NOOR TEXTILES LAHORE · CLIENT GUIDE

ERP Screen-by-Screen User Manual

A visual guide to every main module and child screen in the Urdu RTL textile ERP.

Read the screen arrows

This guide documents **45 main menu screens and 113 child screens/forms**. **1** points to the screen title; **2** points to the matching menu item when available. Below every screenshot, read the purpose, how to use it, related records and the actual visible form fields.

Using a module

The right-side menu is grouped by business area. Select a child item to open its screen. Use global search when available and follow source links to review underlying documents. For transactions, prepare the record, complete required review/approval, then post it. Draft or approved-but-unposted records are not completed stock or financial postings.

Availability

142 screens are available in this demo. 16 screens are marked under construction and are included only to explain the planned workflow; they do not record transactions.

Module index

Business area	Screens	Child	Status	Starts p.
Central workspace	2	0	1 ready · 1 planned	8
Purchasing & fabric	38	24	38 ready · 0 planned	10
Processing	30	24	30 ready · 0 planned	24
Manufacturing	69	64	69 ready · 0 planned	30
Wholesale	8	1	0 ready · 8 planned	35
Accounts	4	0	0 ready · 4 planned	42
Administration	7	0	4 ready · 3 planned	46

Textile workflow

Supplier & fabric → purchase/order → receipt → grey warehouse → processing → design/BOM → production/cutting → embroidery/QC → suit matching → packaging → finished goods → wholesale.

Dedicated workflow pages explain the forms and handoffs. Wholesale selling, dispatch and invoices are planned, not operational.

Demonstration limits

Frontend-only and single-company: records are local to a browser, payments do not transfer money and demo roles are not authentication. Reports are not production accounting. Export a backup before replacing/resetting data. Screens use an isolated session; existing user data was not changed. The UI is Urdu RTL; this guide is in English.

One connected journey: supplier to finished goods

Follow source documents in order. Each arrow means the next step uses the previous step’s approved source record.

01 Supplier & fabric

02 Request (optional)

03 Purchase order

04 Measured GRN

05 Grey warehouse

06 Processing & design

07 Production & QC

08 Matching

09 Packaging

10 Finished stock

11 Wholesale · planned

01 1 · Set up

Create/select the supplier and fabric master. These identify who sells the cloth and what material is being purchased; neither creates stock.

02 2 · Request & order

An internal purchase request is optional. Create a purchase order (PO) with supplier, fabric lines, units, quantities, rates, delivery date and terms. Submit/approve it before receiving.

03 3 · Receive & inspect

At delivery, create a goods receipt (GRN) against the approved PO. Enter actual roll measurements and inspection results. Post accepted quantities to create traceable lots and rolls.

04 4 · Record supplier finance

Create a supplier bill from posted GRNs, then allocate a supplier payment to posted bills. Physical receiving and supplier liability are separate postings.

05 5 · Store & process

Put accepted fabric away into a storage bin. Reserve/issue eligible quantities to an approved processing or production job; record actual service return, inspection and cost.

06 6 · Manufacture & sell

Approved design/BOM → production work order → cutting/components → embroidery/QC → matching → packaging → finished-goods lot. Wholesale order, dispatch, invoice and customer receipt are planned screens, not operational sales transactions yet.

Purchase forms: prepare supplier, request and PO

The purchase-order form is the central buying commitment. Complete its header and each fabric line before approval.

01 Supplier master

Use the supplier form for the supplier’s code/name, contact details, city, payment terms, opening payable and credit limit where those fields are shown. Confirm the supplier is active before selecting it.

02 Fabric master

Use the fabric form for a stable code/name, composition, category, width, GSM/grade and purchasing defaults. Check that the unit and fabric specification match the material being ordered.

03 Purchase request (optional)

Fill request date, requester, department, fabric, requested quantity/unit, needed date, reason and priority. Submit for review. An approved request can be converted to a linked order; it does not add inventory.

04 Purchase order header

Select supplier, order date, expected receipt date, receiving grey warehouse and payment-term days. Add notes only when they explain the commitment.

05 Purchase order lines

For each fabric line select the fabric; enter ordered quantity and unit, per-meter rate and explicit line discount. For roll/thaan packaging, enter the individual expected measurements when requested. Arithmetic example only: 1,000 m × PKR 250/m = PKR 250,000 before discount. Use the supplier’s agreed quantity and rate, not this example.

06 Approve the order

Save the draft, inspect supplier and quantities, then submit/approve using the available actions. An approved quantity or rate is not casually edited; create a separate order for a changed commitment. A PO alone is neither stock nor a bill.

Receiving and supplier settlement forms

Record what physically arrived first; use the supplier invoice and payment forms only for their separate financial events.

01 Goods receipt (GRN)

Select the approved purchase order, receipt date, receiving warehouse, receiver and supplier challan reference. Add the delivered rolls against PO lines: roll number, actual measurement, measurement/packing unit, width, grade and inspection decision. Record transport reference or notes if relevant.

02 Check before posting

Compare each actual roll measurement with the delivery and remaining PO allowance. Keep rejected/quarantined goods as inspection evidence; they must not be counted as accepted owned stock. Post the GRN only after review. Accepted posted measurements create the traceable lot/roll stock.

03 Supplier bill

Select the supplier and eligible posted GRNs. Fill the supplier invoice reference, bill date, payment due date, explicit discount and additional charges. Confirm the receipt sources and amount; tax is explicitly zero in this demo. Post once to recognize the supplier payable.

04 Supplier payment

Select the supplier, enter payment date, positive amount, cash/bank/cheque method, reference and notes. Allocate only to posted bills for that supplier and within the outstanding balance. Post the payment. Any eligible excess is an unapplied advance; no money is transmitted by this demo.

05 Purchase return (when needed)

Select eligible available stock, enter the return quantity/reason and link the source evidence. Complete approval and posting. A return reduces owned stock; only an eligible return linked to billed goods creates a supplier credit.

From warehouse fabric to a production job

Trace the material identity and measurement through every handoff. A reservation is not a physical movement.

01 Putaway & location

Select accepted source roll portions, the receiving/staging location and a compatible destination bin. Posting putaway changes location, not total owned meters.

02 Reserve & issue

Choose the exact eligible lot/roll, source location, quantity, purpose and linked job/order. Reservations protect availability. Post the supported issue to move material into processing/production custody. Never issue more than the available unreserved balance.

03 Processing job form

Choose the contractor, service/process, service rate and basis, issue quantity, expected return/date, color/design specifications and notes requested by the form. Record challan issues and returned quantities separately; partial returns and approved loss require source-linked evidence.

04 Design & BOM

Create a collection and design, select suit type/season and colors, then prepare a revisioned BOM. Enter each component fabric, source/specification, per-suit requirement, waste allowance and rate. Submit the sample/BOM for required approval before production planning.

05 Production plan & work order

Select the approved design, collection, variant/color and approved BOM revision; enter target suits, plan dates, priority and responsible planner. Approve the plan and create/approve its work order. Reserve then issue materials against the work order.

From production to packaged finished stock

Meters become individually counted components and suits only through the explicit manufacturing records.

01 Cutting & embroidery

For a cutting result, select the source work order/material issue, enter input and consumed meters, output component count and component unit. Issue specific lots to embroidery when required; record partial physical returns, inspection results and only explicitly approved loss.

02 Production quality

Select the source component lot and record inspected, accepted, held, rejected and rework quantities so the totals reconcile. Record corrections and reinspect through the supported QC/rework actions.

03 Matching & assembly

Create a plan from the production work order and target sets. Reserve compatible accepted component lots, then record the actual matched set count. Missing pieces remain incomplete WIP; do not claim a complete suit from partial pieces. Complete final inspection and rework as needed.

04 Packaging materials

Maintain packaging-material masters, record counted receipts and allocate actual required quantities to the packaging order. Verify available material before completion; packaging inputs are counted units, not fabric meters.

05 Packaging order & finished lot

Select the matched batch, compatible sellable SKU/product identity and approved set quantity. Enter packaging method/team/dates and actual labor/overhead; confirm the recipe and allocated materials. Complete/post the accepted quantity to create the finished-goods receipt/lot.

06 Stock identity

Review the stable SKU/barcode, actual packaging batch, carton membership, finished lot, location, reservations and quality status. Cartons are containers for already packaged suits, not additional inventory.

Selling handoff: what happens next, and what is not live

Finished stock is real in the current demo; the wholesale transaction chain is not yet implemented.

01 Current final operational step

Finished-goods inventory can show packaged lots, SKU/barcode, locations, availability, quality holds and movements. Confirm the required quantity is available and not damaged, held or already reserved.

02 Planned customer & pricing setup

The customer, wholesale price-list and quotation destinations are roadmap placeholders. In a future sales form the user would choose customer, ship/bill details, items/SKU, unit price, discount, terms and expiry, then issue a quotation. No live quotation is recorded today.

03 Planned sales order

A future order should reference an accepted quotation/customer, requested finished SKUs and quantities, agreed prices, delivery date and credit checks. The intended workflow would reserve eligible finished lots against that order. The current sales route is under construction: it creates no order or reservation.

04 Planned dispatch & invoice

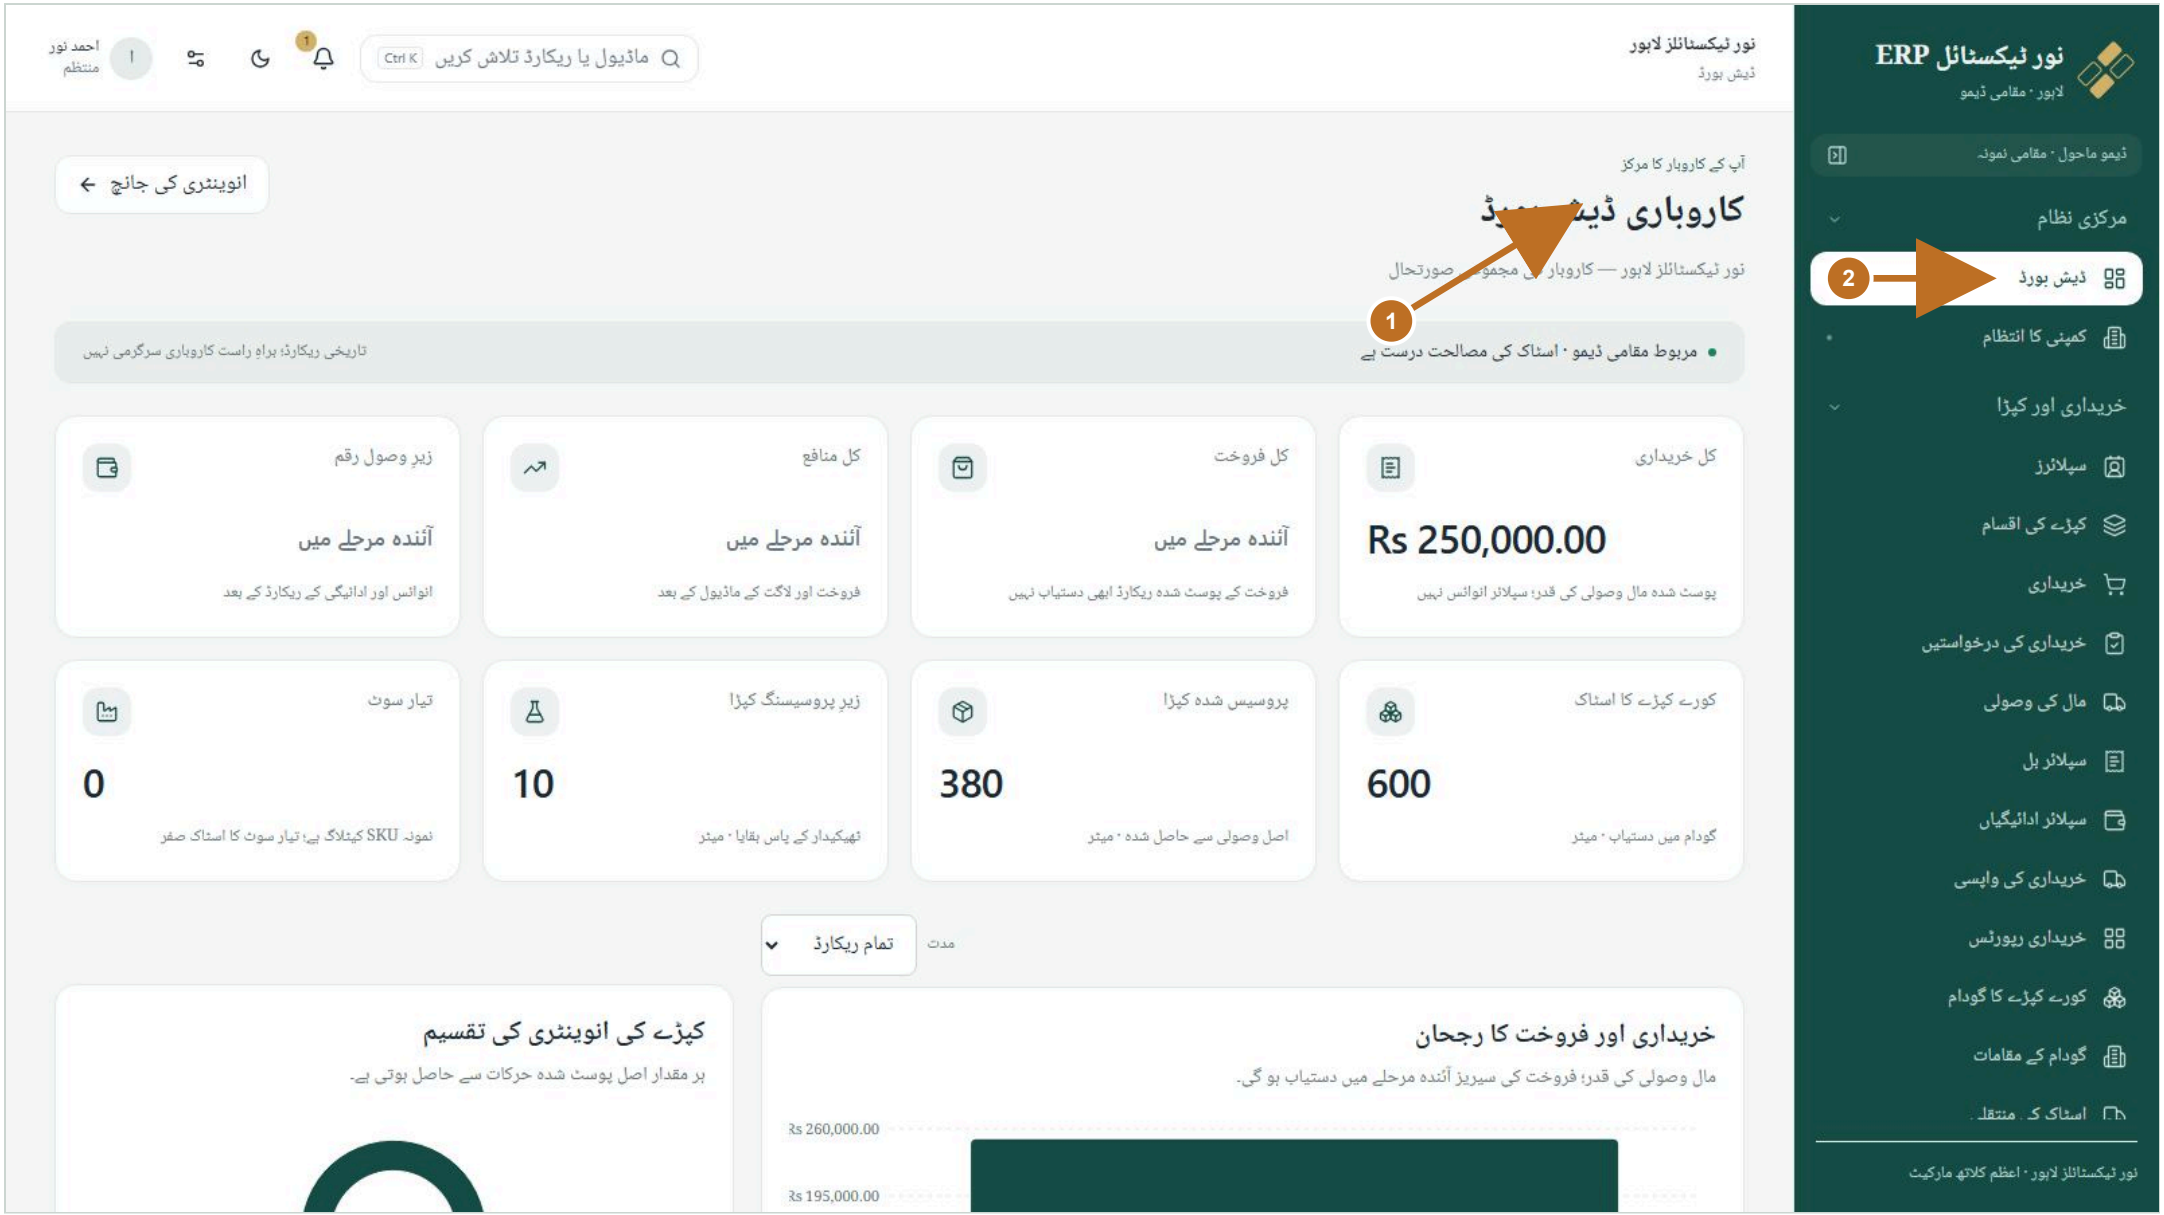

A future dispatch form should select the order, reserved source lots, picked quantity, delivery/carrier details and handover evidence. Invoicing should use the source order/dispatch and approved price/charges. Current dispatch and invoice pages are placeholders and move no stock or create no receivable.

05 Planned customer receipt & returns

A future receipt form should identify the customer, date, amount/method/reference and invoice allocations; a future return should cite the original dispatch/invoice and inspection disposition. Current customer-payment and return routes do not post these transactions.

06 End-to-end truth

The demo currently supports purchasing → warehouse → processing/design/production → packaging → finished inventory. It stops before operational wholesale selling. Do not represent the planned sales screens as a completed purchase-to-cash system.

1 Screen purpose
A company overview of current stock, activity, alerts and available business analytics.

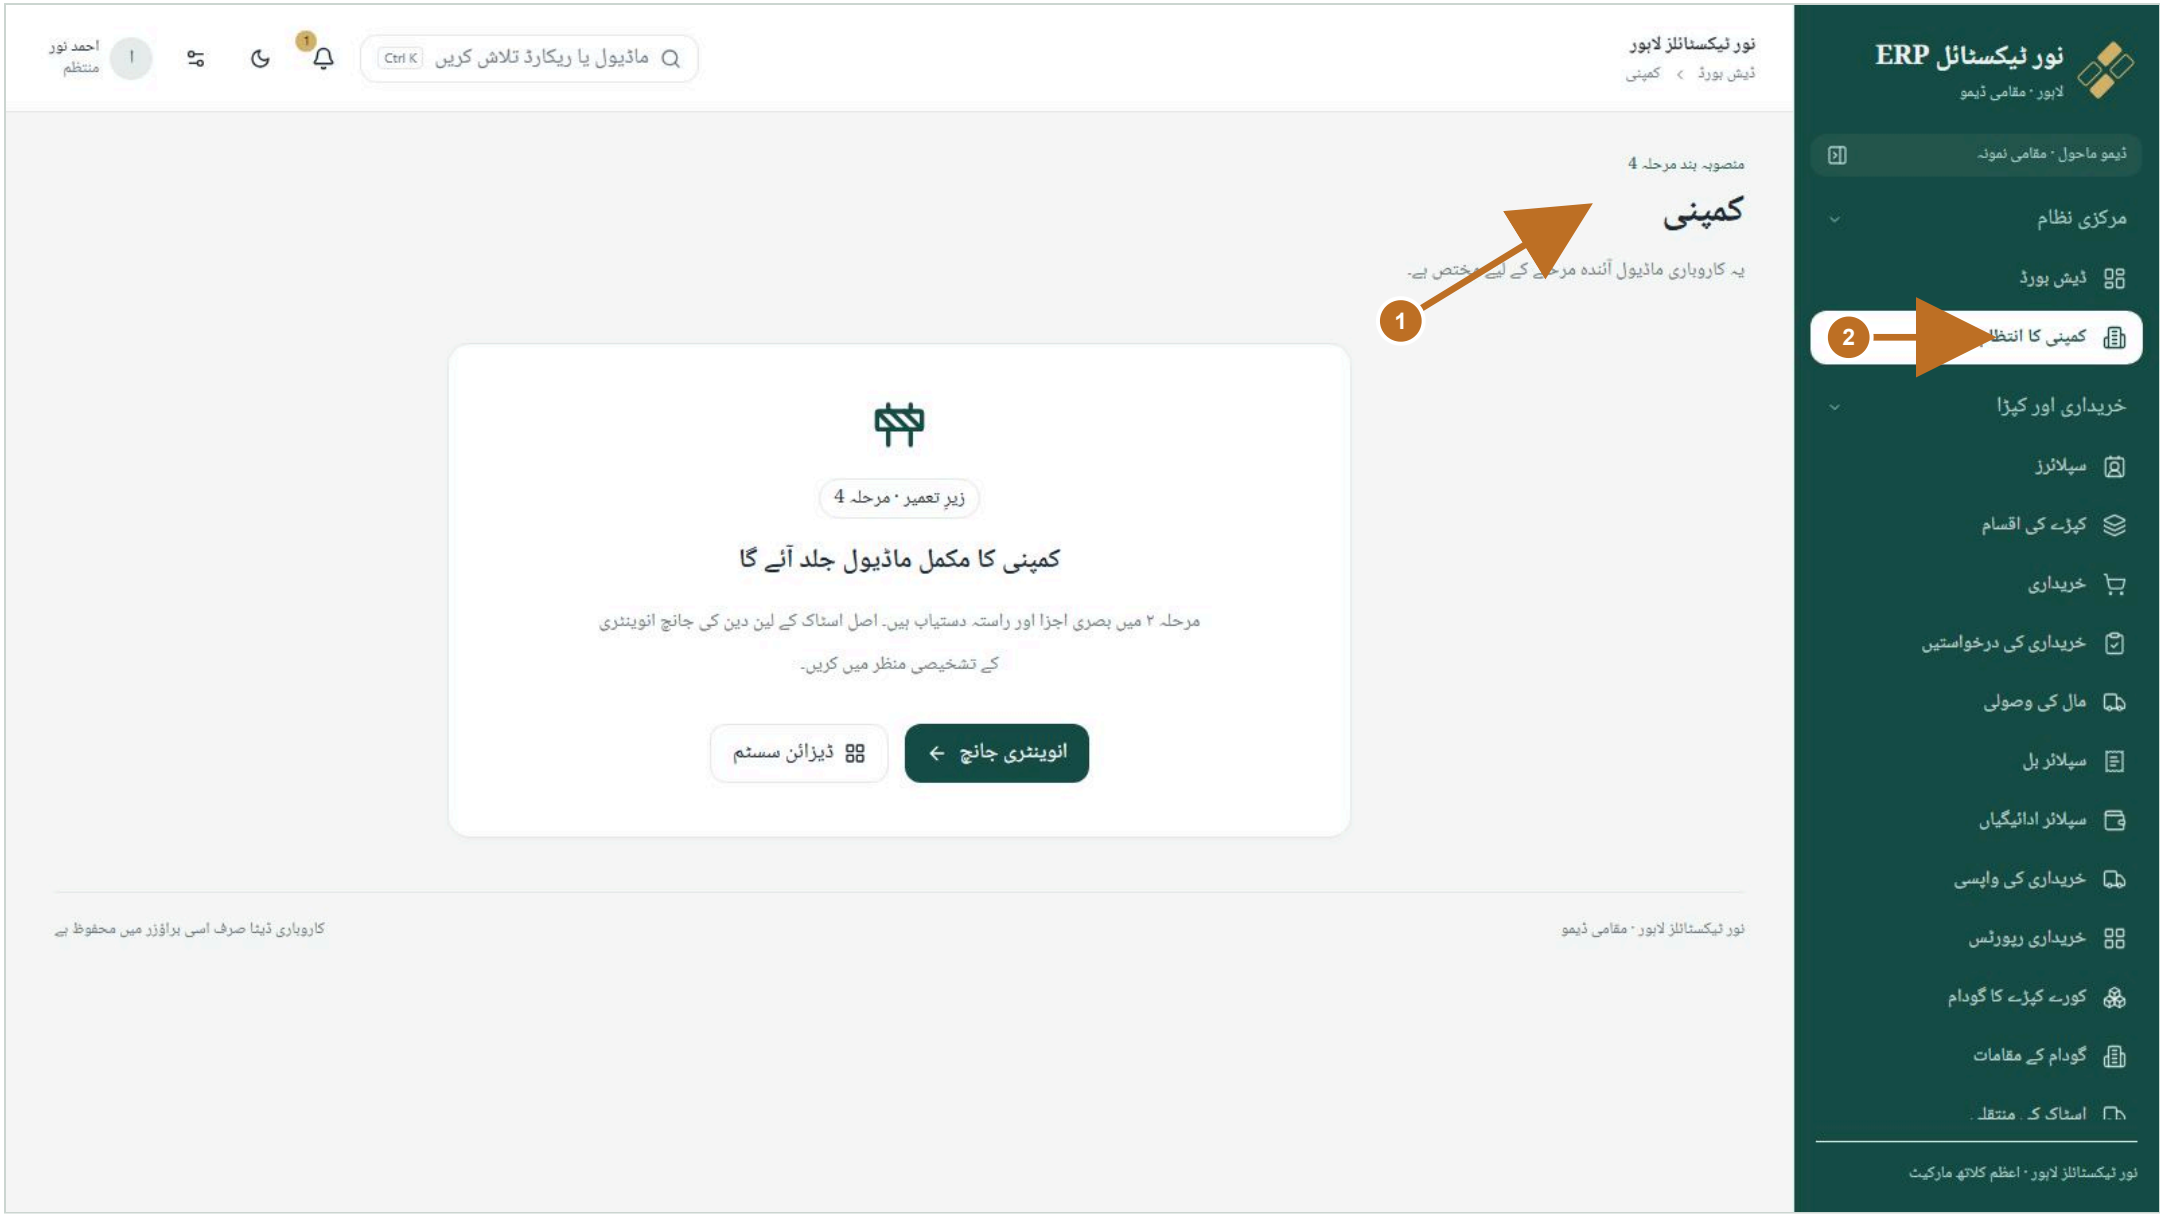

2 Navigation & use
Start here to review the overall picture. Open a relevant card, alert or source record to investigate the underlying activity.

Business connection
Figures are projections of the records in this browser's demo dataset; they are not a separate accounting ledger.

Form / next step
No direct form on this screen. Use its linked child form or open a source record to continue.

02 Company profile کمپنی کا انتظام

Central workspace **PLANNED — NOT OPERATIONAL**

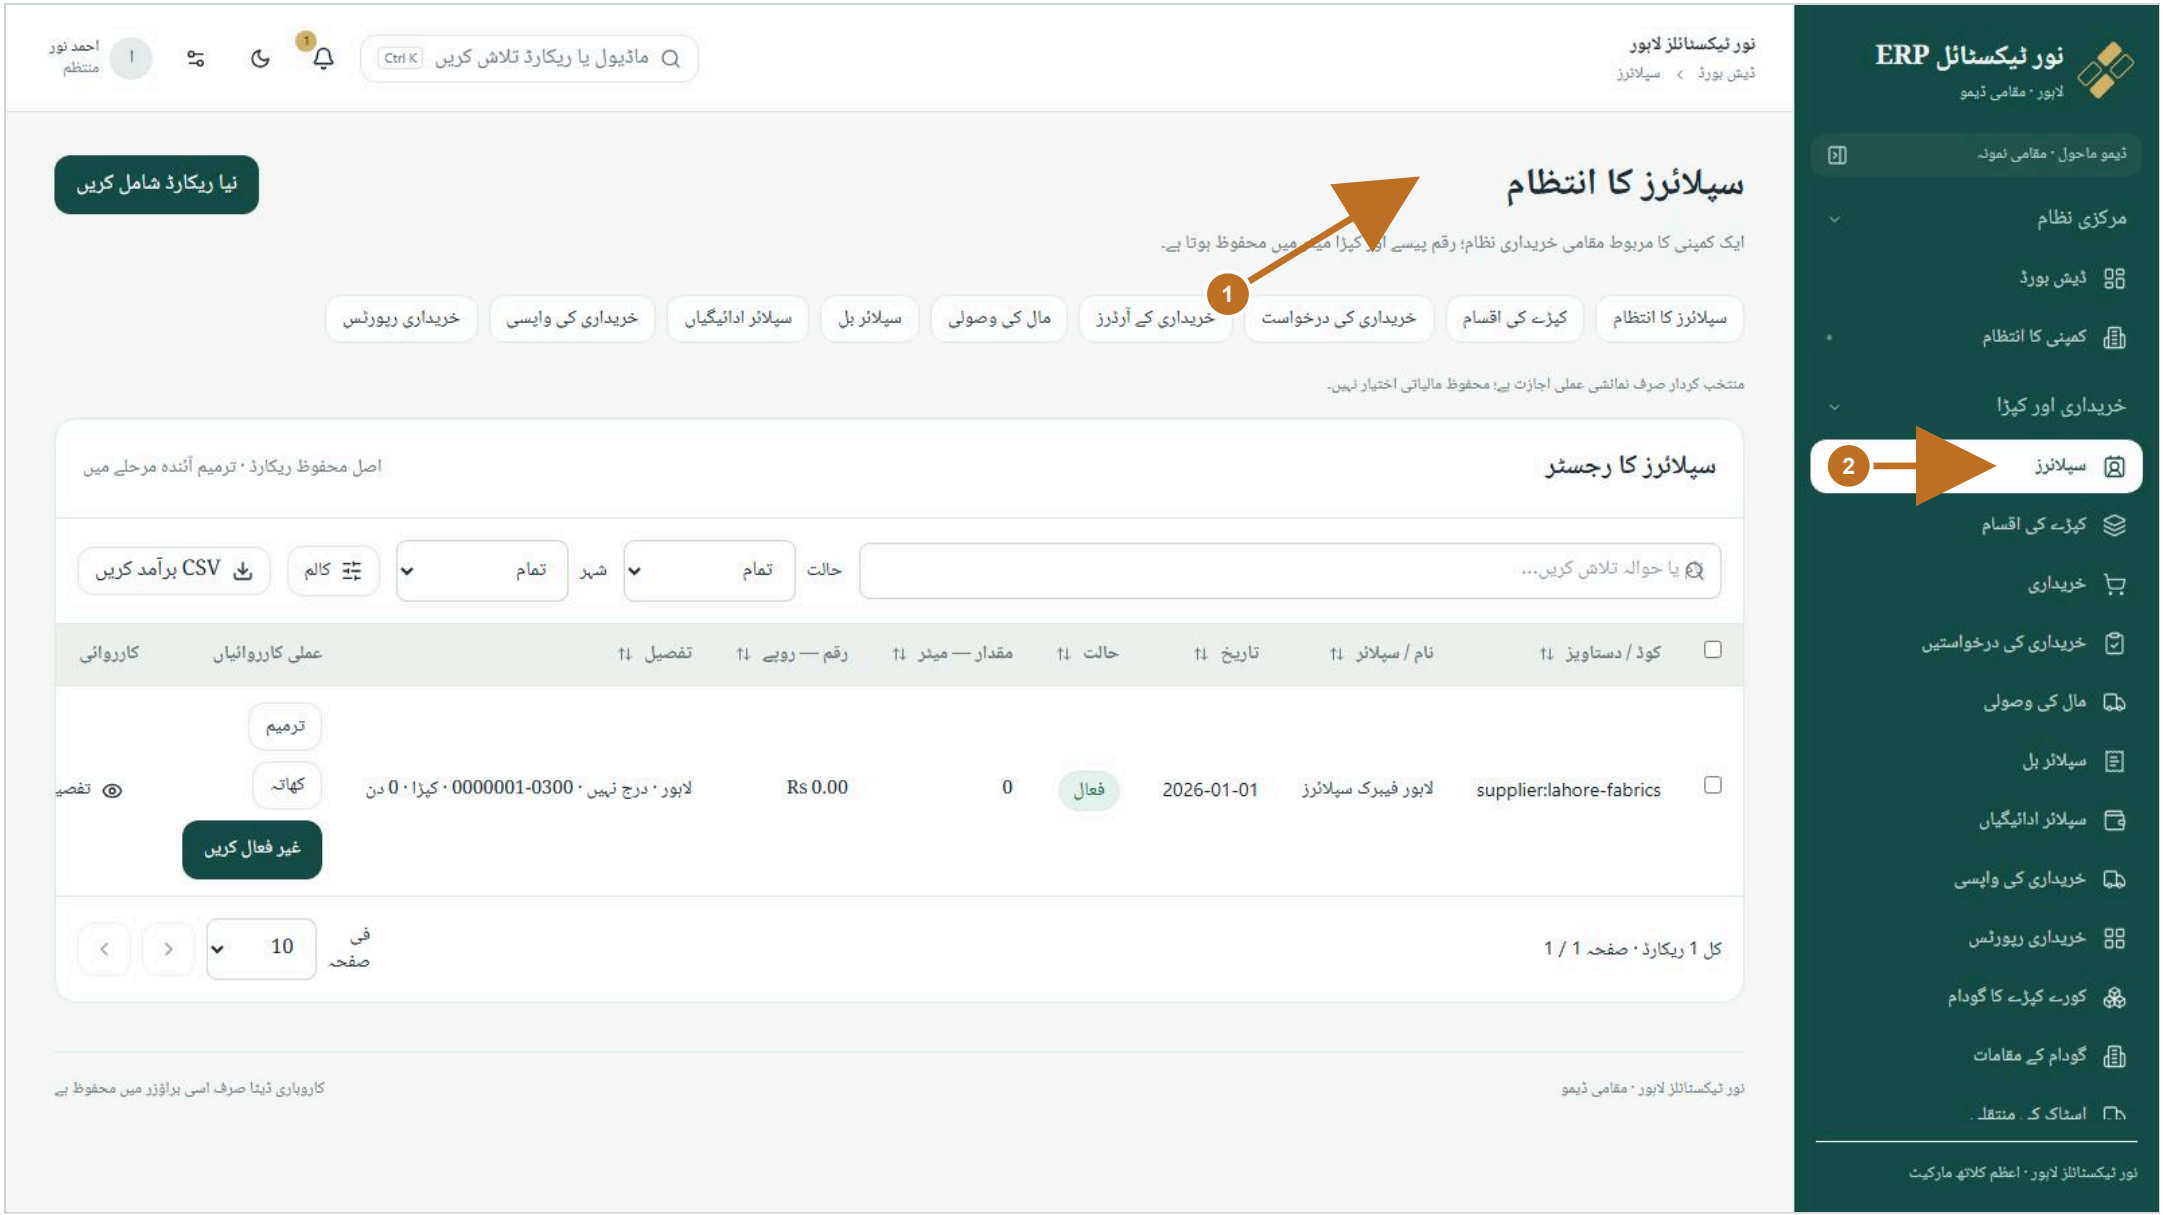

1 Screen purpose
The planned home for the company's identity and operating details.

2 Navigation & use
Use it to review or maintain company profile information when this module is implemented.

Business connection
This screen is a roadmap placeholder; company-profile editing is not currently available.

Form / next step
No active data-entry form: this route is a planned placeholder.

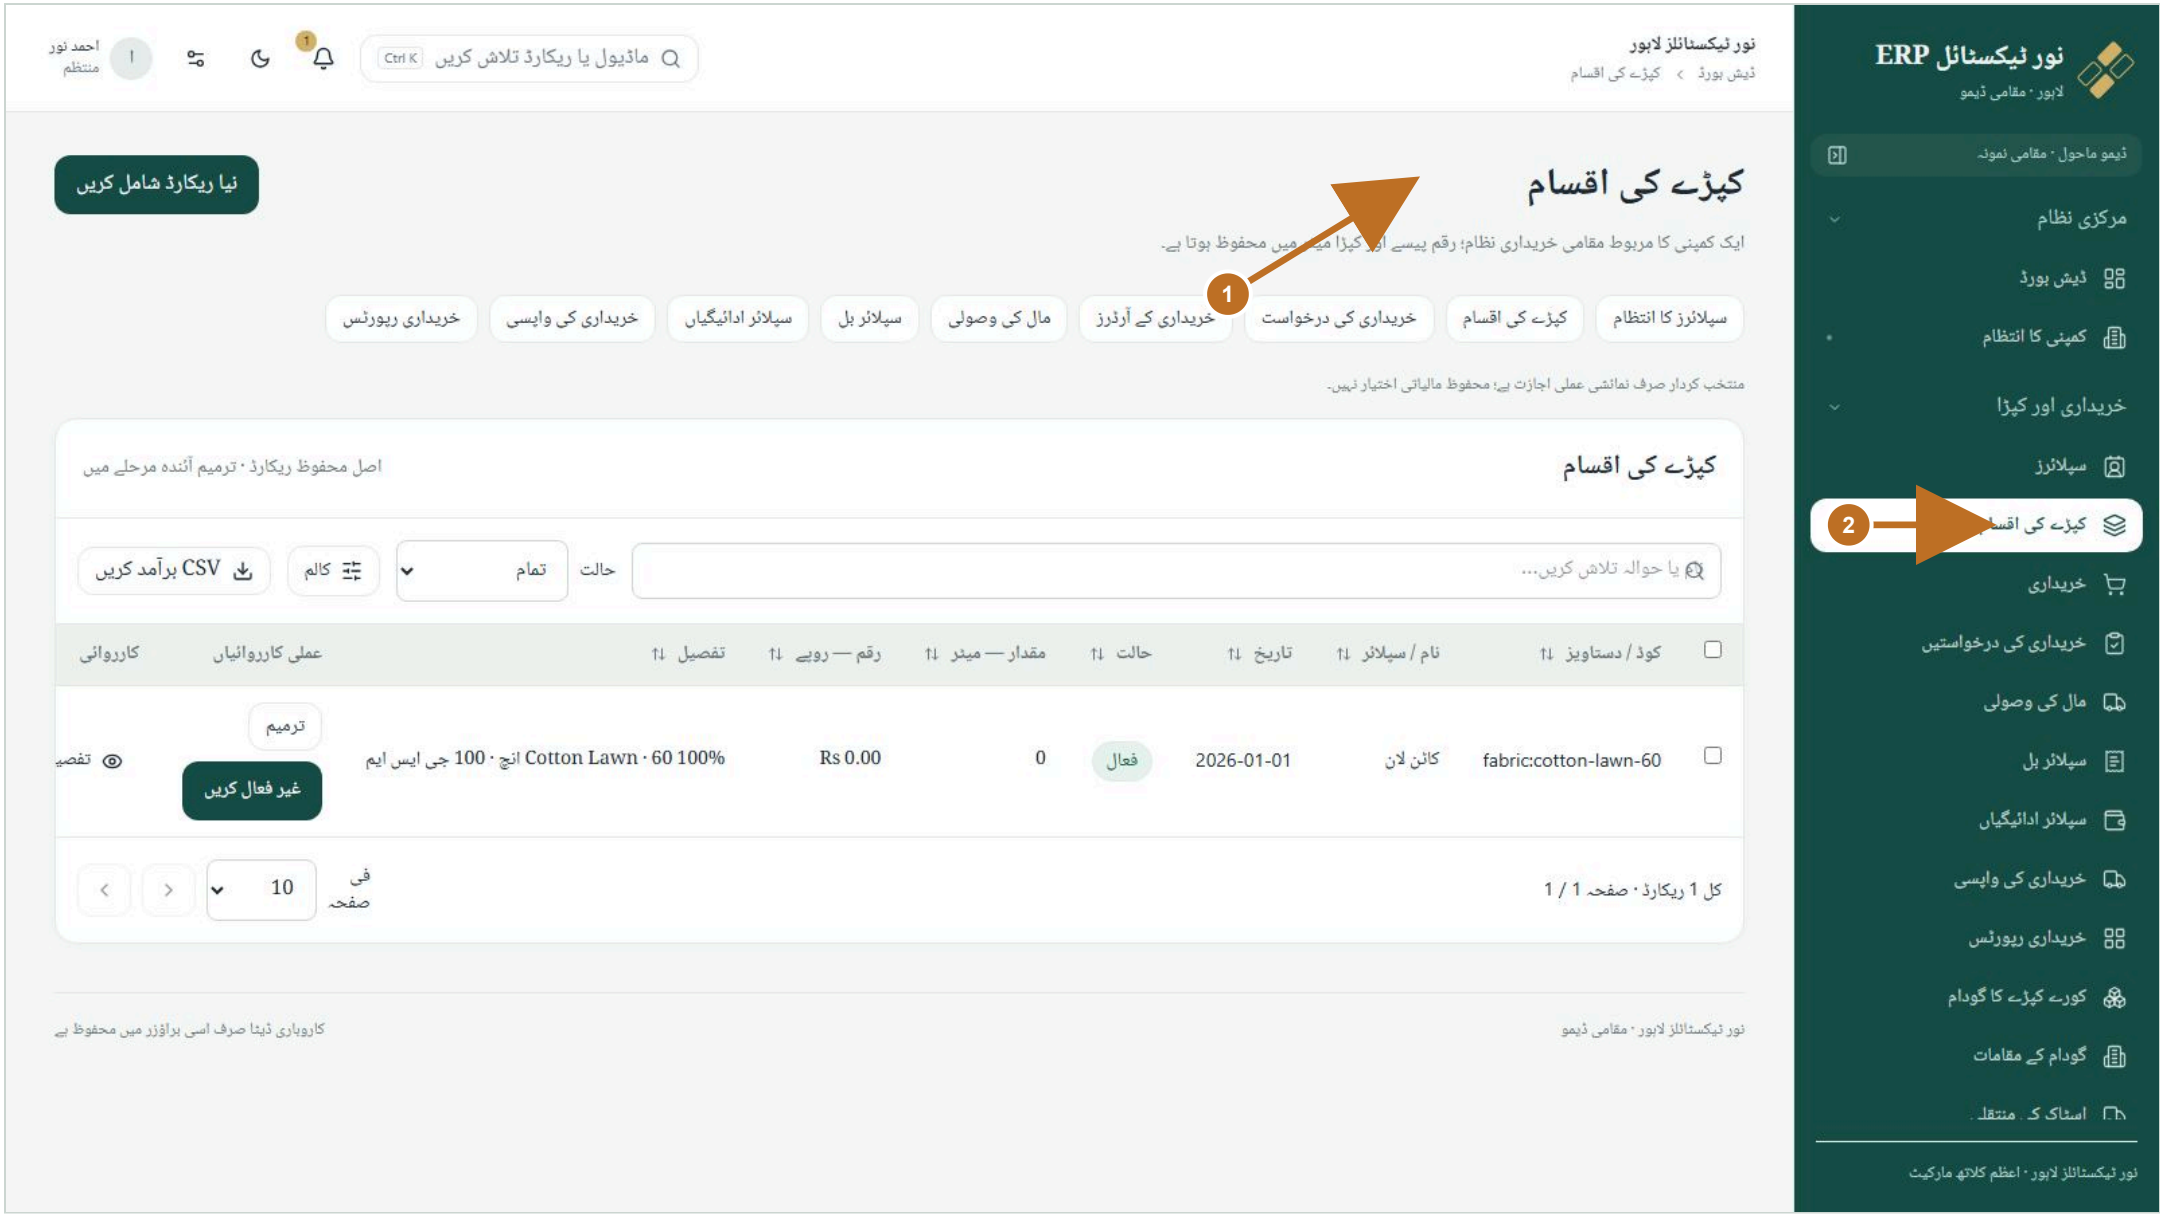

1 Screen purpose
A directory of fabric vendors and their business terms.

2 Navigation & use
Maintain supplier contact and status details, then use a supplier on purchase orders and review the supplier ledger.

Business connection
Creating or editing a supplier master does not receive stock or post a bill.

Form / next step
No direct form on this screen. Use its linked child form or open a source record to continue.

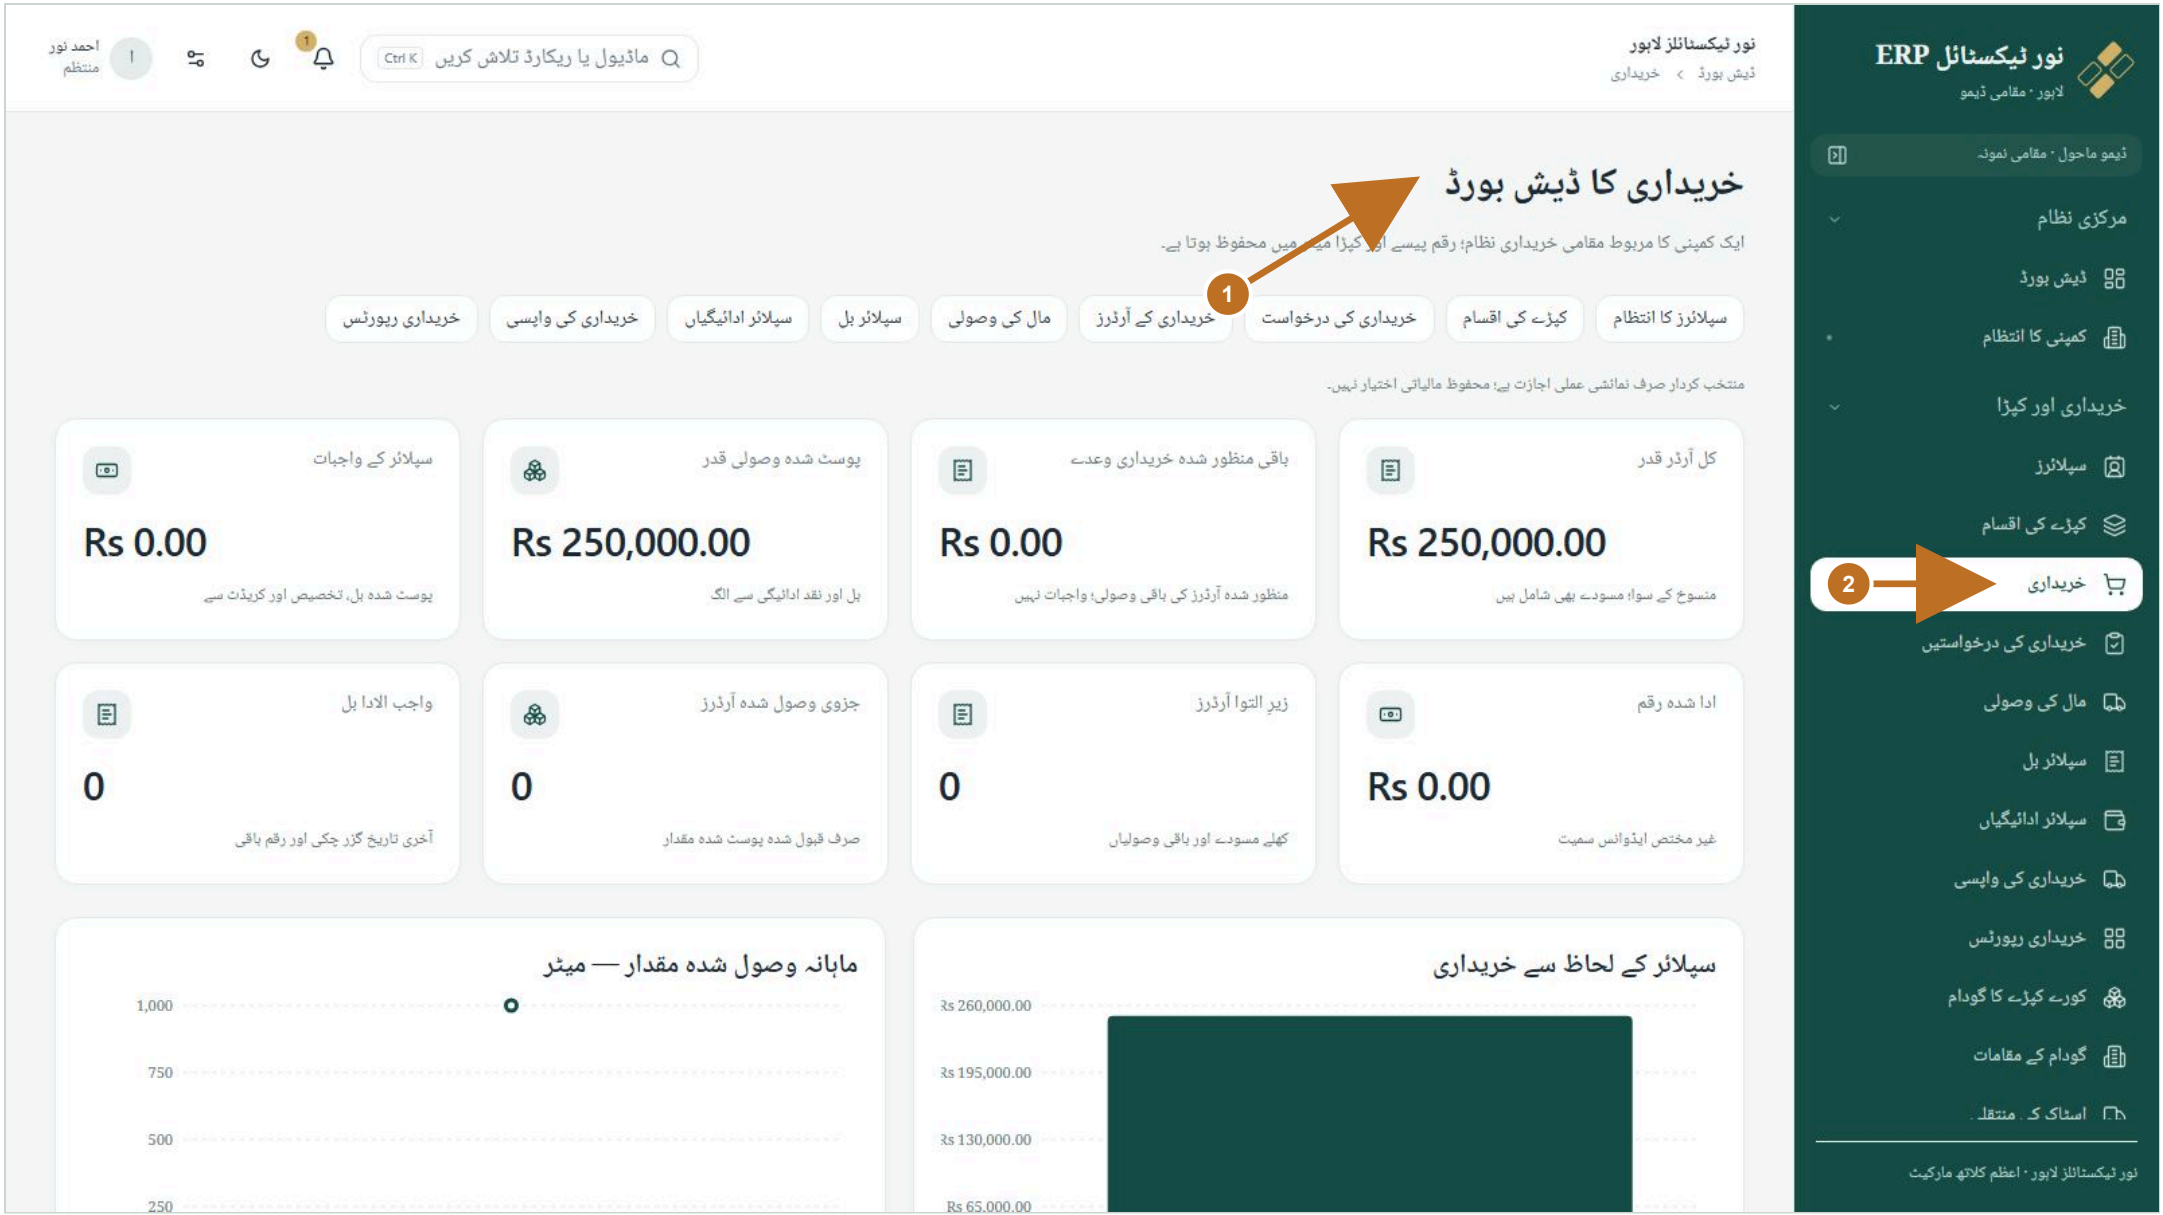

1 Screen purpose
The master catalogue describing the fabrics Noor Textiles buys and uses.

2 Navigation & use
Maintain a fabric's identity and specifications before selecting it on a request, order or receipt.

Business connection
A fabric master is not a received lot and does not create inventory.

Form / next step
No direct form on this screen. Use its linked child form or open a source record to continue.

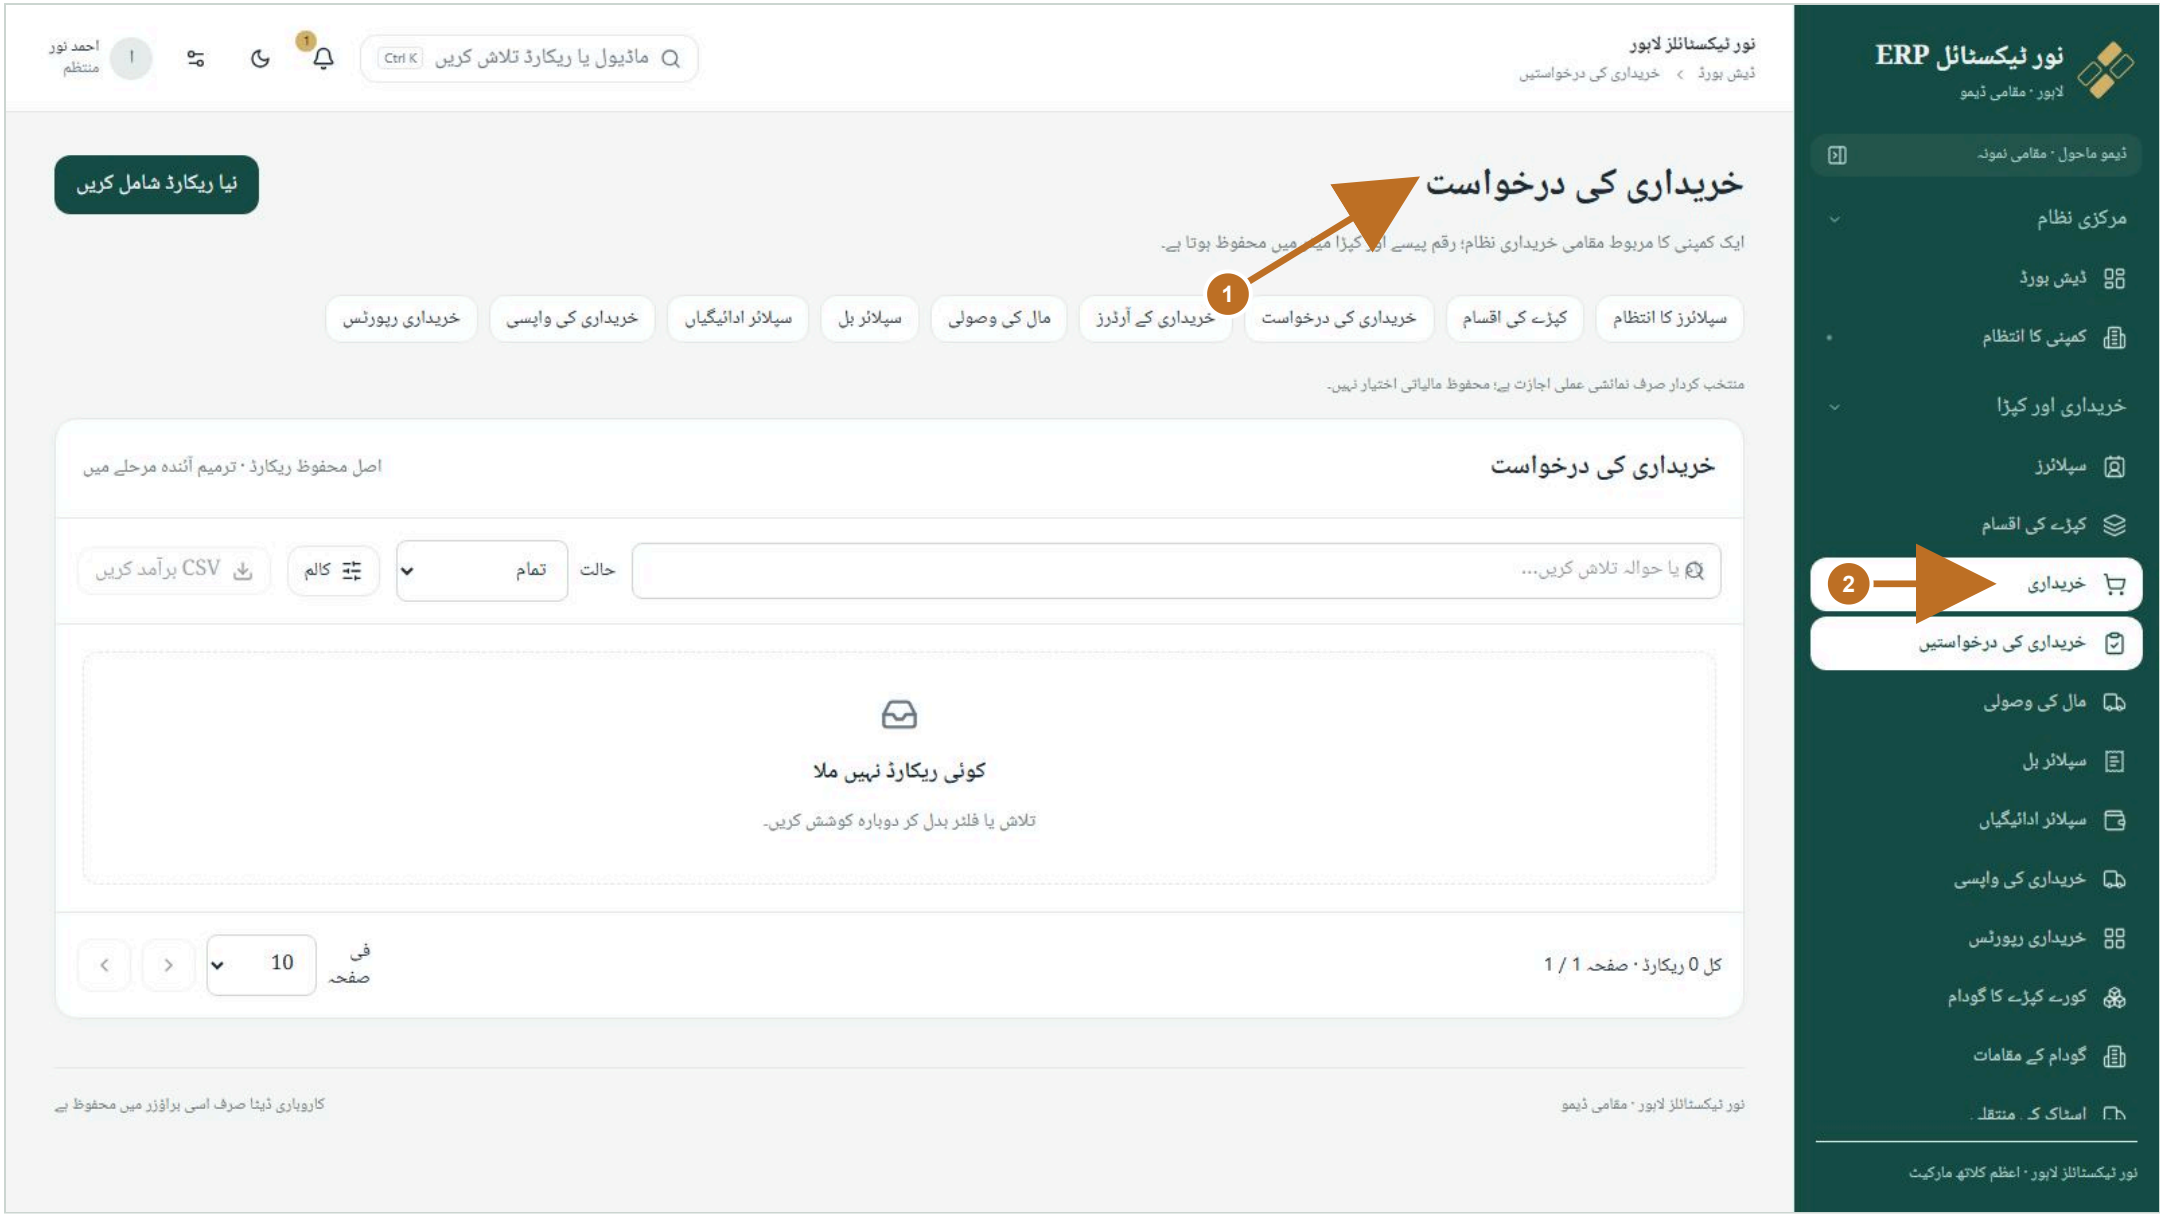

1 Screen purpose
The order register and purchasing overview for supplier commitments.

2 Navigation & use
Create a draft order with supplier, fabric, quantity and rate; review and approve it before receiving goods.

Business connection
An order is a commitment, not stock or a supplier payable. The detailed purchase lifecycle is implemented.

Form / next step
No direct form on this screen. Use its linked child form or open a source record to continue.

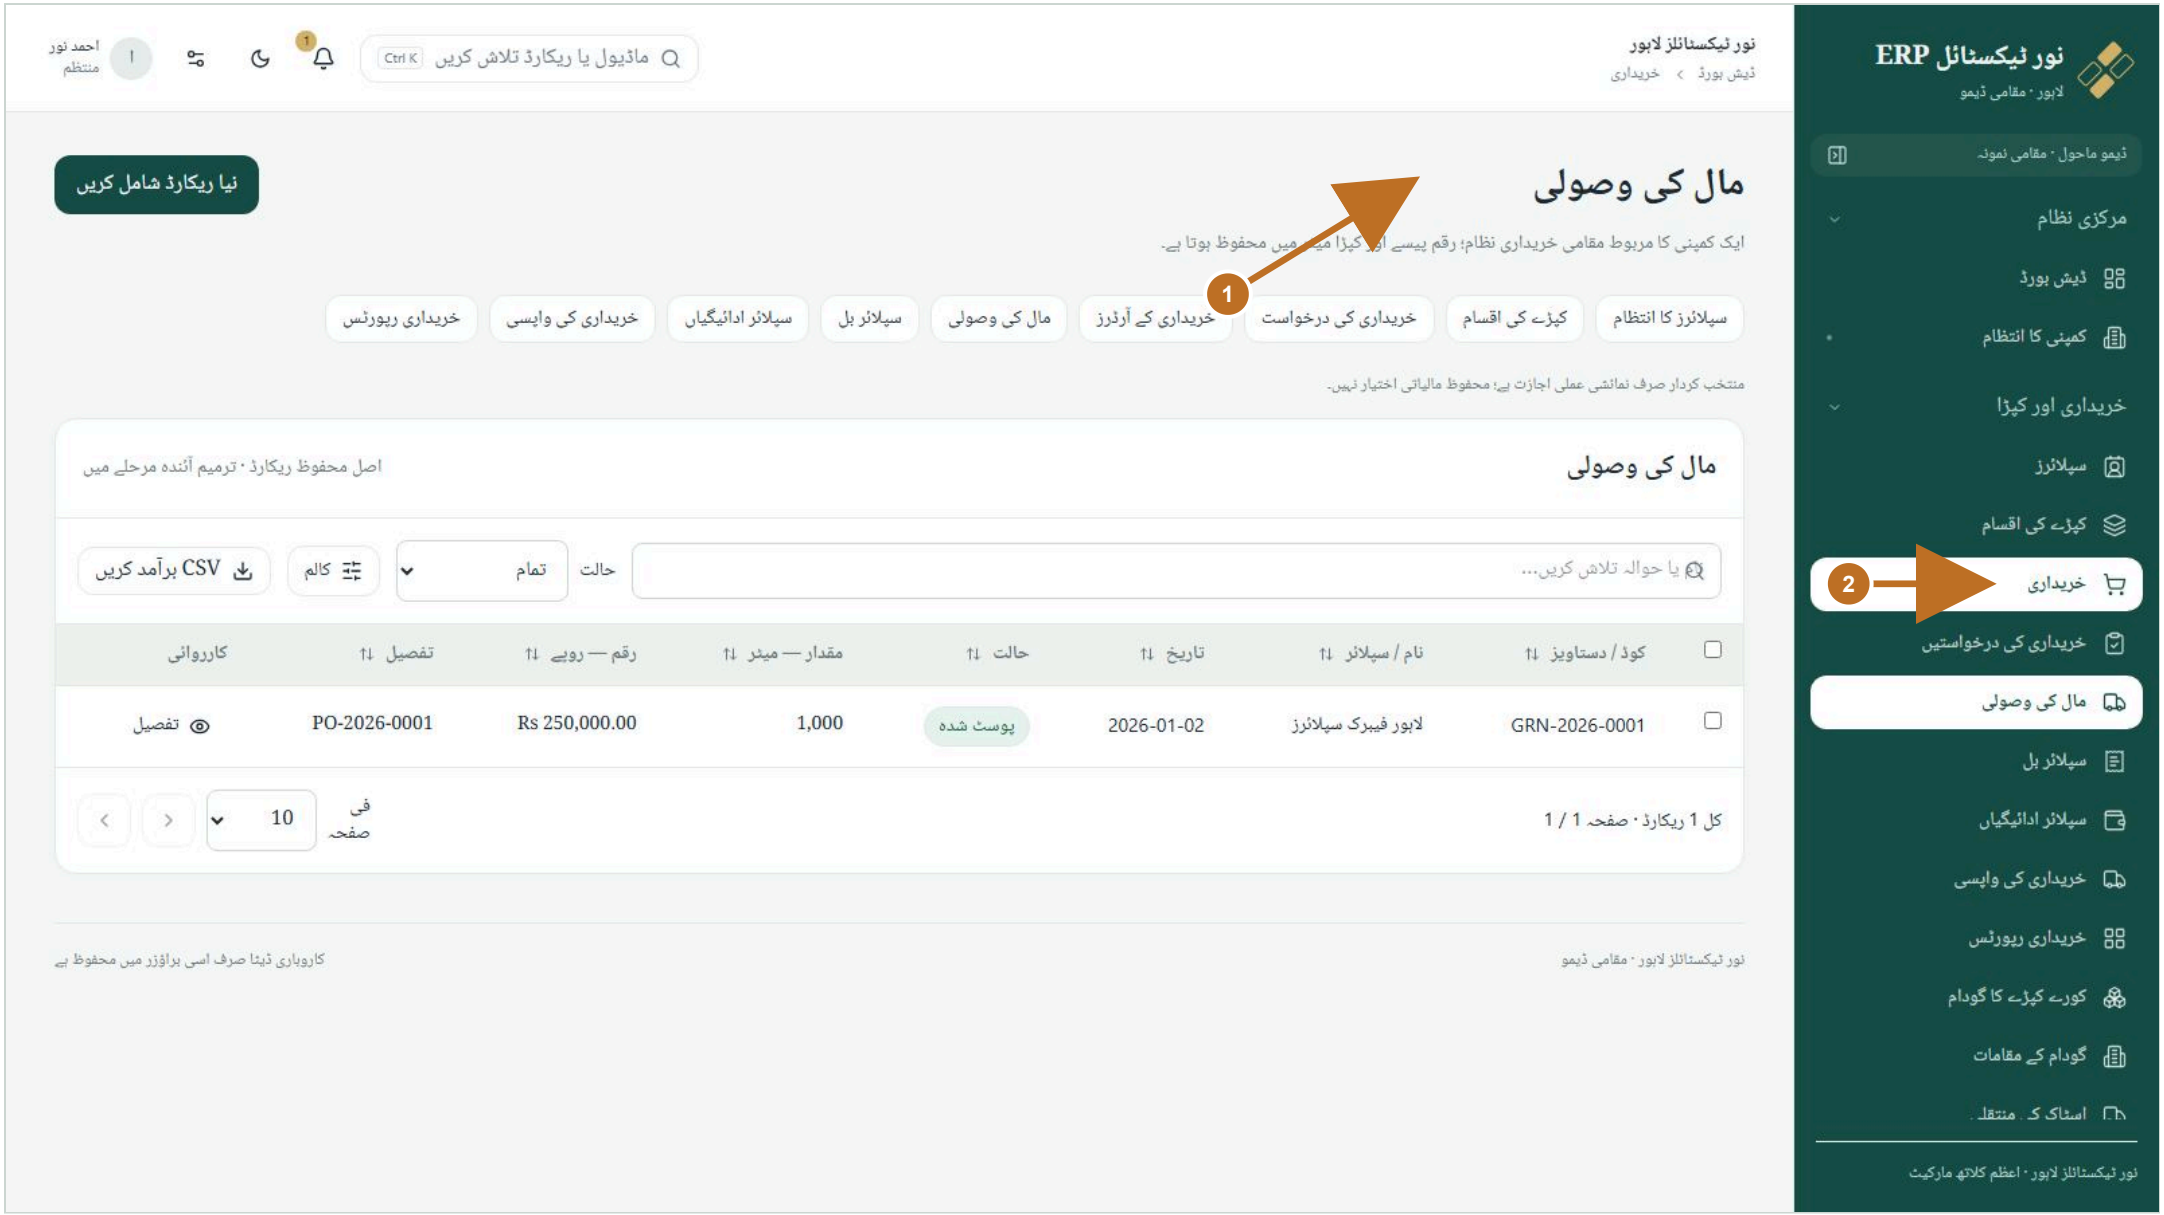

1 Screen purpose
Internal requests that record the need for fabric before an order is made.

2 Navigation & use
Enter the requested material, quantity, need date and reason; submit it for the available review/approval workflow.

Business connection
A request records demand; it does not increase inventory.

Form / next step
No direct form on this screen. Use its linked child form or open a source record to continue.

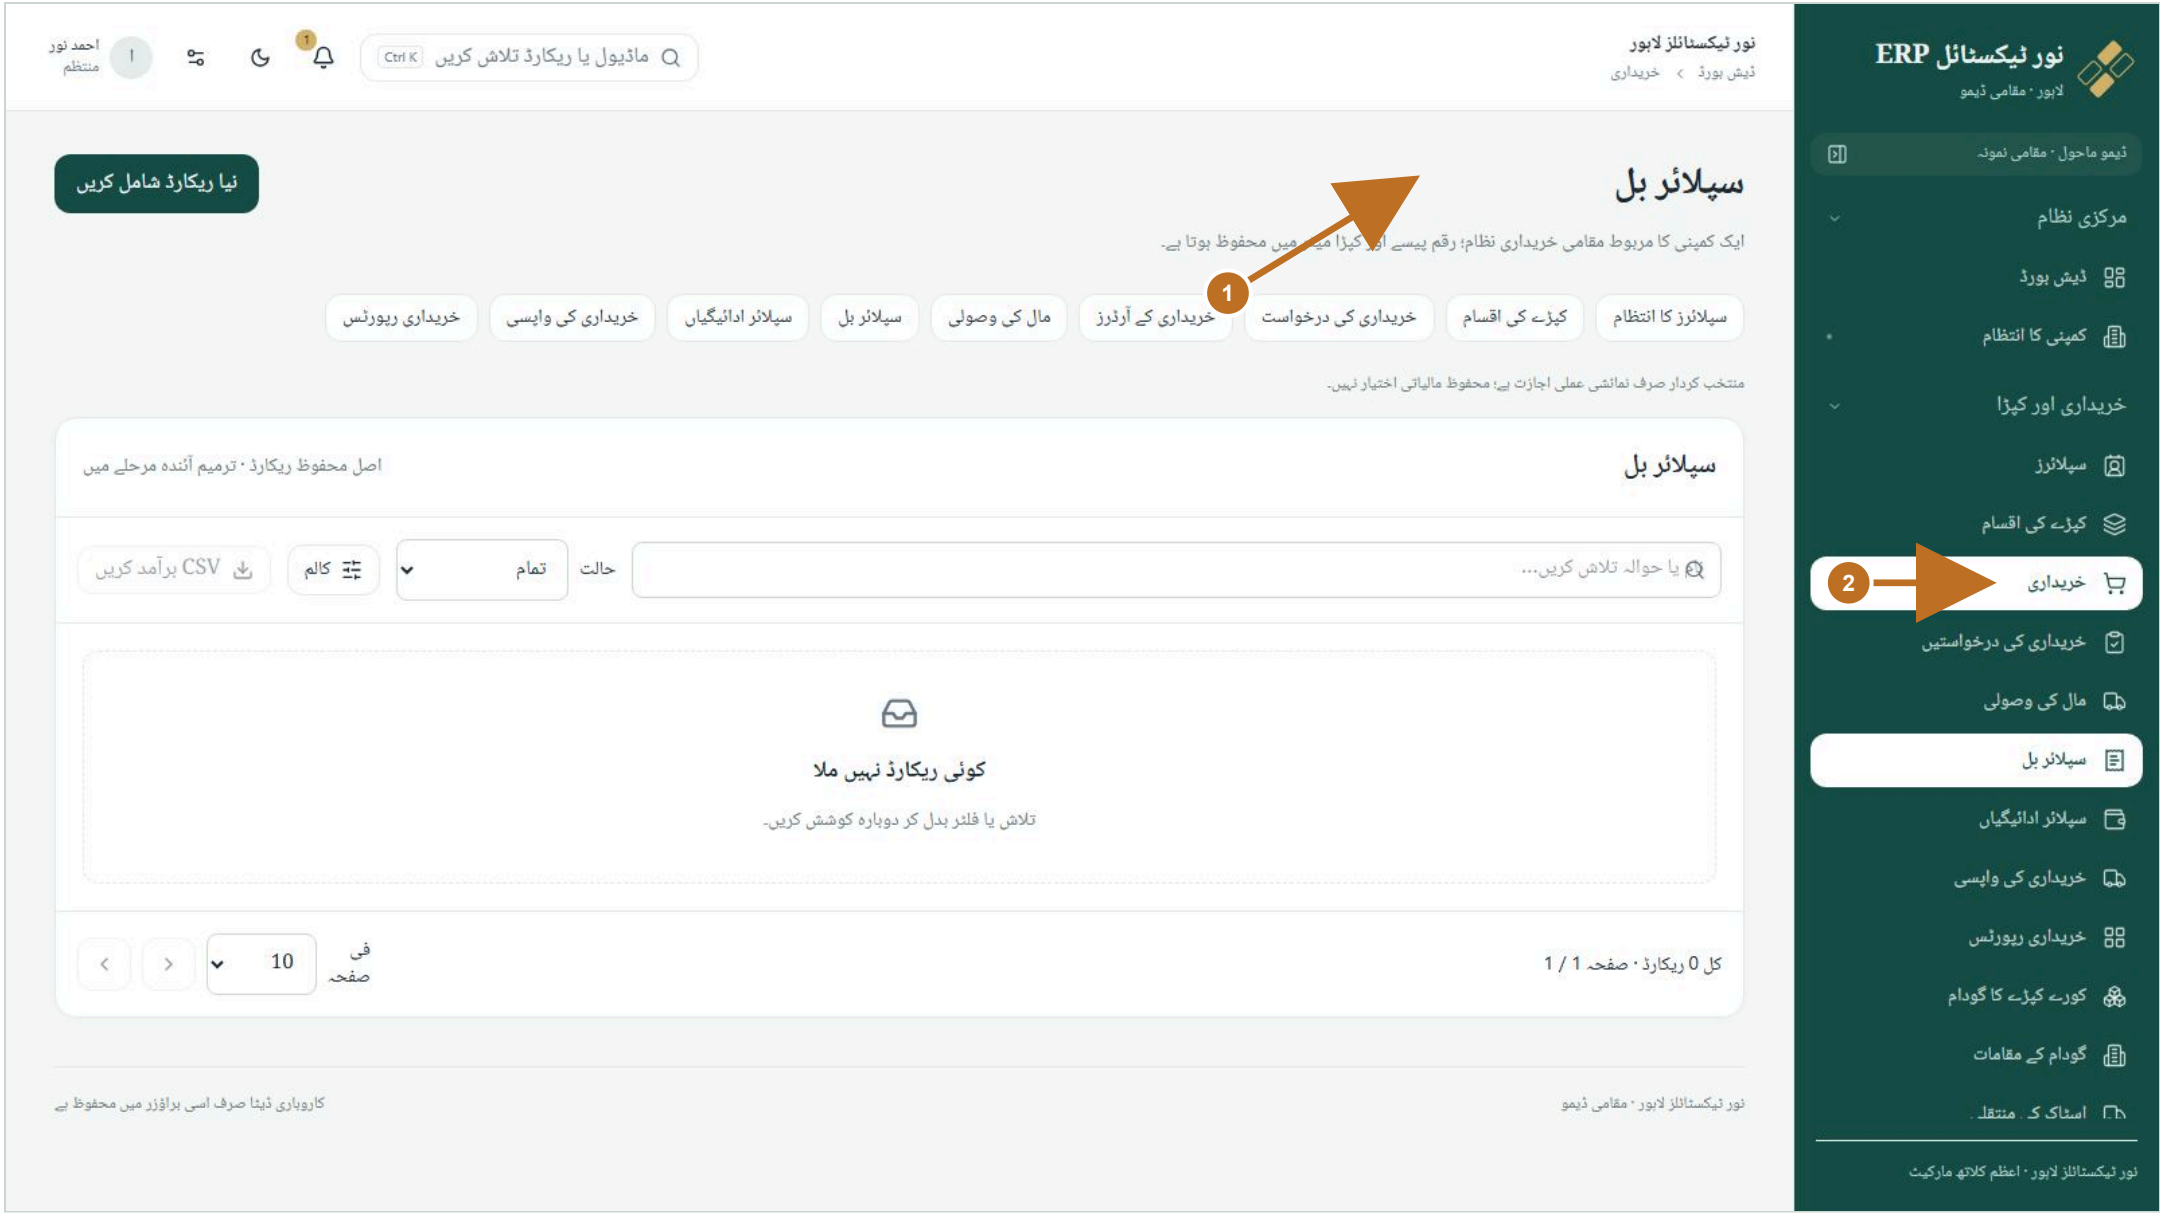

1 Screen purpose
The receiving register for fabric physically delivered against purchase orders.

2 Navigation & use
Record actual rolls and measured quantities, complete receiving checks and post accepted goods.

Business connection
A posted accepted receipt creates lot/roll inventory. Drafts do not change stock.

Form / next step
No direct form on this screen. Use its linked child form or open a source record to continue.

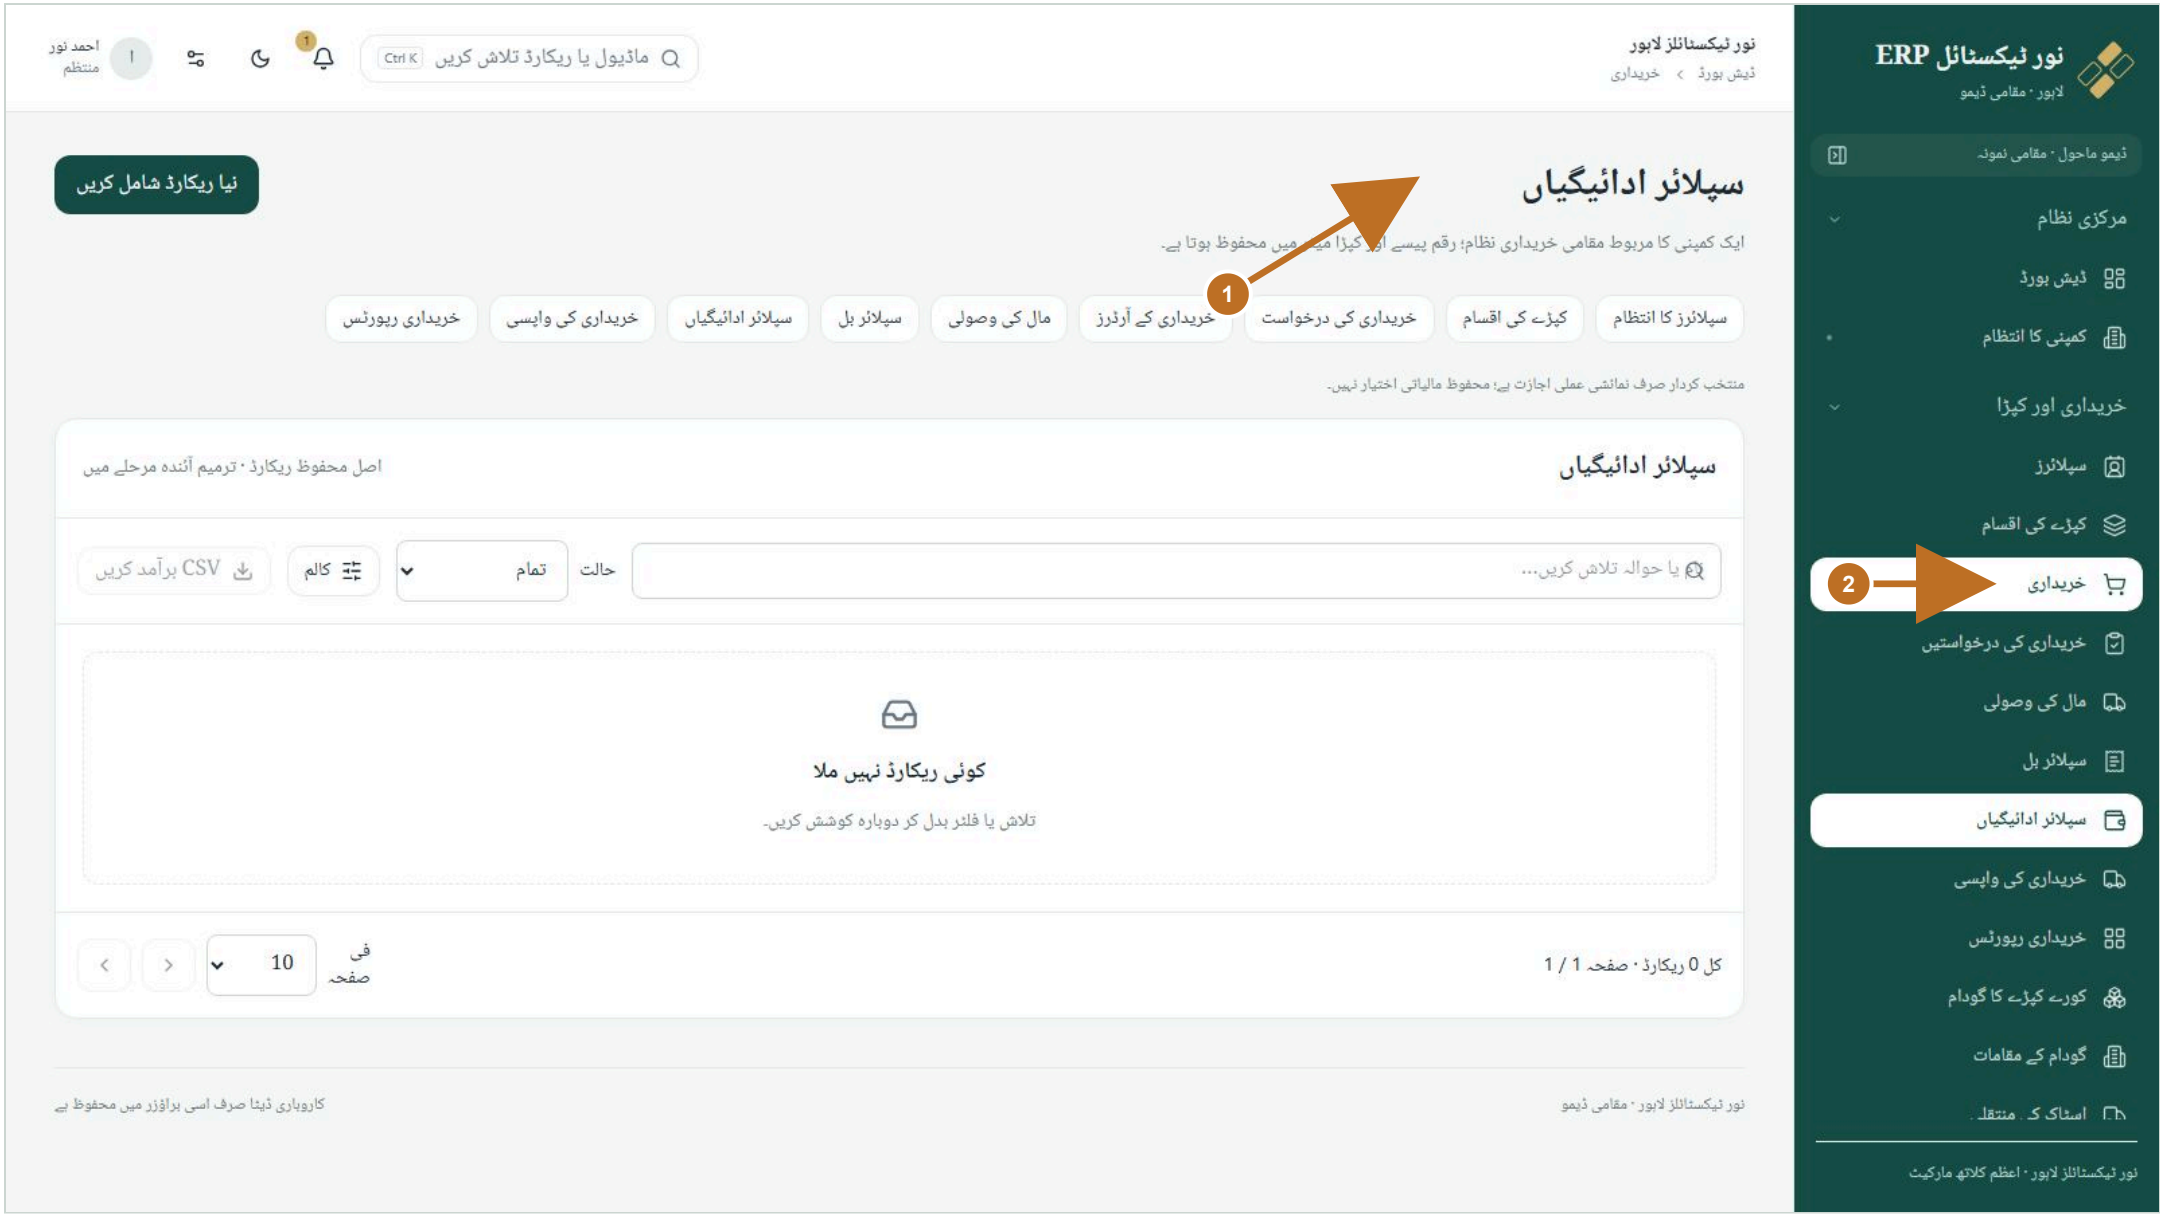

1 Screen purpose
The register of supplier invoices that become posted liabilities.

2 Navigation & use
Select the supporting receipt records, enter the supplier's invoice details and post the bill.

Business connection
A bill is separate from a goods receipt; receipt alone does not post a payable.

Form / next step
No direct form on this screen. Use its linked child form or open a source record to continue.

1 Screen purpose
The register for recording demonstration payments to suppliers.

2 Navigation & use
Create a payment, allocate it to the relevant supplier liability and post it.

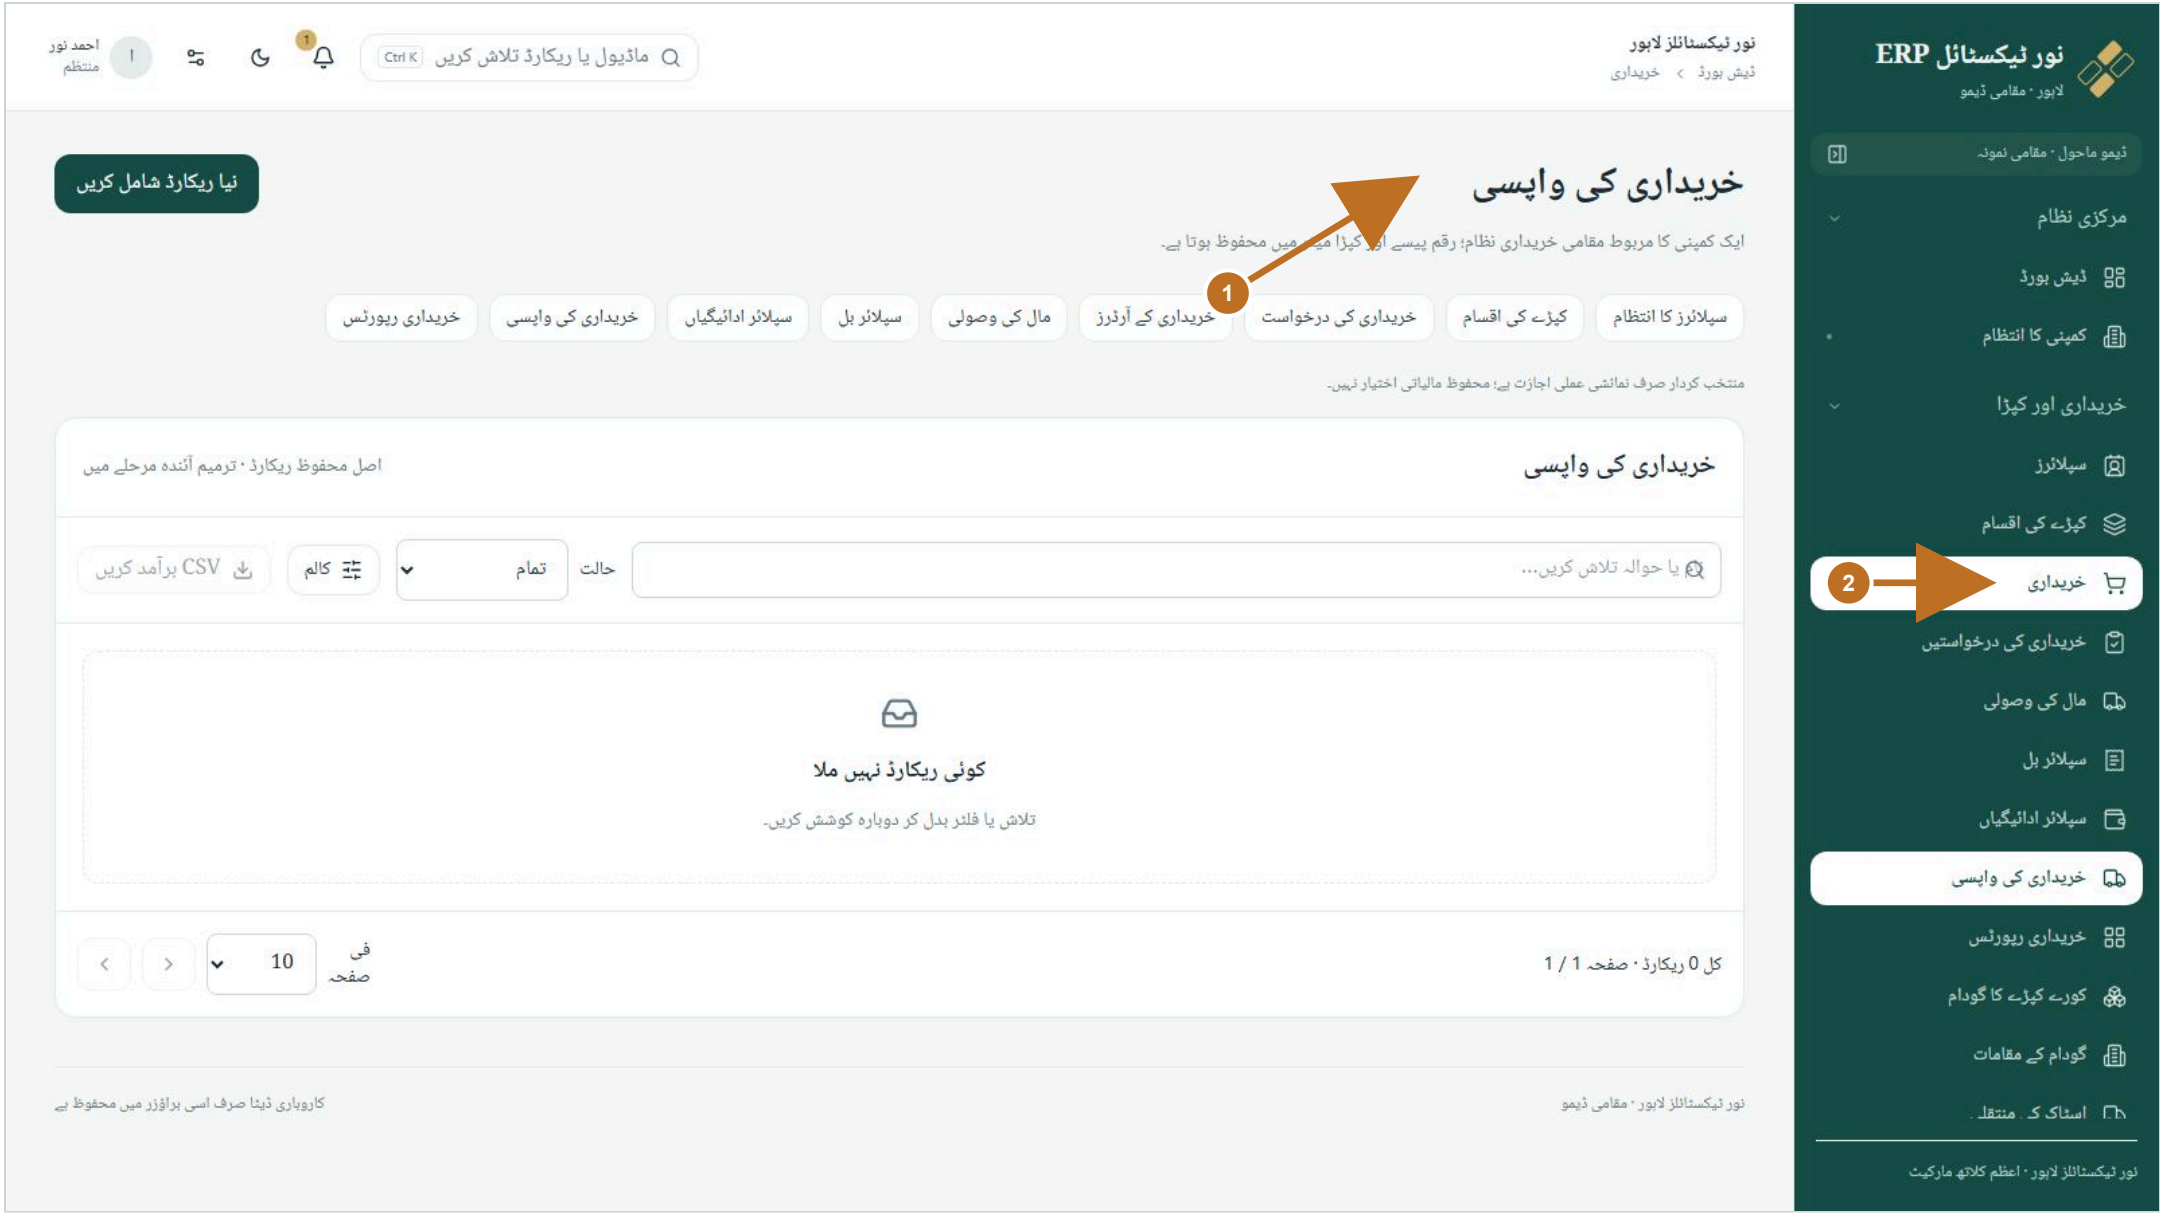

Business connection
Payments are local demonstration records only; no money is transmitted.

Form / next step
No direct form on this screen. Use its linked child form or open a source record to continue.

10 Purchase returns خریداری کی واپسی

Purchasing & fabric

AVAILABLE IN THIS DEMO

1 Screen purpose

The workflow for returning eligible received fabric to a supplier.

2 Navigation & use

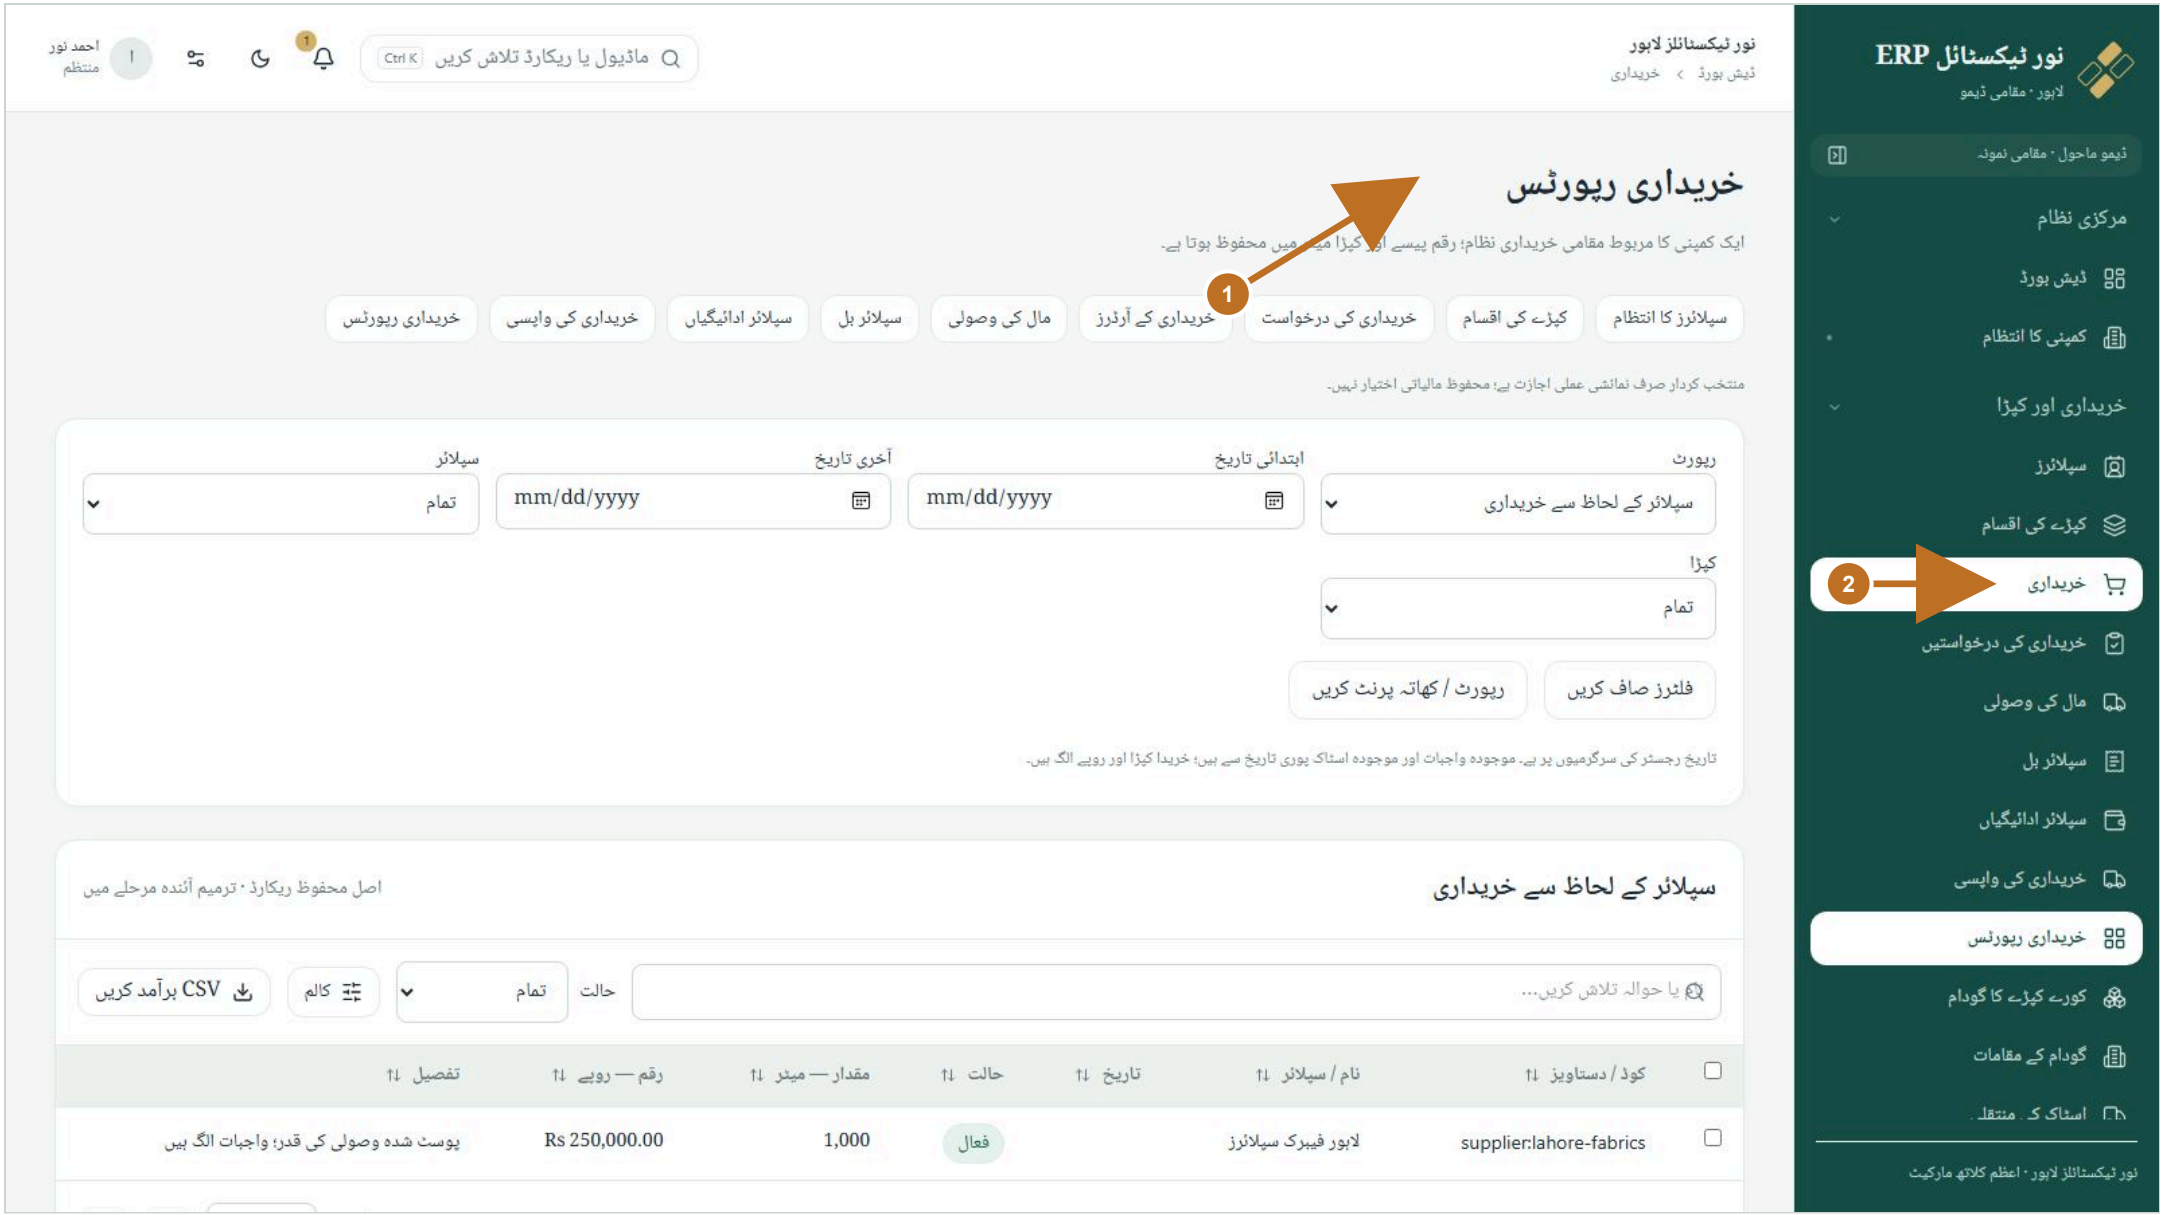

Choose eligible stock, record the return and complete the required review and posting steps.

Business connection

Posting reduces eligible inventory; a return linked to billed goods can affect the supplier balance.

Form / next step

No direct form on this screen. Use its linked child form or open a source record to continue.

1 Screen purpose
A read-only view of purchasing activity, supplier balances and reconciliations.

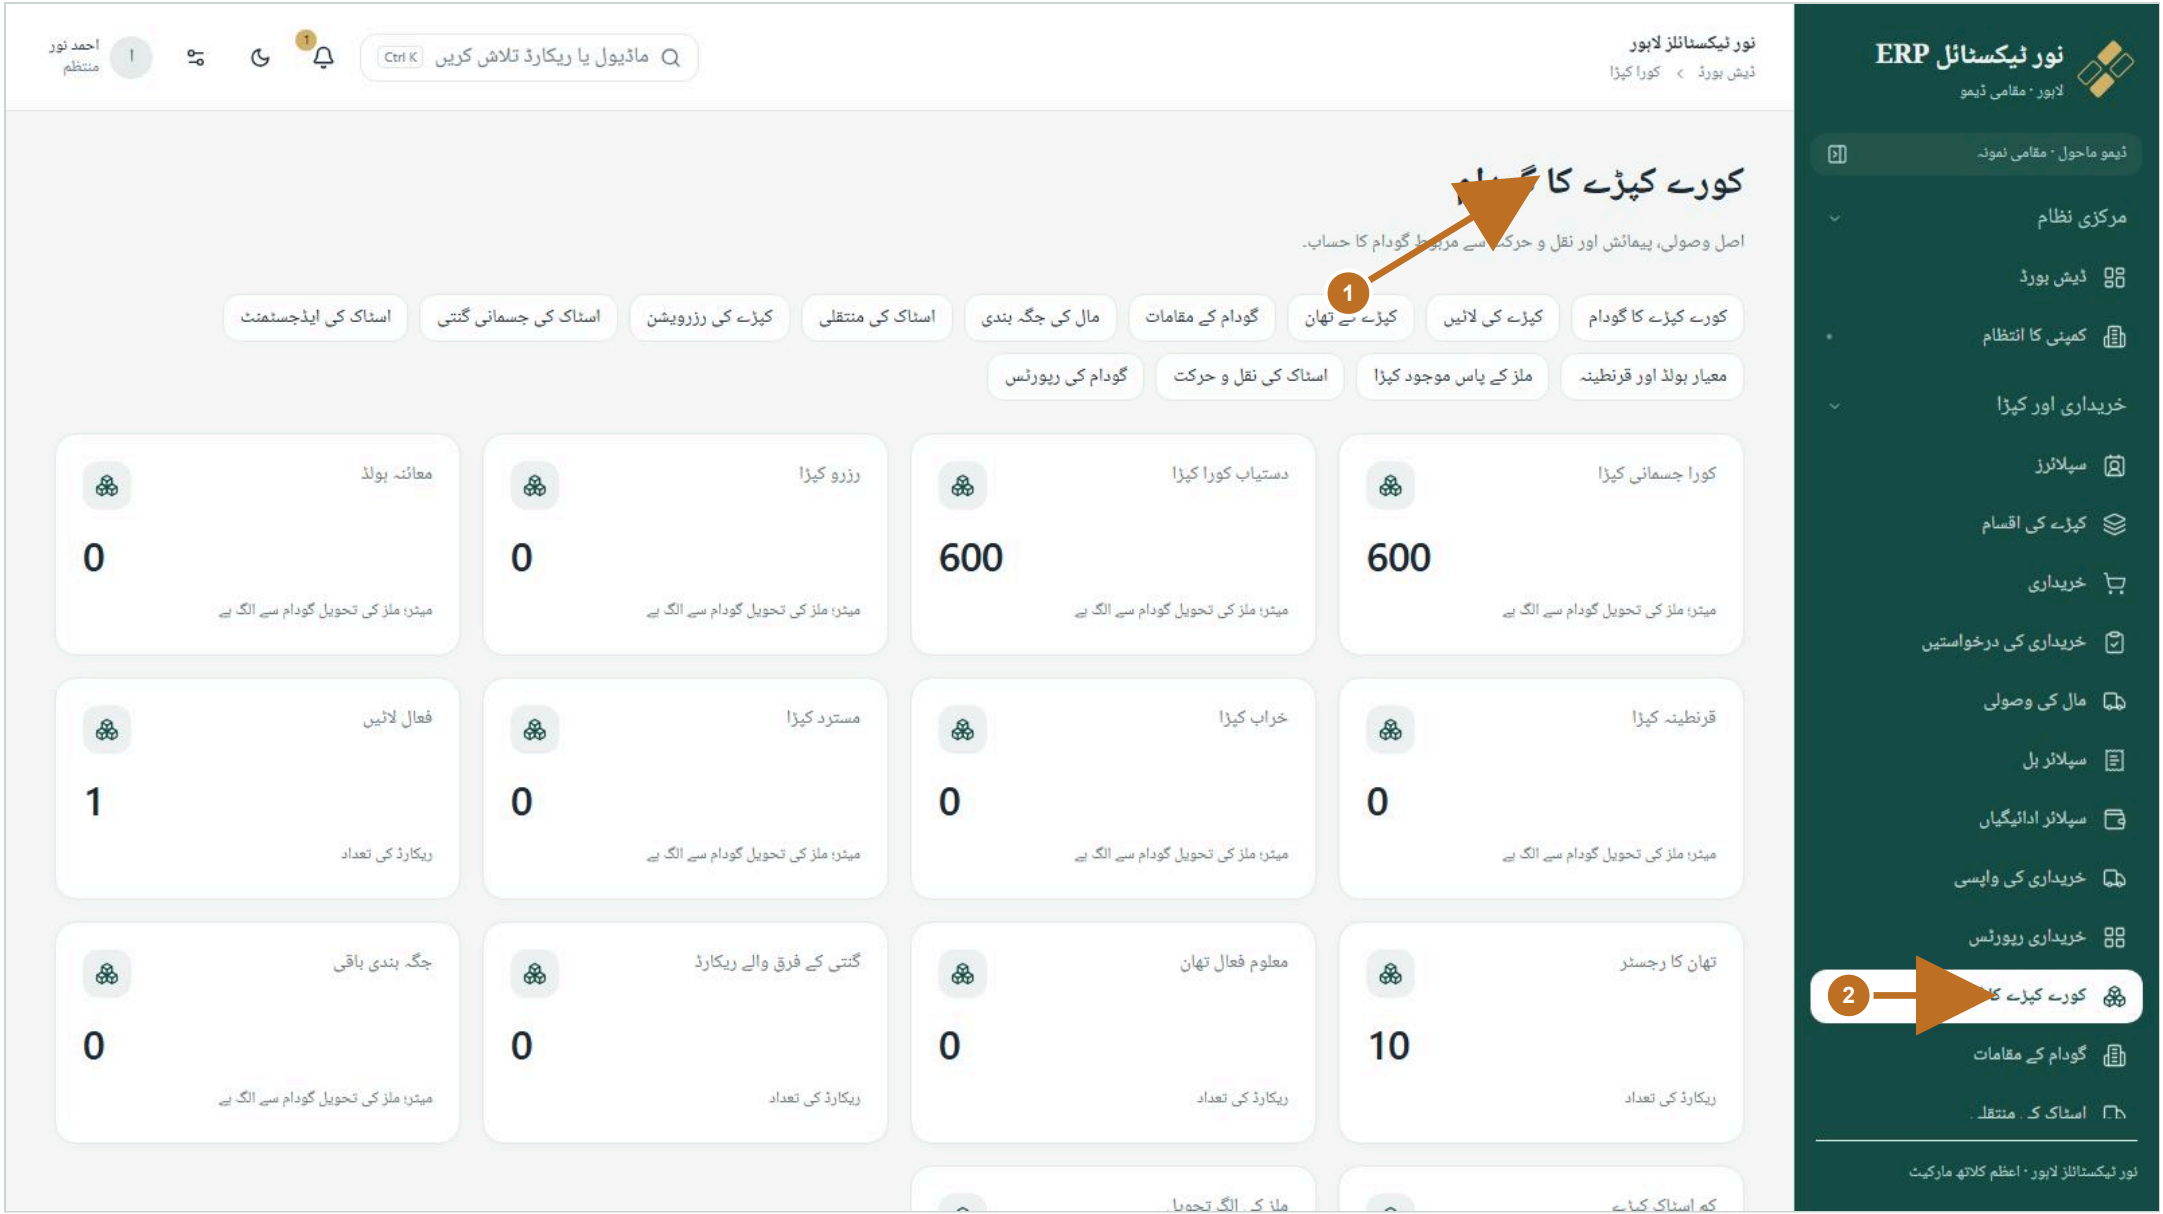

2 Navigation & use
Choose the report and available filters, then inspect or export the resulting records.

Business connection
Reports summarize source documents; correct a discrepancy in its originating transaction.

Form / next step
No direct form on this screen. Use its linked child form or open a source record to continue.

12 Grey-fabric warehouse کورے کپڑے کا گودام

Purchasing & fabric **AVAILABLE IN THIS DEMO**

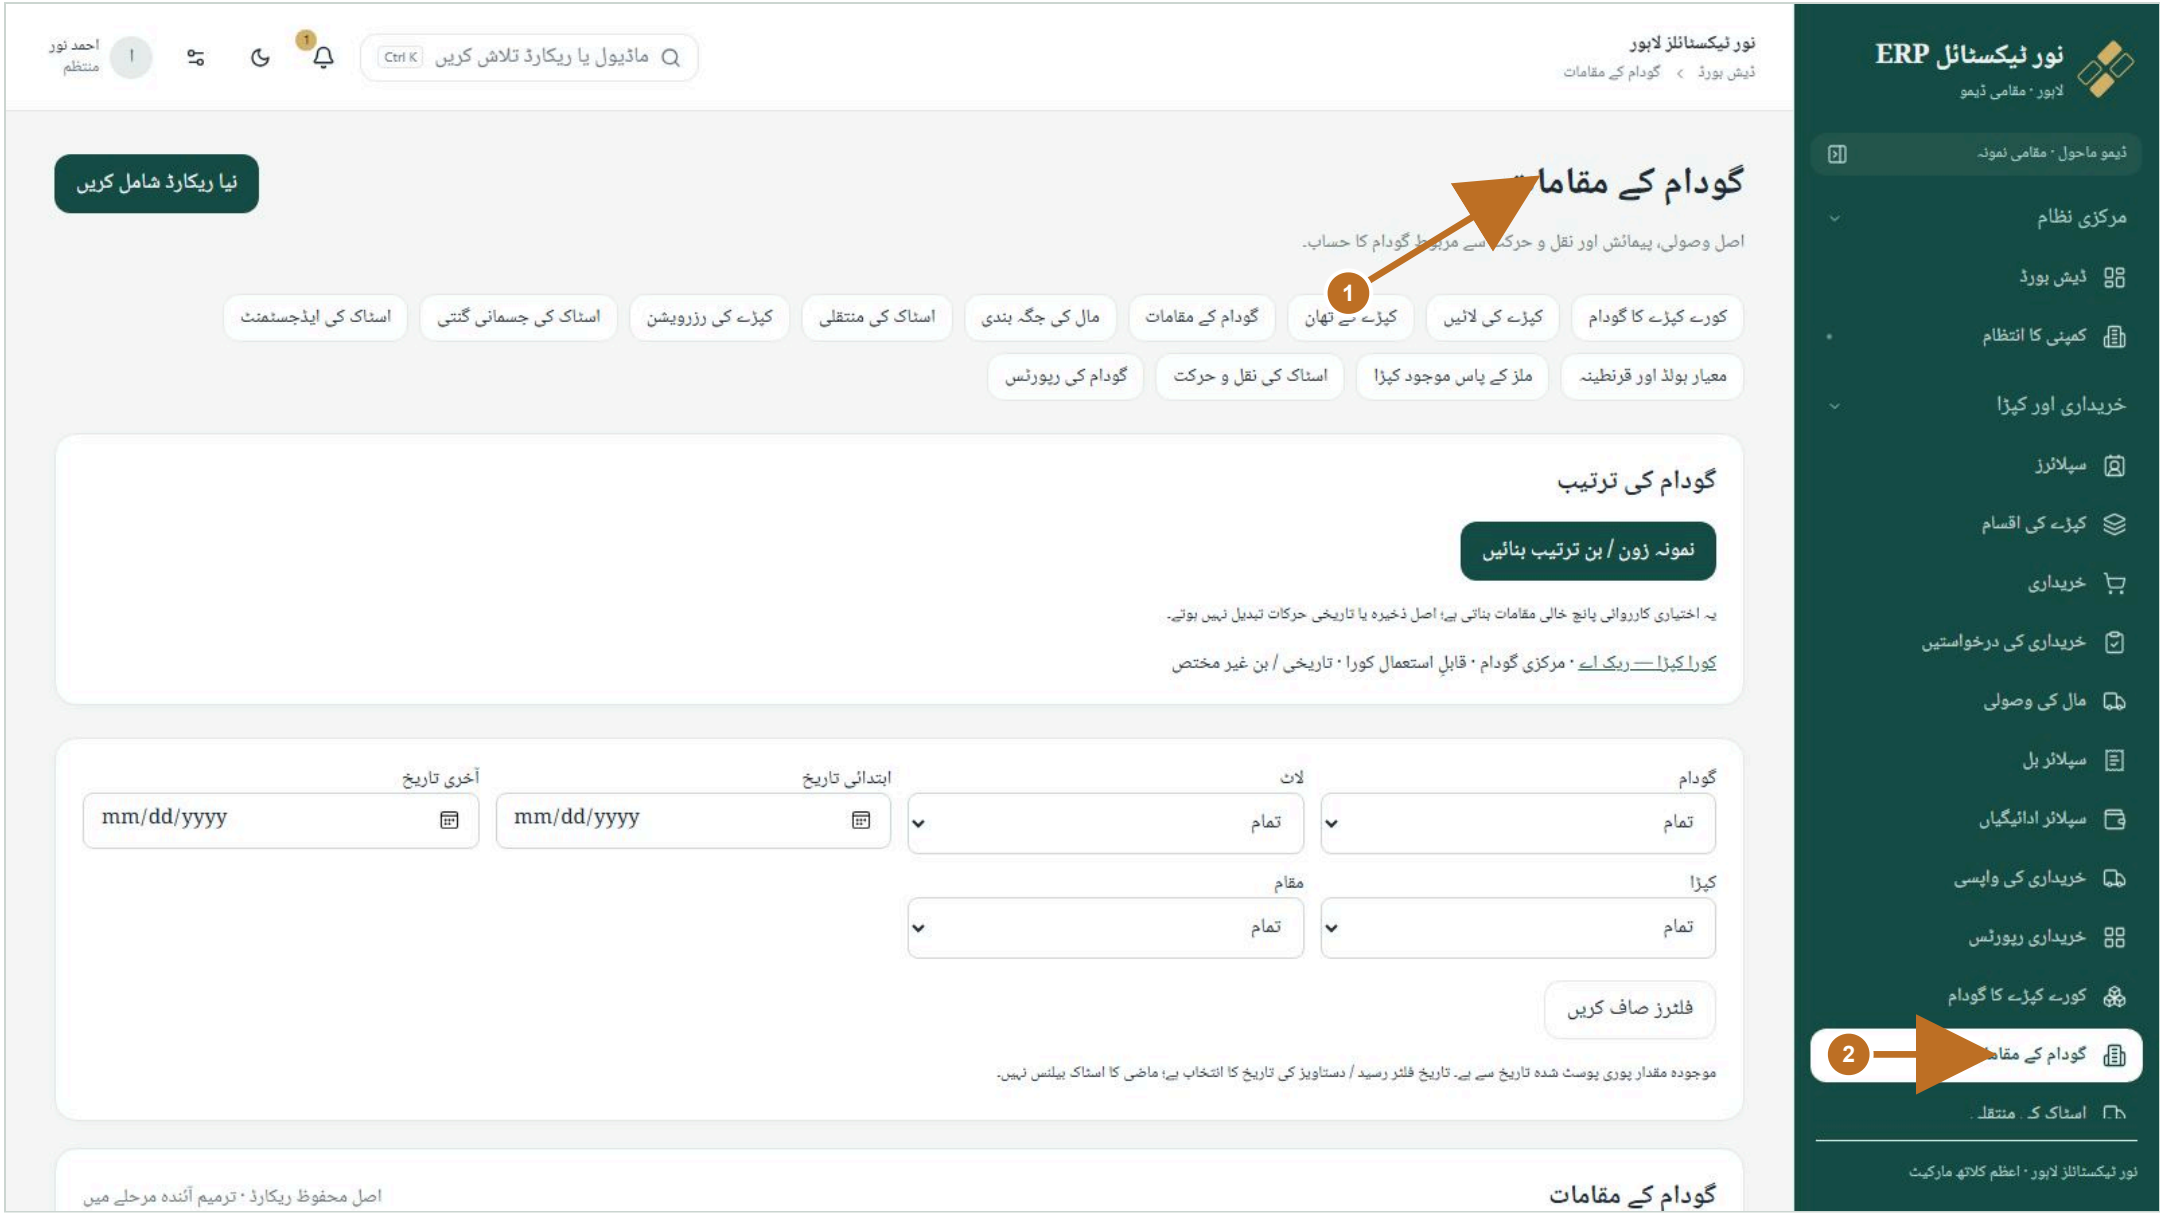

1 Screen purpose
A live overview of owned grey fabric, availability, quality, custody and valuation.

2 Navigation & use
Use the overview to identify stock and drill into lots, rolls, locations and warehouse actions.

Business connection
Physical stock, reserved stock and quality-held stock are different quantities.

Form / next step
No direct form on this screen. Use its linked child form or open a source record to continue.

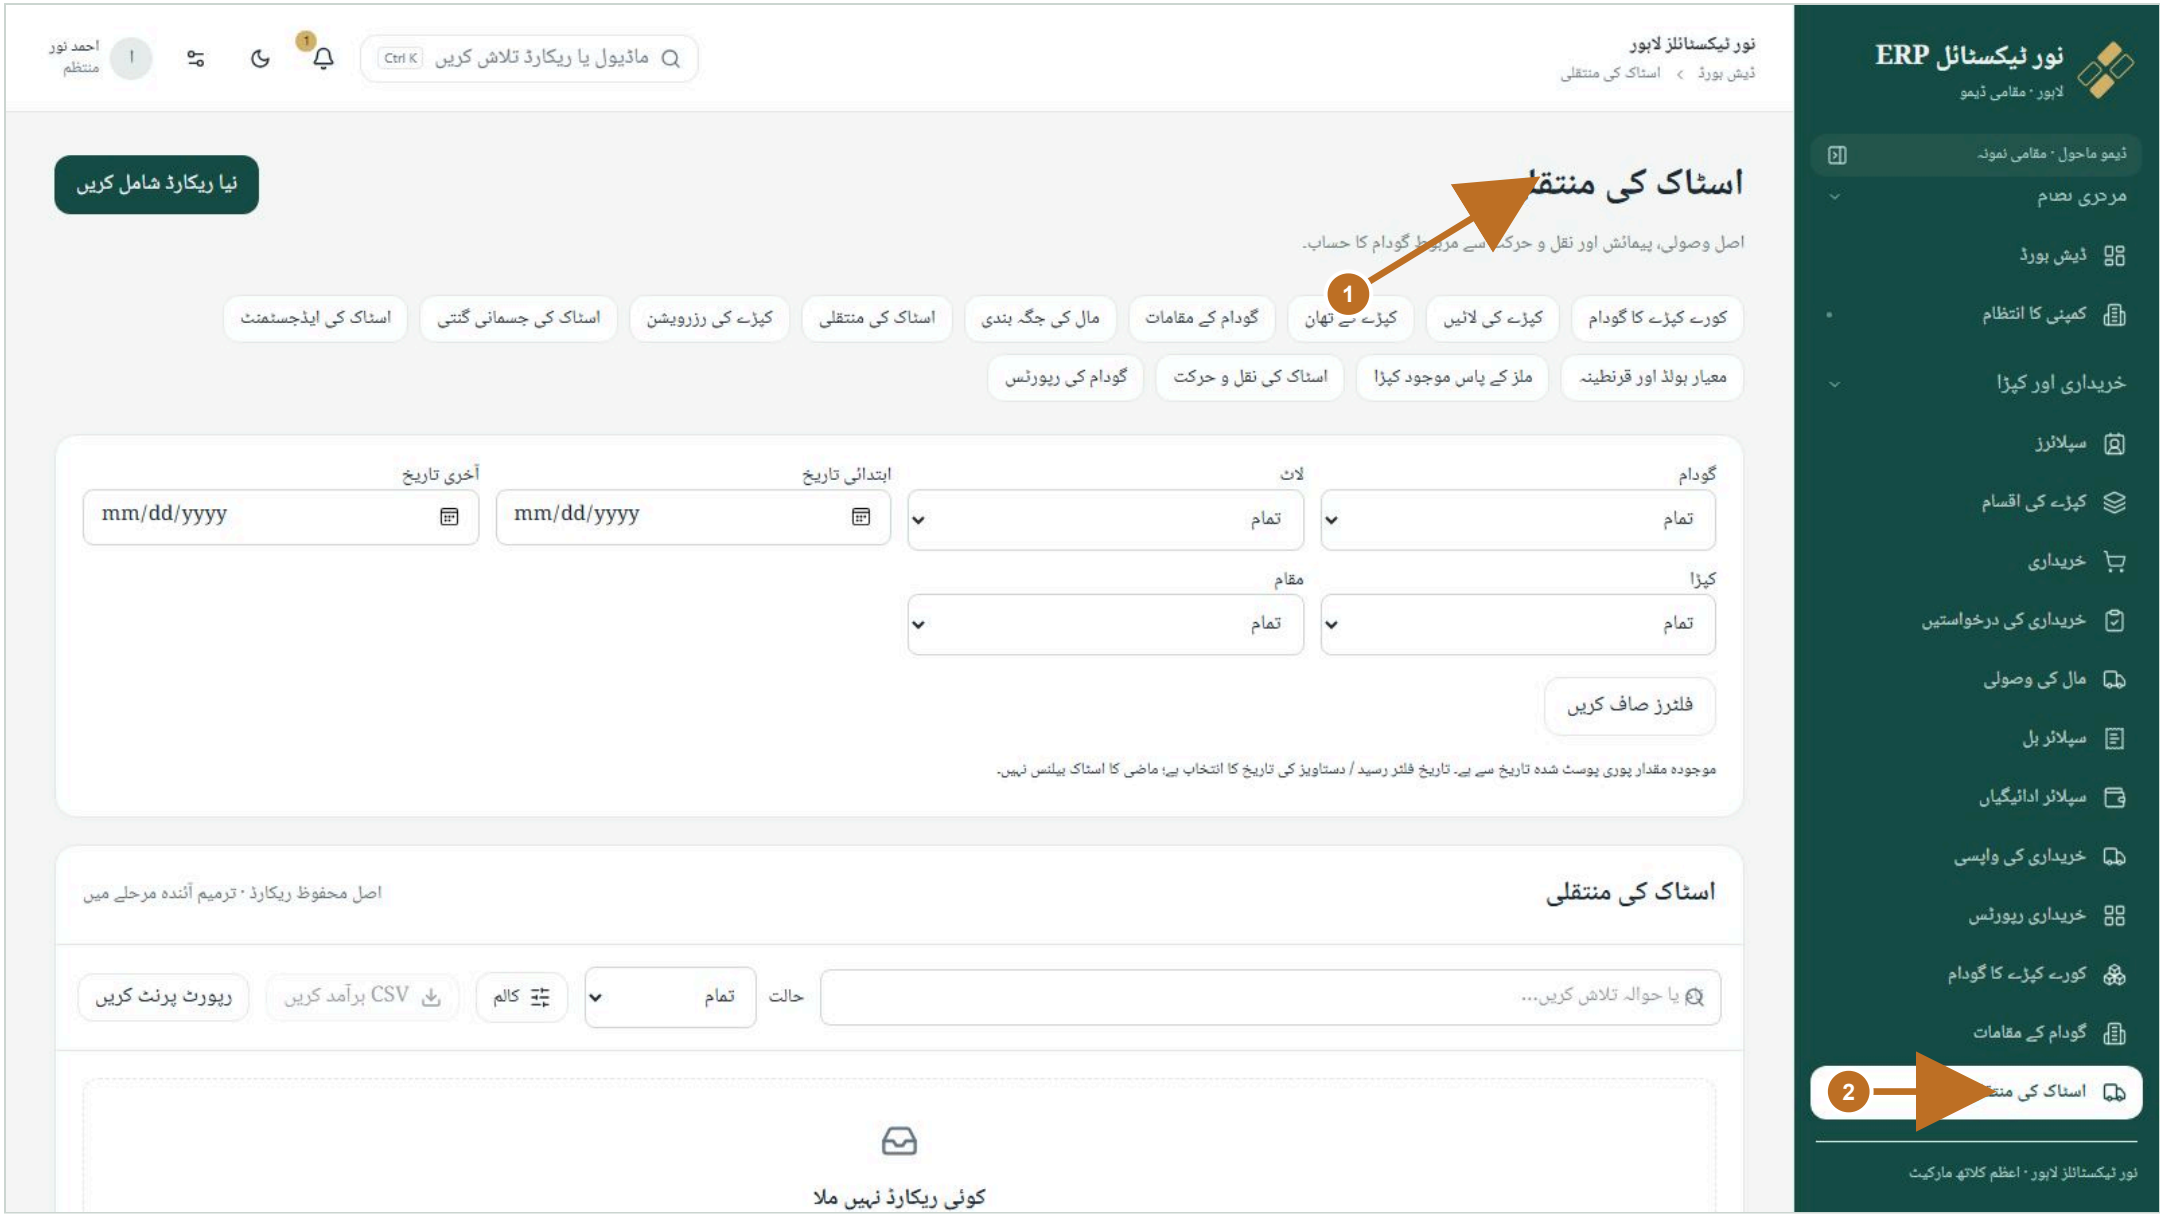

1 Screen purpose
The location hierarchy for receiving, staging, storage and quality areas.

2 Navigation & use
Create and maintain active locations, then select them on receiving, putaway and transfer documents.

Business connection
Creating or changing a location does not create or move stock.

Form / next step
No direct form on this screen. Use its linked child form or open a source record to continue.

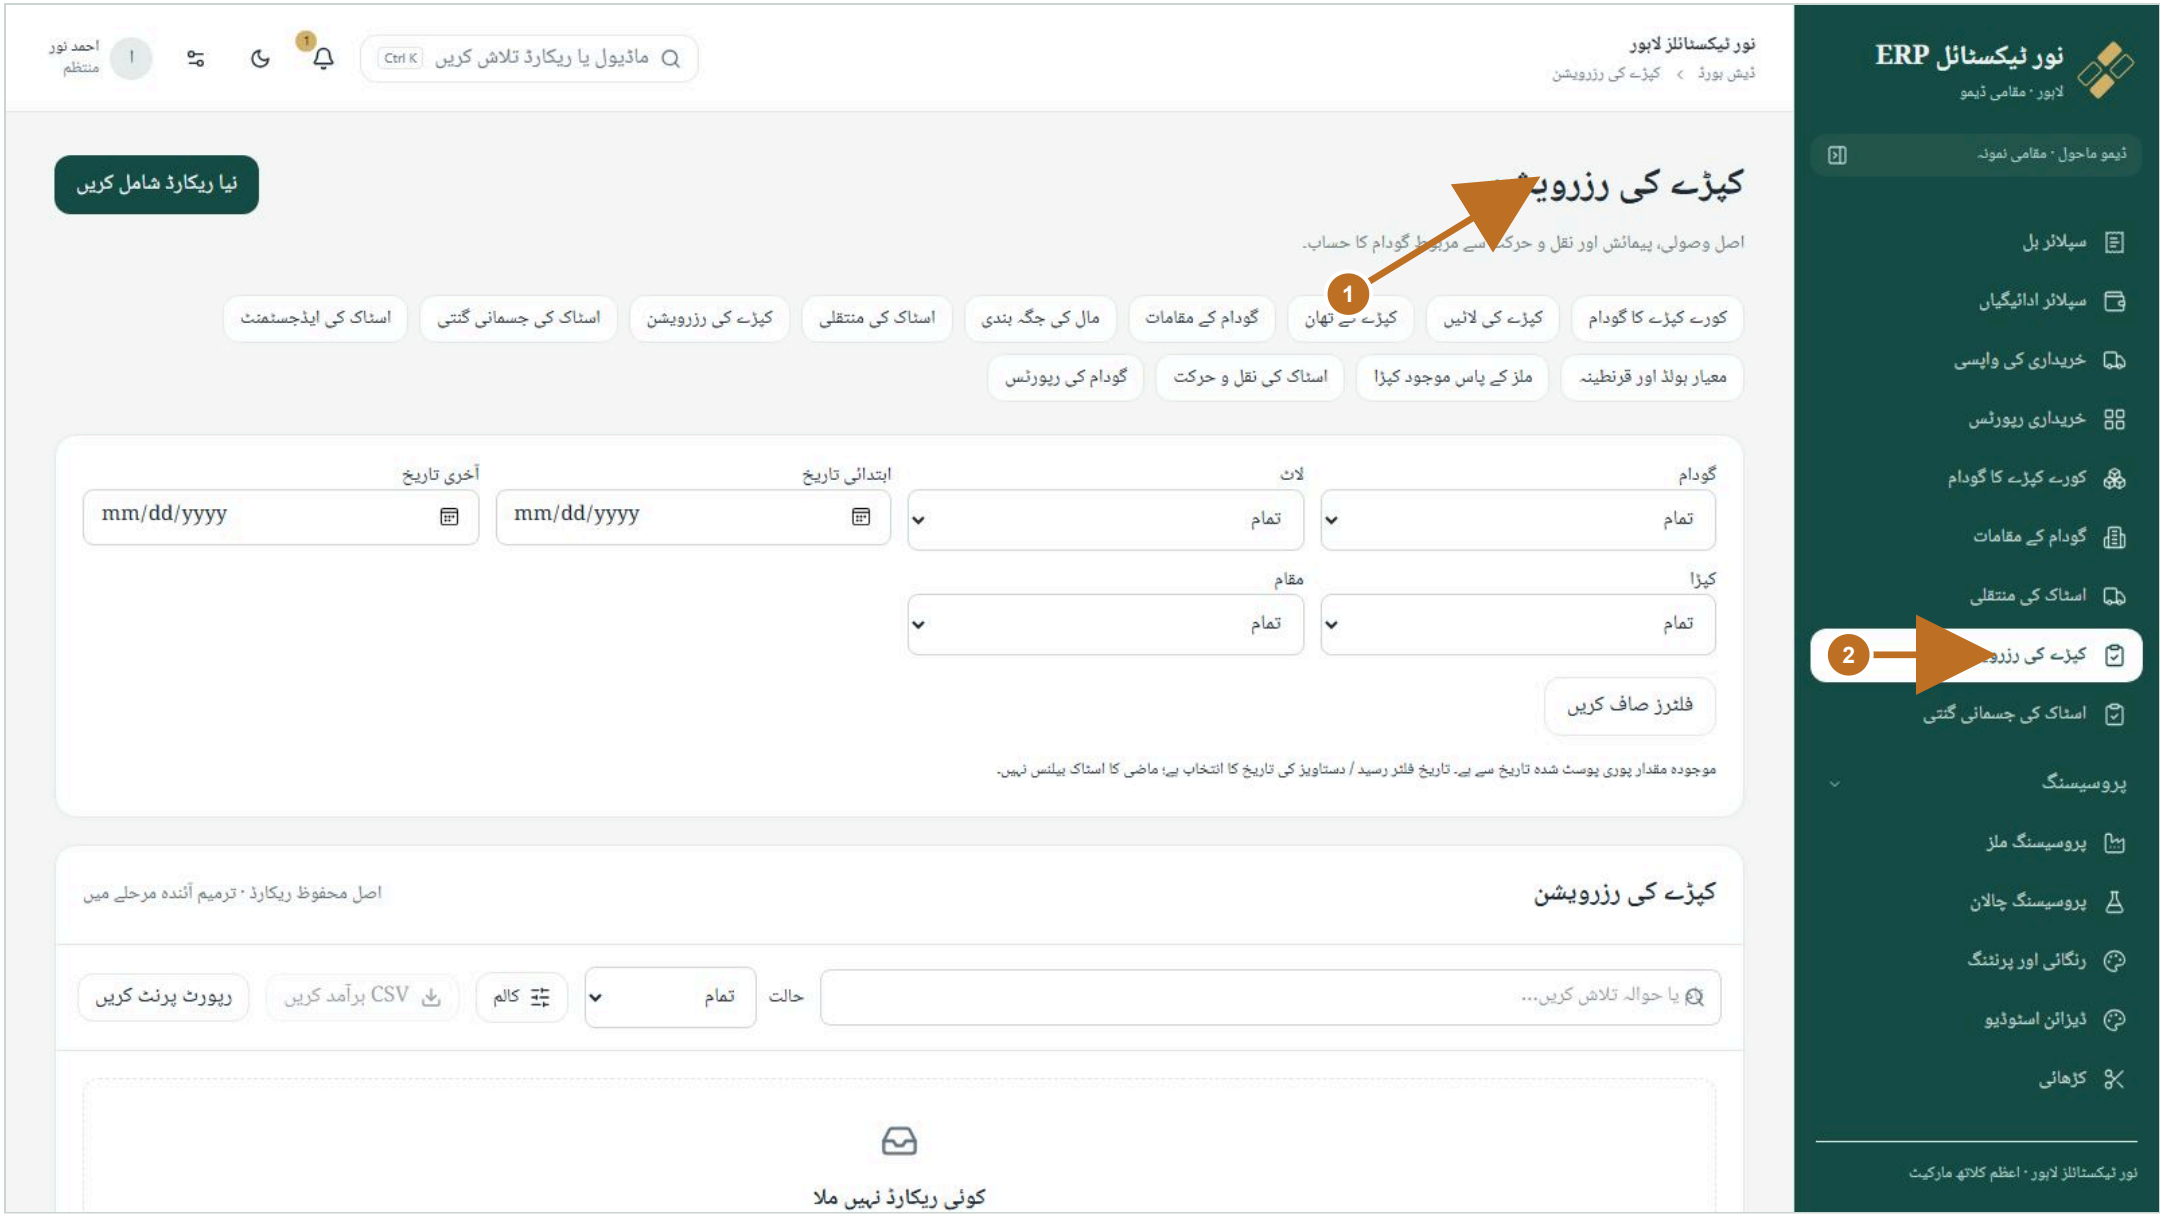

1 Screen purpose
Controlled movement of eligible material between warehouse locations.

2 Navigation & use
Choose the exact source stock and destination, then submit, approve and post the transfer.

Business connection
A posted transfer moves stock between locations; it does not change total company quantity.

Form / next step
No direct form on this screen. Use its linked child form or open a source record to continue.

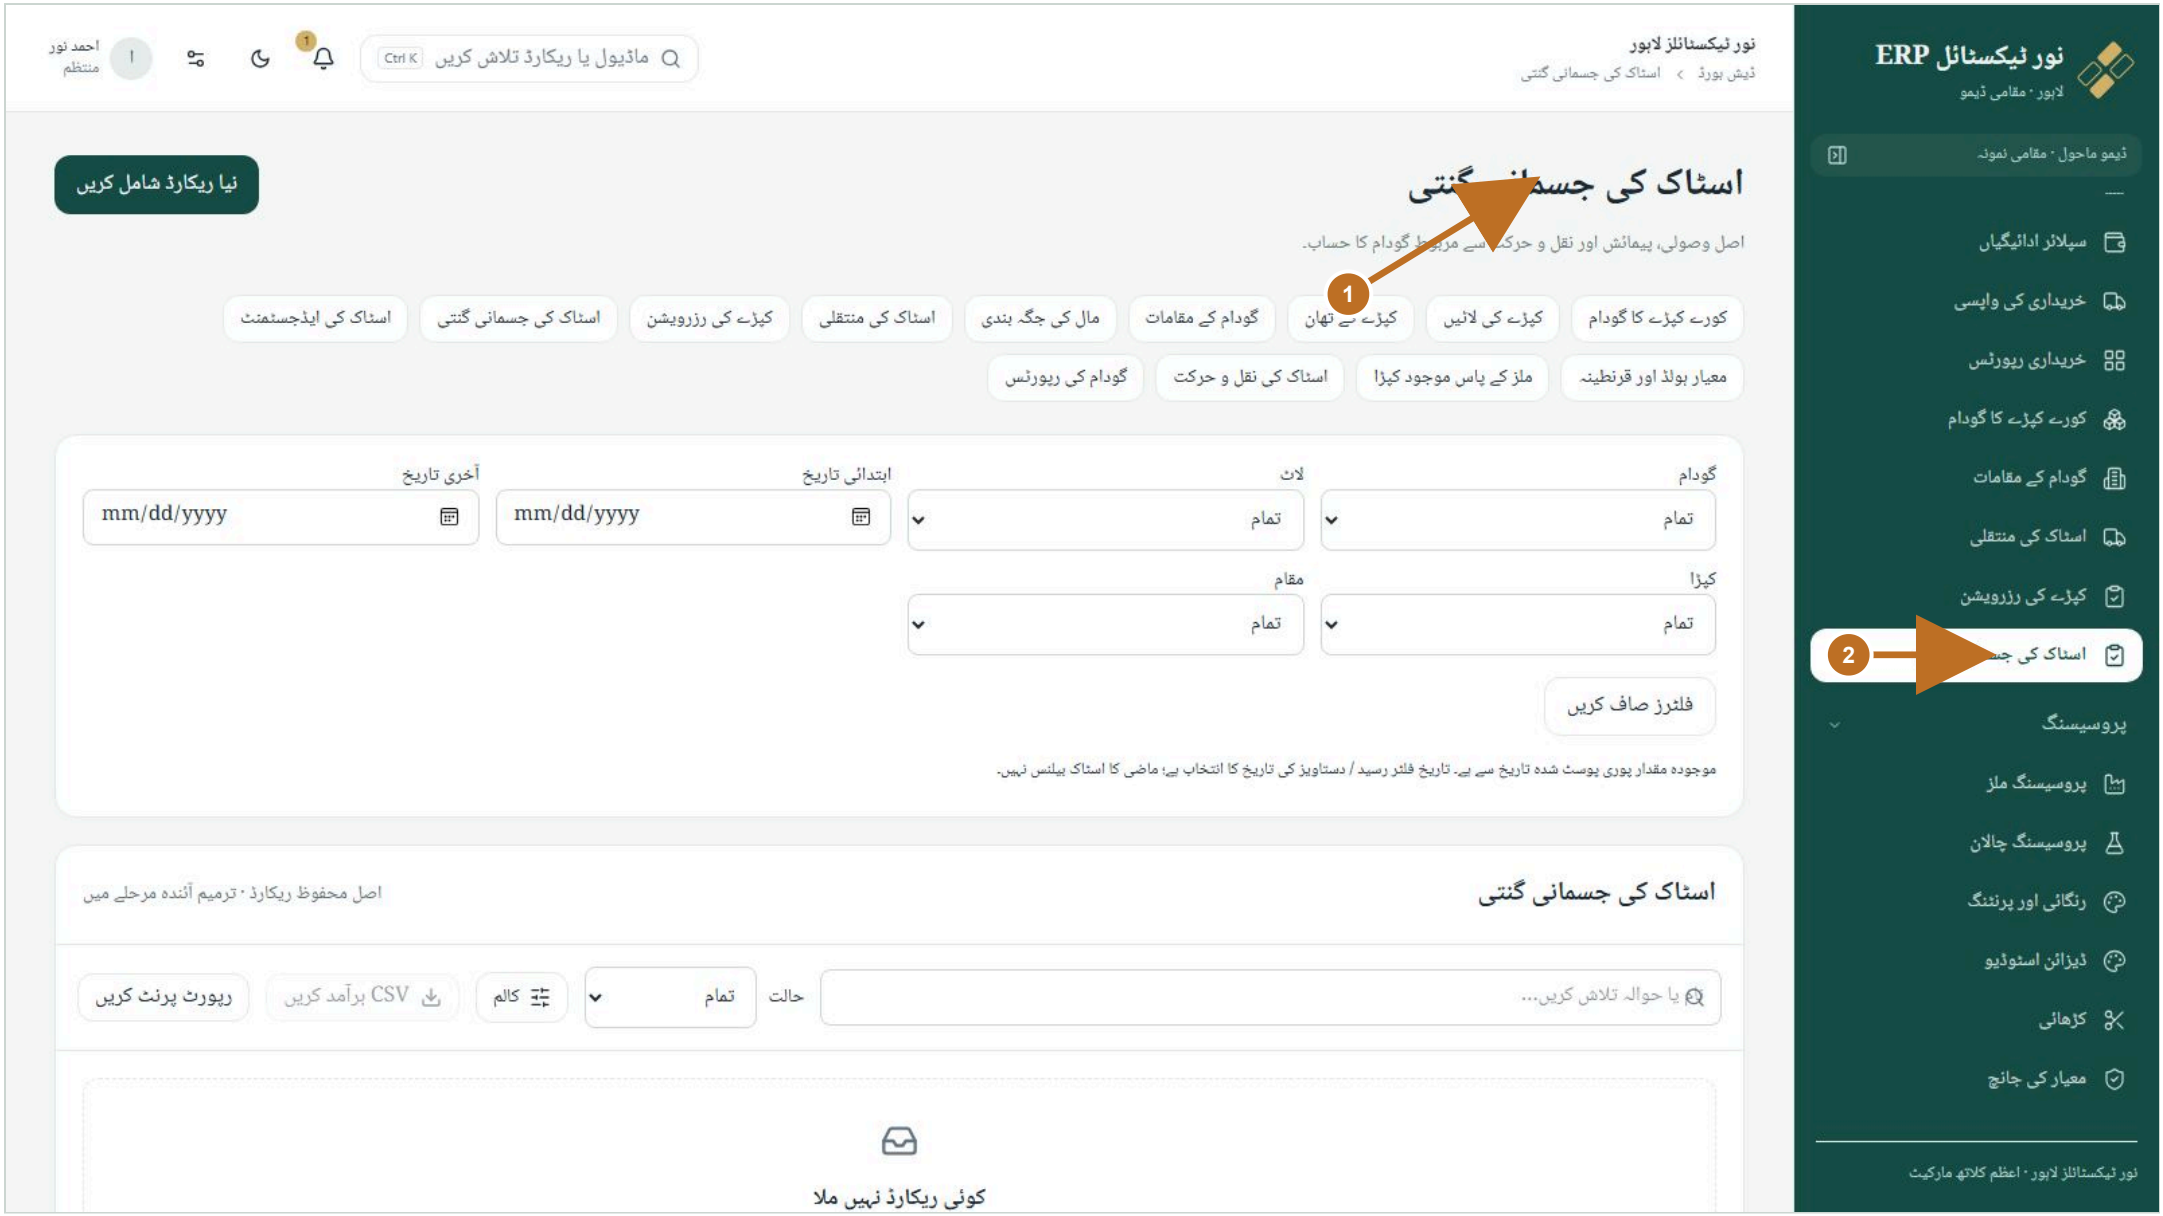

1 Screen purpose
Reservations protect eligible fabric for a named operational requirement.

2 Navigation & use
Select the source lot/location, quantity and purpose; later release or consume it through a supported linked issue.

Business connection
A reservation reduces availability but does not move physical stock.

Form / next step
No direct form on this screen. Use its linked child form or open a source record to continue.

1 Screen purpose
Physical counts compared with a saved warehouse-stock snapshot.

2 Navigation & use
Record the physical count and notes, submit for review and post approved variances.

Business connection
Saving a count alone does not change inventory; posting an approved variance does.

Form / next step
No direct form on this screen. Use its linked child form or open a source record to continue.

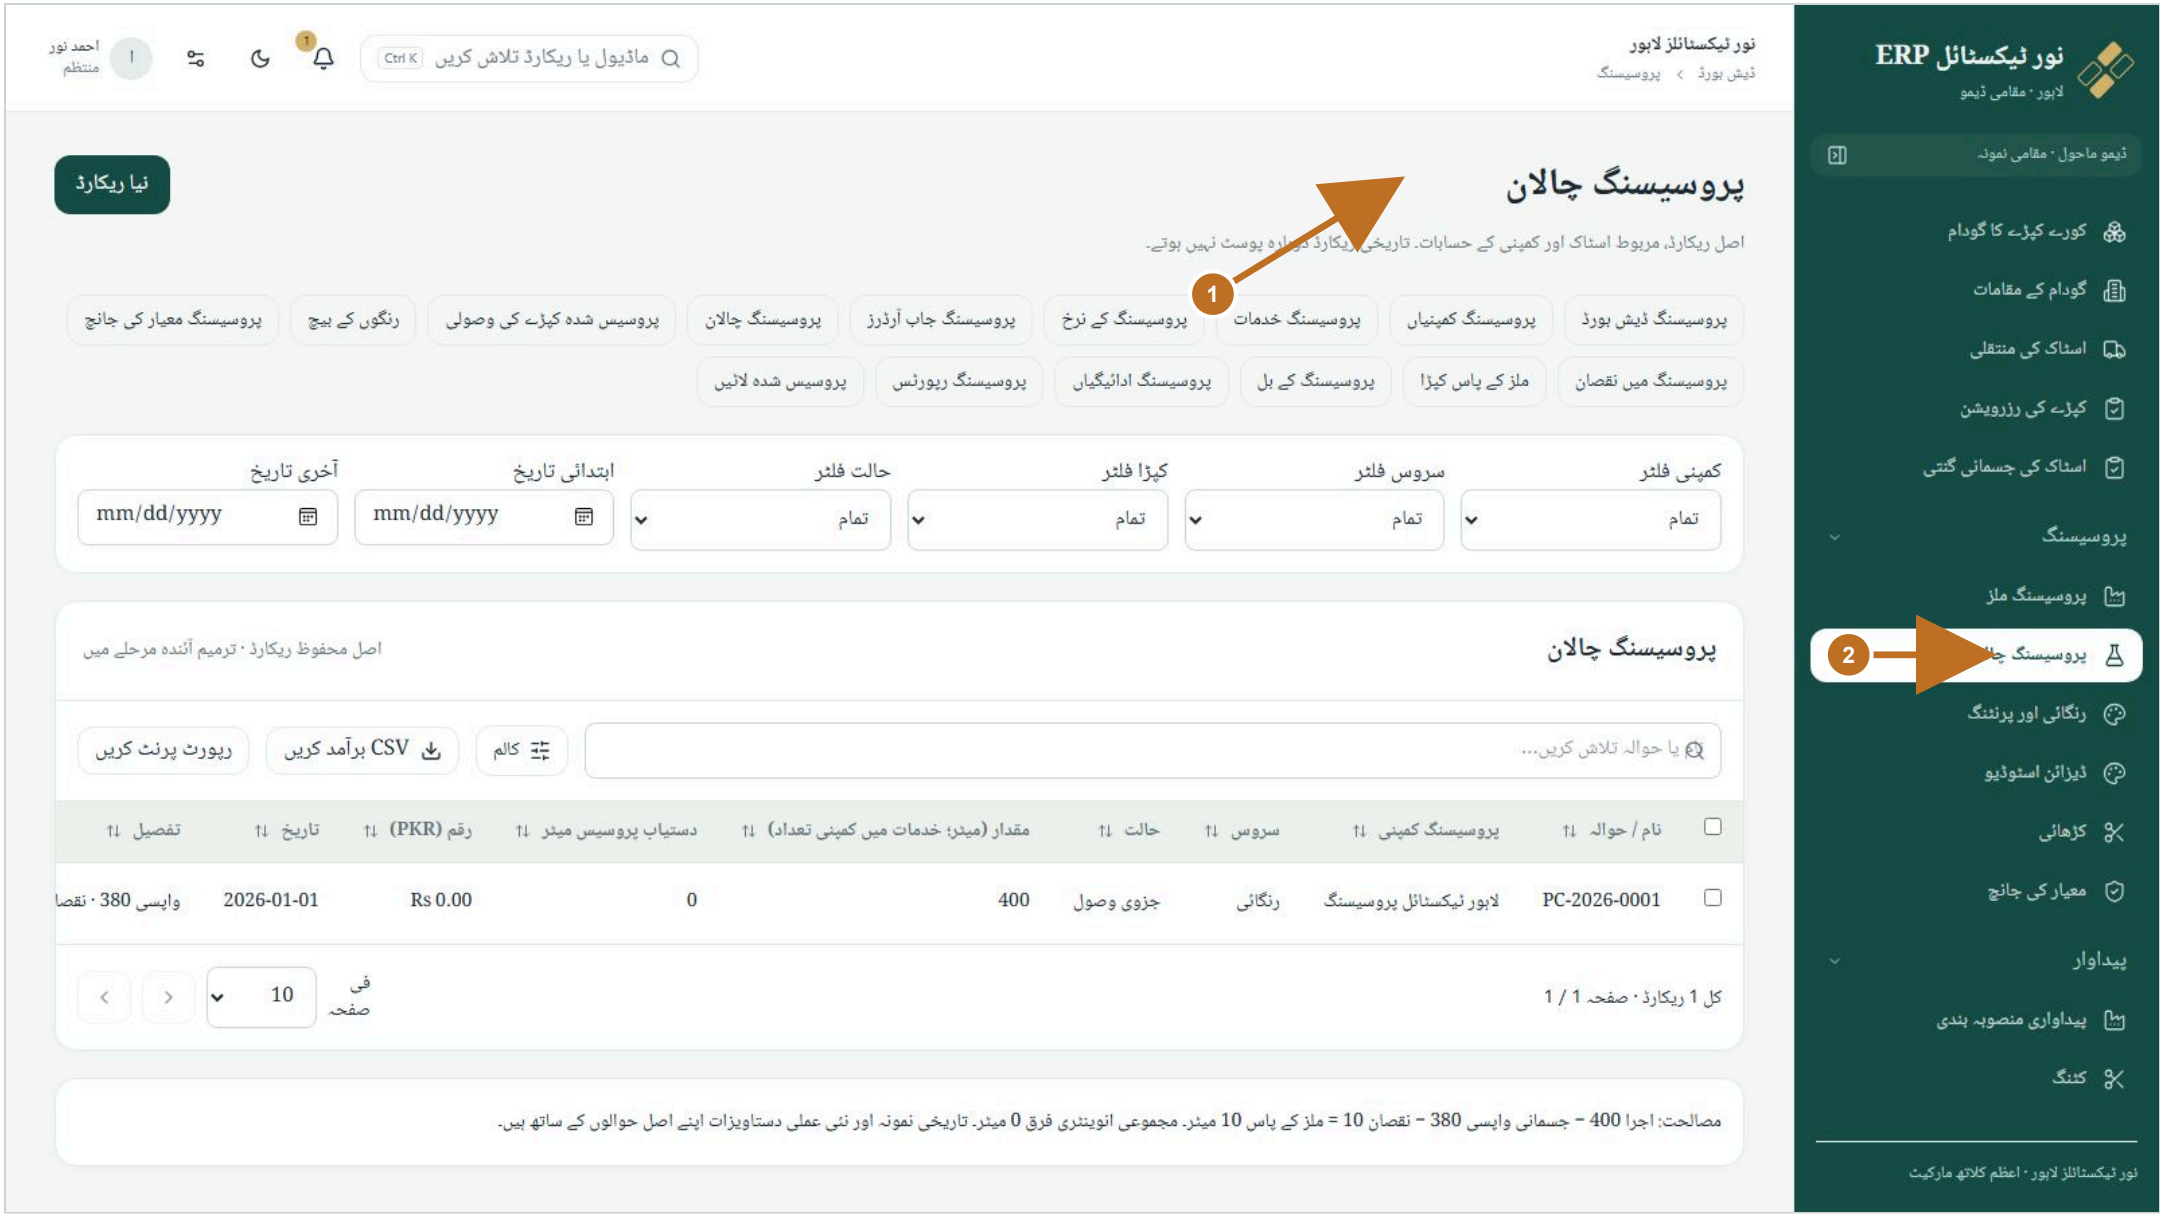

1 Screen purpose
Contractor directory and custody-related information for external manufacturing partners.

2 Navigation & use
Review active contractors and their supported service/custody information; follow linked jobs or ledger records where shown.

Business connection
Contractor, job, challan, receipt and ledger operations are implemented in the processing area.

Form / next step
No direct form on this screen. Use its linked child form or open a source record to continue.

1 Screen purpose
The route for material issued to or received back from external processing.

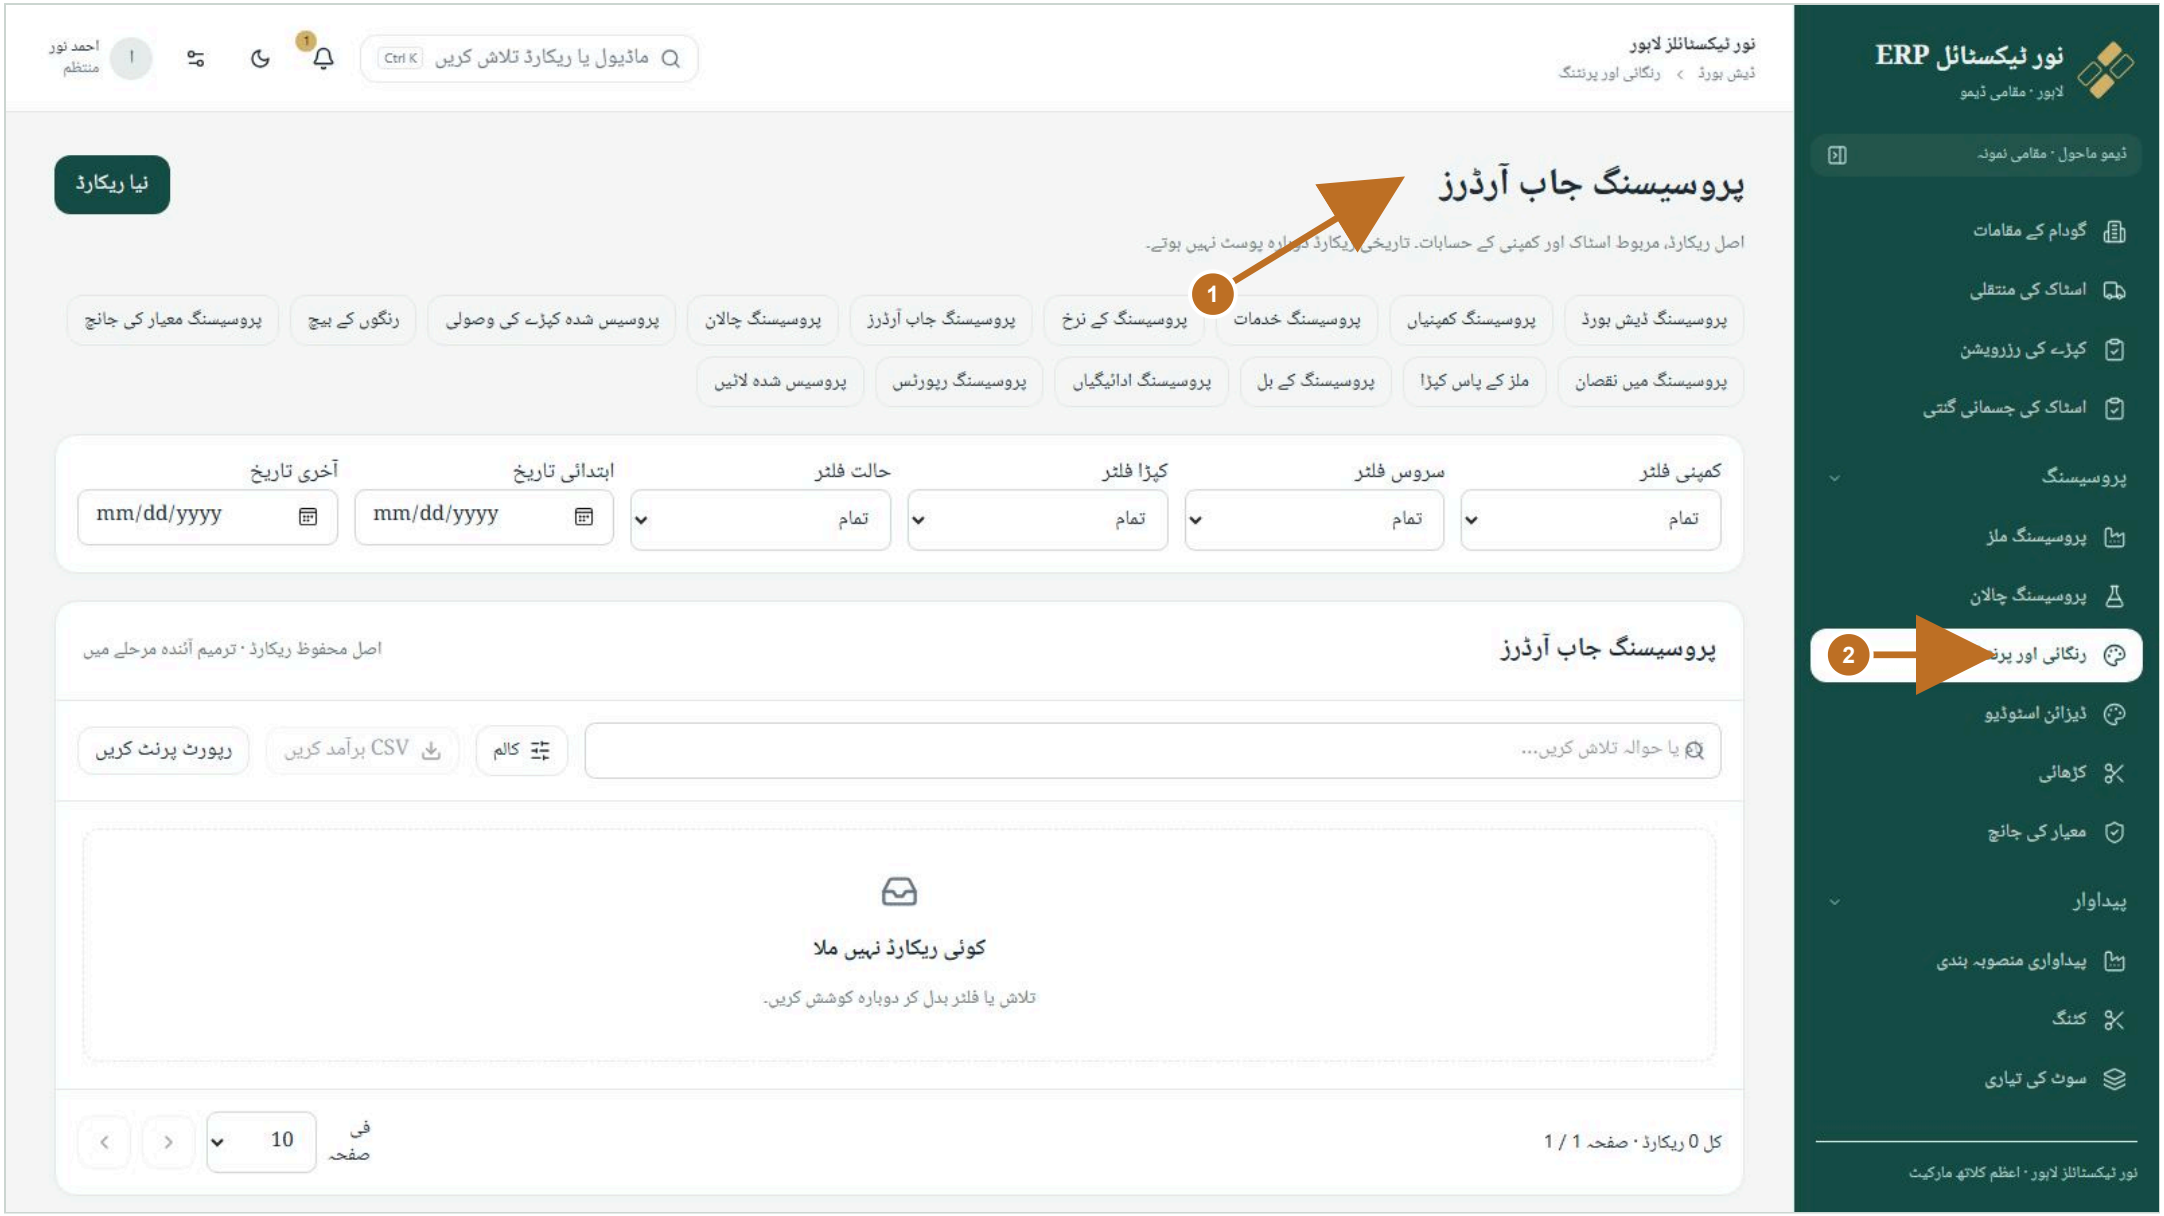

2 Navigation & use
Track source material, contractor and the linked issue/return document where available.

Business connection
Use processing jobs for the operational service workflow; inventory changes only on valid posted movements.

Form / next step
No direct form on this screen. Use its linked child form or open a source record to continue.

19 Processing jobs رنگائی اور پرنٹنگ

Processing AVAILABLE IN THIS DEMO

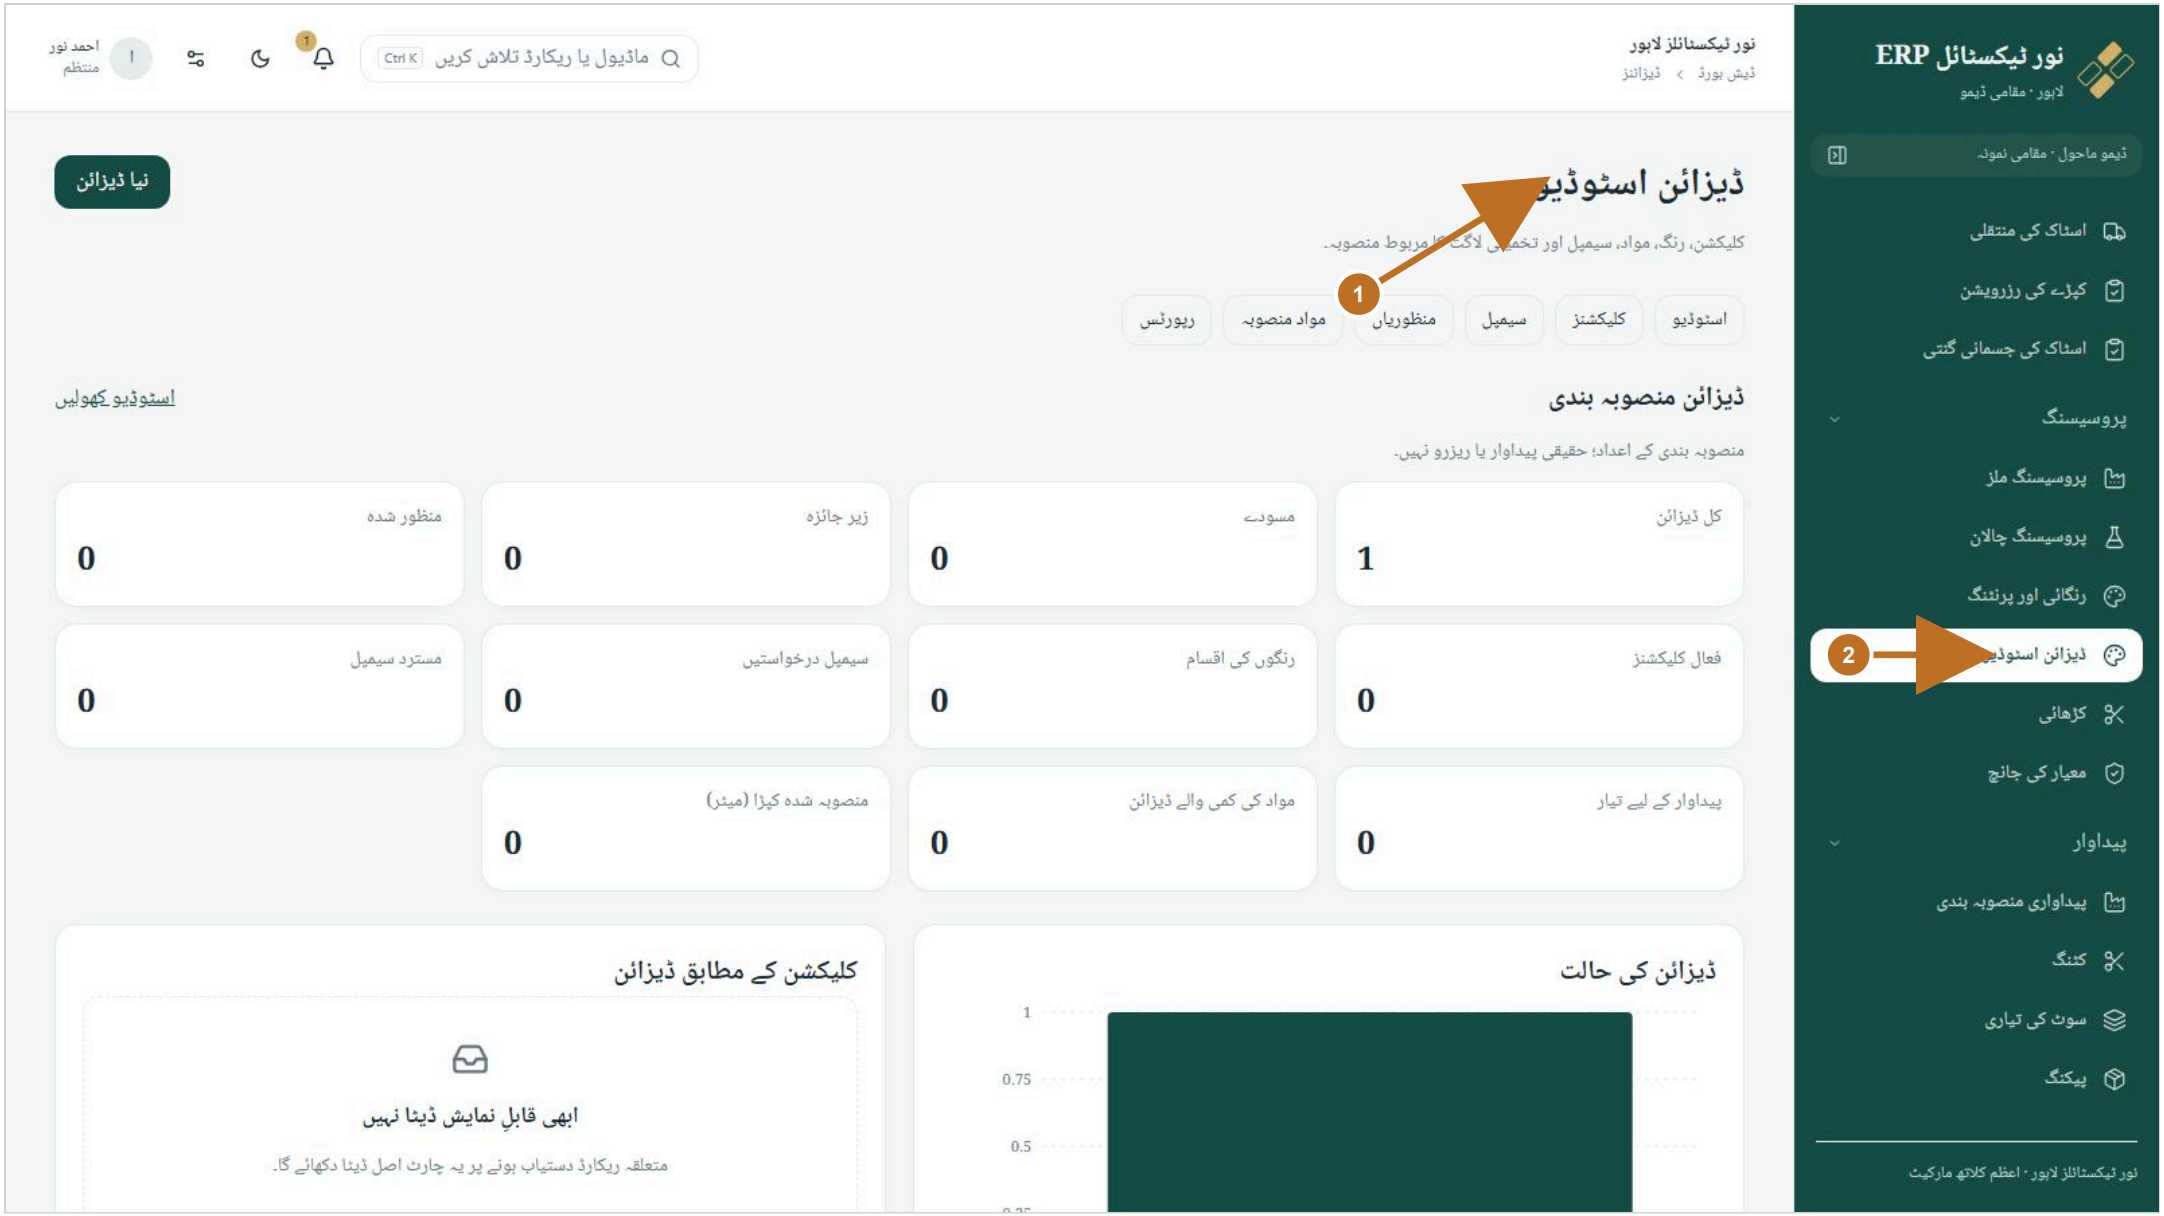

1 Screen purpose
Jobs describing textile services such as dyeing, printing or embroidery work.

2 Navigation & use
Review a job's service, contractor, status and linked material/cost records.

Business connection
Service estimates are distinct from posted processing bills and stock movements.

Form / next step
No direct form on this screen. Use its linked child form or open a source record to continue.

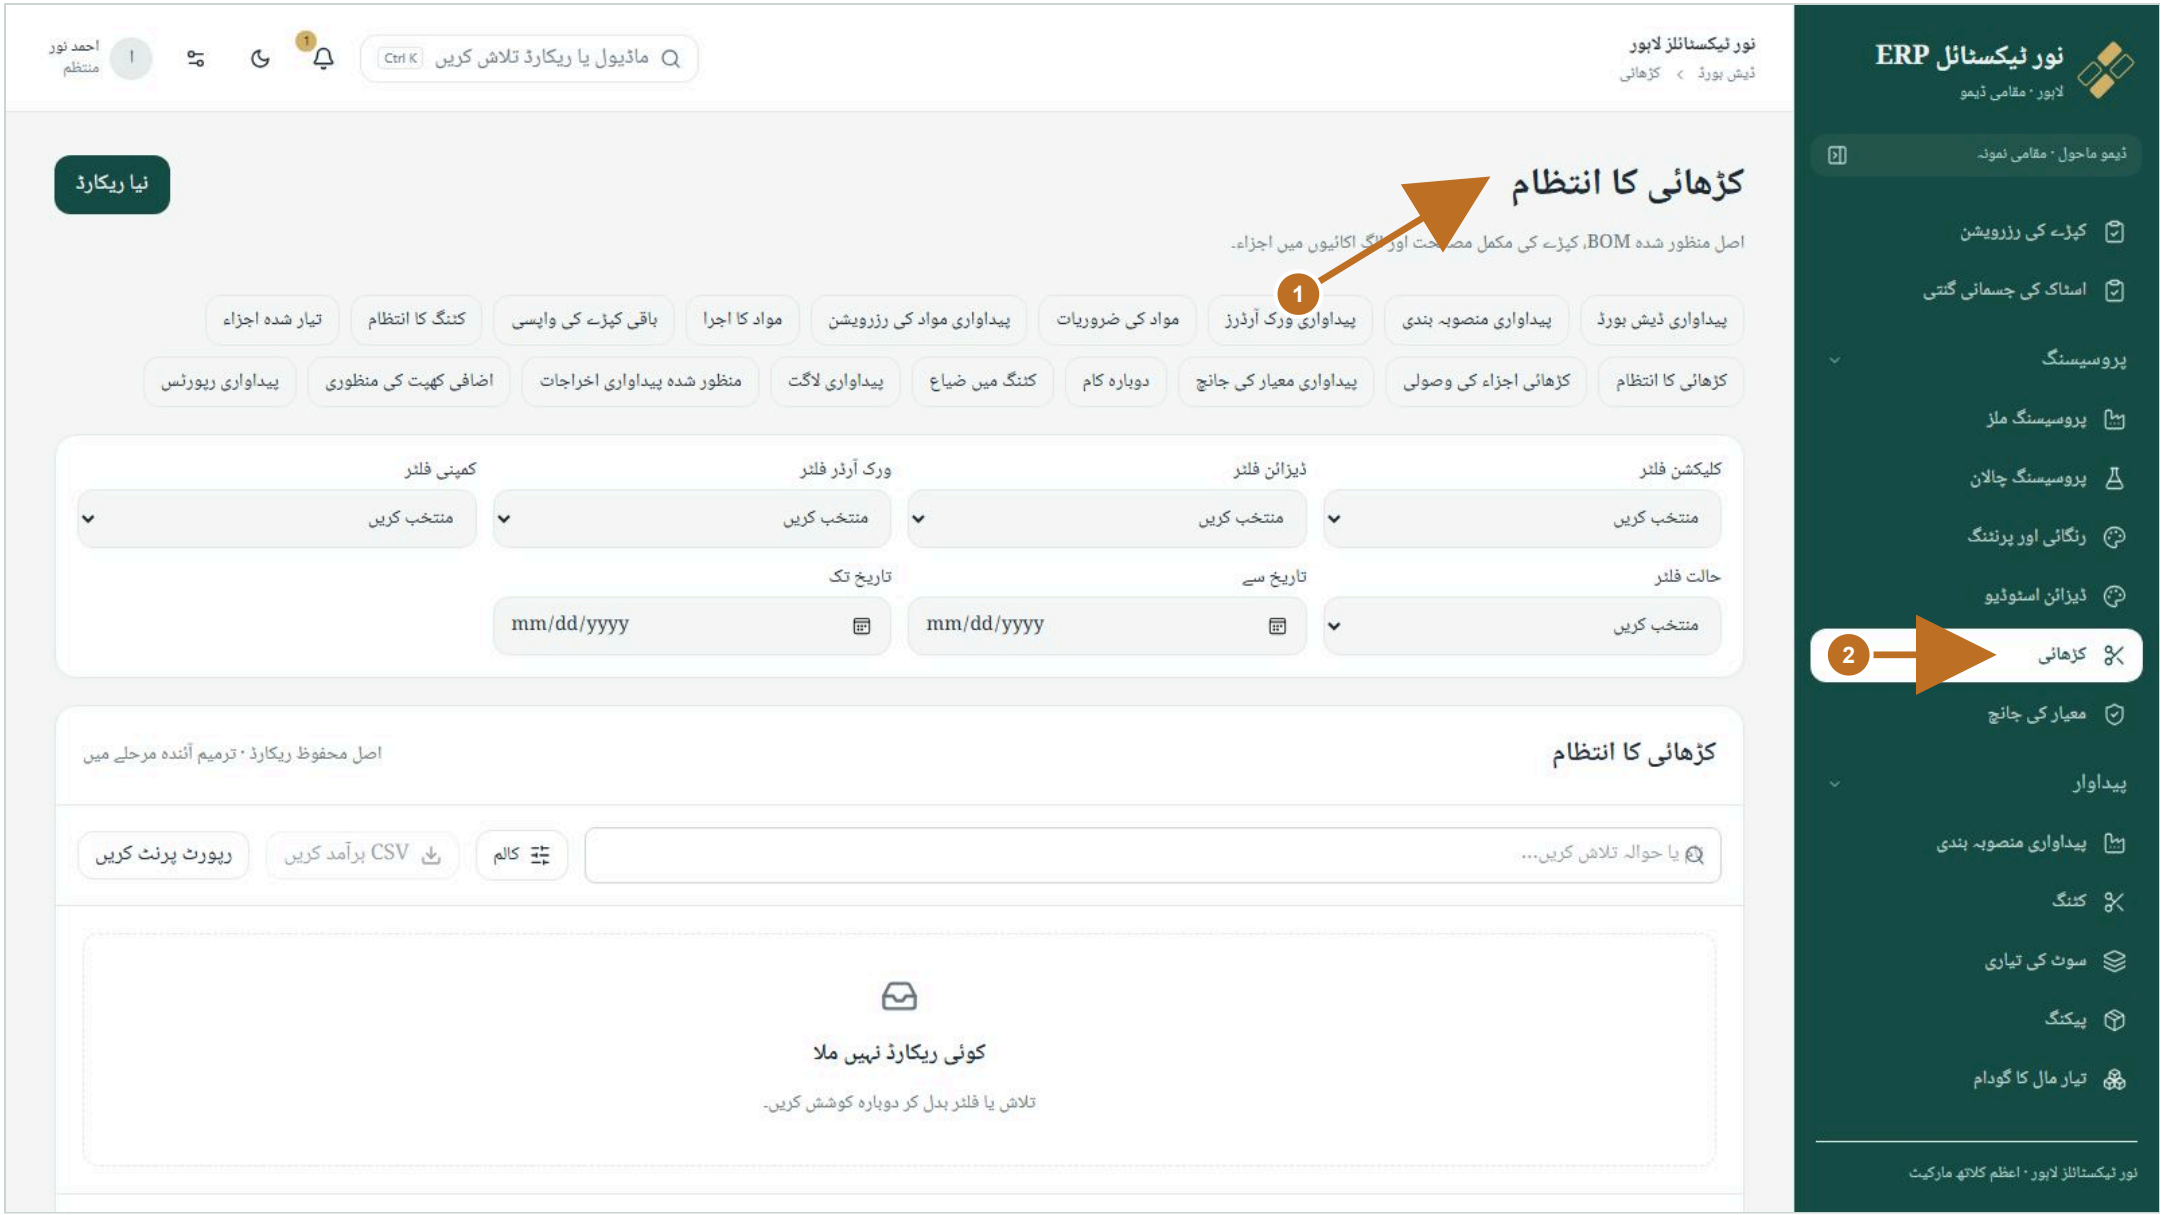

1 Screen purpose
The catalogue and workflow for approved textile suit designs and their production definition.

2 Navigation & use
Open a design to review colors, bill of materials (BOM), sampling, approval and readiness information.

Business connection
An approved design/BOM supplies controlled production inputs; it is not finished stock.

Form / next step
No direct form on this screen. Use its linked child form or open a source record to continue.

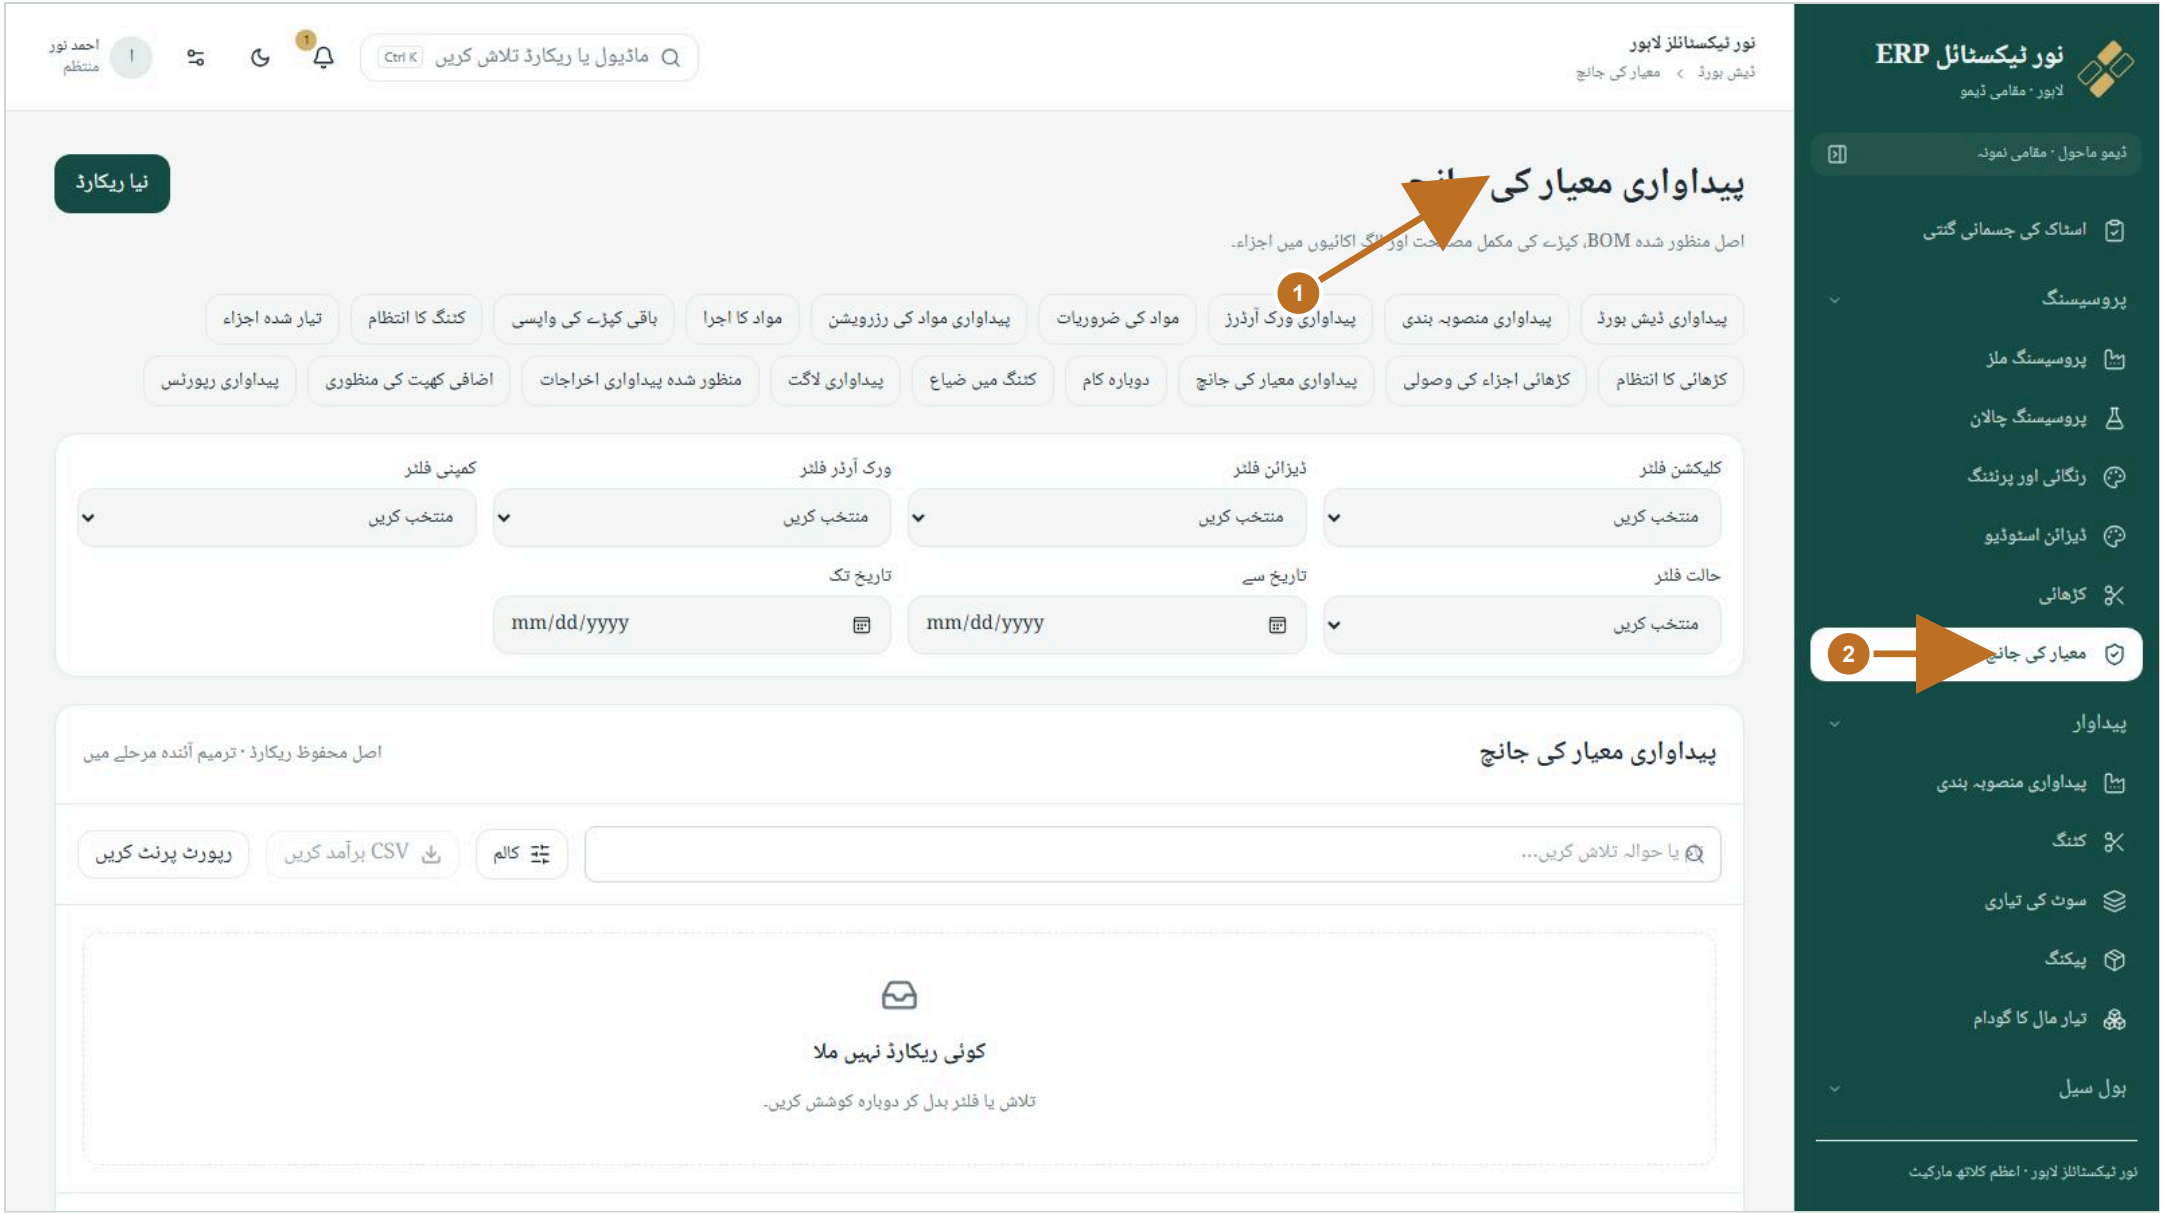

1 Screen purpose
The production route for embroidery jobs and contractor-held component lots.

2 Navigation & use
Review issued lots, partial physical returns, inspection outcomes and any approved loss disposition.

Business connection
Physical rejected returns are not contractor loss; custody clears only when returned or explicitly disposed.

Form / next step
No direct form on this screen. Use its linked child form or open a source record to continue.

1 Screen purpose
Inspection and disposition of production or returned items.

2 Navigation & use
Review the source lot, inspection counts and accepted, held, rejected or rework quantities before posting a decision.

Business connection
Inspection outcomes must reconcile to the inspected quantity and authorized workflow.

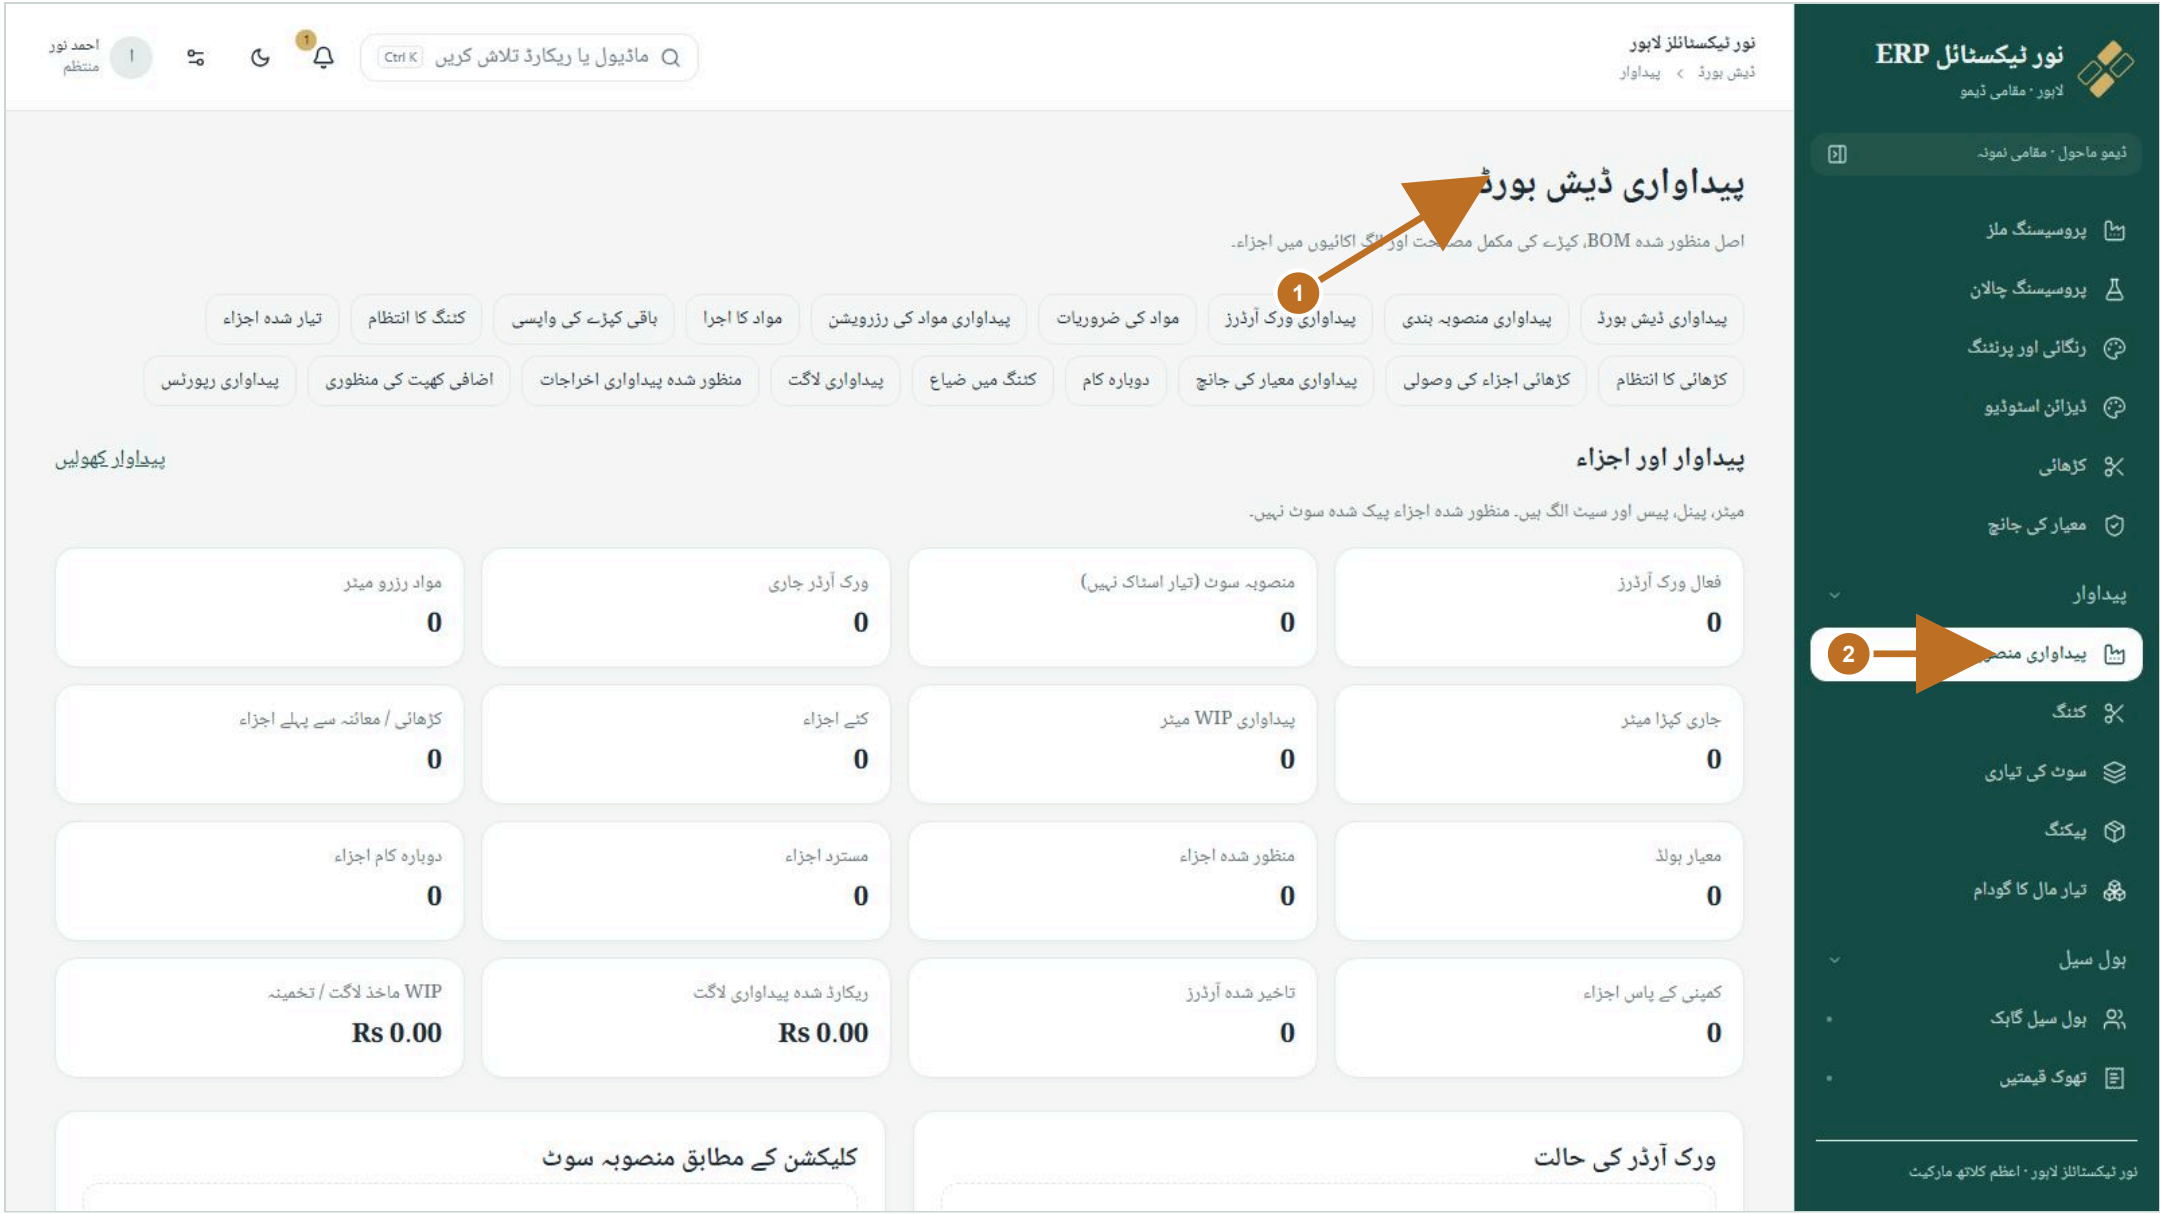

Form / next step
No direct form on this screen. Use its linked child form or open a source record to continue.

23 Production planning & work orders

پیداواری منصوبہ بندی

Manufacturing

AVAILABLE IN THIS DEMO

1 Screen purpose
Plans and work orders that translate an approved design and BOM into factory work.

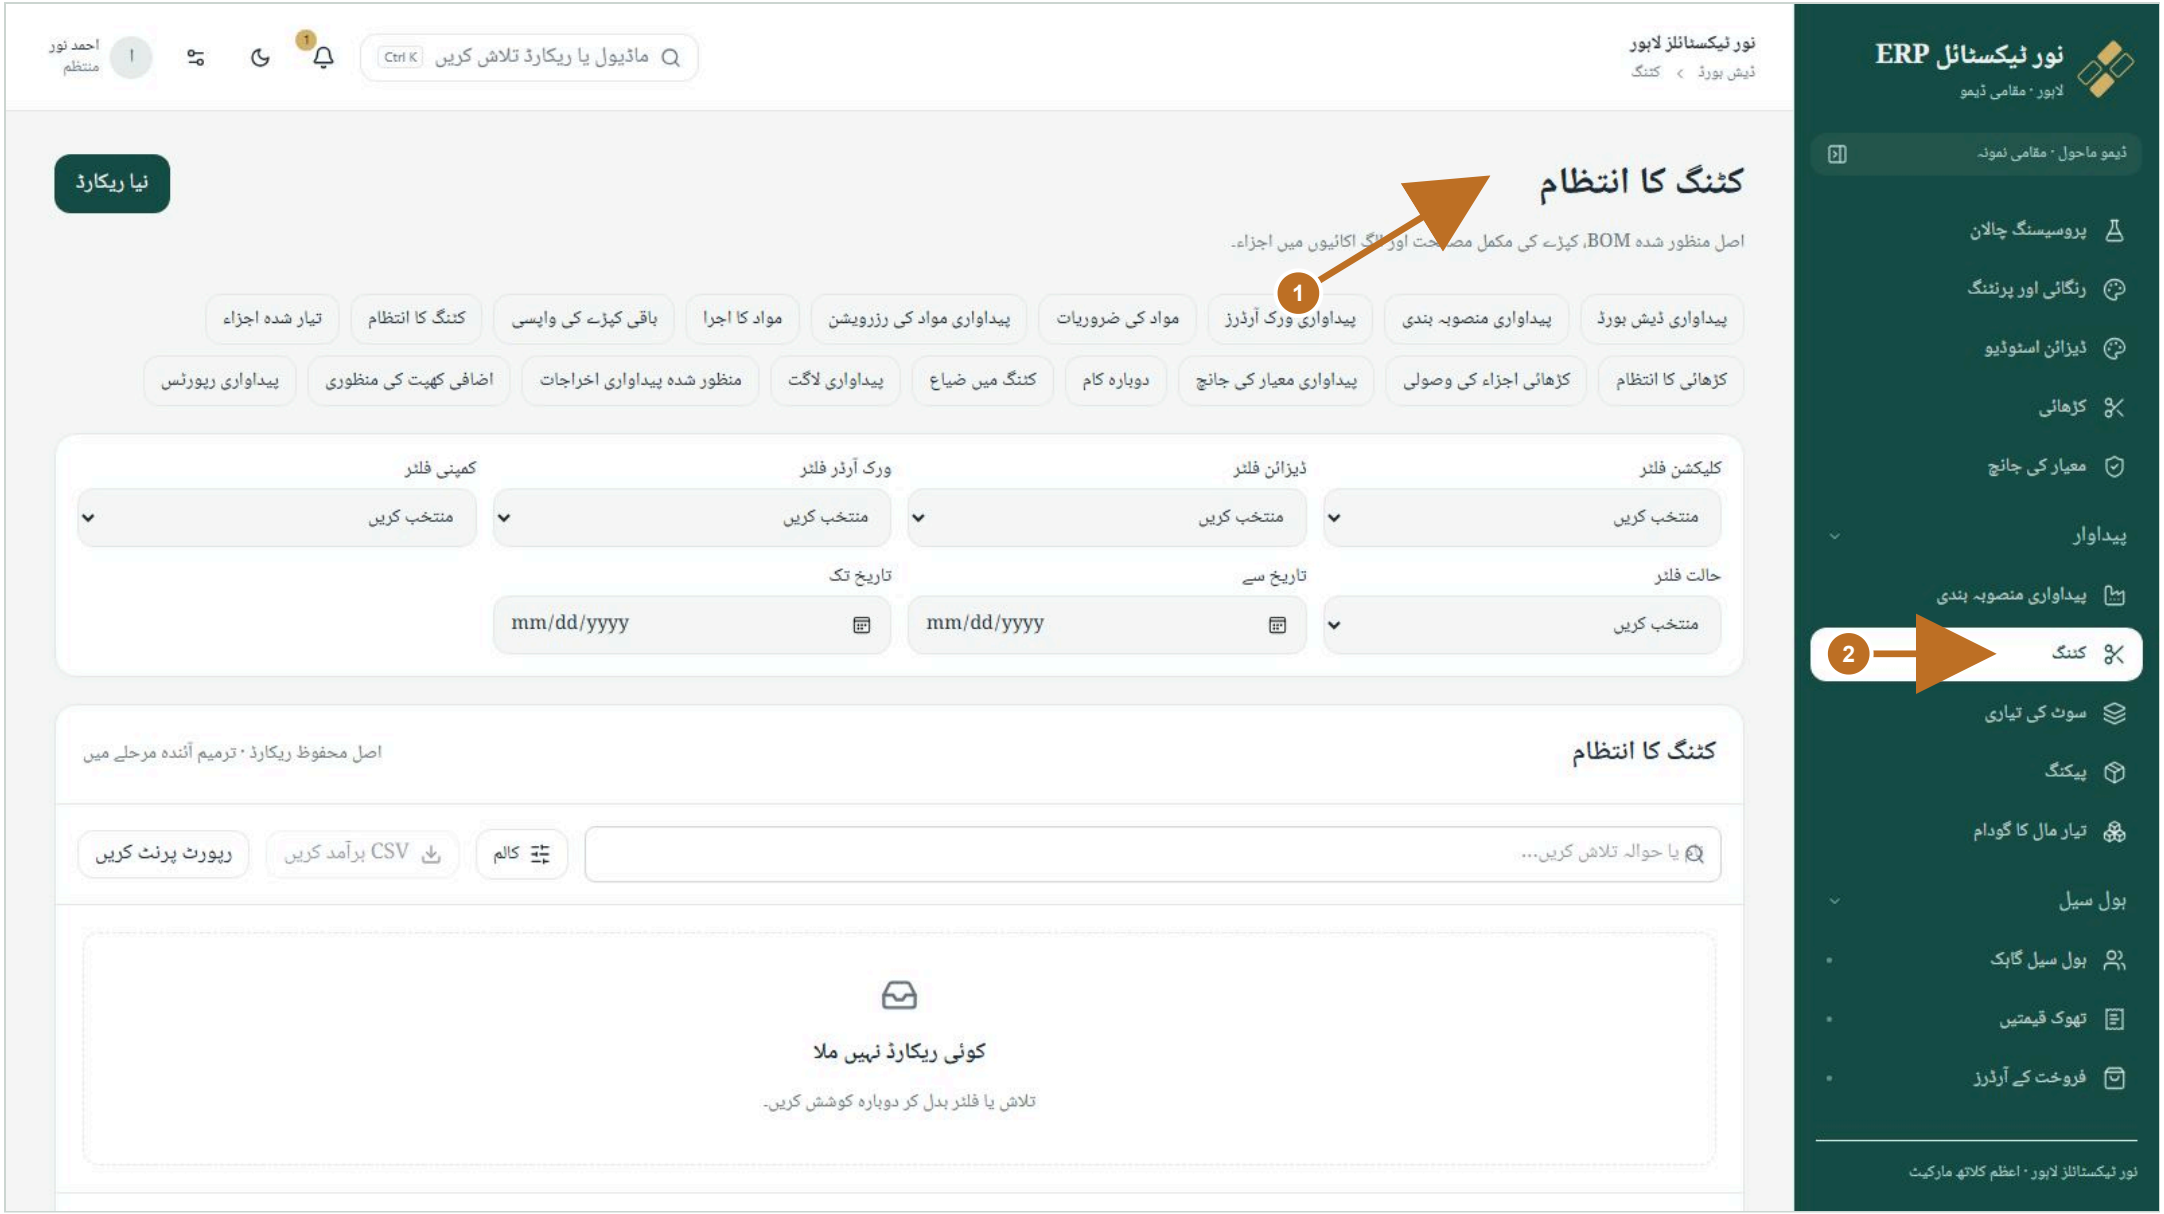

2 Navigation & use
Create a plan from approved inputs, obtain the required approvals and follow its resulting work order.

Business connection
Material reservations and issues are source-linked; a plan alone does not consume stock.

Form / next step
No direct form on this screen. Use its linked child form or open a source record to continue.

24 Cutting & components کٹنگ

Manufacturing AVAILABLE IN THIS DEMO

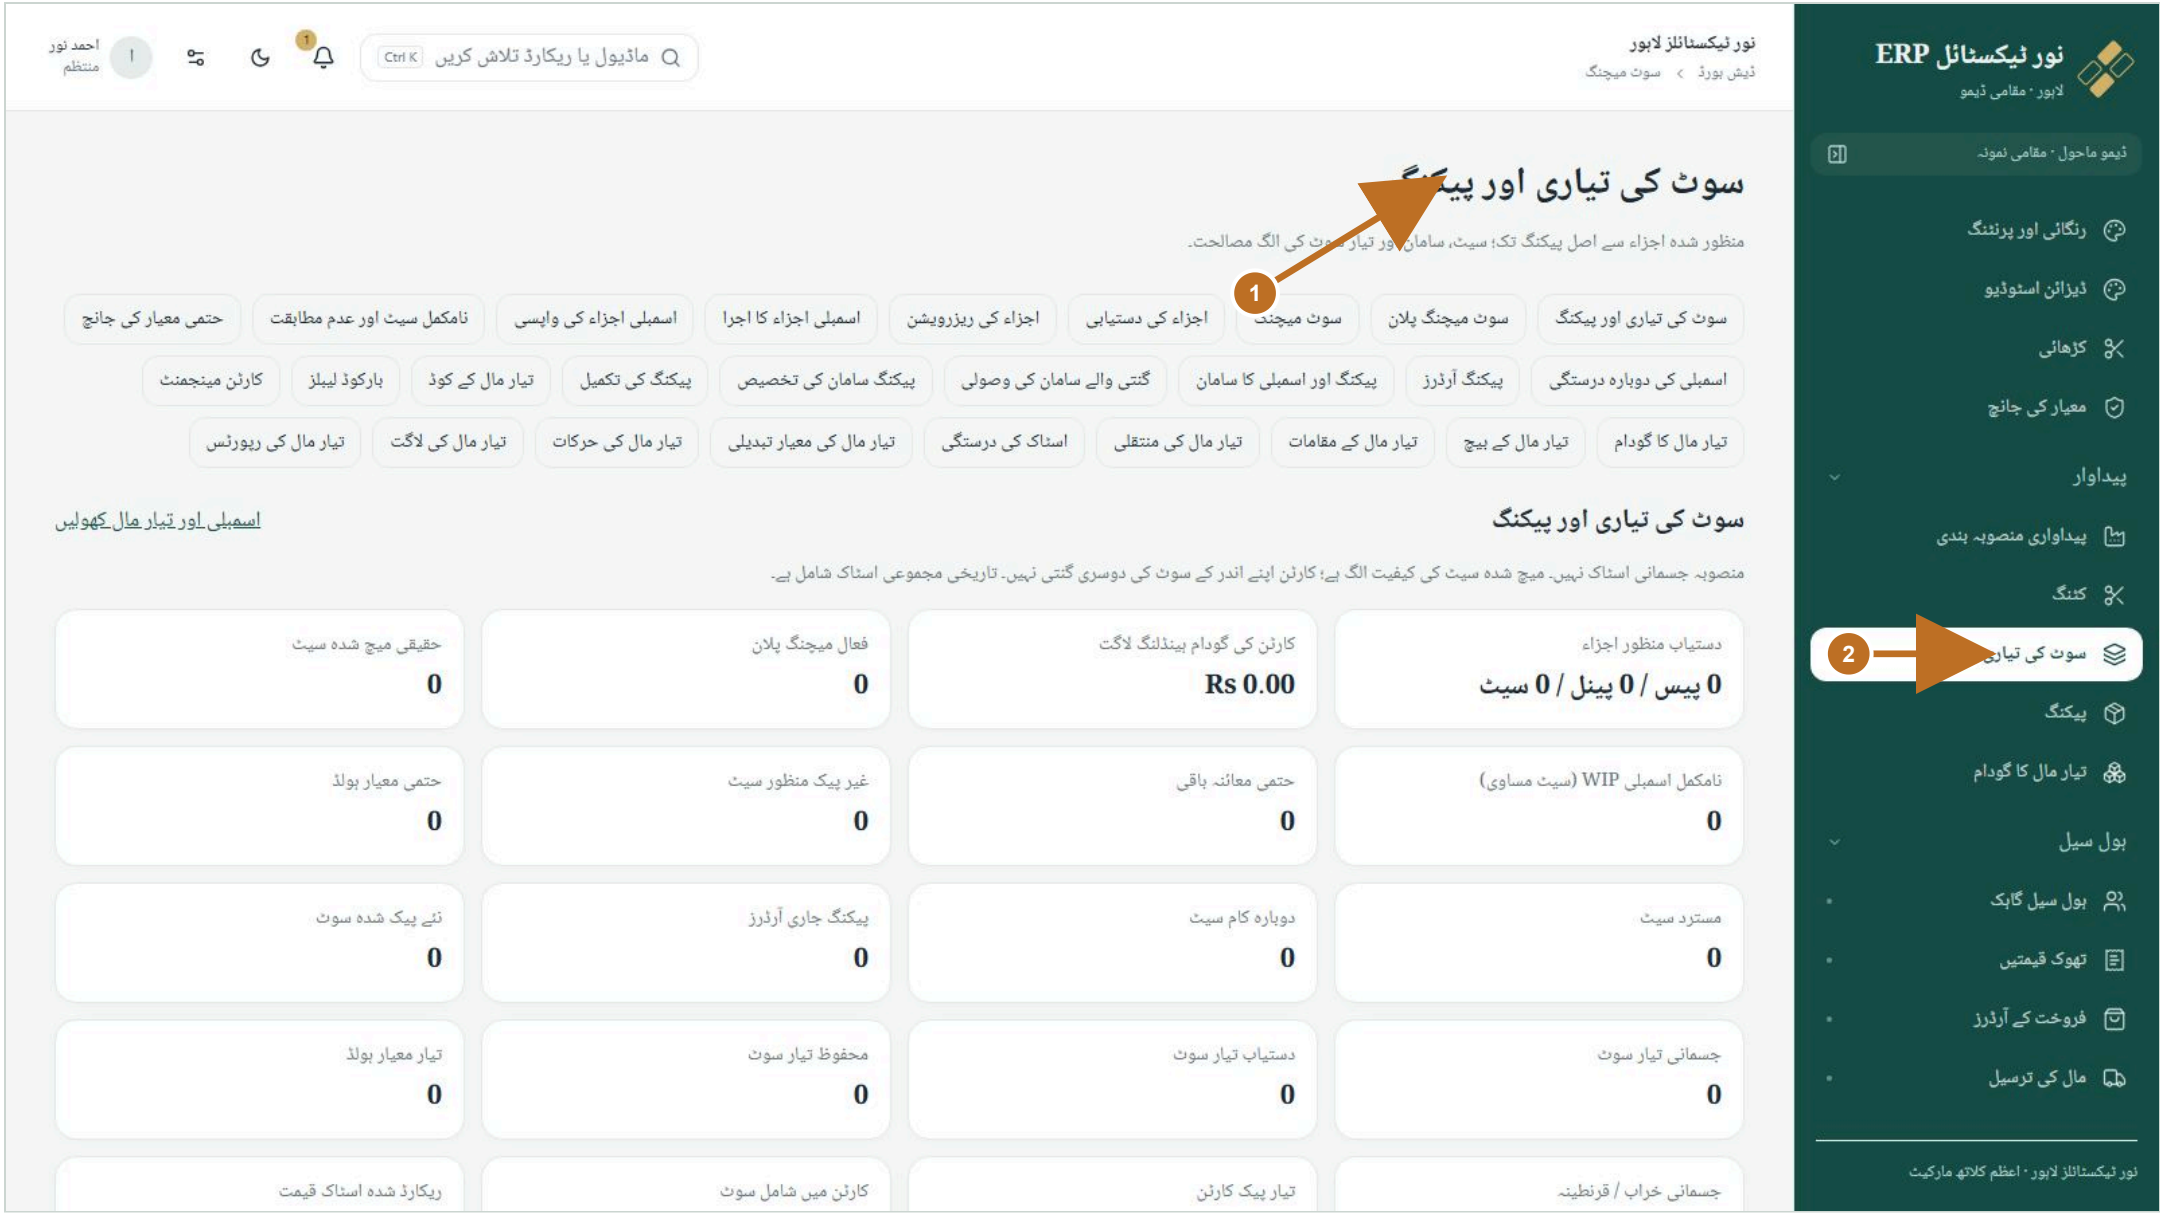

1 Screen purpose
The process that converts issued fabric into count-based component lots.

2 Navigation & use
Record the source work order/issue, material use and produced component count; route results through inspection.

Business connection
Meters and component counts are separate units and must not be converted implicitly.

Form / next step
No direct form on this screen. Use its linked child form or open a source record to continue.

1 Screen purpose
The matching workflow that combines accepted components into suit sets.

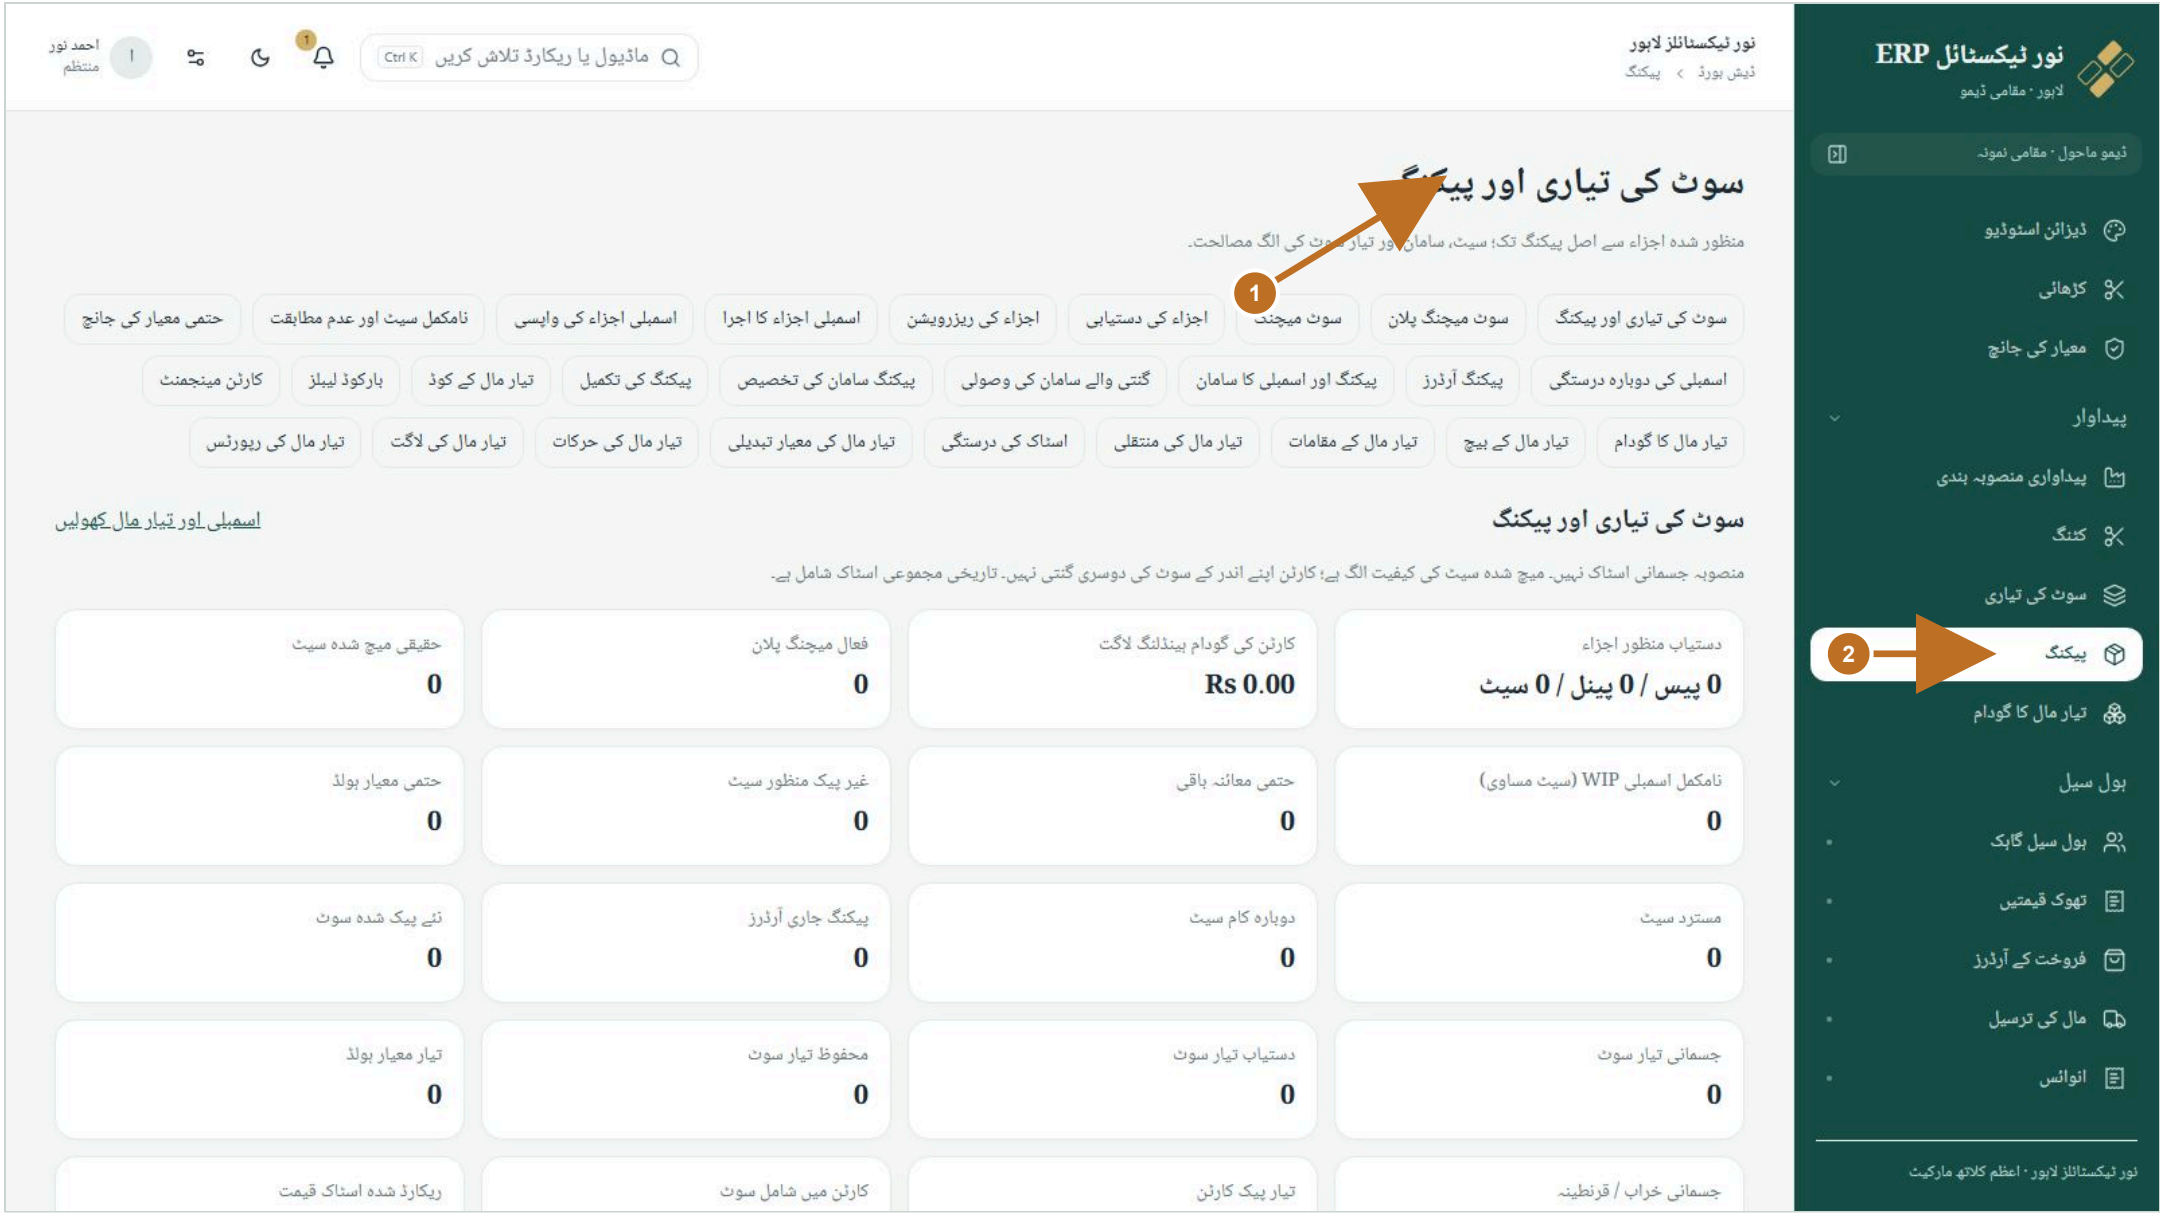

2 Navigation & use
Select compatible, accepted component lots for the production order and record assembly/QC outcomes.

Business connection
A complete set requires the correct pieces and accepted quantities; it is not yet packaged inventory.

Form / next step
No direct form on this screen. Use its linked child form or open a source record to continue.

26 Packaging پیکنگ

Manufacturing AVAILABLE IN THIS DEMO

1 Screen purpose
The process that packs accepted, matched finished suits into tracked finished-goods lots/cartons.

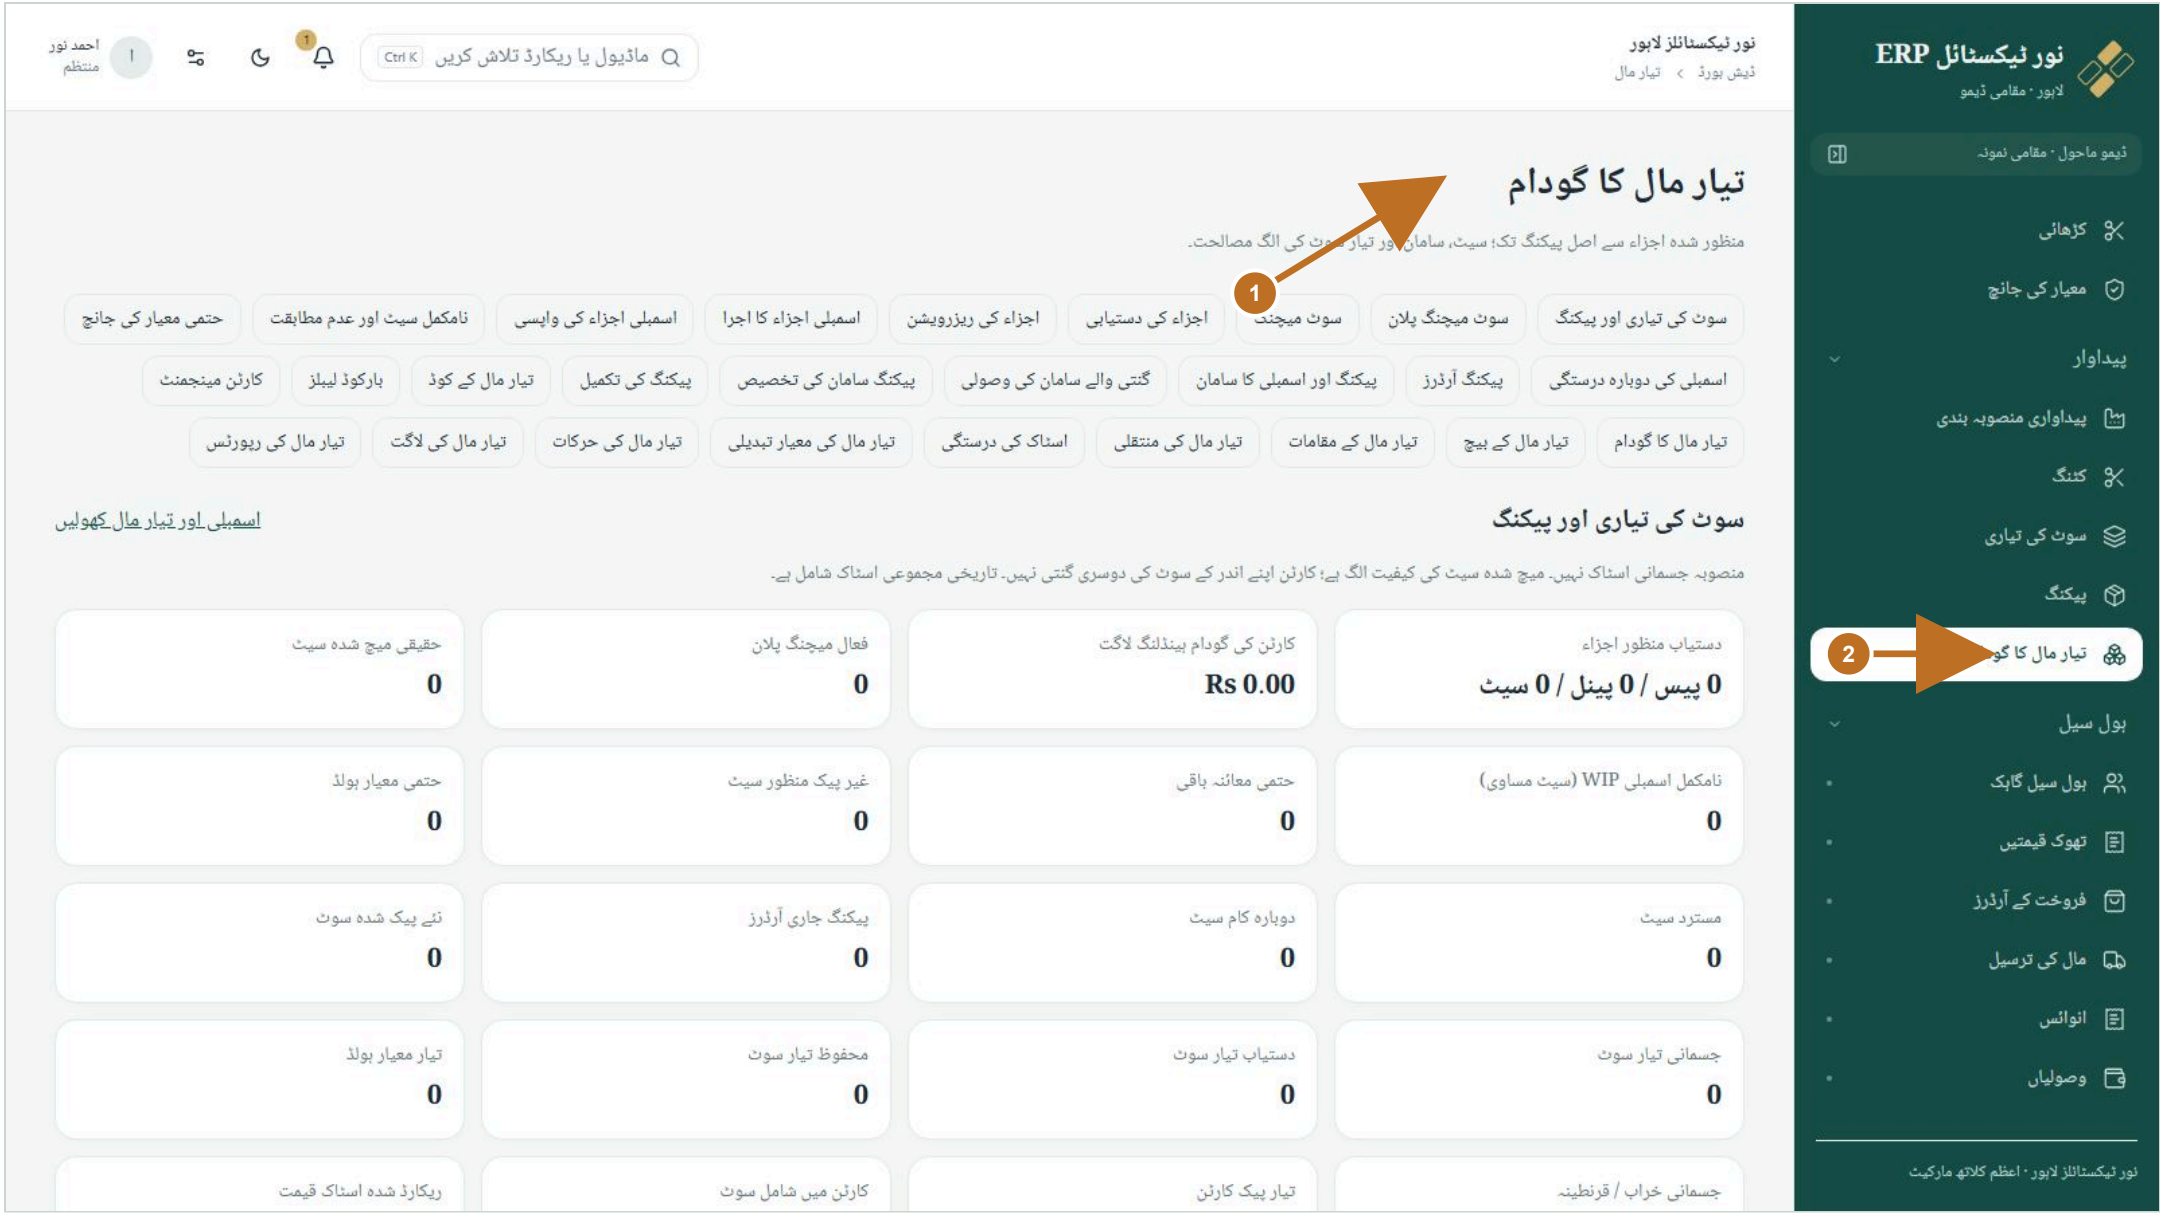

2 Navigation & use
Select eligible completed suits, record counted packaging materials and create the supported package/carton records.

Business connection
Packaging is a counted, source-linked transaction; carton membership itself does not create stock.

Form / next step
No direct form on this screen. Use its linked child form or open a source record to continue.

27 Finished-goods inventory تیار مال کا گودام

Manufacturing AVAILABLE IN THIS DEMO

1 Screen purpose
The stock view for finished, packaged suits, lots, locations and identifiers.

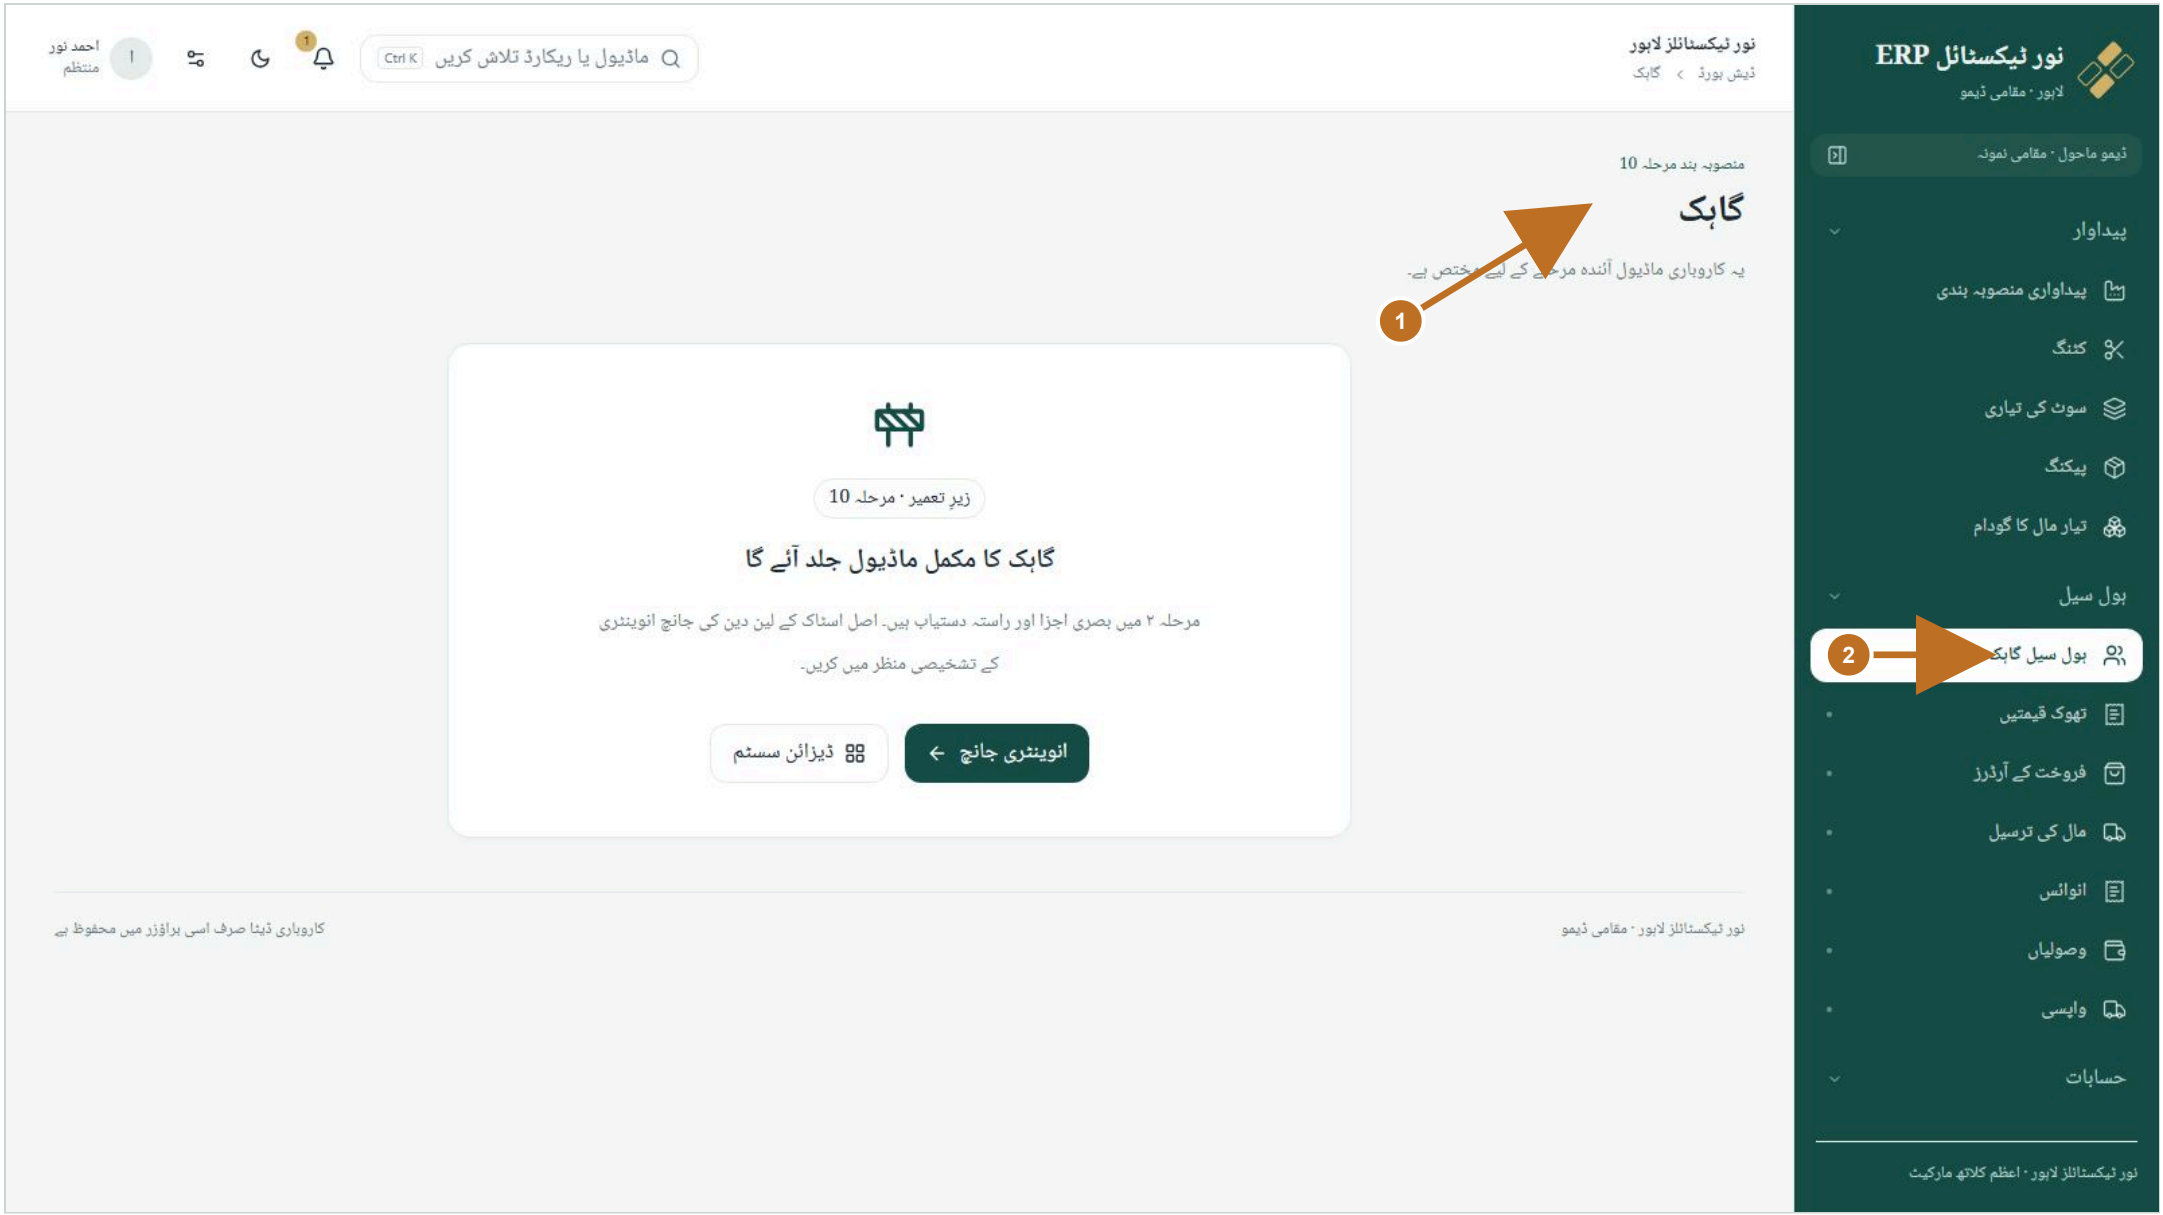

2 Navigation & use
Review eligible quantities, SKU/barcode and carton/location details before downstream wholesale activity.

Business connection
Availability excludes held, damaged and reserved stock; sales and dispatch modules are planned.

Form / next step
No direct form on this screen. Use its linked child form or open a source record to continue.

28 Wholesale customers بول سیل گاہک

Wholesale PLANNED — NOT OPERATIONAL

1 Screen purpose
The planned customer master for the wholesale lifecycle.

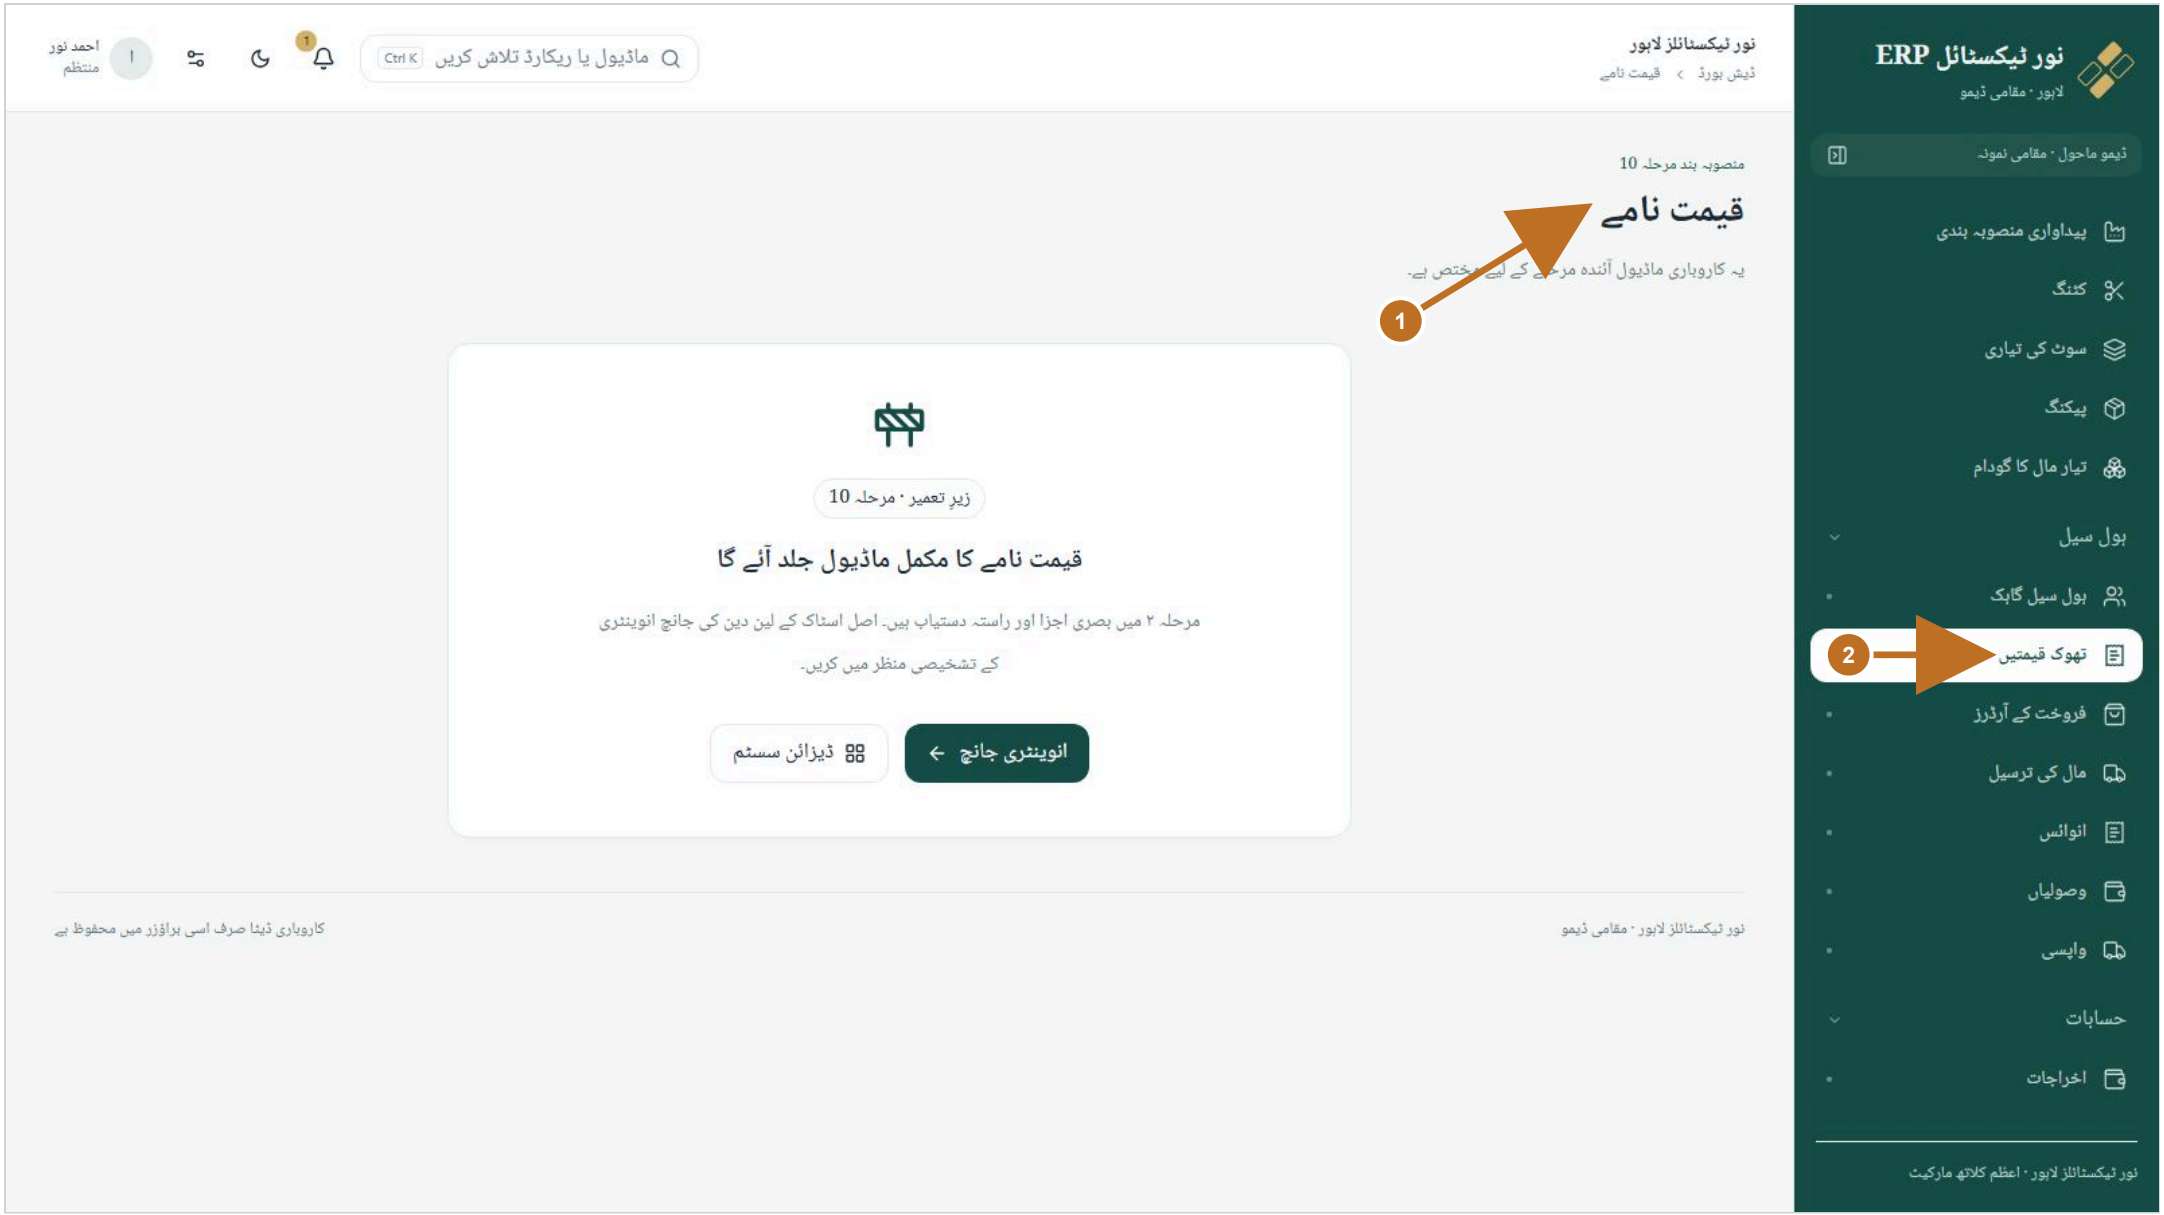

2 Navigation & use
When available, maintain customer identity and commercial terms before preparing quotations or orders.

Business connection
This is currently a roadmap placeholder; customer maintenance is not available.

Form / next step
No active data-entry form: this route is a planned placeholder.

29 Wholesale pricing تھوک قیمتیں

Wholesale PLANNED — NOT OPERATIONAL

1 Screen purpose
The planned price-list and customer pricing area.

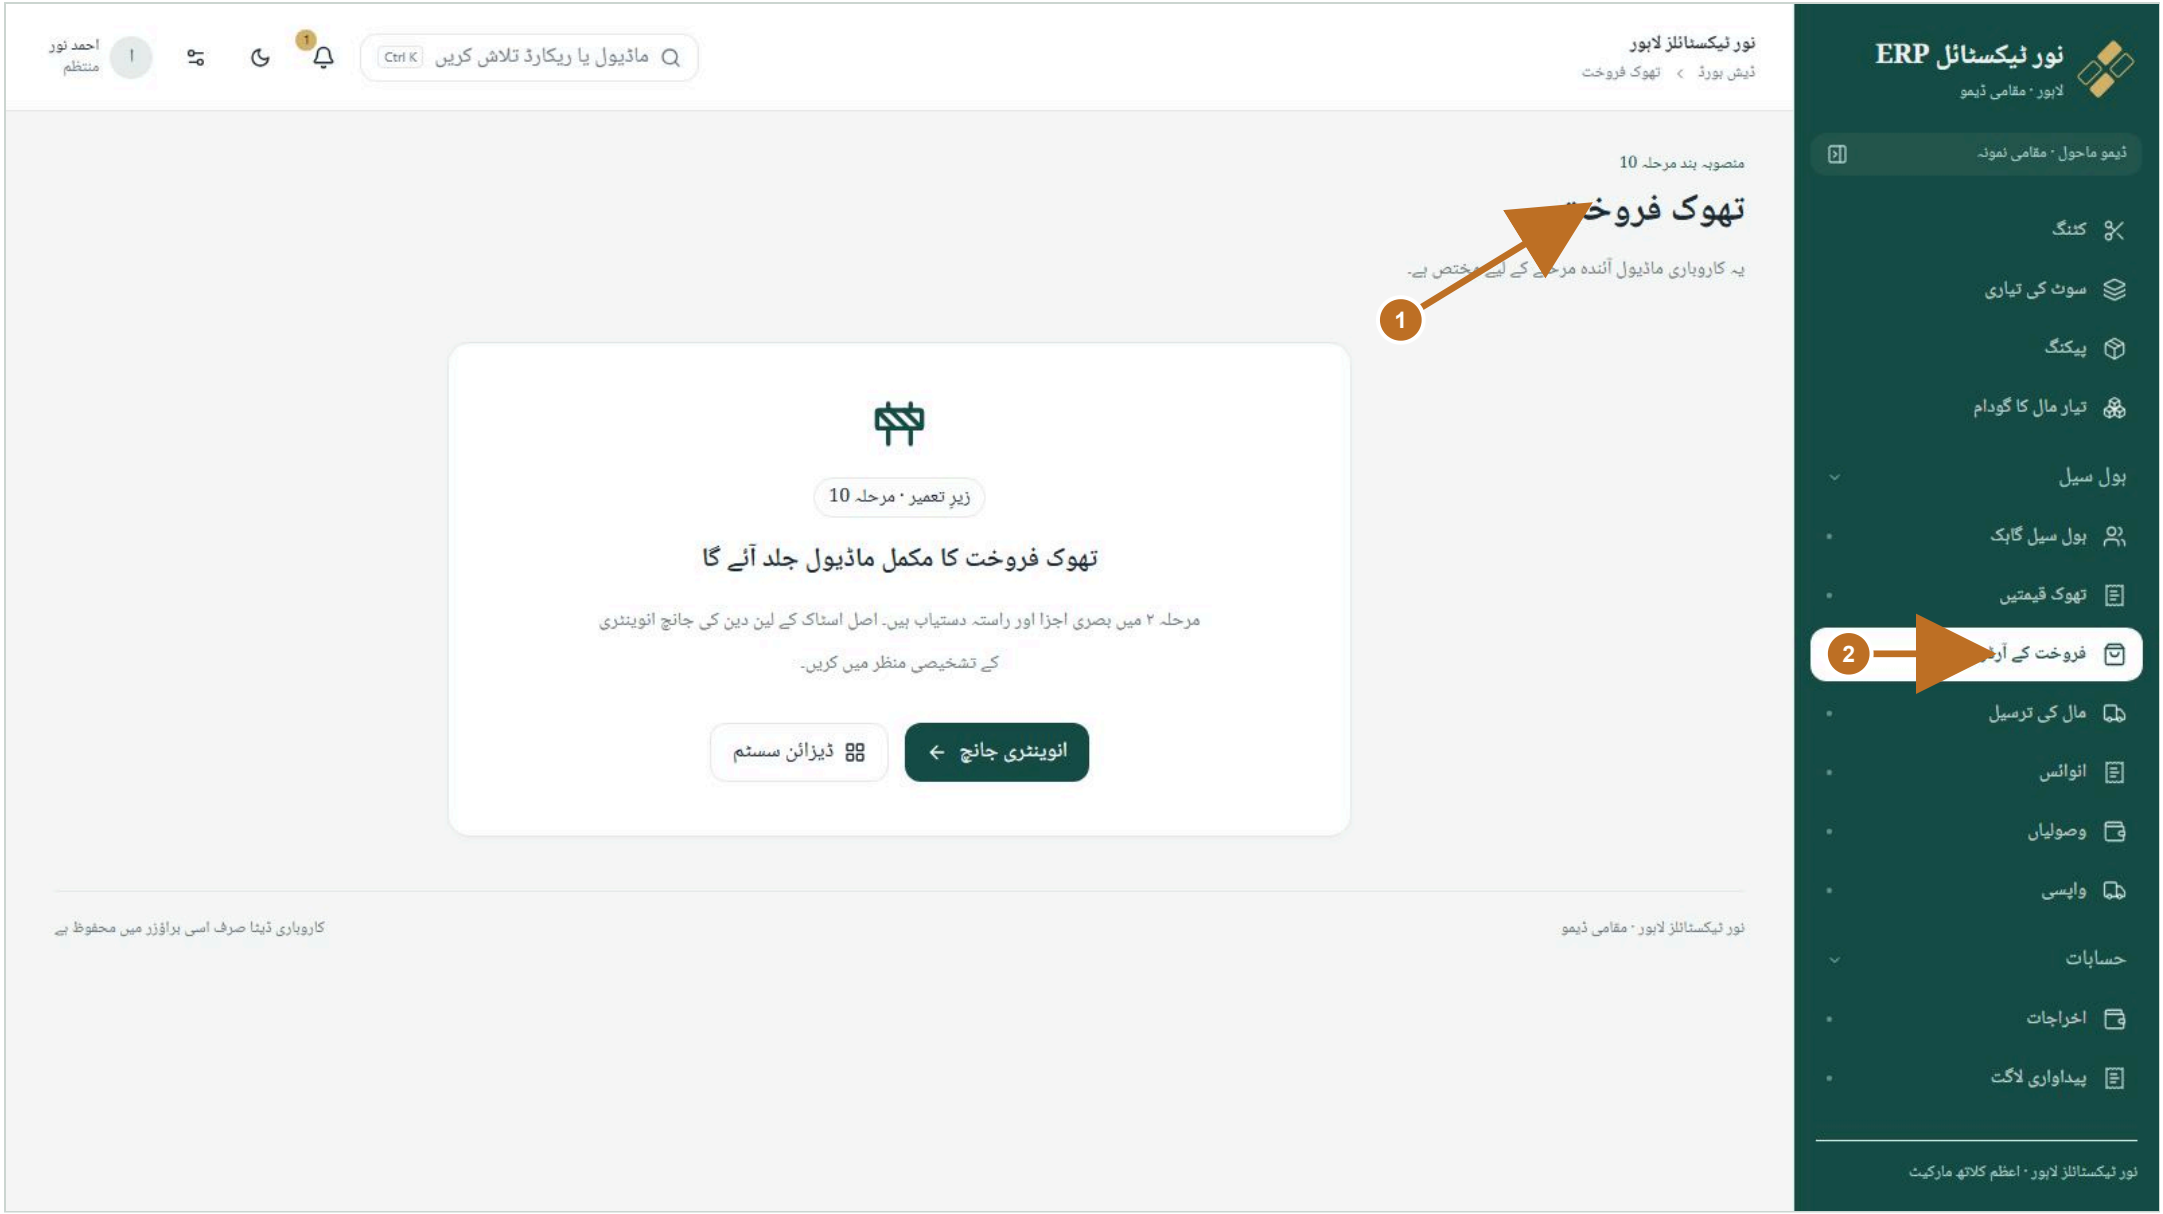

2 Navigation & use
Use it to define approved wholesale prices before quoting or accepting orders once implemented.

Business connection
This screen is a roadmap placeholder; it does not set live selling prices.

Form / next step
No active data-entry form: this route is a planned placeholder.

30 Wholesale sales orders فروخت کے آرڈرز

Wholesale PLANNED — NOT OPERATIONAL

1 Screen purpose
The planned order register for customer demand and finished-goods reservations.

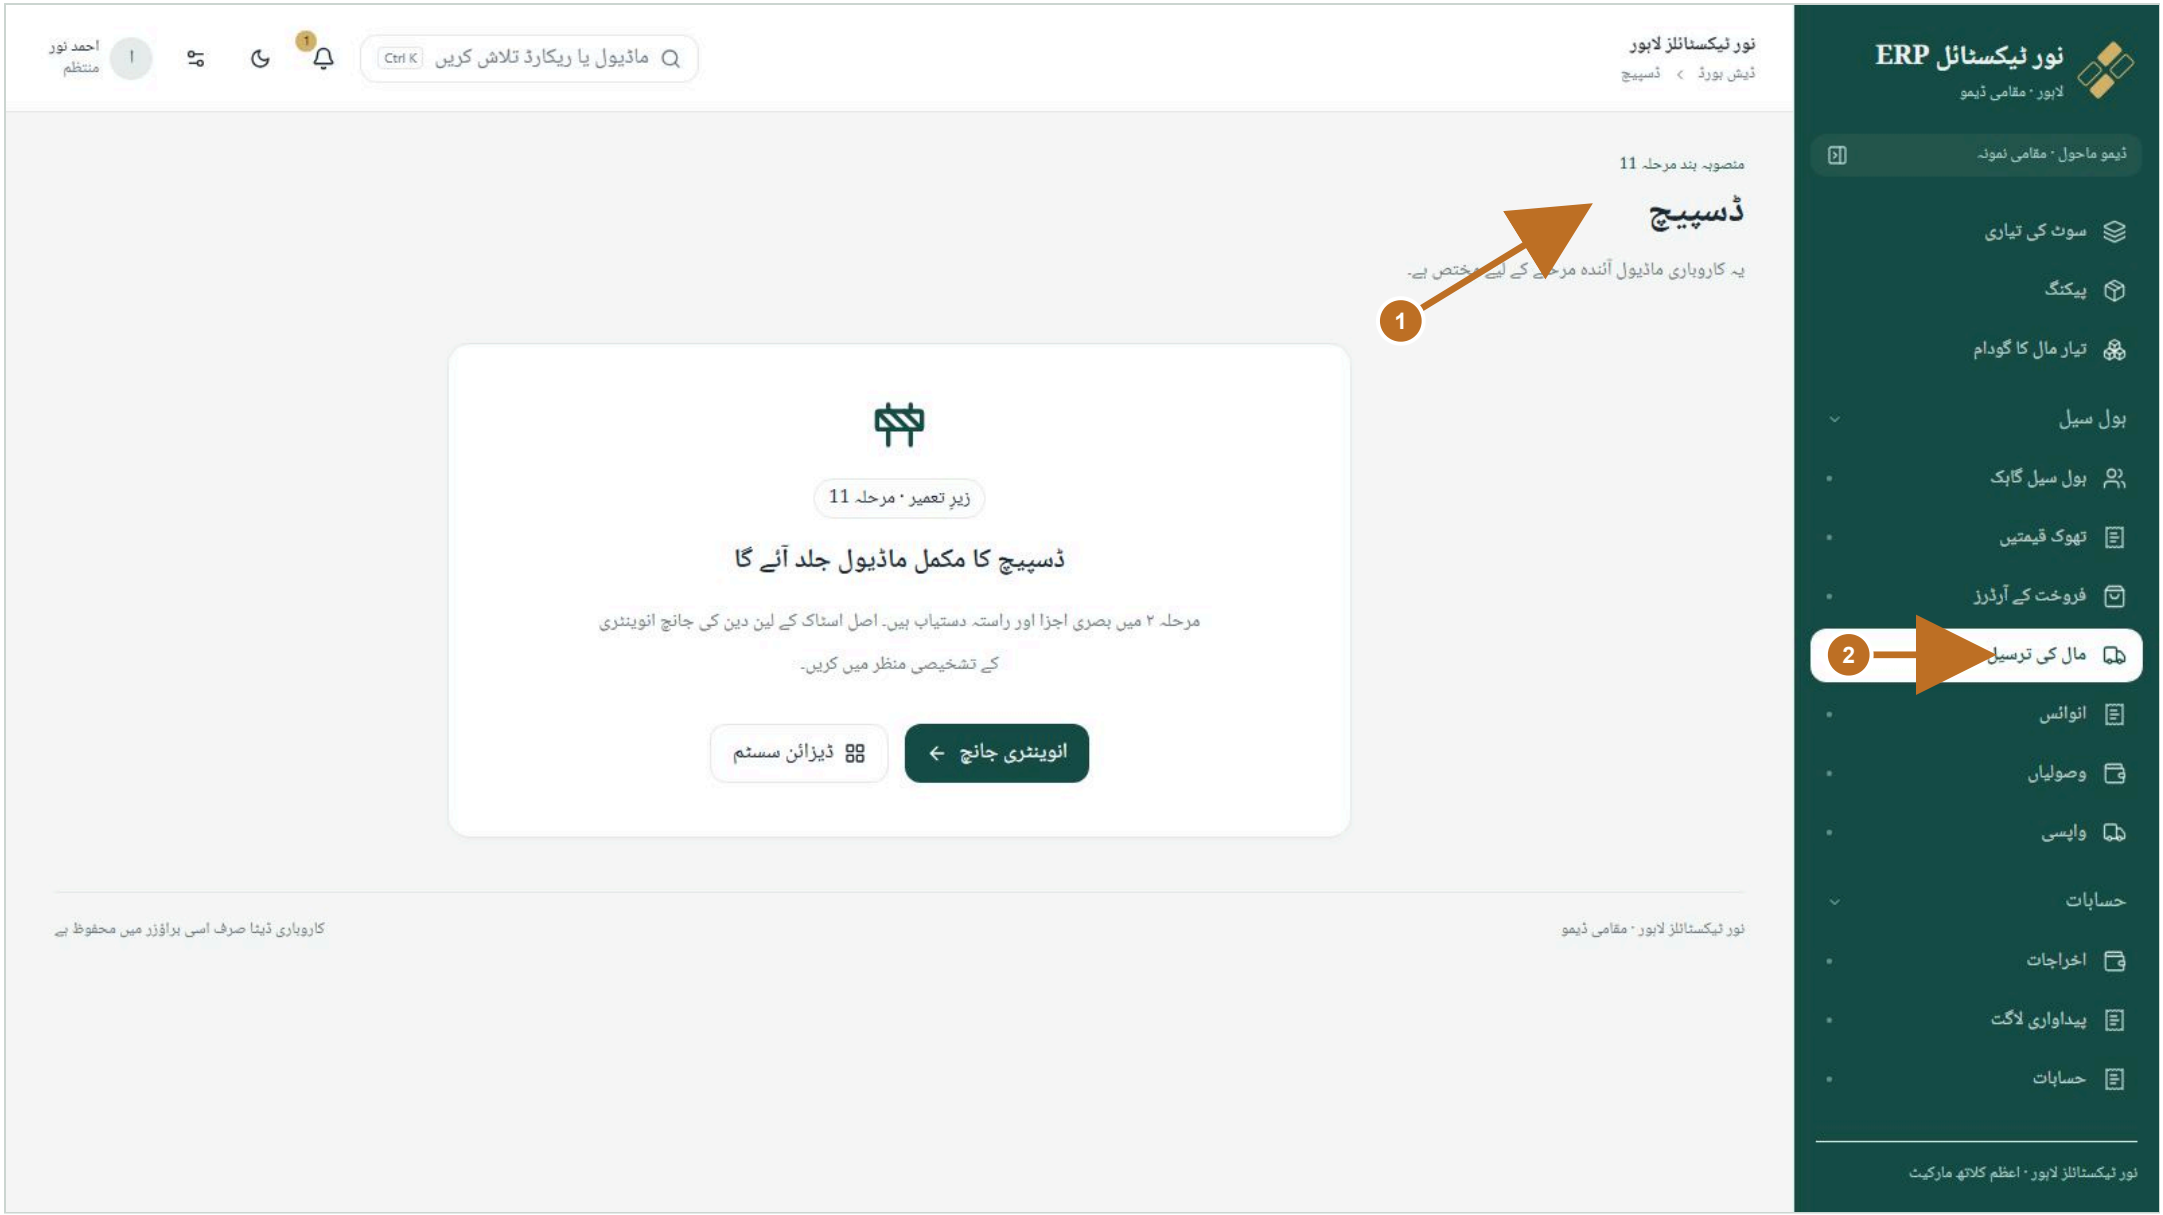

2 Navigation & use
Once implemented, create an order from an approved customer/pricing context and review reserved availability.

Business connection
This screen is a roadmap placeholder; orders do not currently reserve stock.

Form / next step
No active data-entry form: this route is a planned placeholder.

31 Dispatch مال کی ترسیل

Wholesale **PLANNED — NOT OPERATIONAL**

1 Screen purpose
The planned workflow for picking and shipping goods against approved wholesale orders.

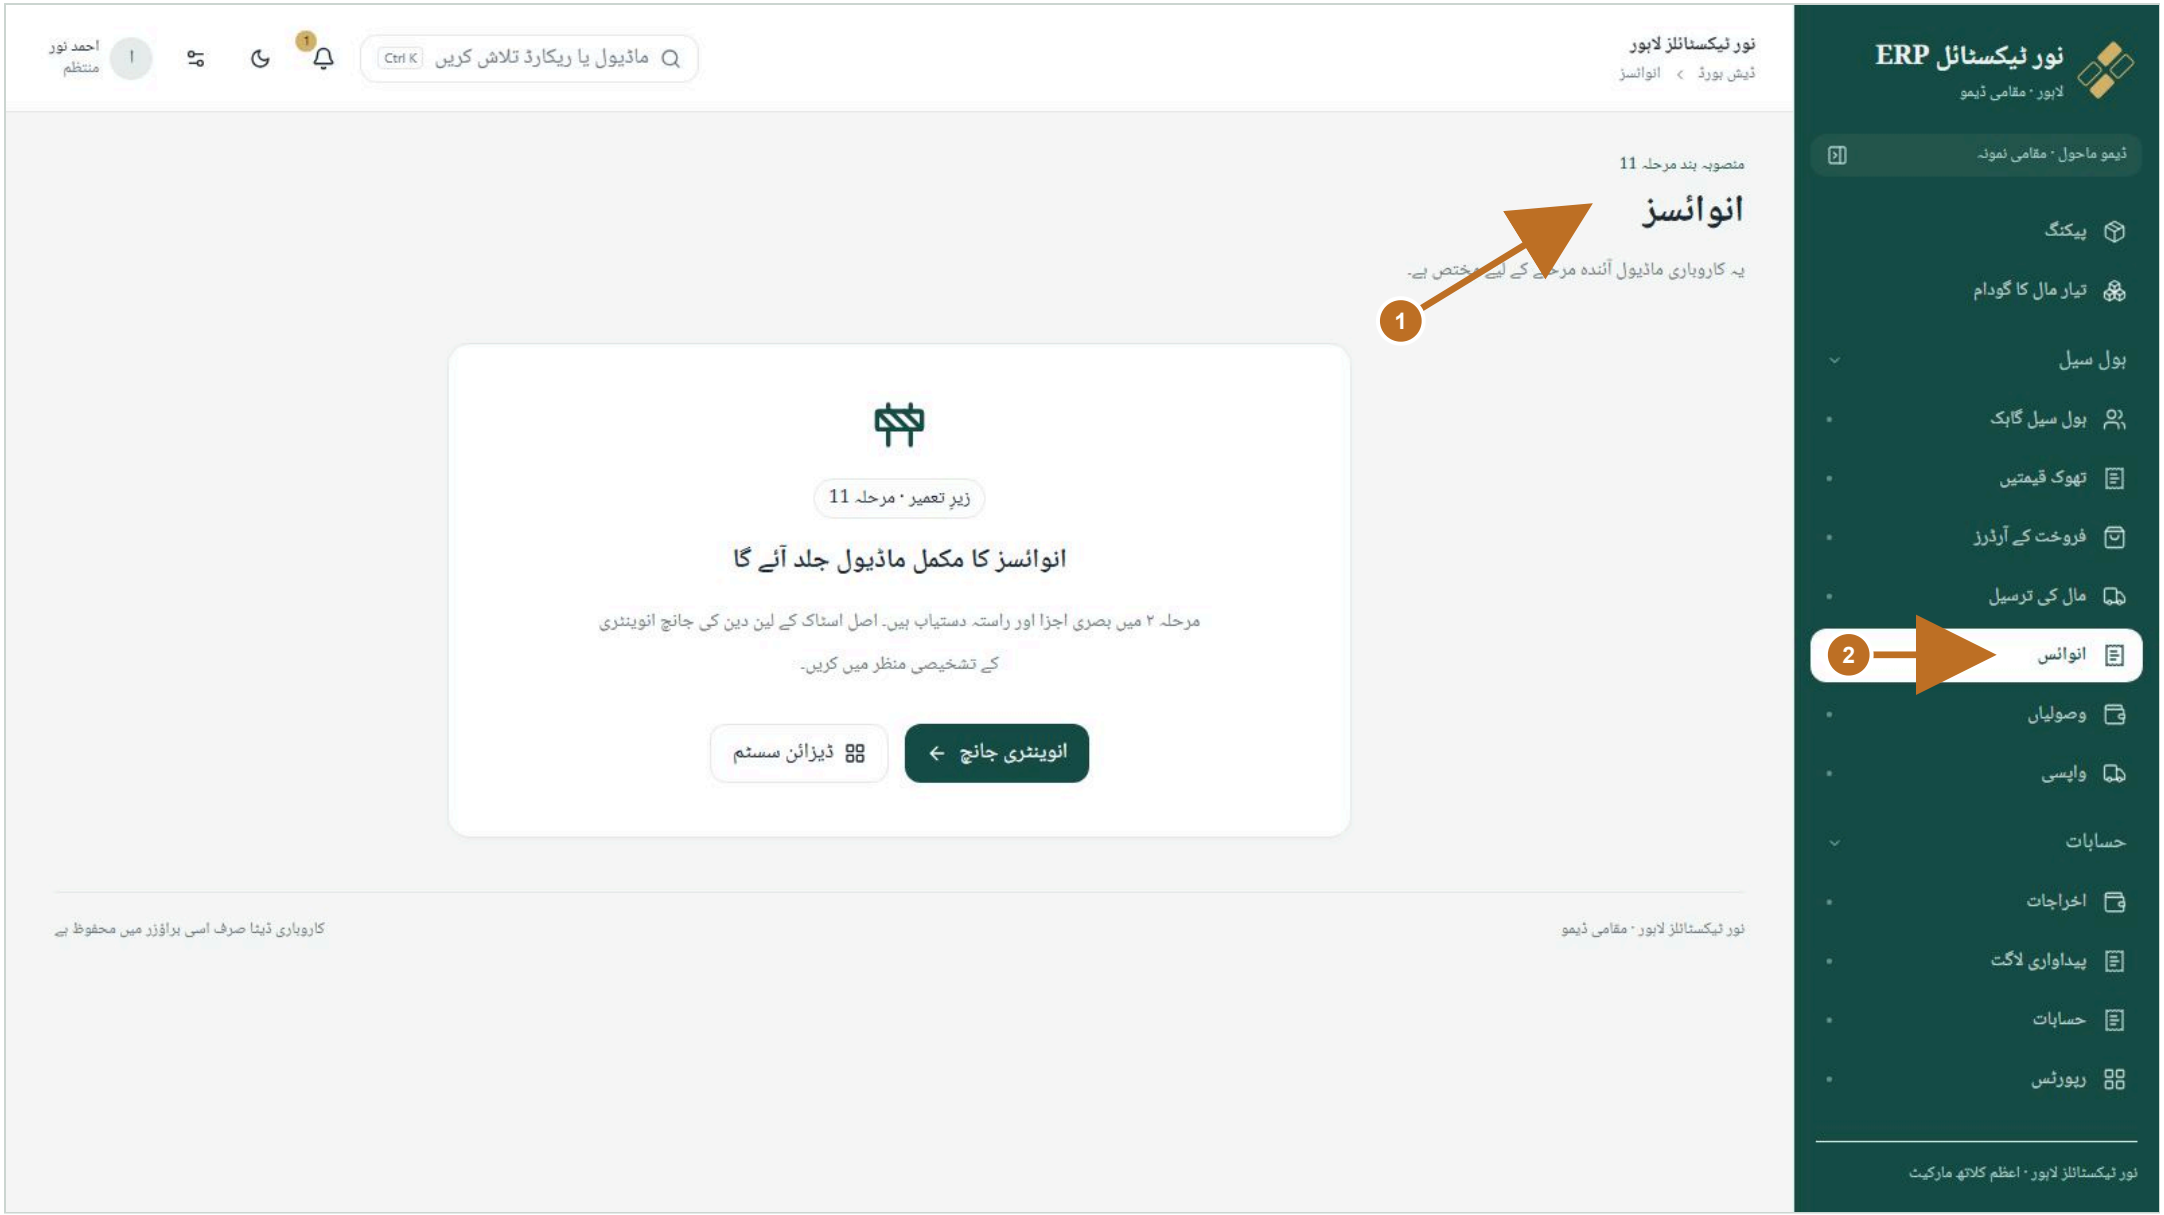

2 Navigation & use
When implemented, dispatch should consume the order's reserved, eligible finished lots.

Business connection
This screen is a roadmap placeholder; no stock is dispatched here.

Form / next step
No active data-entry form: this route is a planned placeholder.

32 Customer invoices انوائس

Wholesale PLANNED — NOT OPERATIONAL

1 Screen purpose
The planned customer billing register linked to wholesale sales and dispatch.

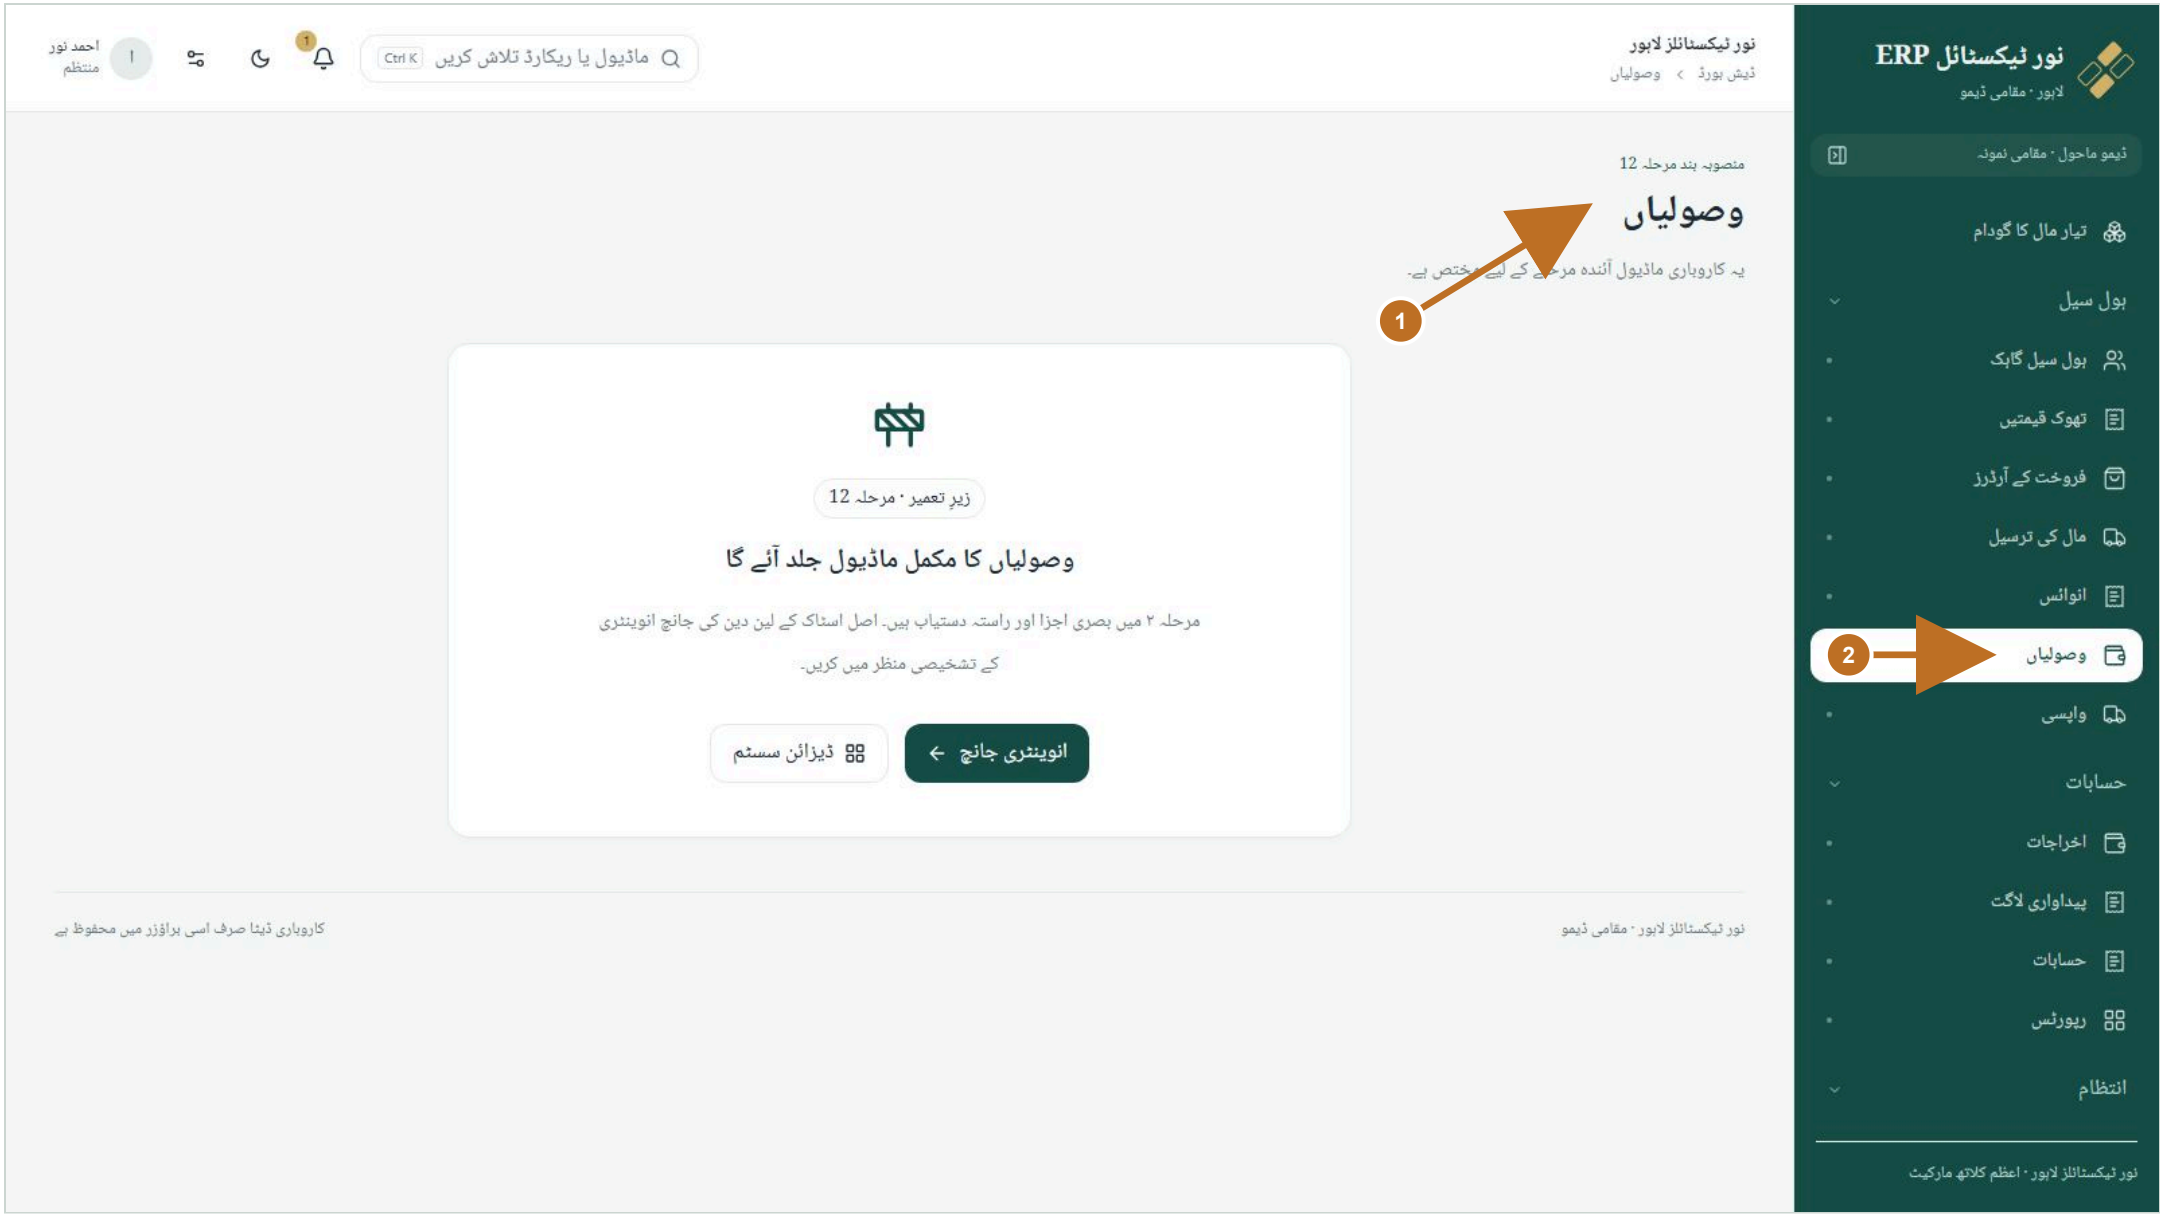

2 Navigation & use
When implemented, create and review invoices from supported sales documents.

Business connection
This screen is a roadmap placeholder; it does not create a receivable.

Form / next step
No active data-entry form: this route is a planned placeholder.

33 Customer receipts وصولیاں

Wholesale PLANNED — NOT OPERATIONAL

1 Screen purpose
The planned workflow for recording and allocating customer receipts.

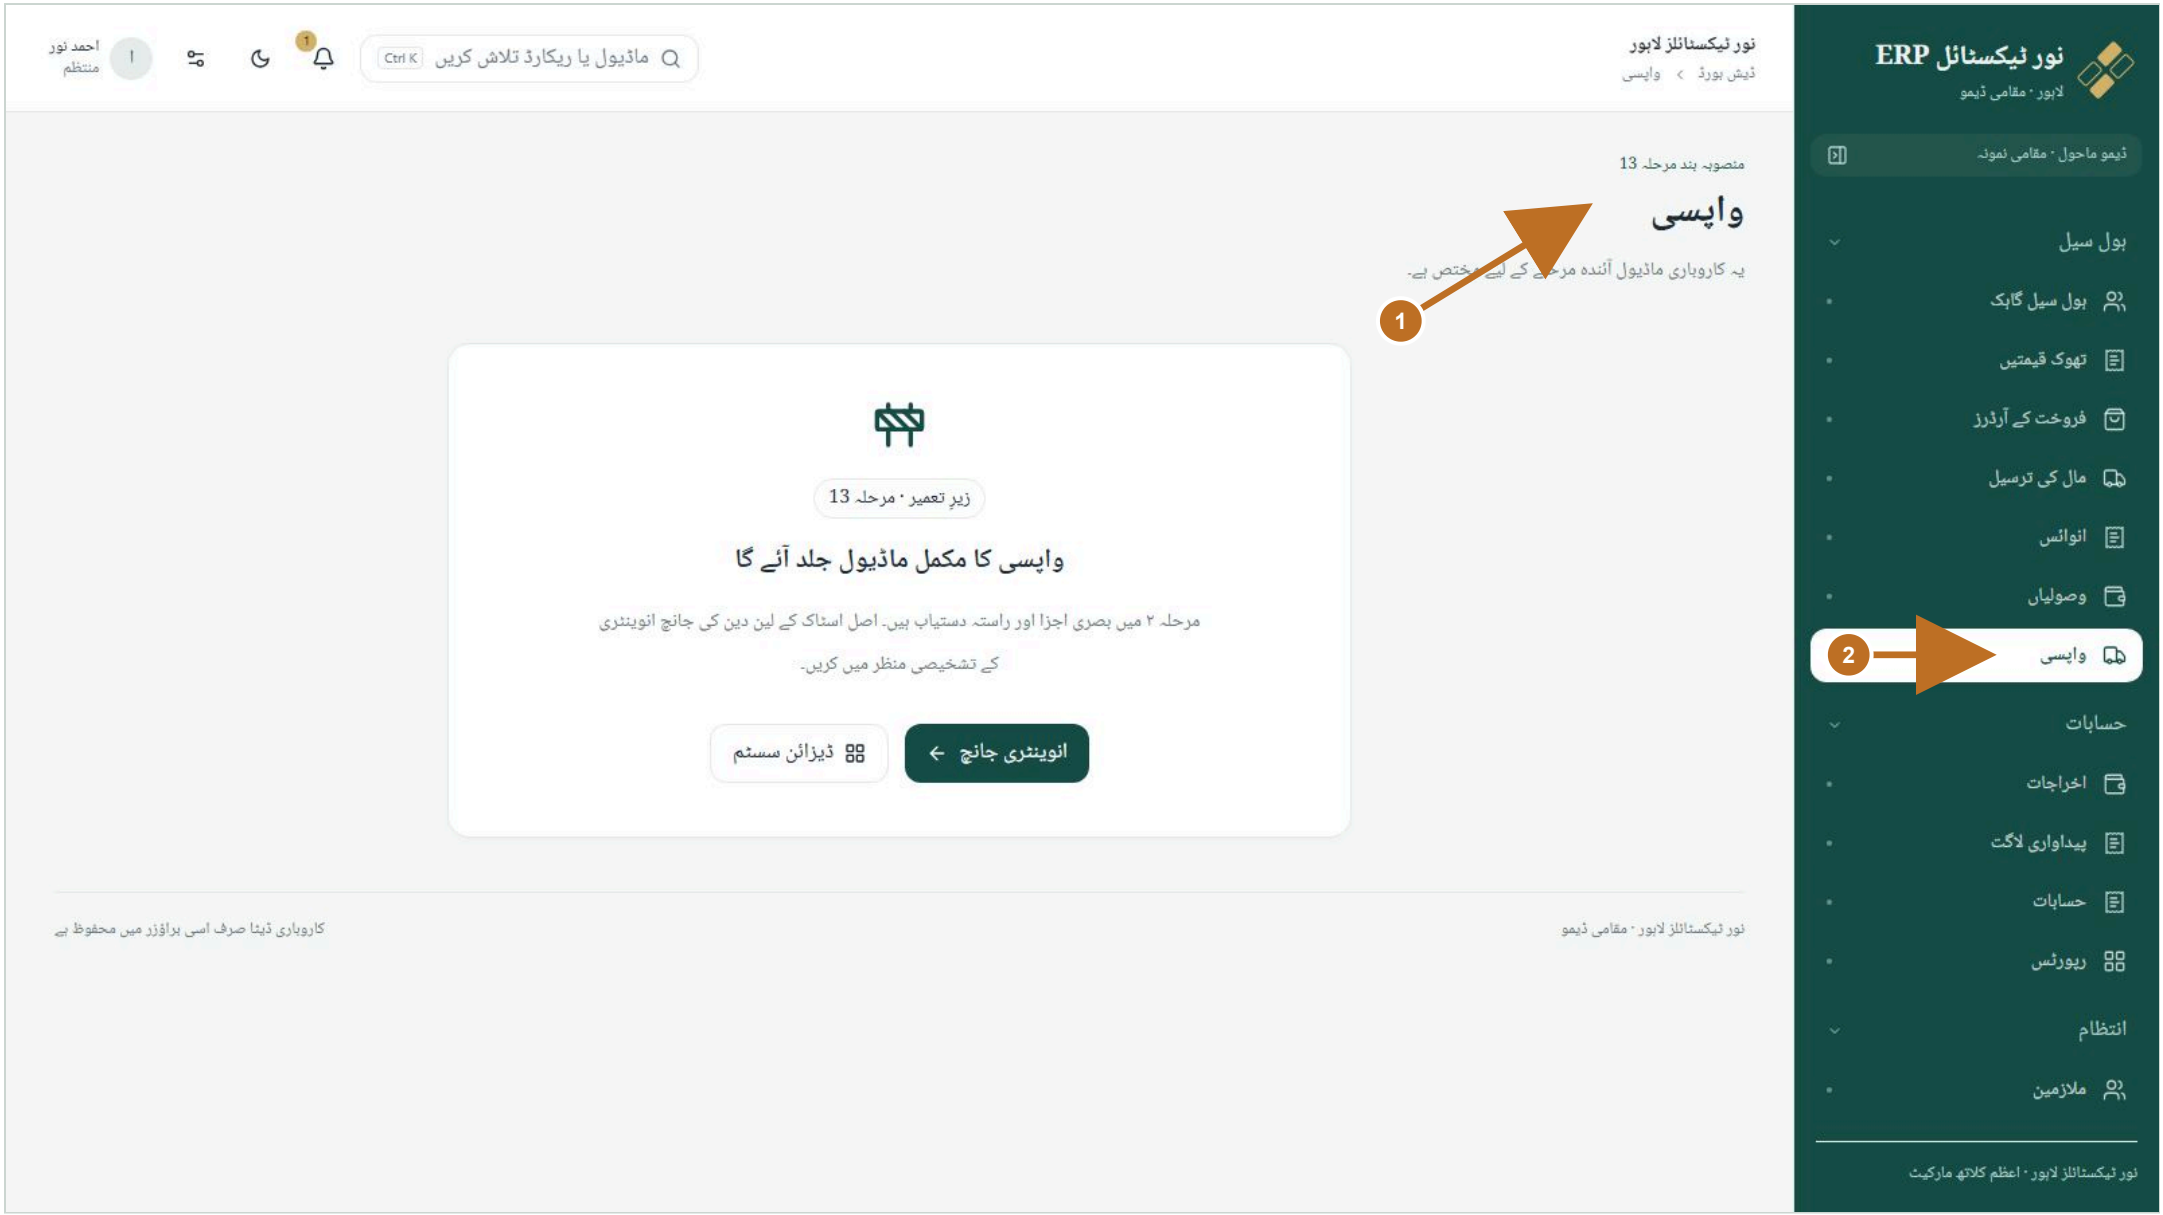

2 Navigation & use
When implemented, apply a receipt to the correct customer invoice or balance.

Business connection
This screen is a roadmap placeholder; no cash receipt is posted here.

Form / next step
No active data-entry form: this route is a planned placeholder.

34 Wholesale returns واپسی

Wholesale **PLANNED — NOT OPERATIONAL**

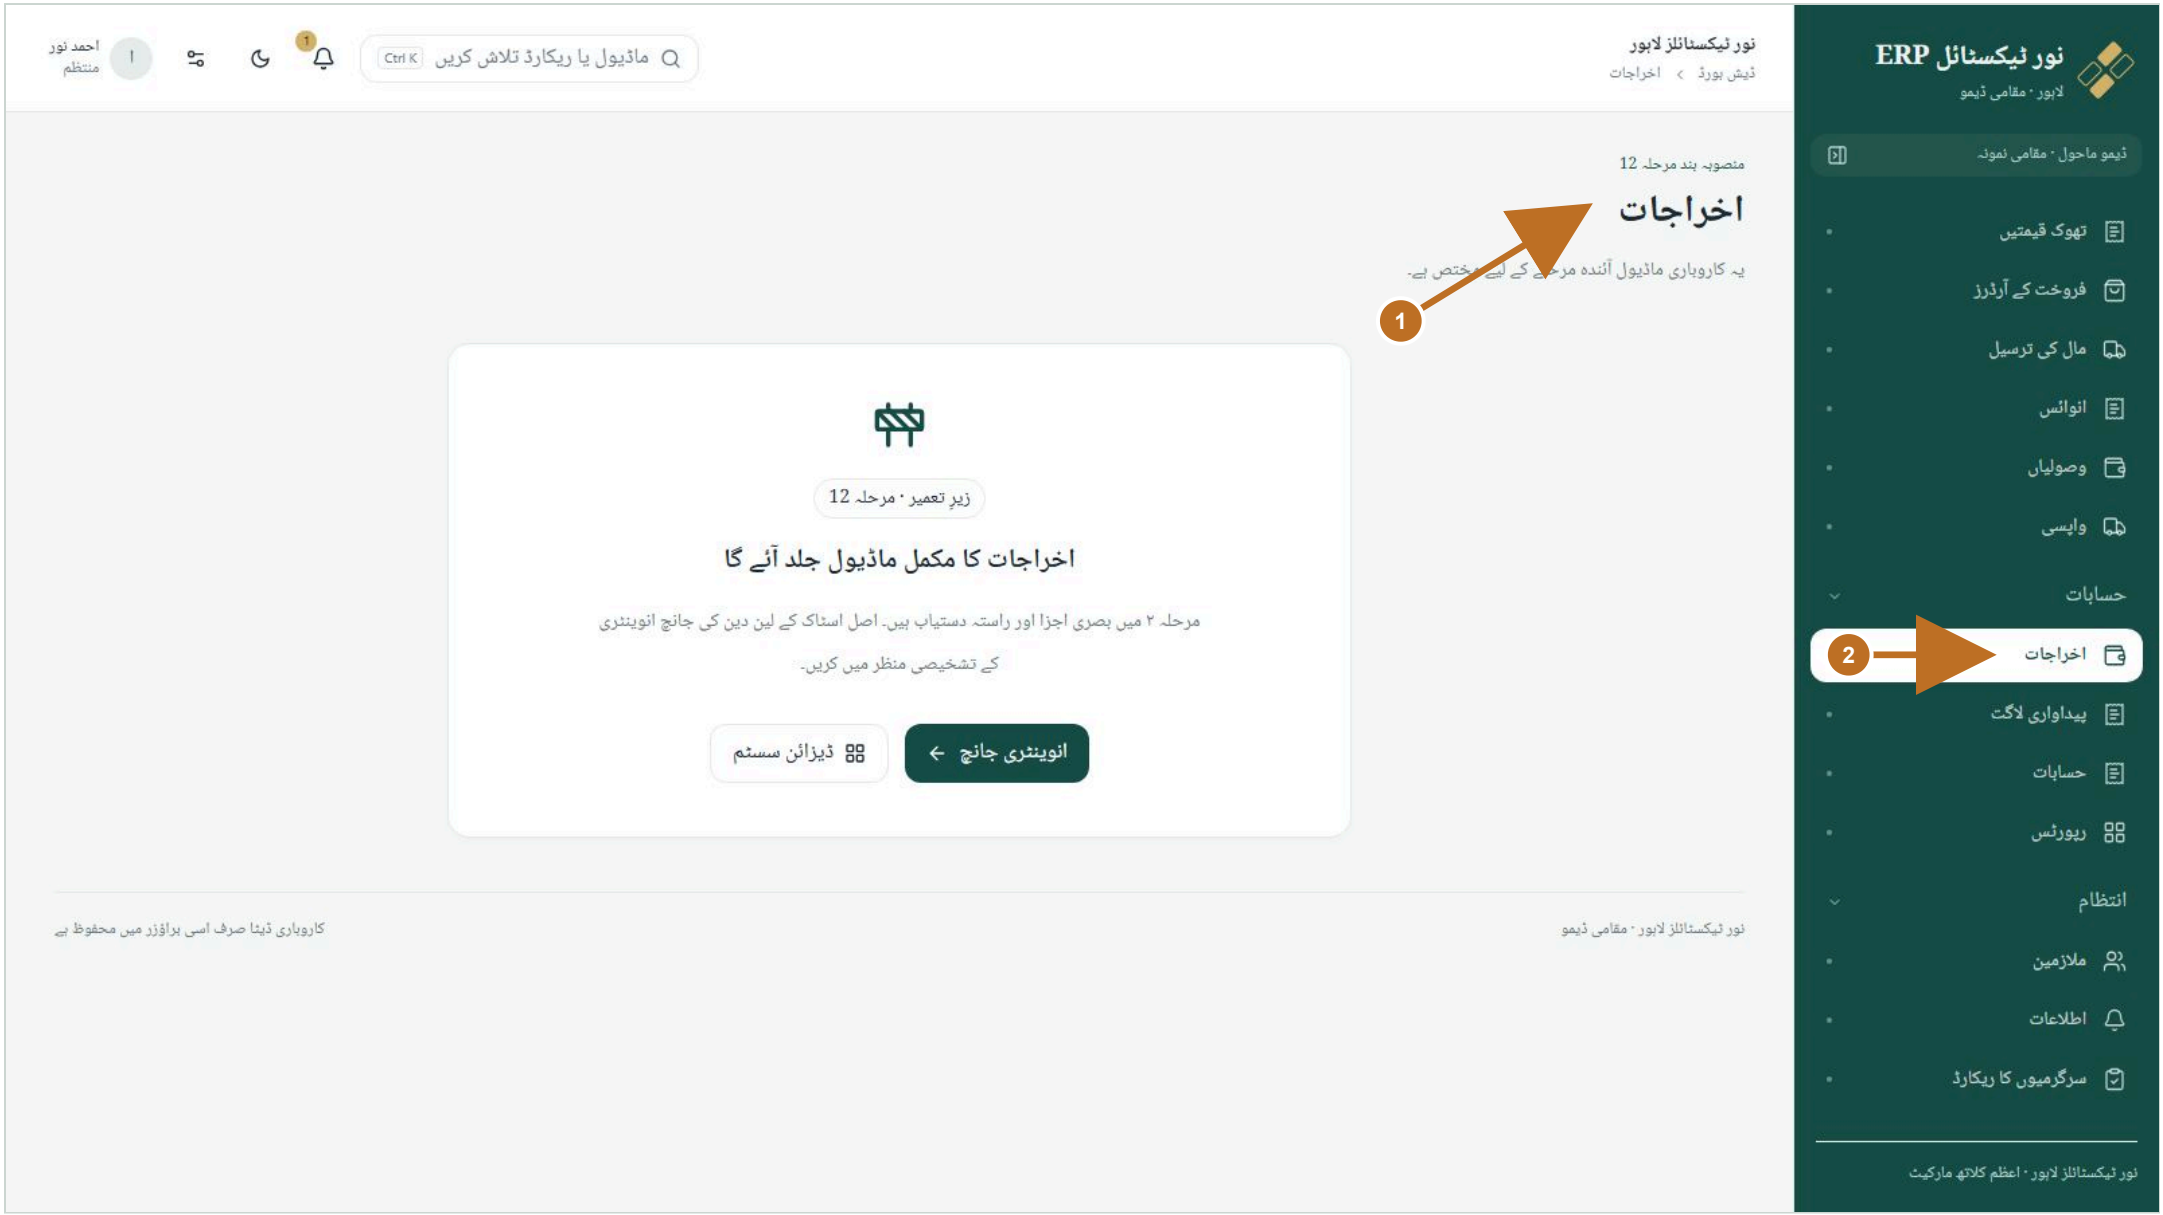

1 Screen purpose
The planned inspection and disposition workflow for goods returned by customers.

2 Navigation & use
When implemented, link each return to its original dispatch/invoice and record an approved disposition.

Business connection
This screen is a roadmap placeholder; customer returns do not currently affect stock.

Form / next step
No active data-entry form: this route is a planned placeholder.

1 Screen purpose
The planned register for operating and production expenses.

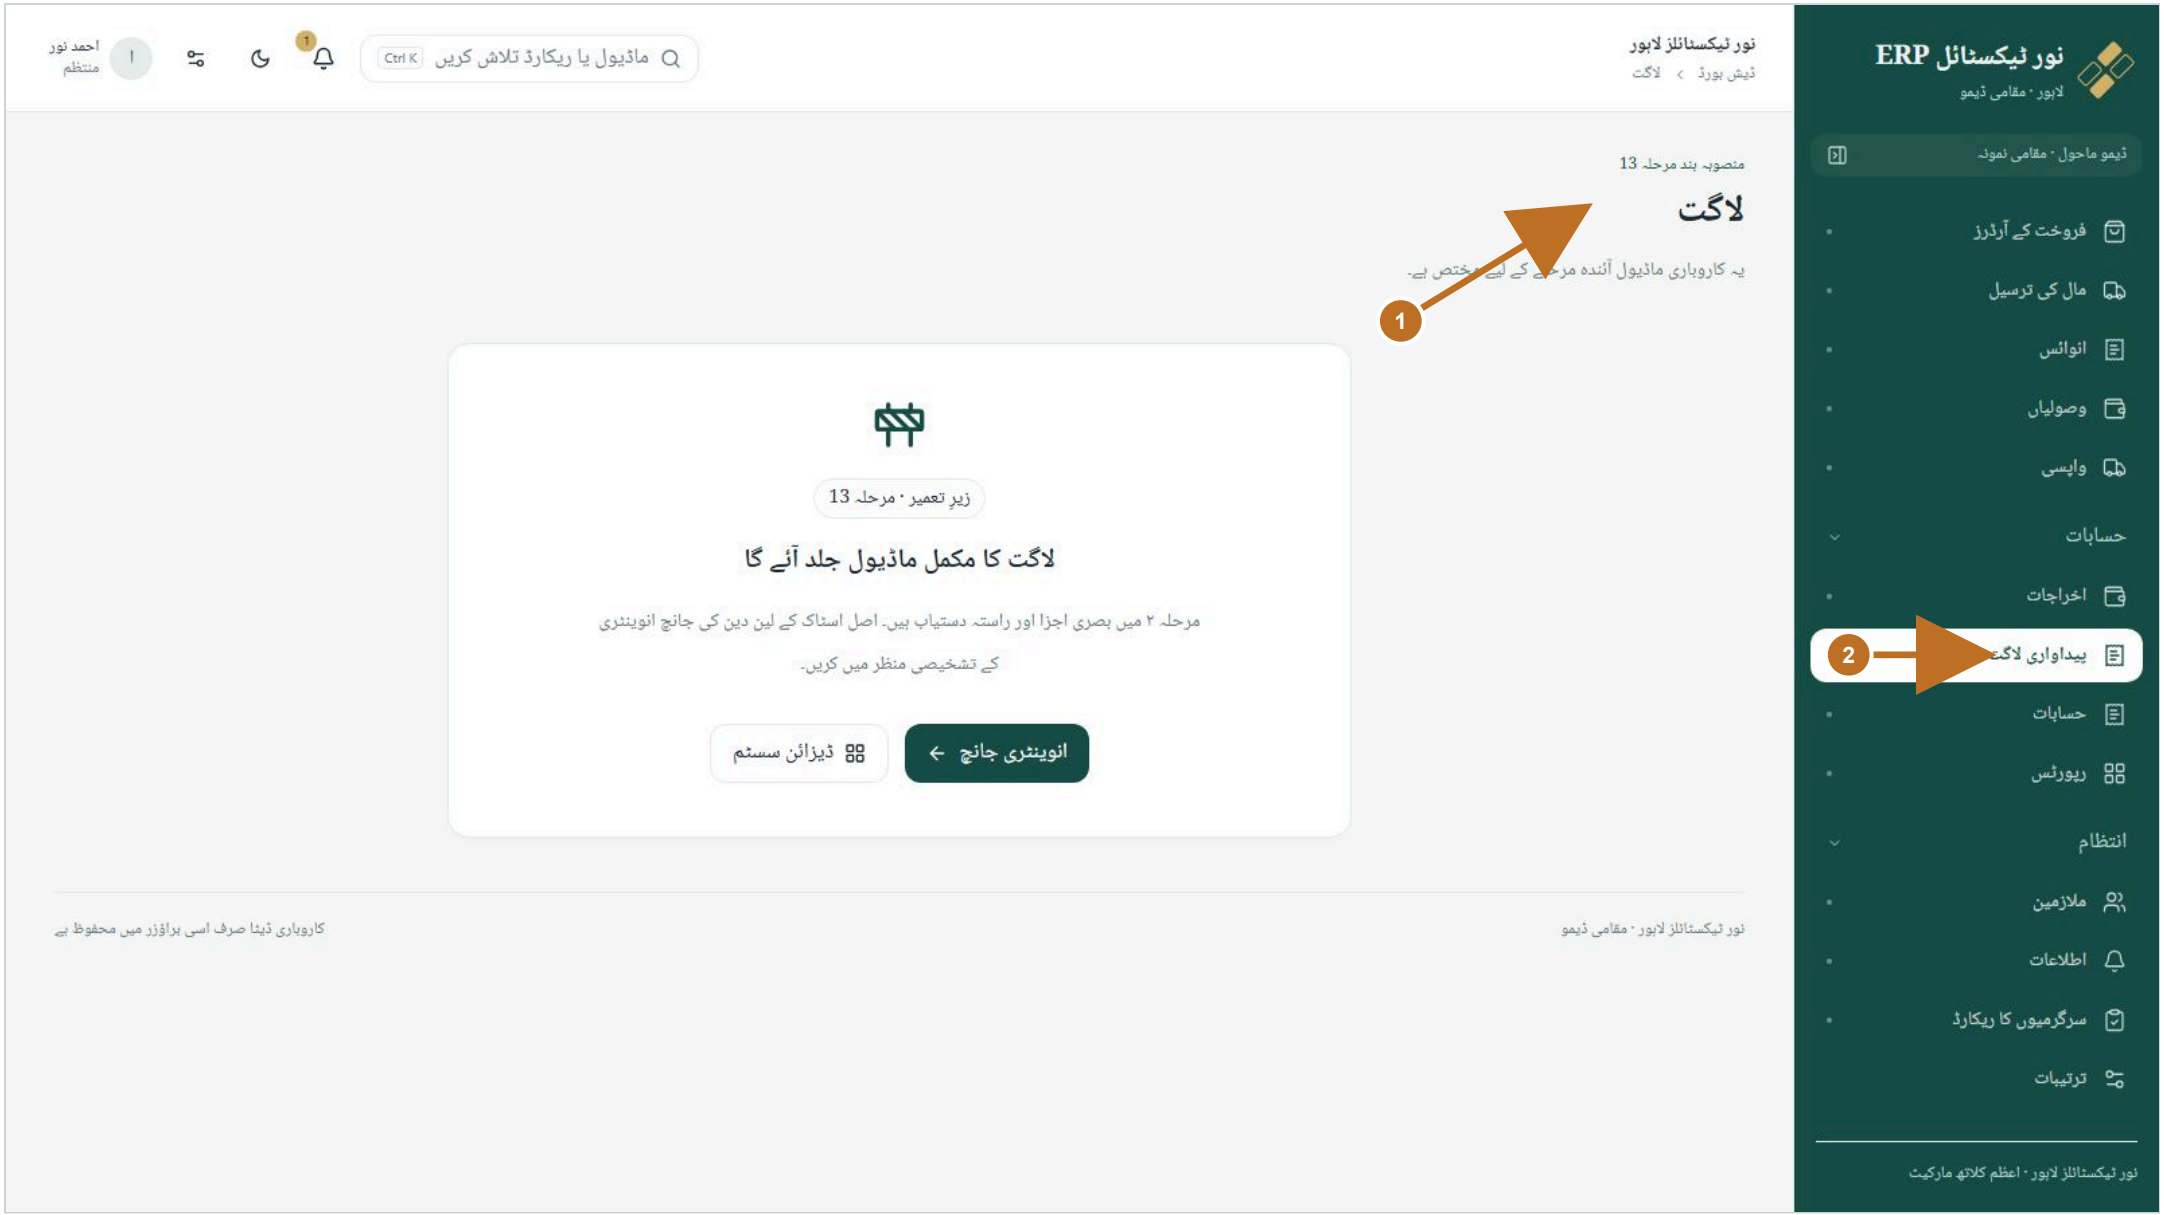

2 Navigation & use
When implemented, record source, date, amount and category for review and costing.

Business connection
This screen is a roadmap placeholder; it does not post accounting entries.

Form / next step
No active data-entry form: this route is a planned placeholder.

36 Batch costing پیداواری لاگت

Accounts PLANNED — NOT OPERATIONAL

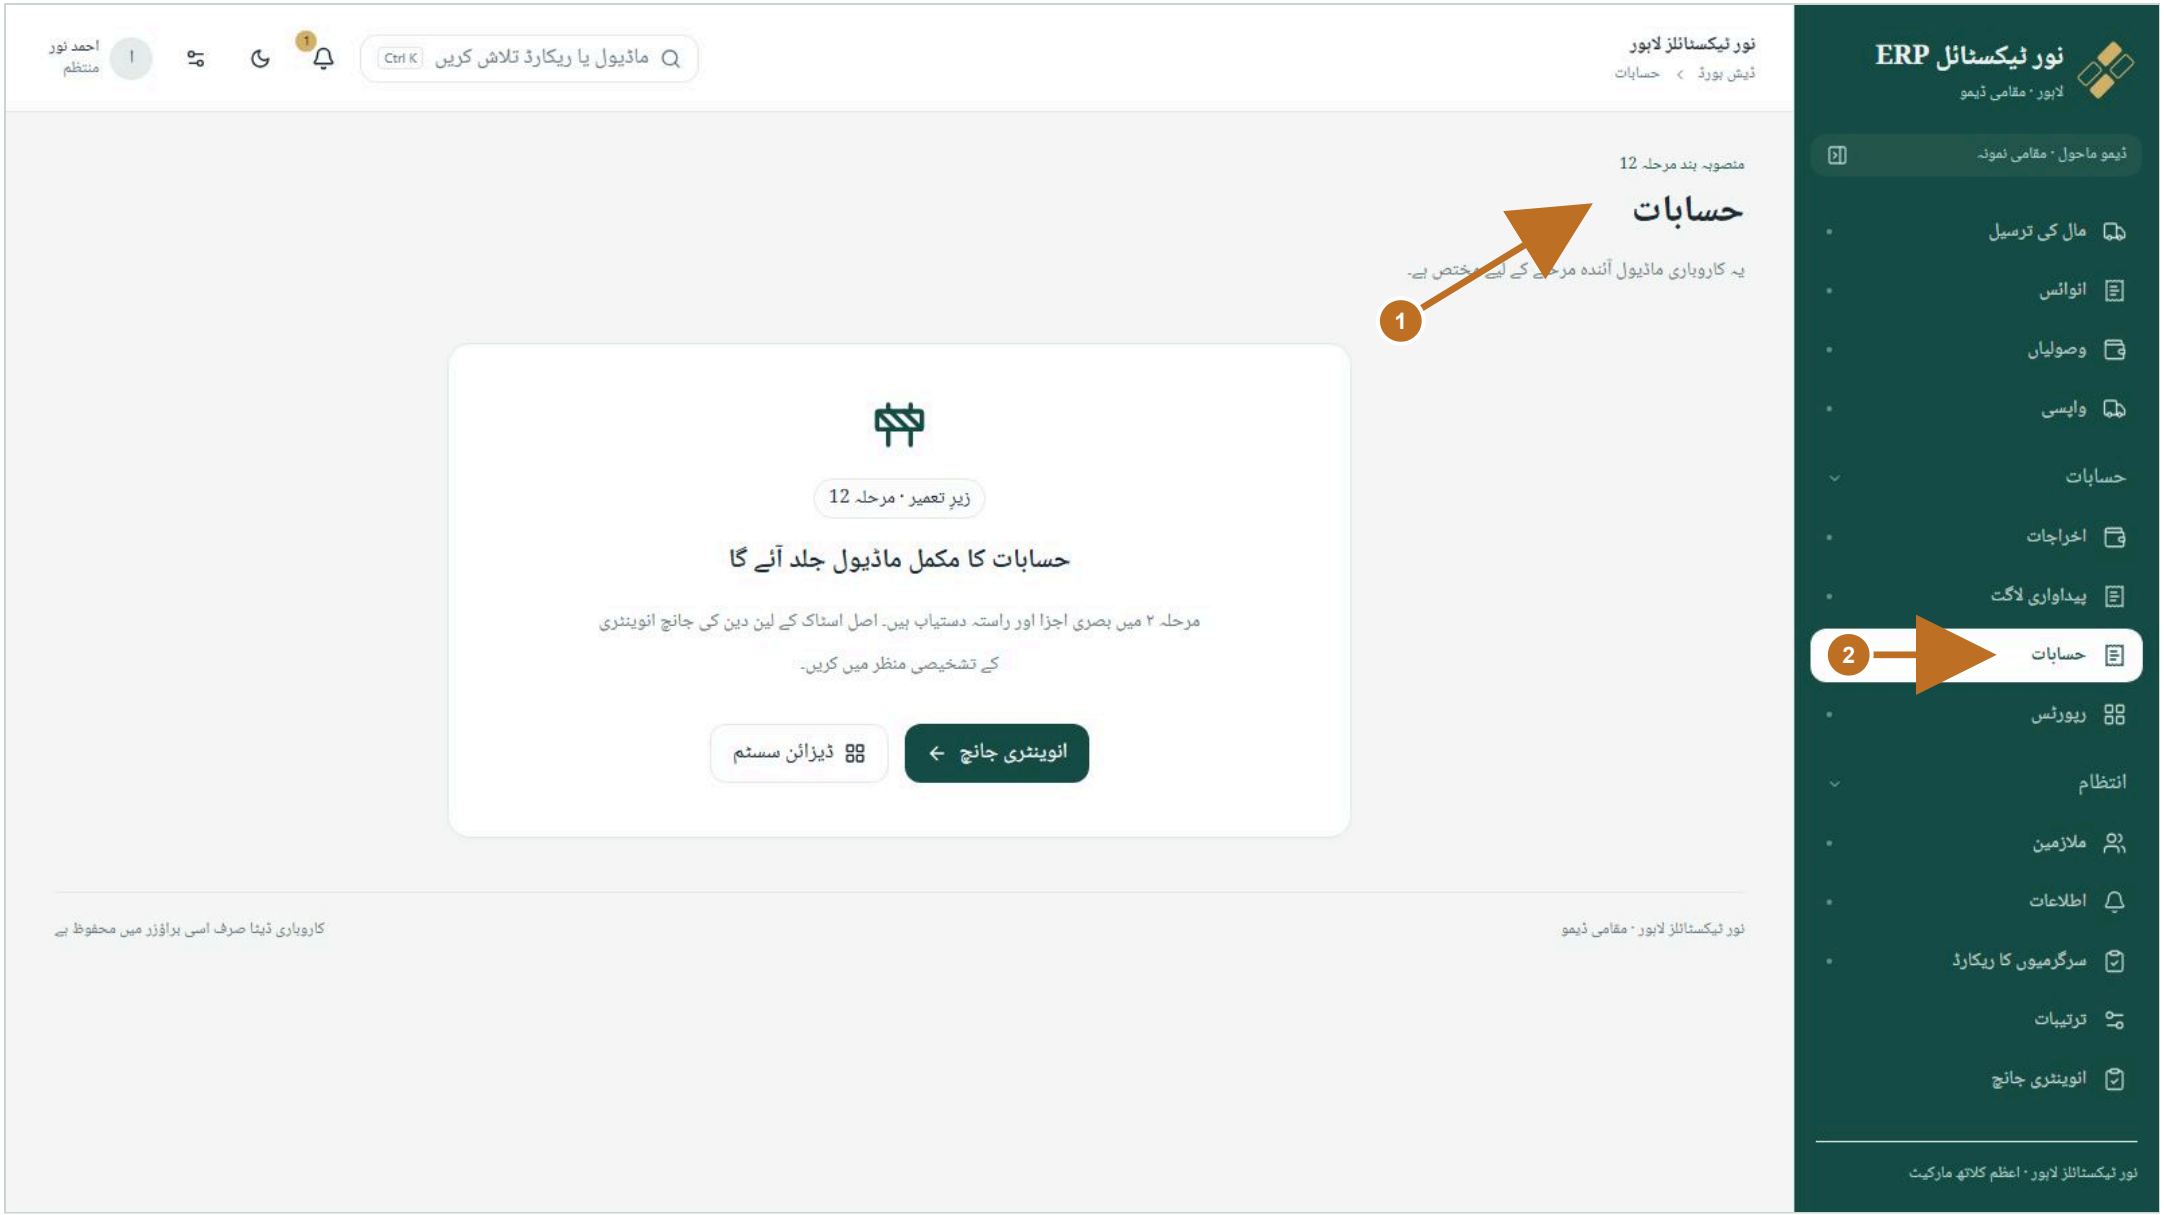

1 Screen purpose
The planned view for connecting material and service costs to manufactured batches.

2 Navigation & use
Use it to understand product cost only after supported source cost records are connected.

Business connection
This screen is a roadmap placeholder; estimates and actual costs must not be confused.

Form / next step
No active data-entry form: this route is a planned placeholder.

1 Screen purpose
The planned accounting overview for financial records and balances.

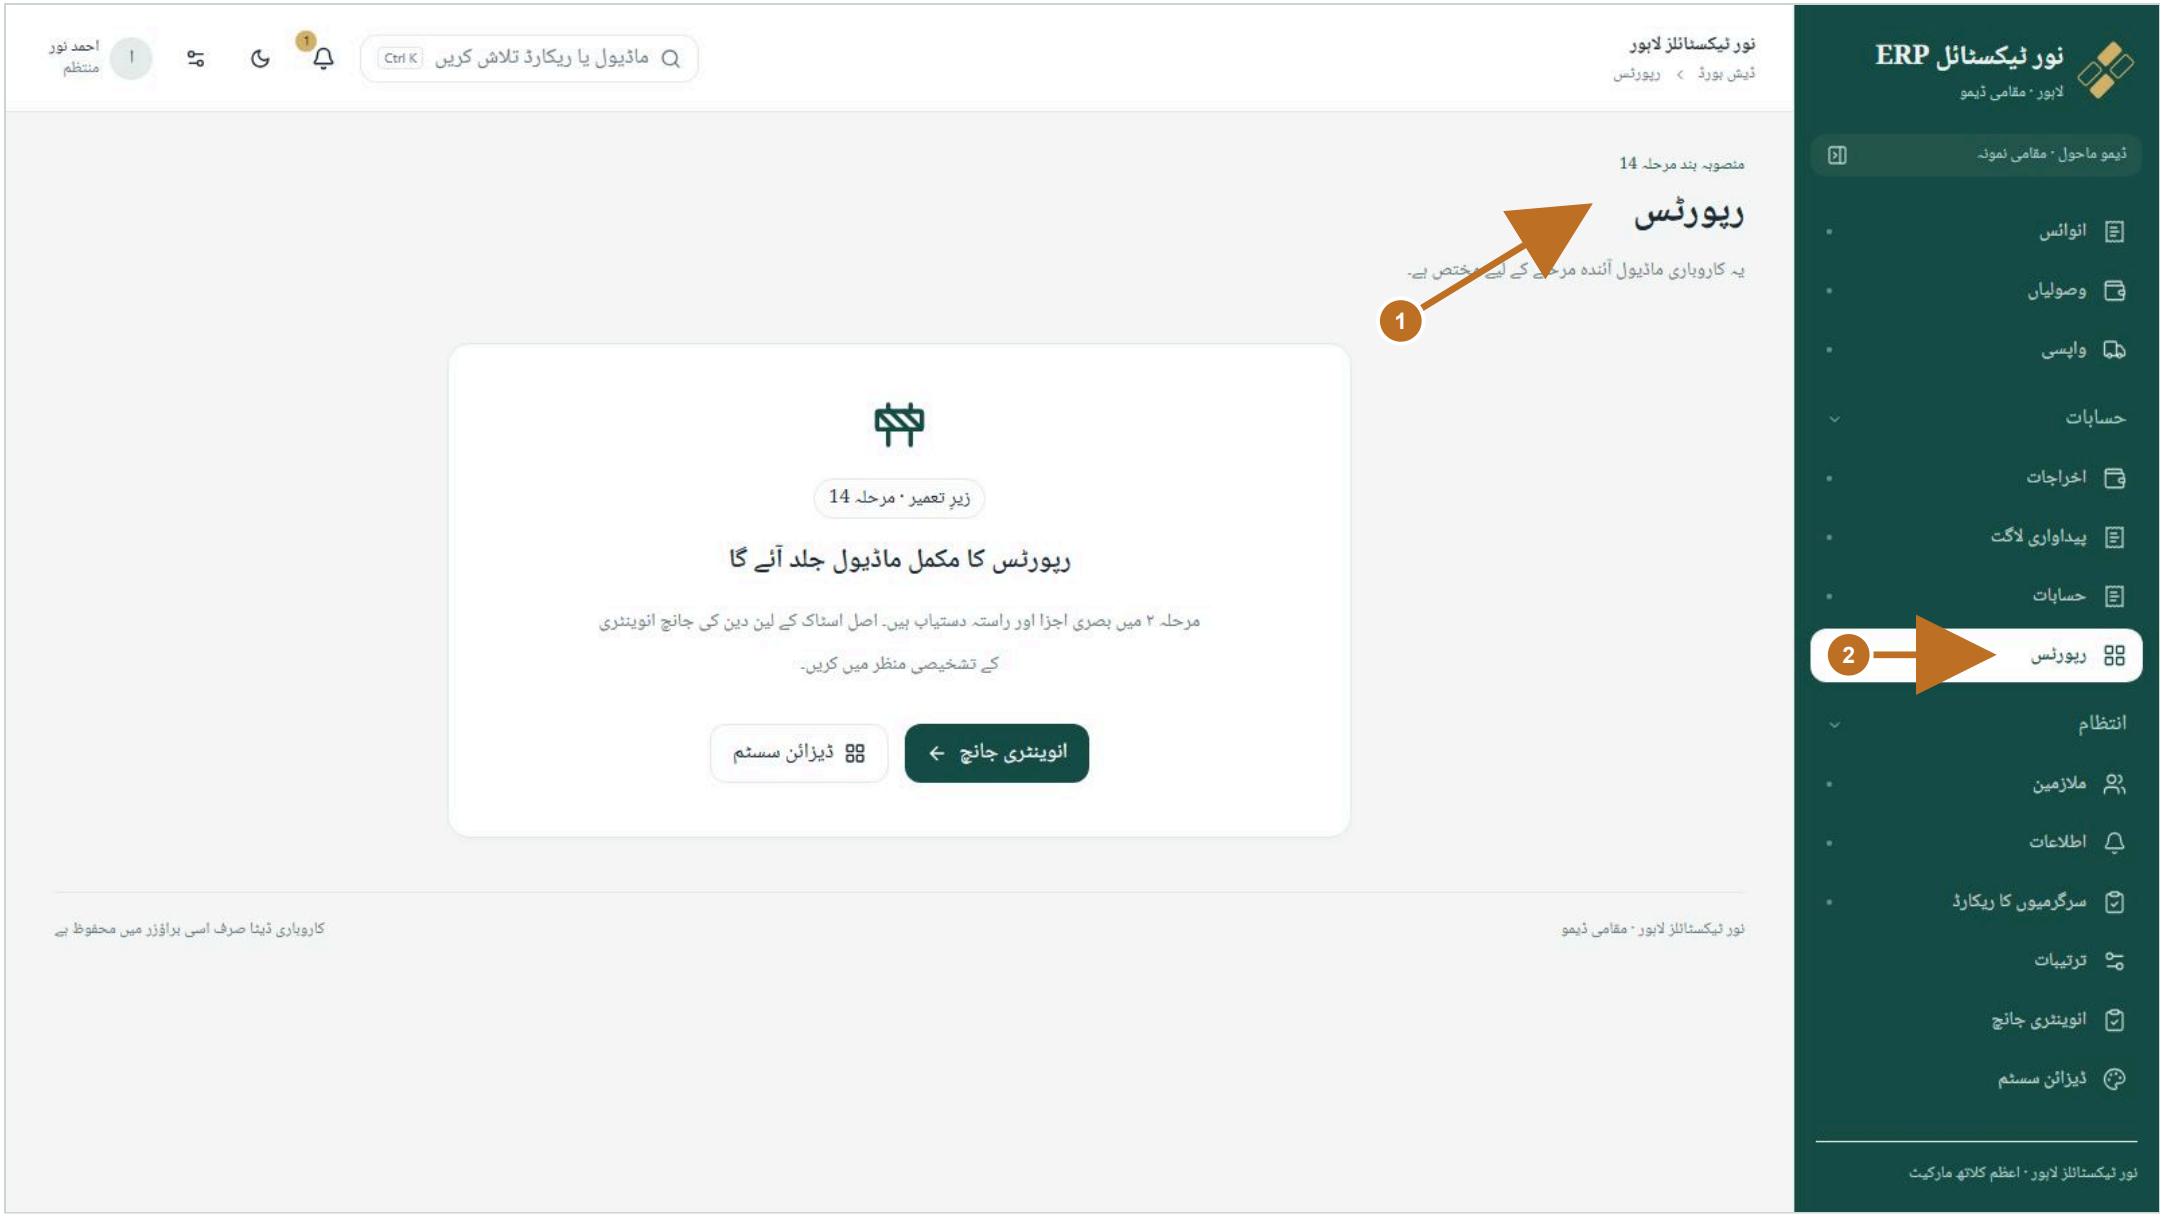

2 Navigation & use
When implemented, use it to review posted supplier/customer balances and supported cash activity.

Business connection
This screen is a roadmap placeholder, not a general ledger or production accounting system.

Form / next step
No active data-entry form: this route is a planned placeholder.

38 Business reports رپورٹس

Accounts **PLANNED — NOT OPERATIONAL**

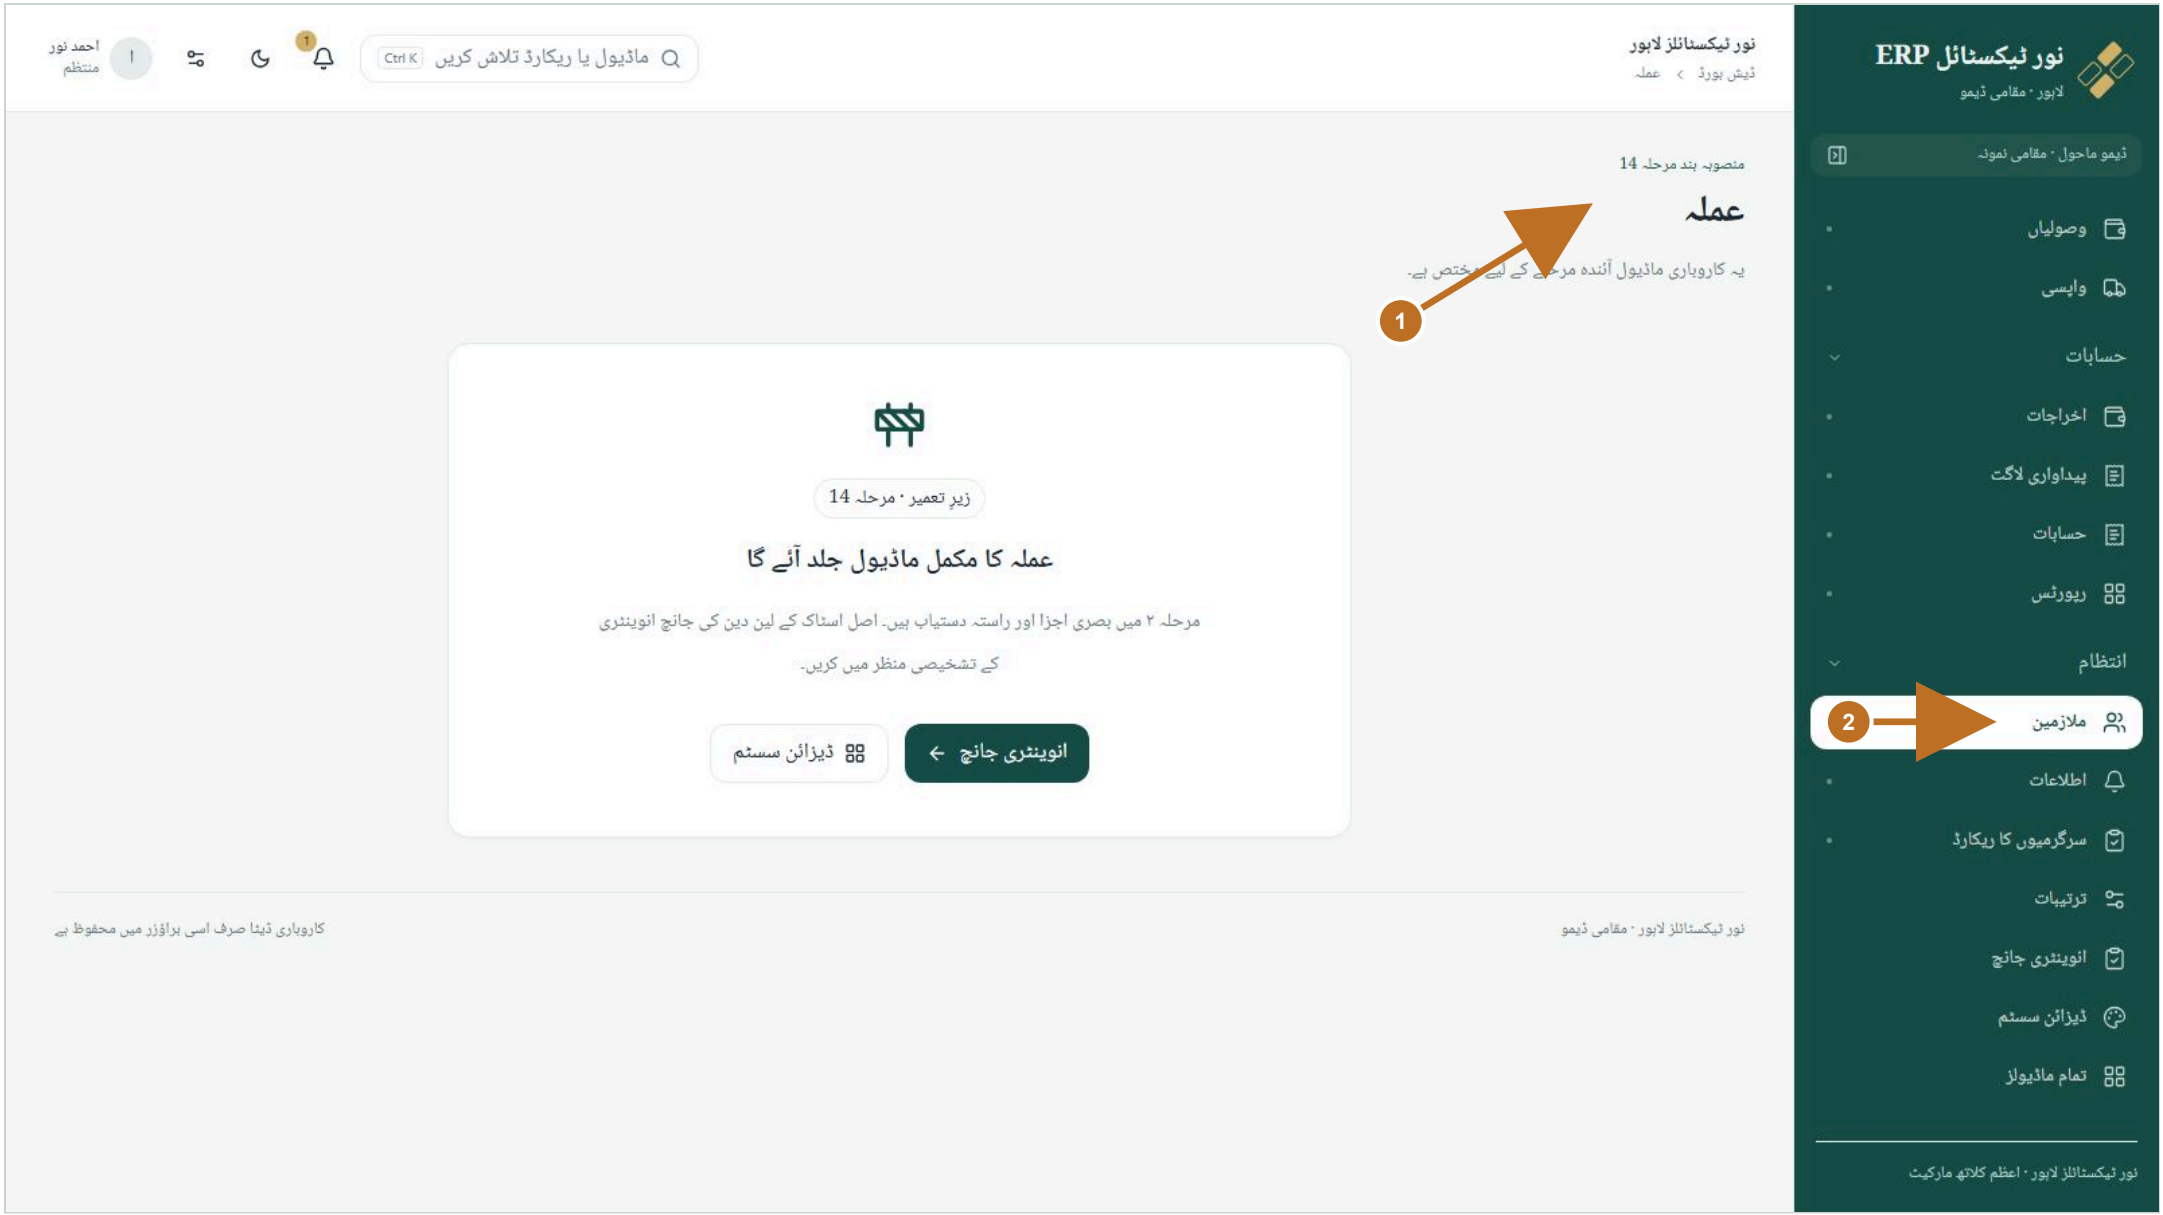

1 Screen purpose
The planned cross-module reporting and reconciliation area.

2 Navigation & use
When available, select a report, scope and period, then trace any exception to its source record.

Business connection
This screen is a roadmap placeholder; available purchasing/warehouse/production reports remain in their own modules.

Form / next step
No active data-entry form: this route is a planned placeholder.

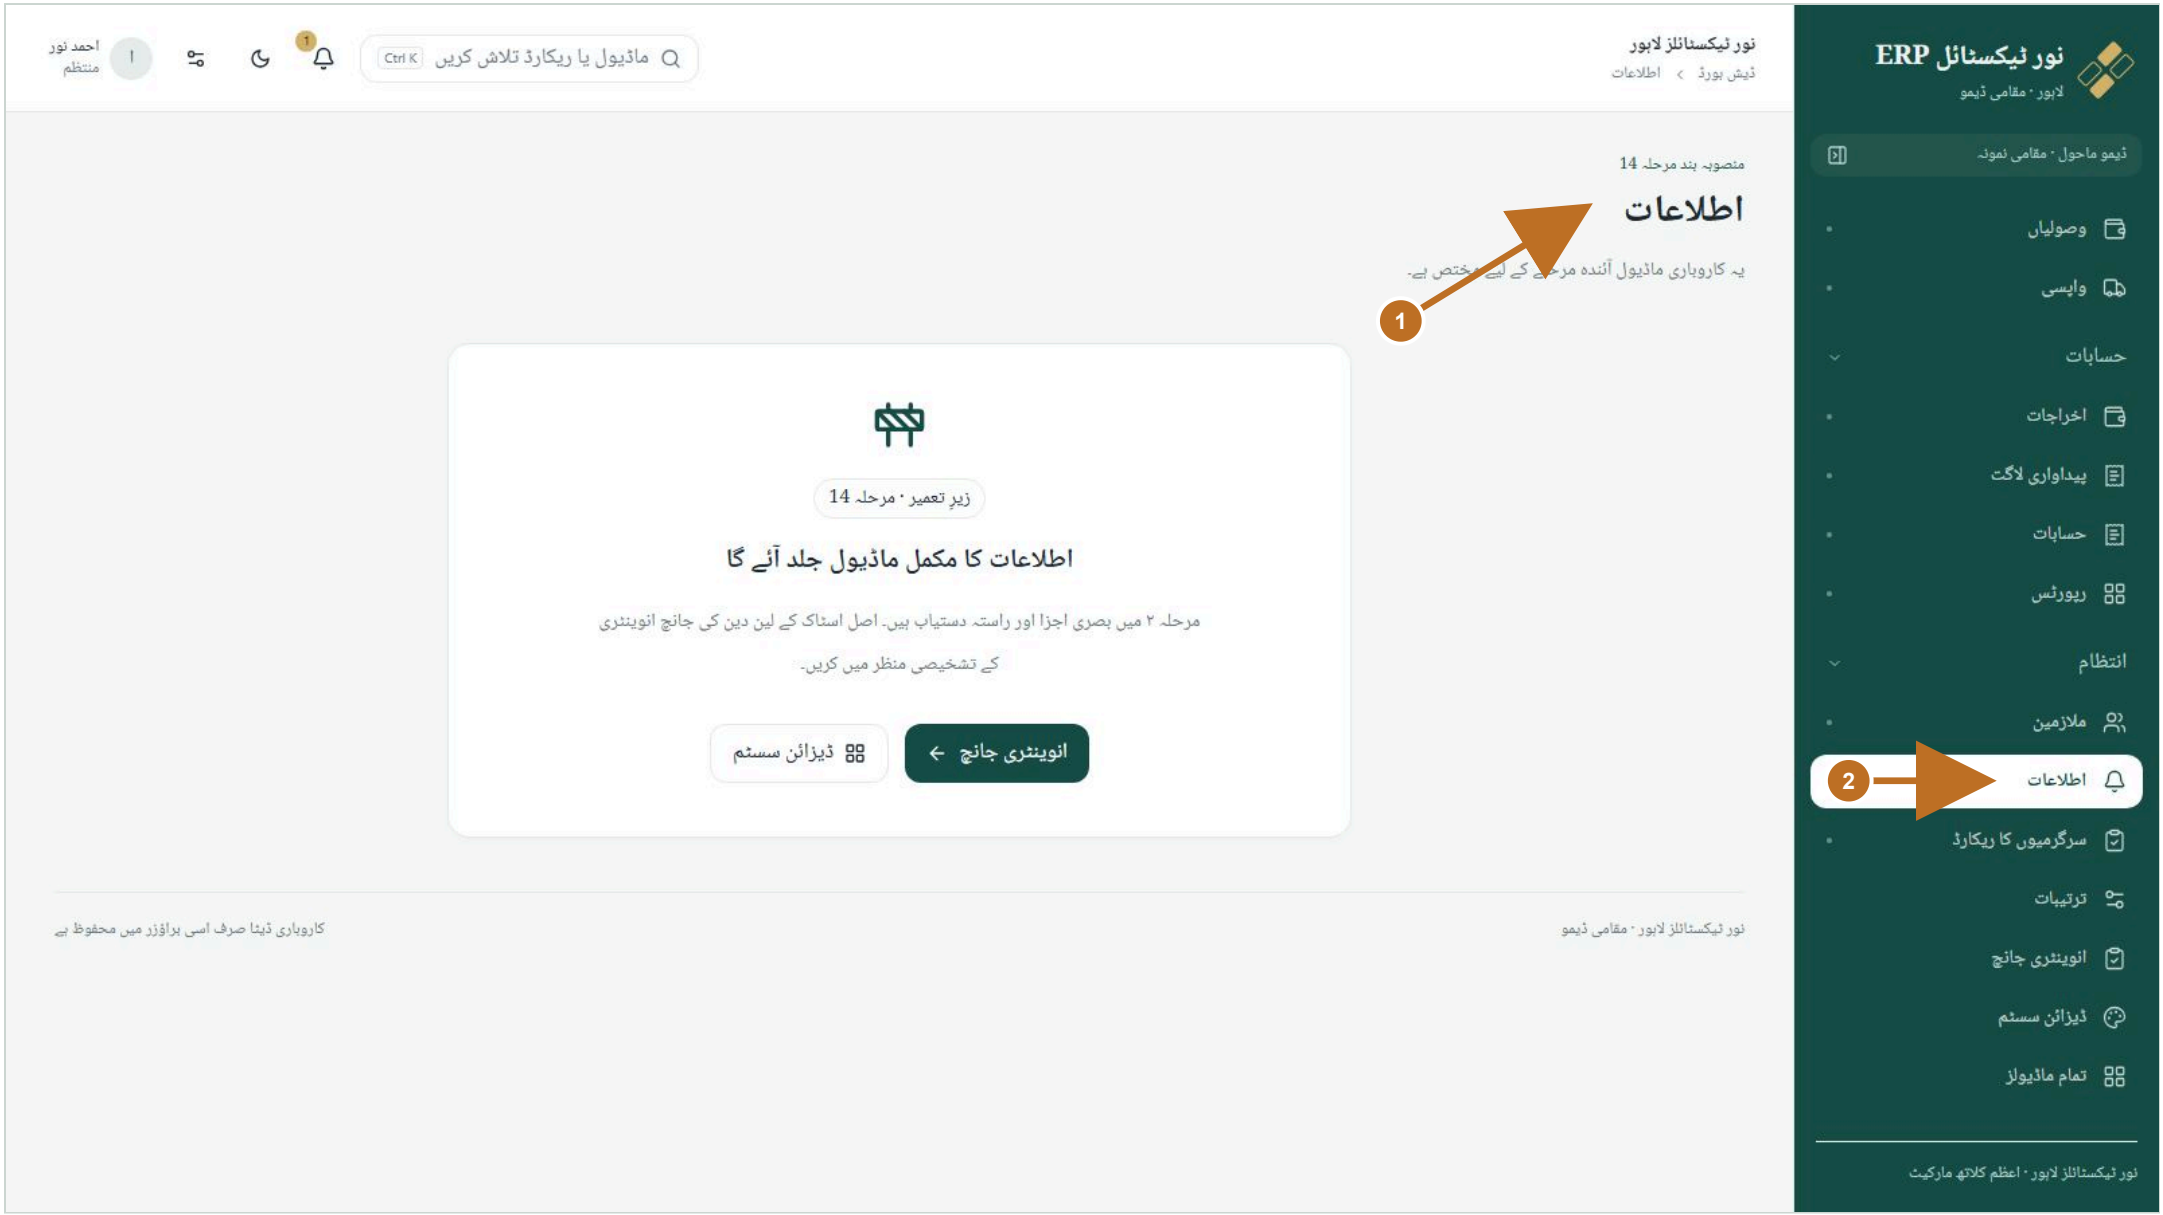

1 Screen purpose
The planned directory for company staff and operational assignments.

2 Navigation & use
When available, maintain staff details and role assignments used in business processes.

Business connection
This screen is a roadmap placeholder; demo role selection is not authentication.

Form / next step
No active data-entry form: this route is a planned placeholder.

1 Screen purpose
A central area for reminders and records that need attention.

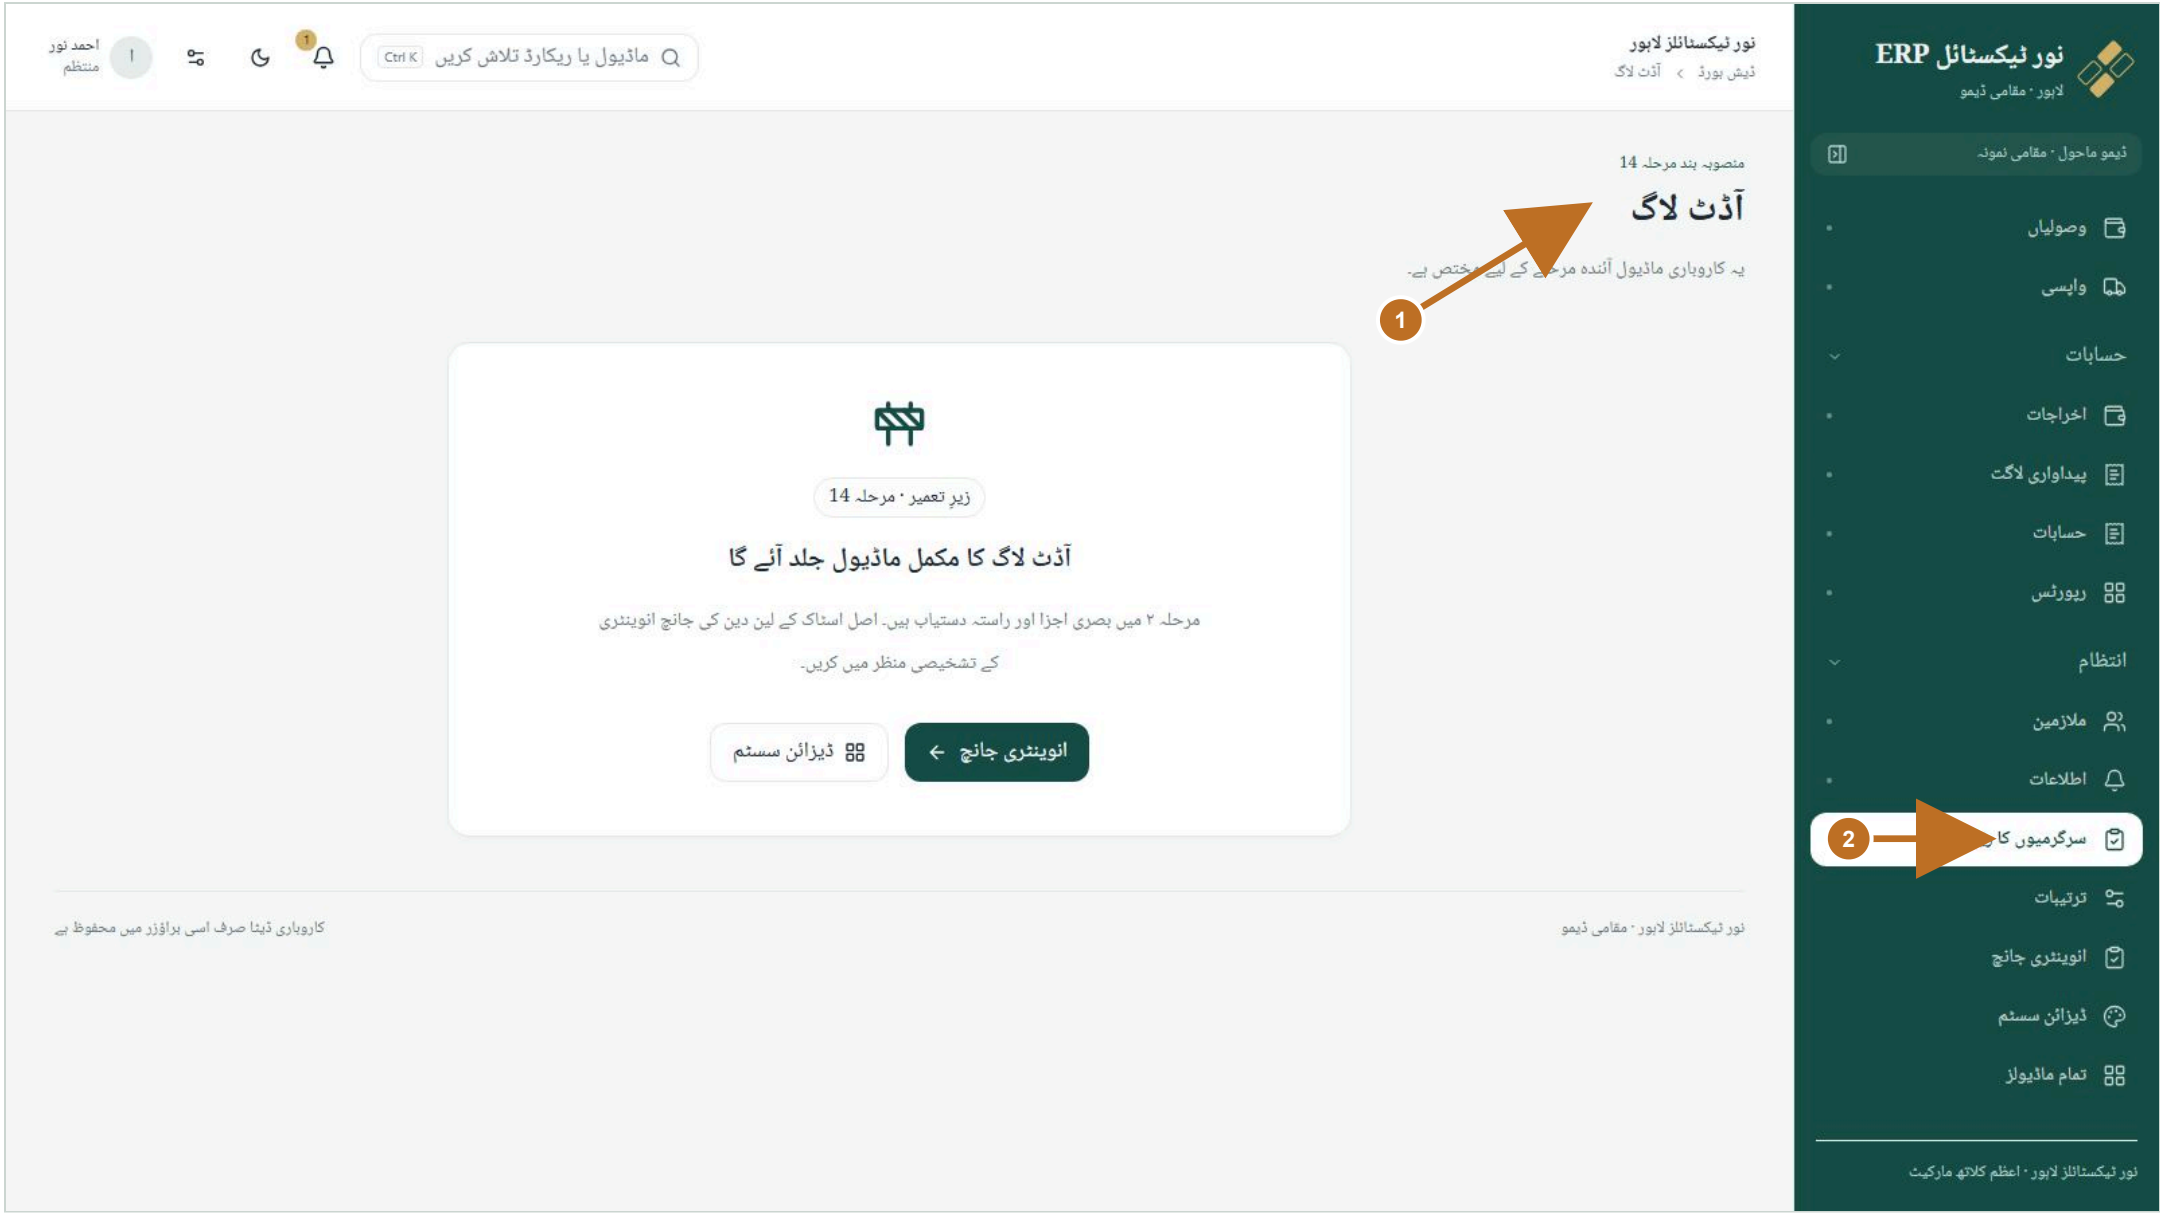

2 Navigation & use
Review each alert and follow its source link to the responsible transaction.

Business connection
Notifications should guide review, not replace validation or approval.

Form / next step
No active data-entry form: this route is a planned placeholder.

41 Activity history سرگرمیوں کا ریکارڈ

Administration PLANNED — NOT OPERATIONAL

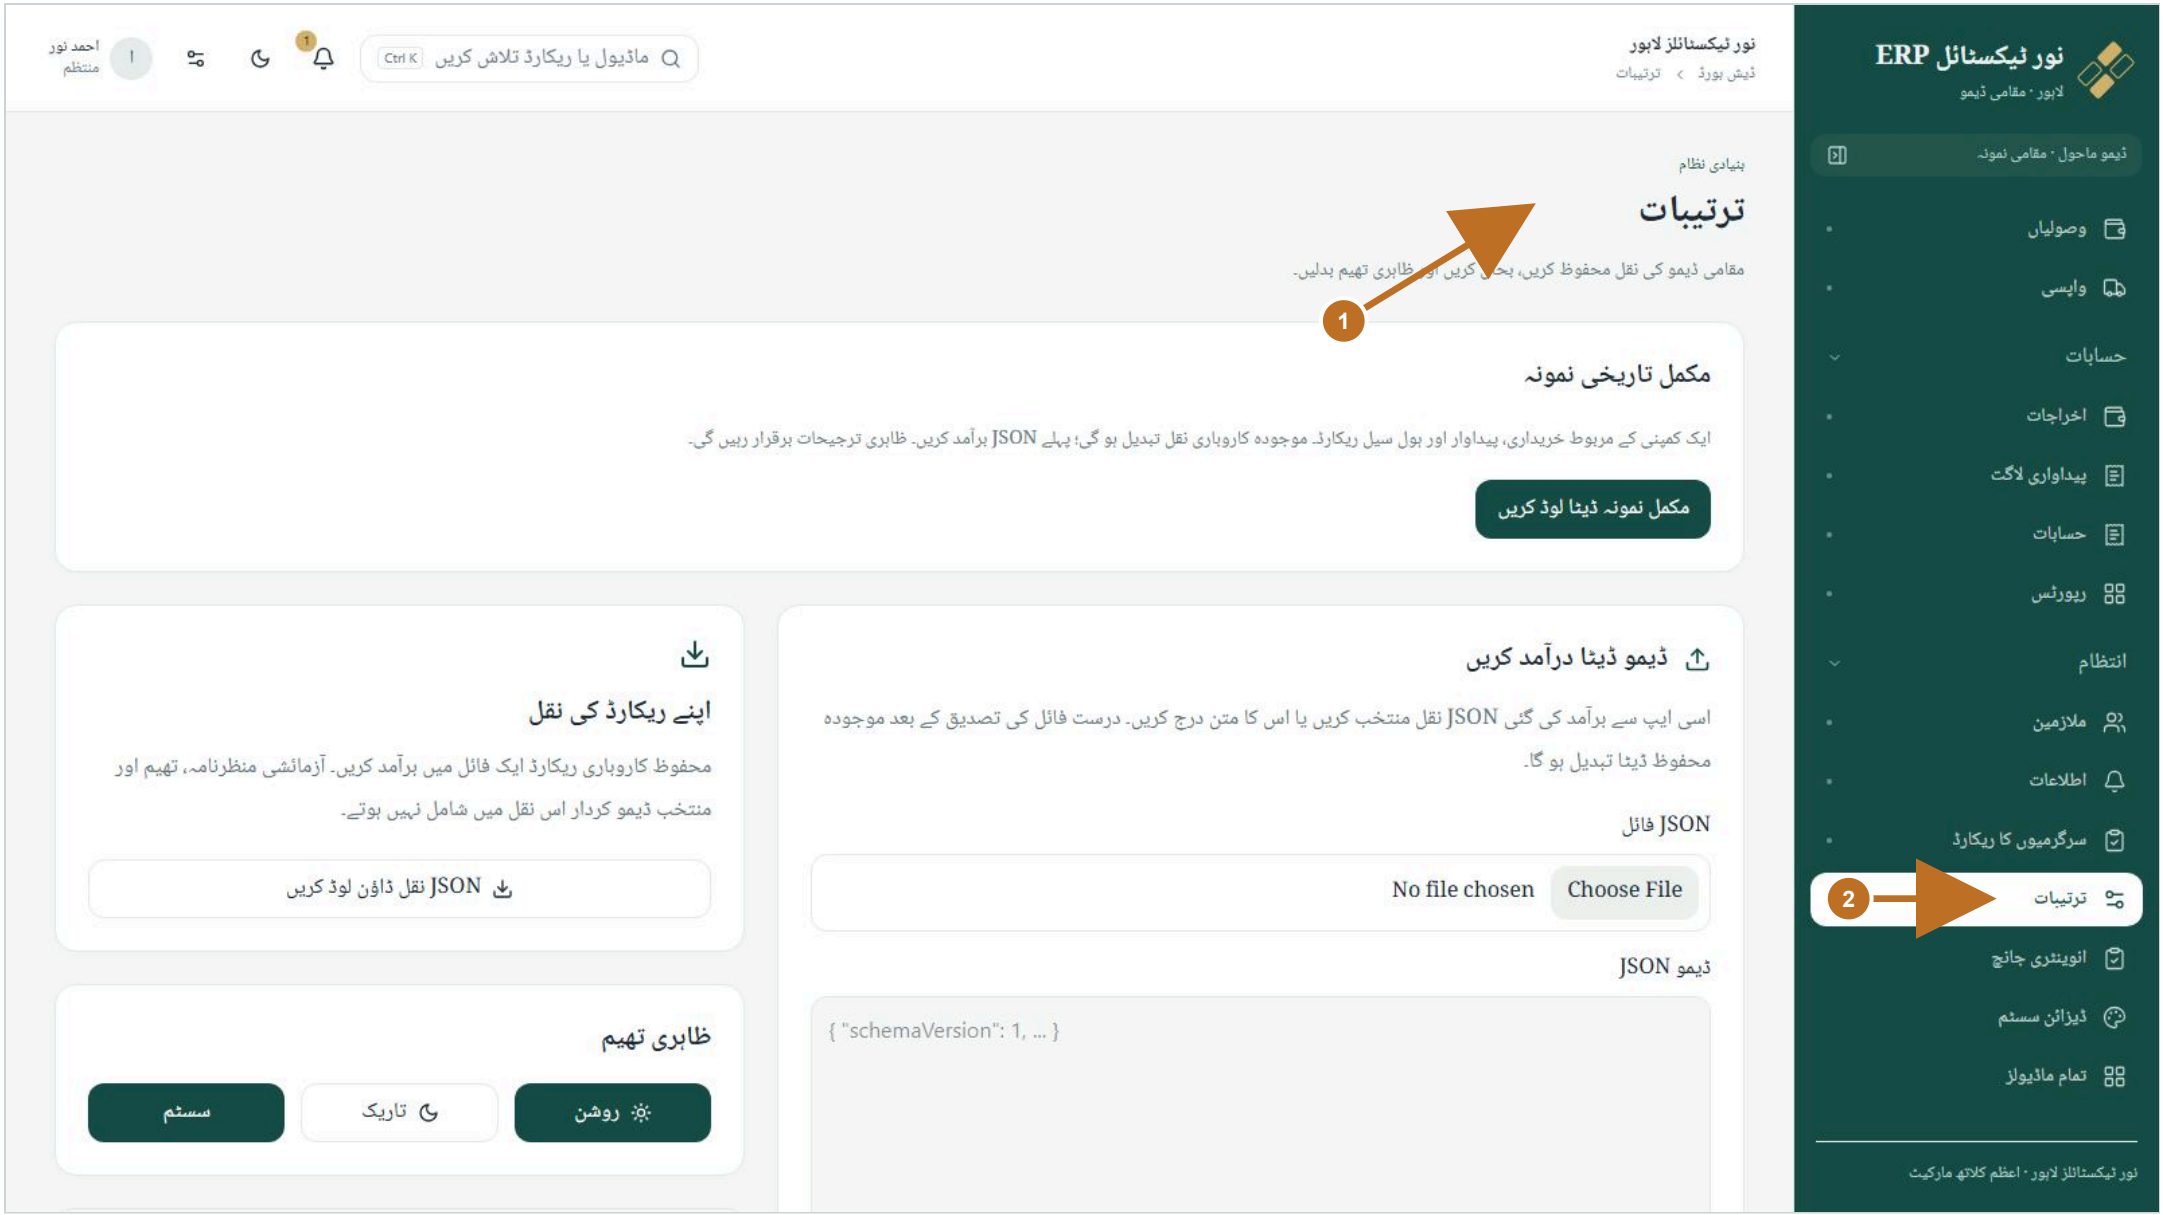

1 Screen purpose
The planned cross-module activity and audit-history view.

2 Navigation & use
When implemented, filter events and open the linked record to understand who did what and when.

Business connection
This screen is a roadmap placeholder; do not treat it as a secure compliance audit log.

Form / next step
No active data-entry form: this route is a planned placeholder.

1 Screen purpose
Controls for this browser's local demonstration data and interface preferences.

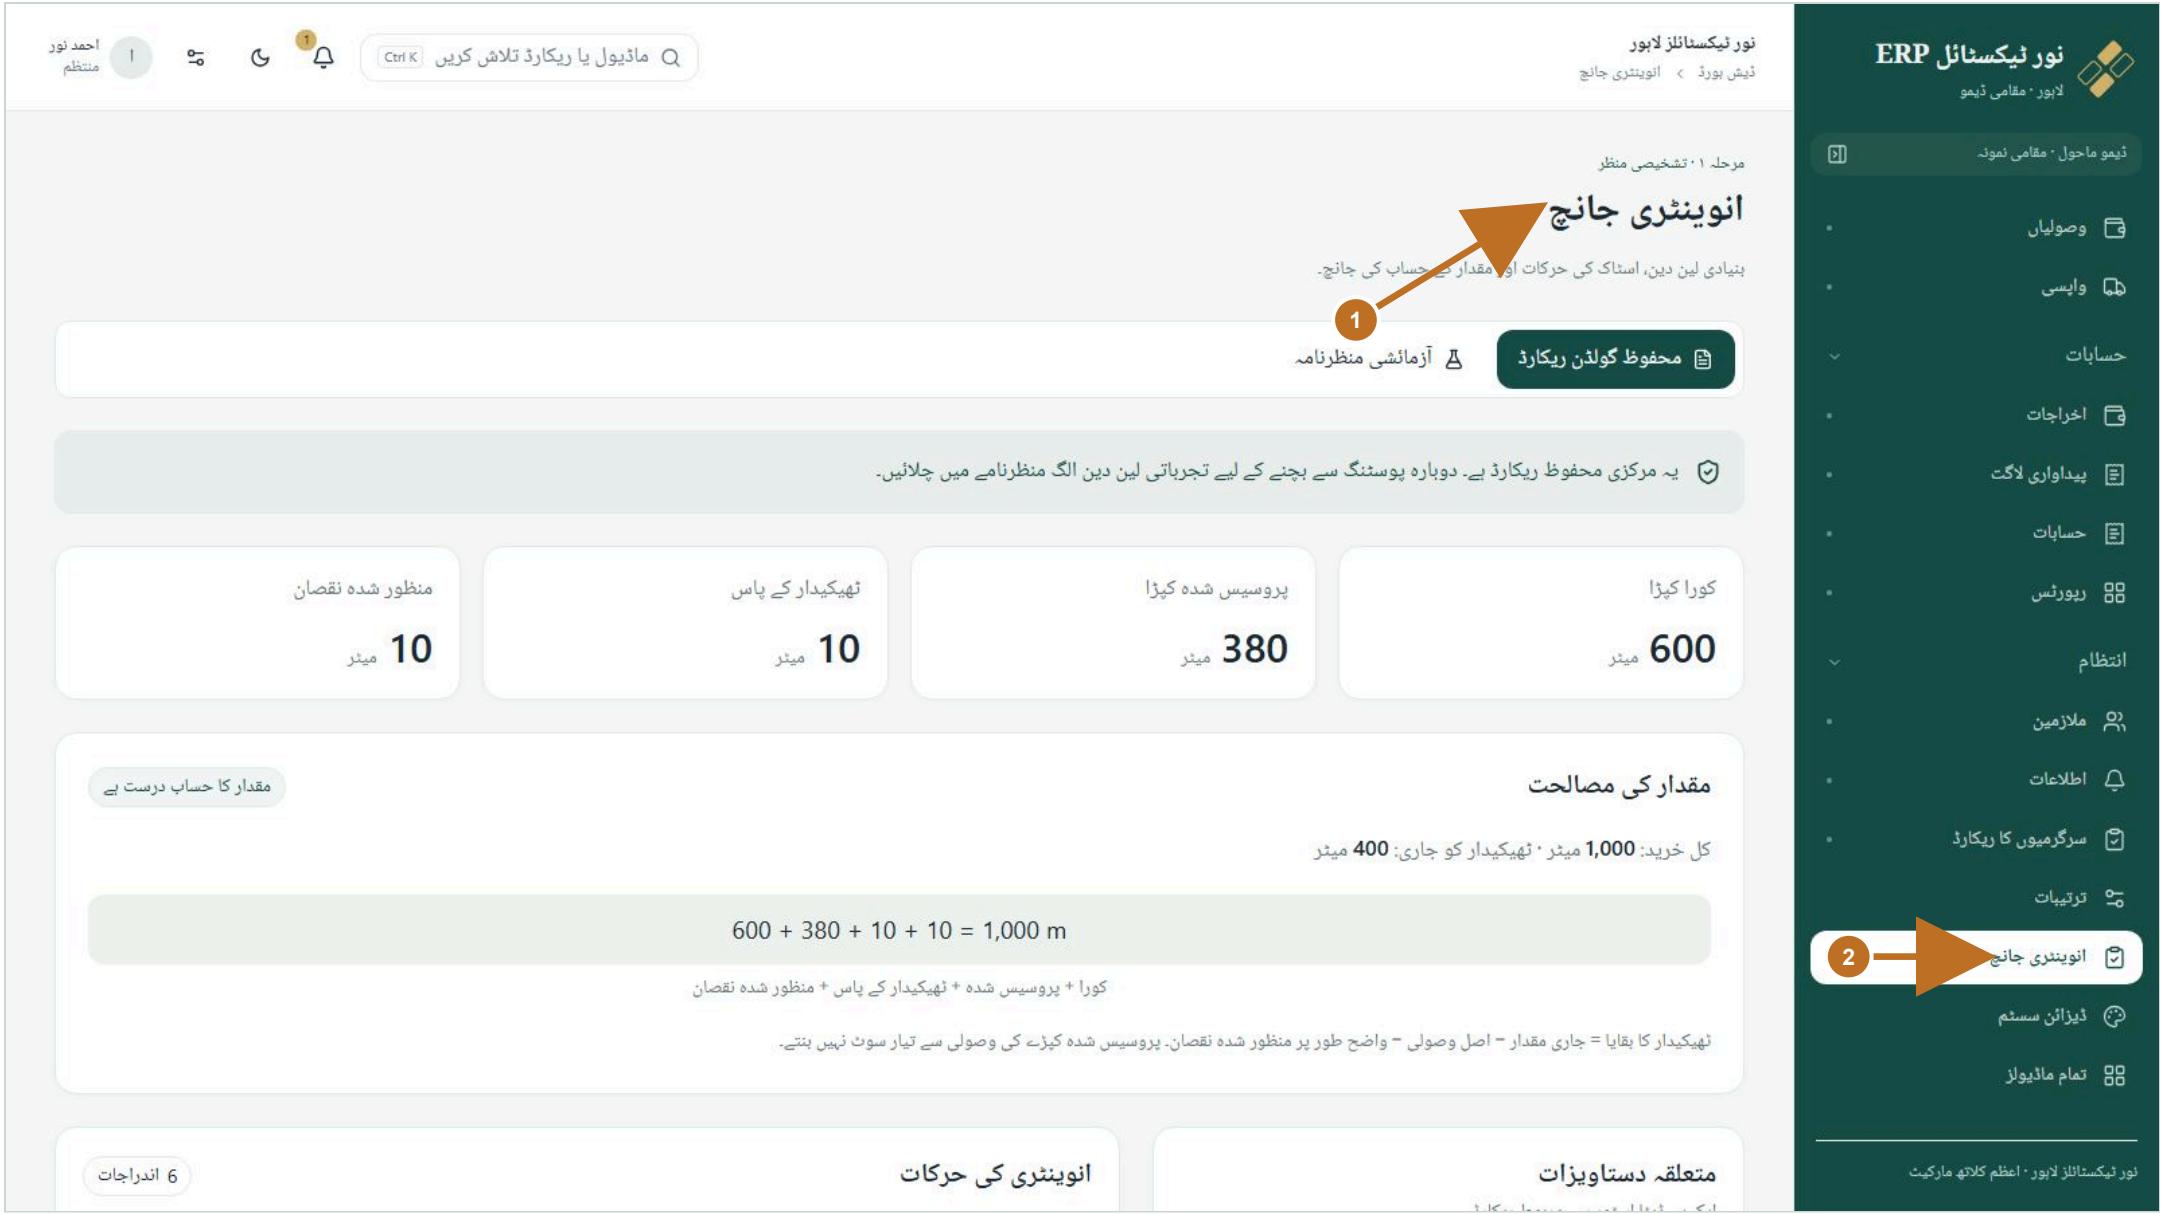

2 Navigation & use
Export a JSON backup before importing or resetting; confirm any replacement or reset deliberately.

Business connection
Business data is stored locally in the browser. This is not a backend or cloud backup.

Form fields shown
میں سمجھتا ہوں کہ درست درآمد میرے موجودہ ڈیمو ریکارڈ کی جگہ لے · JSON فائل · ڈیمو JSON گی۔

43 Inventory diagnostics انوینٹری جانچ

Administration AVAILABLE IN THIS DEMO

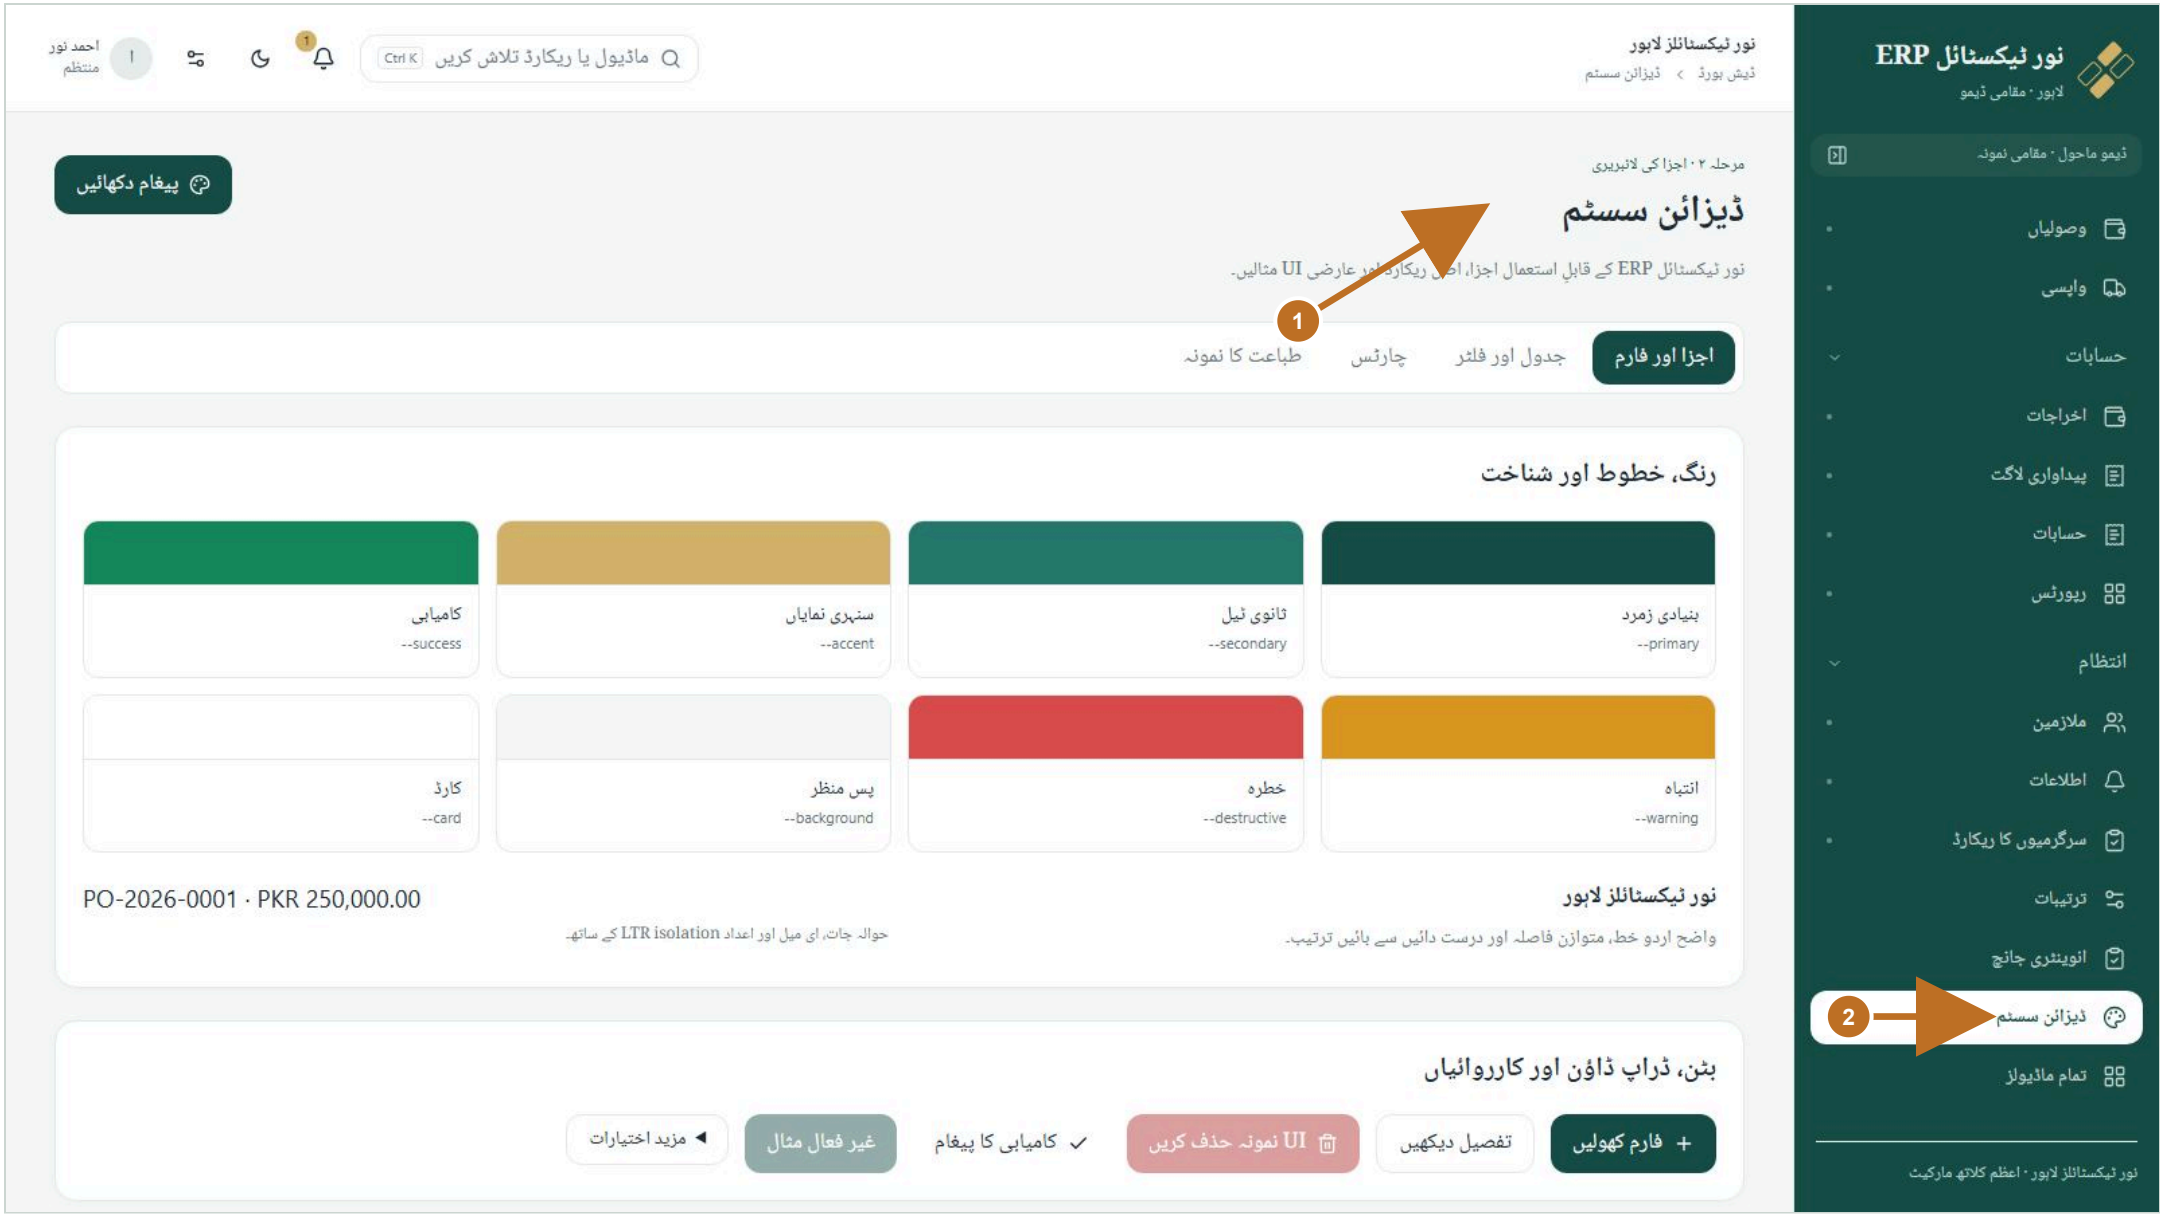

1 Screen purpose
An isolated, resettable scenario for demonstrating and reconciling basic inventory transactions.

2 Navigation & use
Run the sample receipt/issue/receipt chain and inspect its movements and balance reconciliation.

Business connection
The isolated scenario does not alter the main saved business records.

Form / next step
No direct form on this screen. Use its linked child form or open a source record to continue.

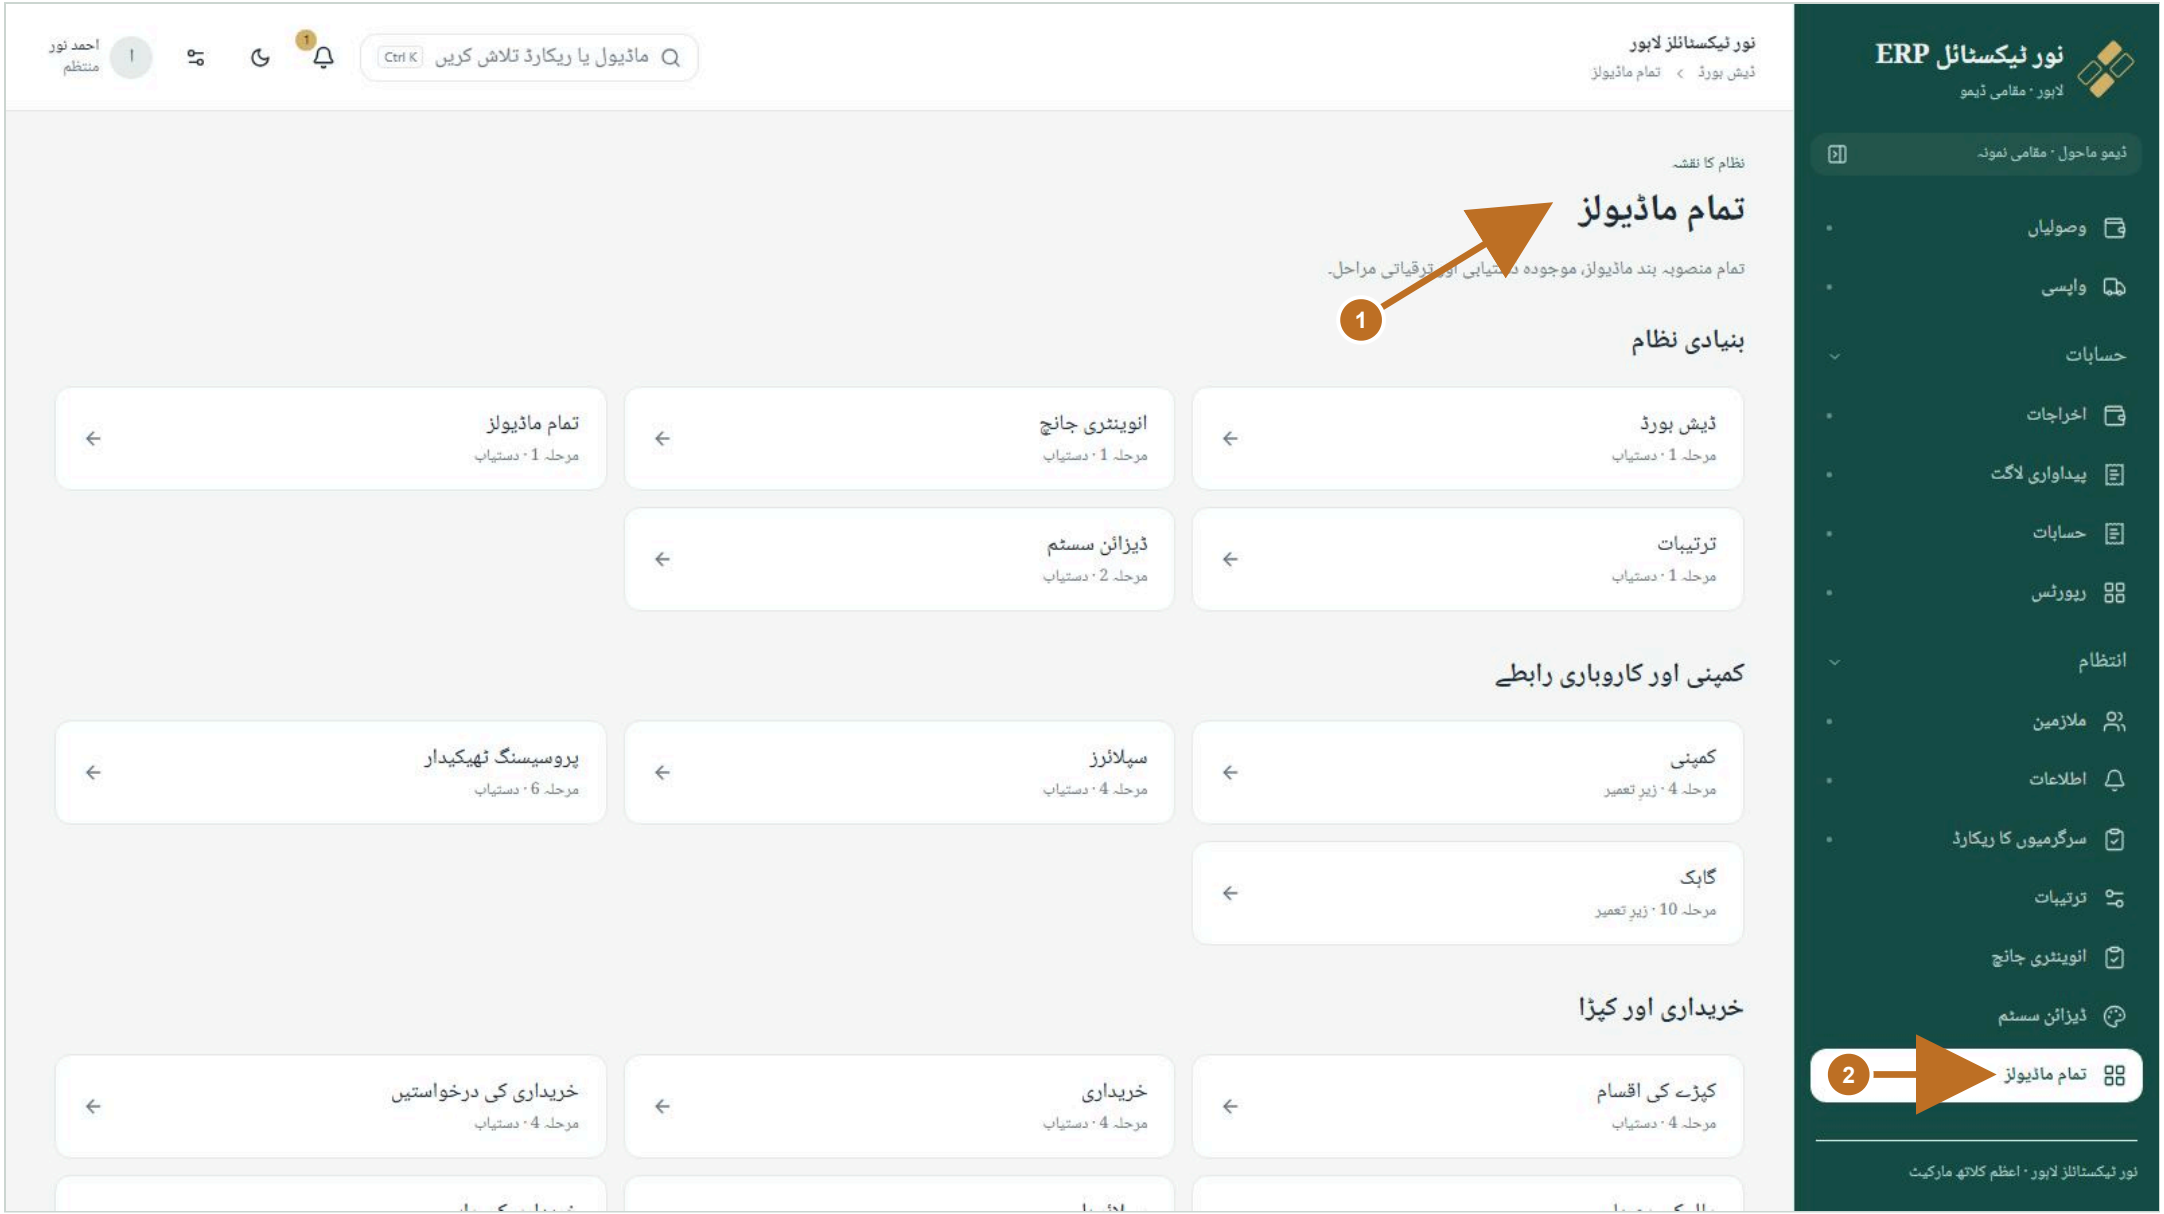

1 Screen purpose
Examples of shared interface components, tables, charts, themes and print layouts.

2 Navigation & use
Explore the sample controls and print preview to understand the application's common visual patterns.

Business connection
The demonstration form is UI-only and does not create business transactions.

Form / next step
No direct form on this screen. Use its linked child form or open a source record to continue.

1 Screen purpose
An index of application modules, current status and planned delivery areas.

2 Navigation & use
Use it to understand what is operational and which future workflows are still planned.

Business connection
A listed module is not automatically an implemented workflow.

Form / next step
No direct form on this screen. Use its linked child form or open a source record to continue.

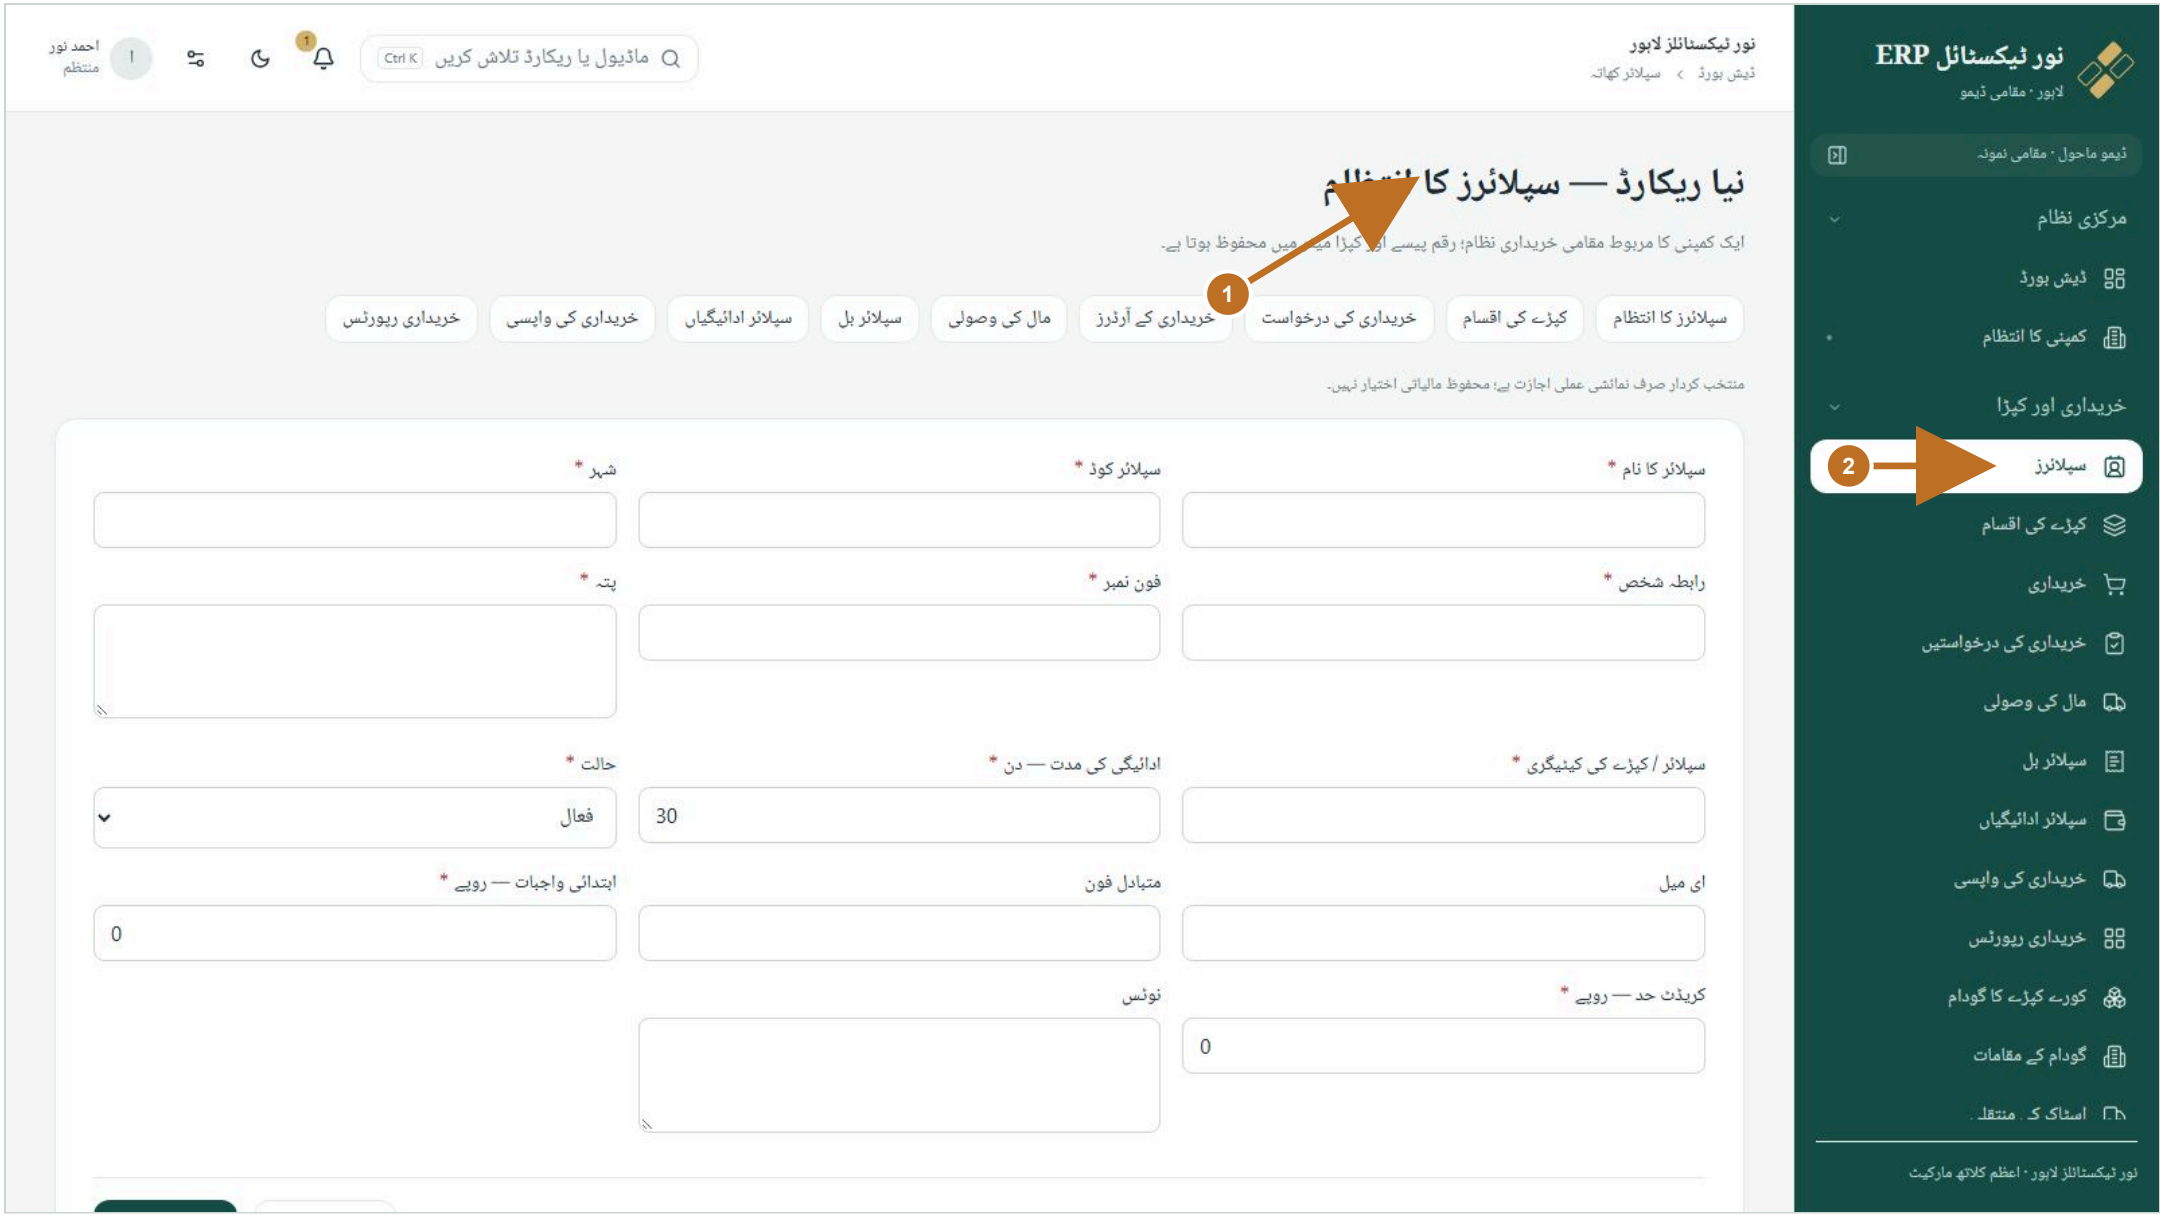

1 Screen purpose
Create a new source-linked record. Fill the visible required fields (*) and the additional fields listed below; review the source, quantities, units and dates before saving.

2 Navigation & use
Complete the visible fields below. Required labels carry an asterisk (*); select the correct linked source and unit, review quantities, then use the on-screen save and approval/posting actions.

Business connection
Source links join supplier, purchase request/order, measured GRN, lot/roll stock, bill, payment and return. Each posting has a distinct effect.

Form fields shown
سپلائر · آرڈر کی تاریخ · متوقع وصولی · کورا گودام · ادائیگی کی مدت — دن · نوٹس · کپڑا · مقدار · خریداری اکائی · فی میٹر قیمت — روپے · لائن رعایت — روپے · رول / تھان کی پیمائشیں · تفصیلات

1 Screen purpose
Create a new source-linked record. Fill the visible required fields (*) and the additional fields listed below; review the source, quantities, units and dates before saving.

2 Navigation & use
Complete the visible fields below. Required labels carry an asterisk (*); select the correct linked source and unit, review quantities, then use the on-screen save and approval/posting actions.

Business connection
Follow the linked source document and its status; a draft, report or reservation is not the same as a posted physical movement.

Form fields shown
سپلائر کا نام · سپلائر کوڈ · شہر · رابطہ شخص · فون نمبر · پتہ · سپلائر / کپڑے کی کیٹیگری · ادائیگی کی مدت — دن · حالت · ای میل · متبادل فون · ابتدائی واجبات — روپے · کریڈٹ حد — روپے · نوٹس

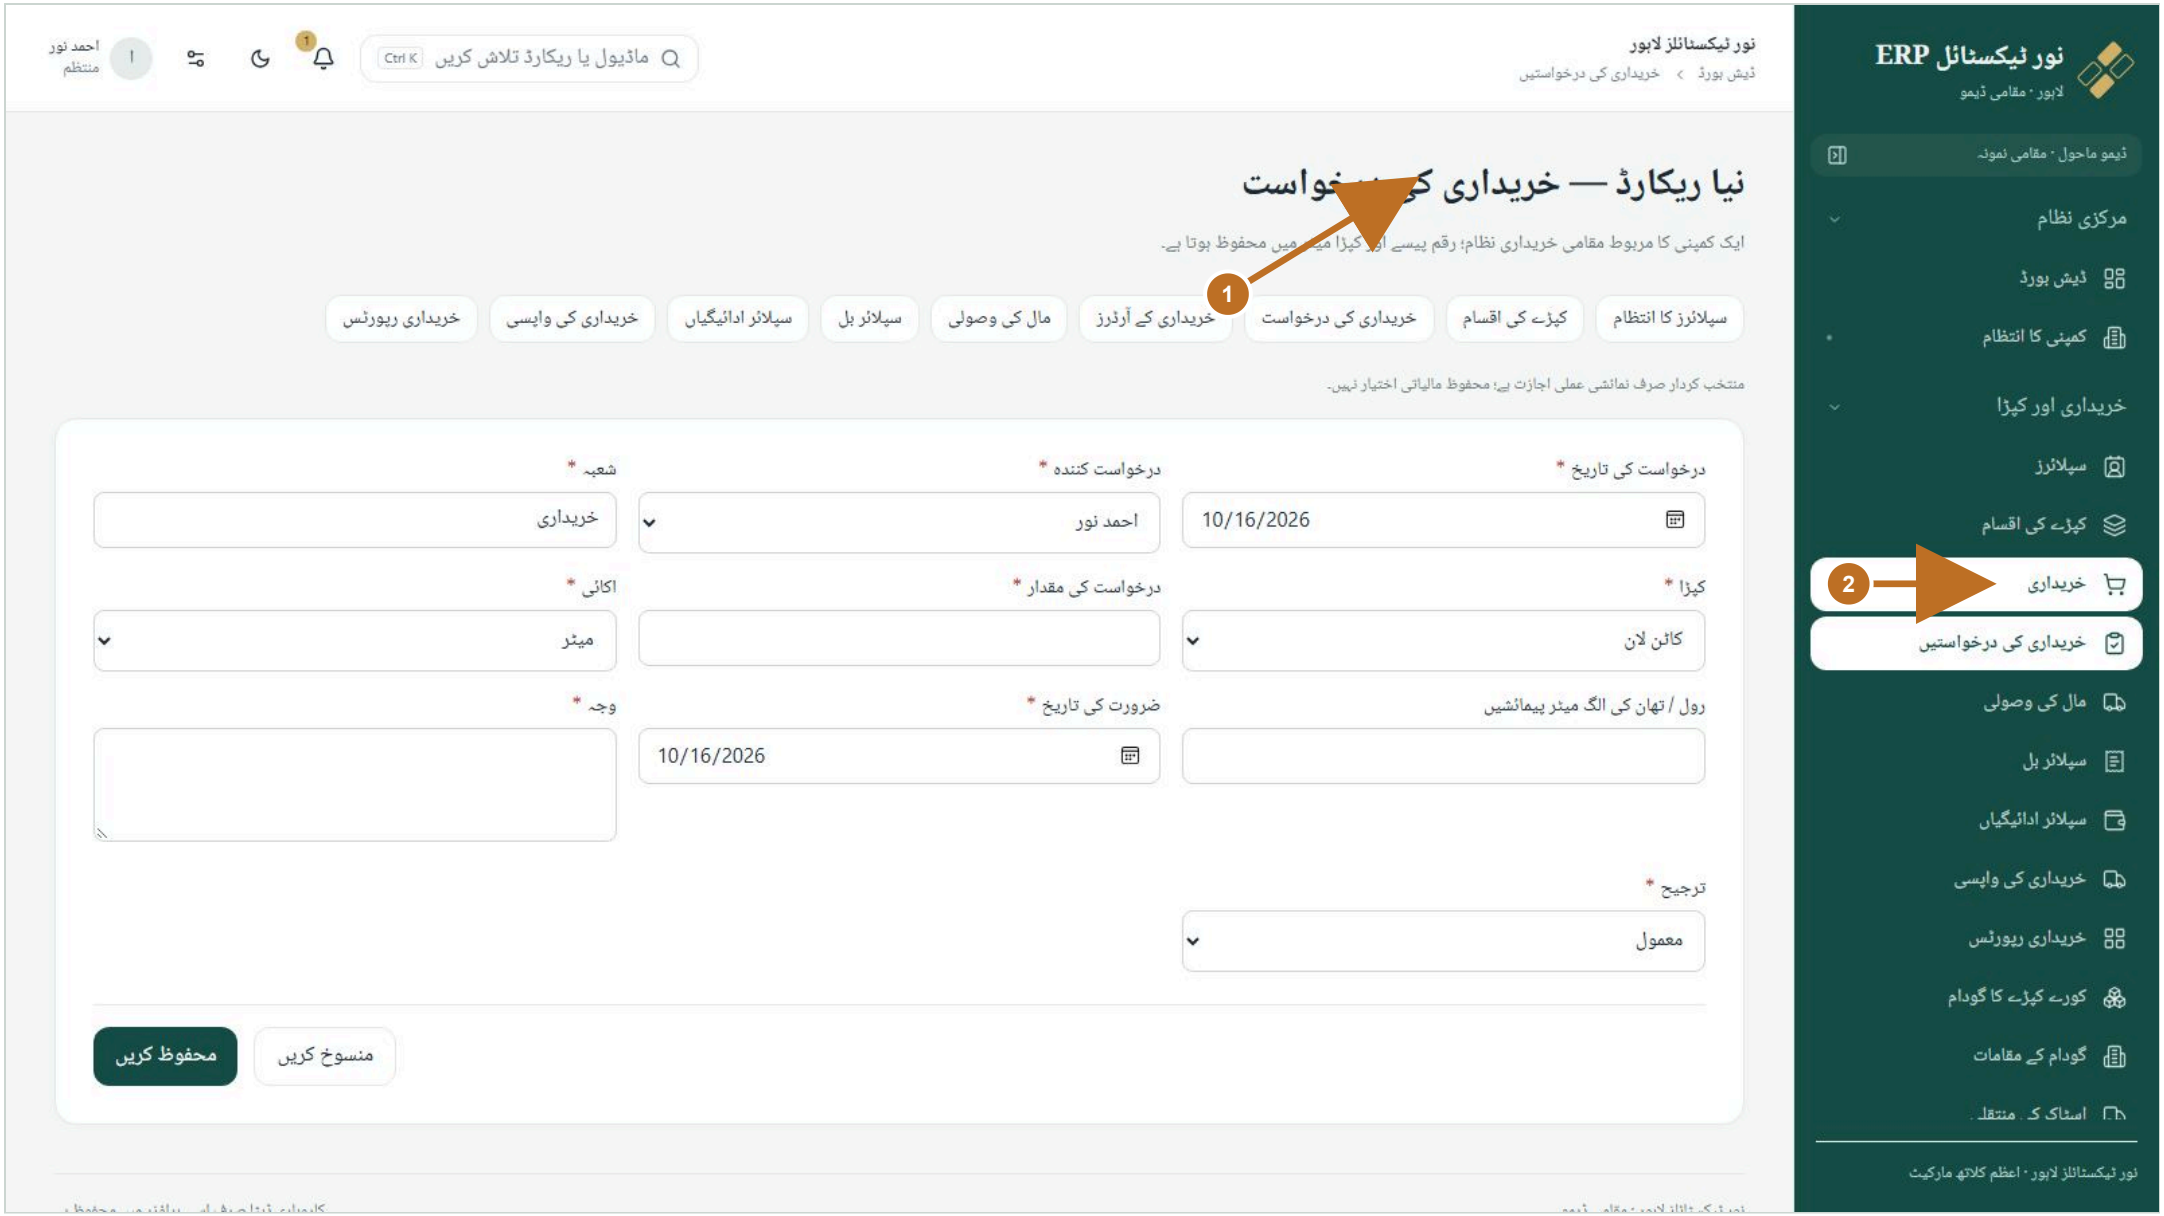

1 Screen purpose
Create a new source-linked record. Fill the visible required fields (*) and the additional fields listed below; review the source, quantities, units and dates before saving.

2 Navigation & use
Complete the visible fields below. Required labels carry an asterisk (*); select the correct linked source and unit, review quantities, then use the on-screen save and approval/posting actions.

Business connection
Follow the linked source document and its status; a draft, report or reservation is not the same as a posted physical movement.

Form fields shown
کپڑے کا نام · کپڑے کا کوڈ · ترکیب · کپڑے کی کیٹیگری · چوڑائی · چوڑائی کی اکائی · جی ایس ایم · خریداری کی طے شدہ اکائی · طے شدہ سپلائر · فی میٹر خریداری قیمت — روپے · معیار کی گریڈ · دوبارہ خریداری کی حد — میٹر · حالت · تفصیل

1 Screen purpose
Create a new source-linked record. Fill the visible required fields (*) and the additional fields listed below; review the source, quantities, units and dates before saving.

2 Navigation & use
Complete the visible fields below. Required labels carry an asterisk (*); select the correct linked source and unit, review quantities, then use the on-screen save and approval/posting actions.

Business connection
Source links join supplier, purchase request/order, measured GRN, lot/roll stock, bill, payment and return. Each posting has a distinct effect.

Form fields shown
درخواست کی تاریخ · درخواست کنندہ · شعبہ · کپڑا · درخواست کی مقدار · اکائی · رول / تھان کی الگ میٹر پیمائشیں · ضرورت کی تاریخ · وجہ · ترجیح

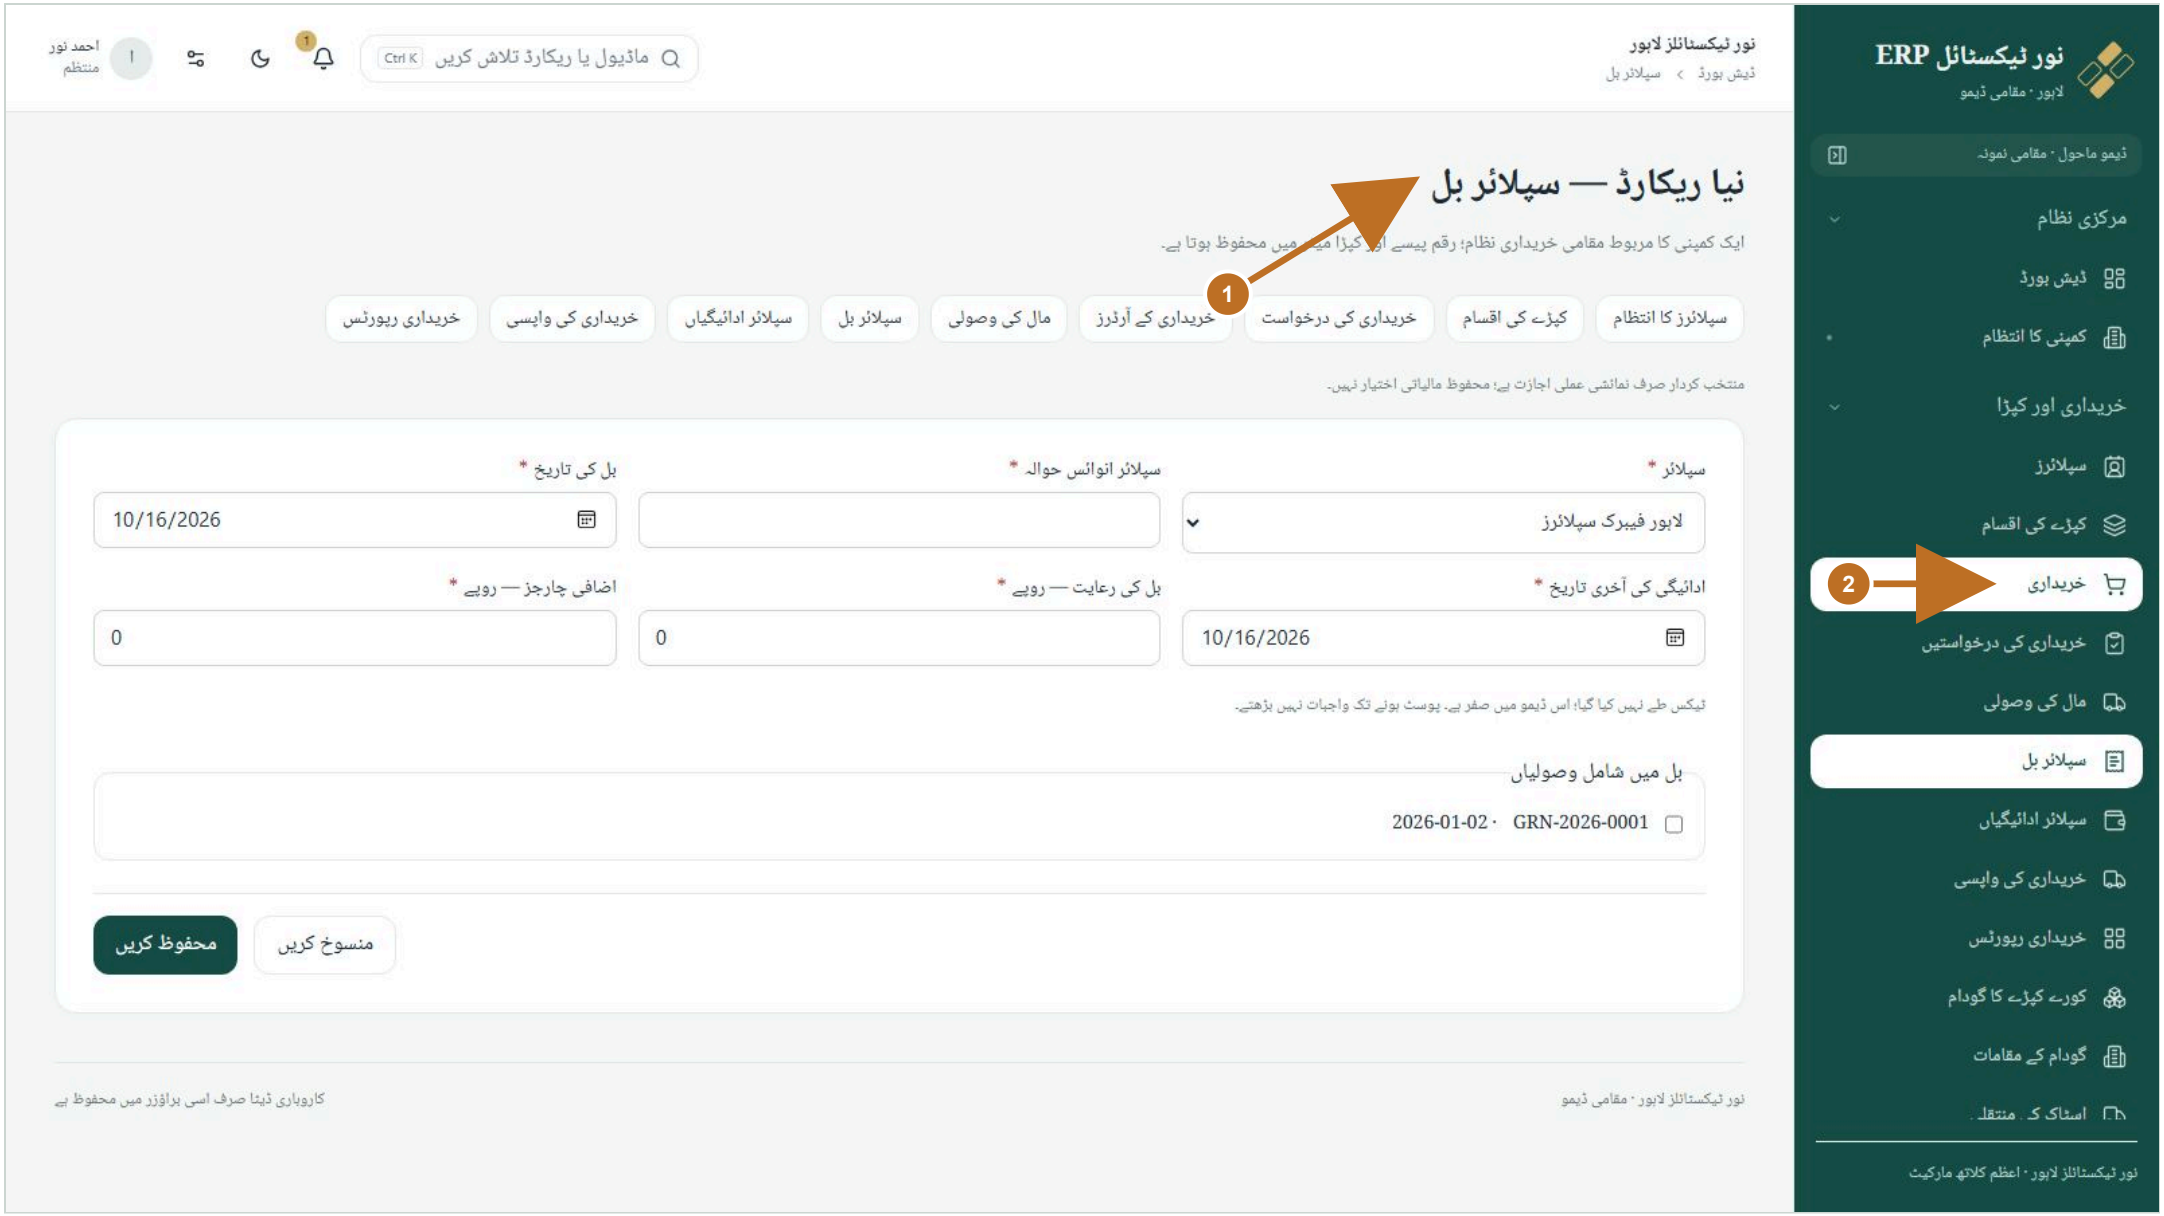

1 Screen purpose
Create a new source-linked record. Fill the visible required fields (*) and the additional fields listed below; review the source, quantities, units and dates before saving.

2 Navigation & use
Complete the visible fields below. Required labels carry an asterisk (*); select the correct linked source and unit, review quantities, then use the on-screen save and approval/posting actions.

Business connection
Source links join supplier, purchase request/order, measured GRN, lot/roll stock, bill, payment and return. Each posting has a distinct effect.

Form fields shown
خریداری آرڈر · وصولی کی تاریخ · وصولی کا گودام · وصول کنندہ · سپلائر چالان حوالہ · ٹرانسپورٹ حوالہ · نوٹس · آرڈر لائن · رول نمبر · پیمائش · پیمائش کی اکائی · پیکنگ اکائی · چوڑائی — انچ · معیار گریڈ +2 more fields

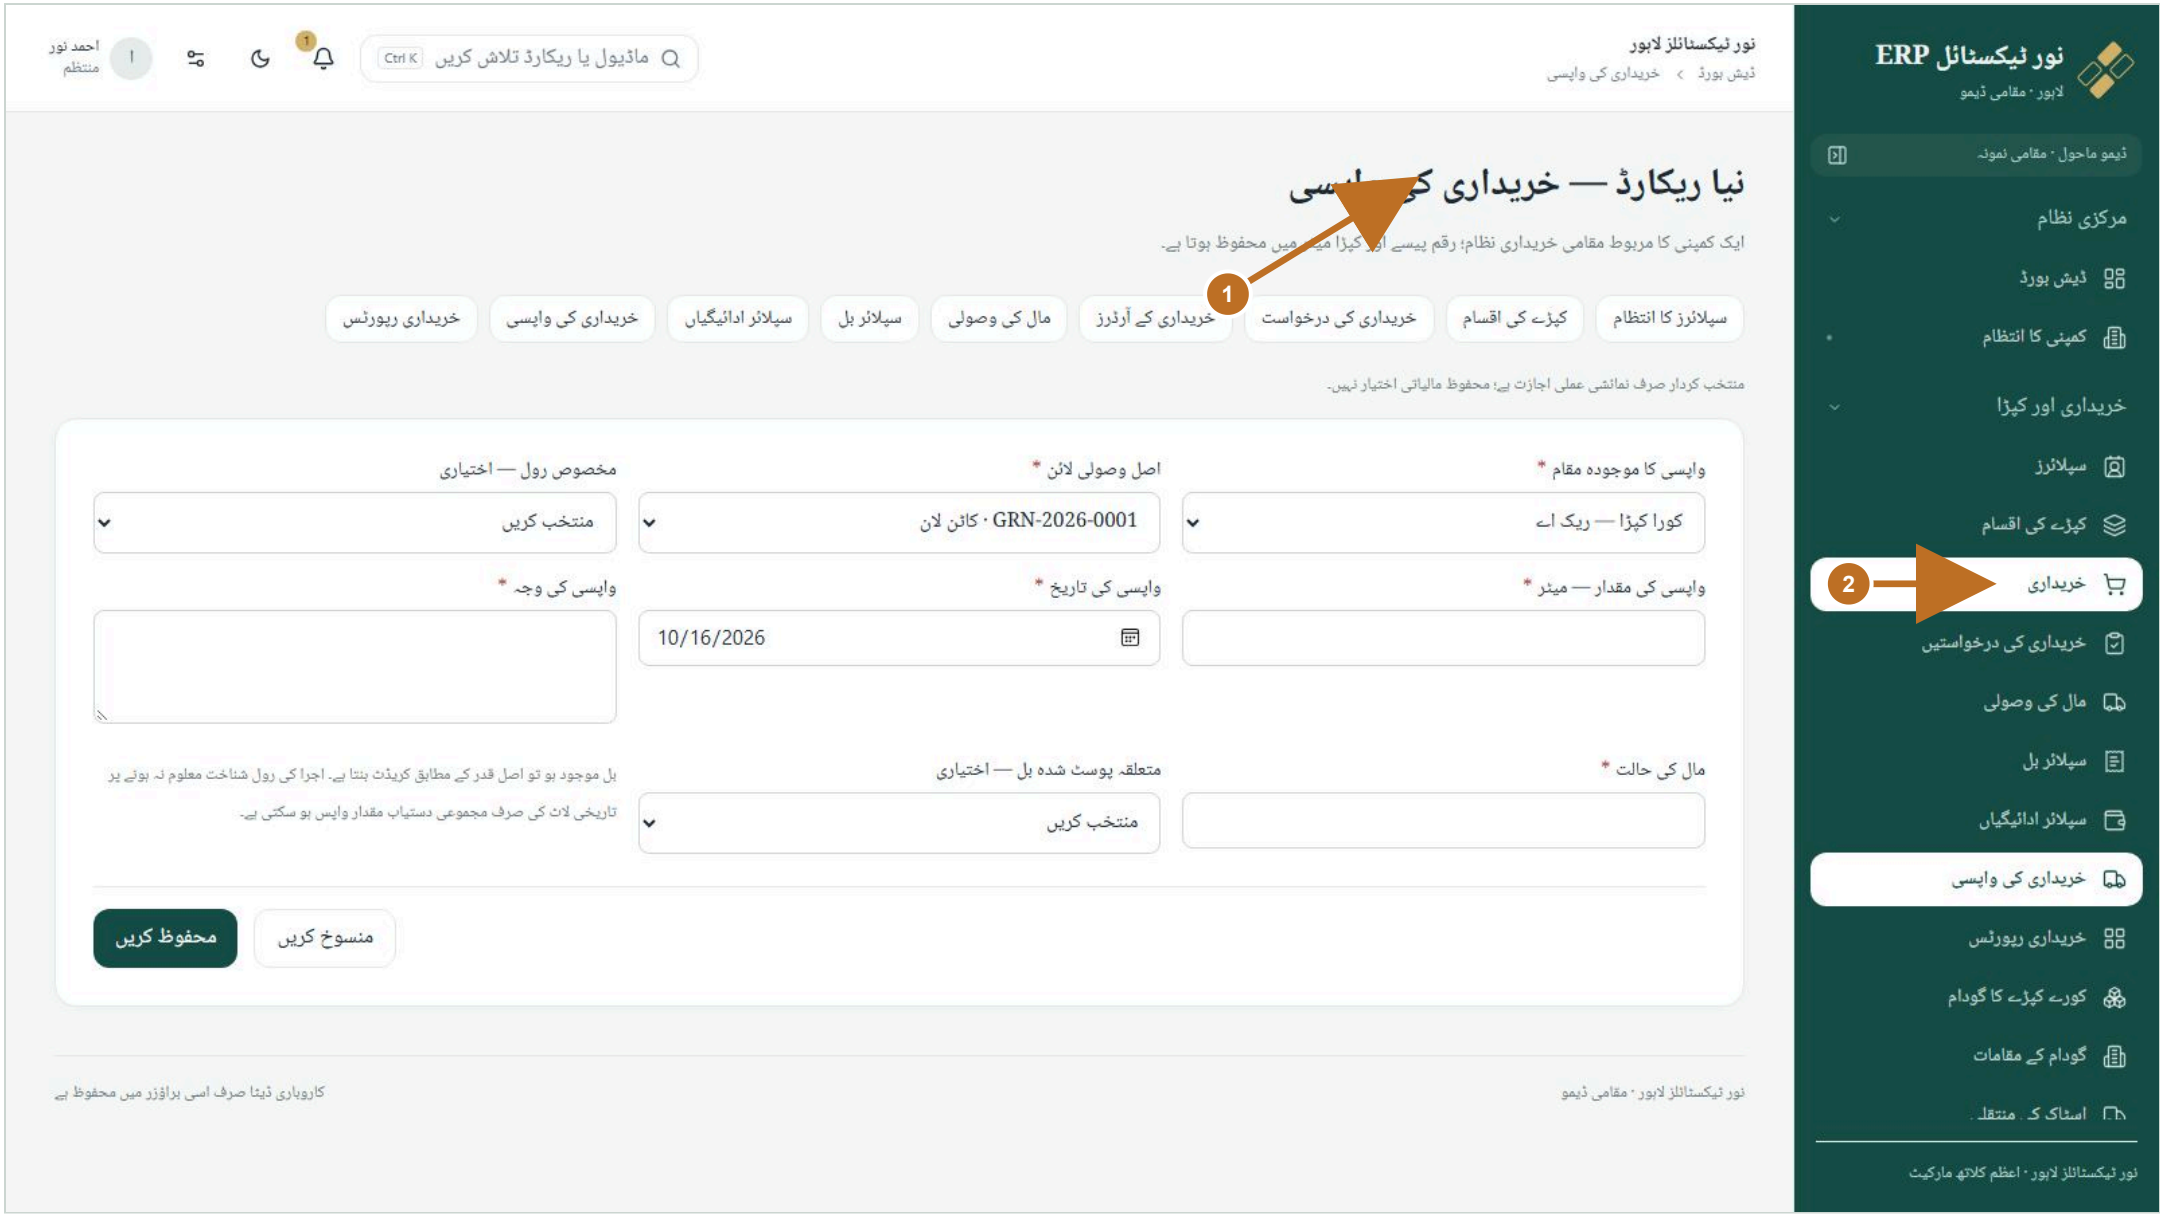

1 Screen purpose
Create a new source-linked record. Fill the visible required fields (*) and the additional fields listed below; review the source, quantities, units and dates before saving.

2 Navigation & use
Complete the visible fields below. Required labels carry an asterisk (*); select the correct linked source and unit, review quantities, then use the on-screen save and approval/posting actions.

Business connection
Source links join supplier, purchase request/order, measured GRN, lot/roll stock, bill, payment and return. Each posting has a distinct effect.

Form fields shown
سپلائر · سپلائر انوائس حوالہ · بل کی تاریخ · ادائیگی کی آخری تاریخ · بل کی رعایت — روپے · اضافی چارجز — روپے · GRN-2026-0001 · 2026-01-02

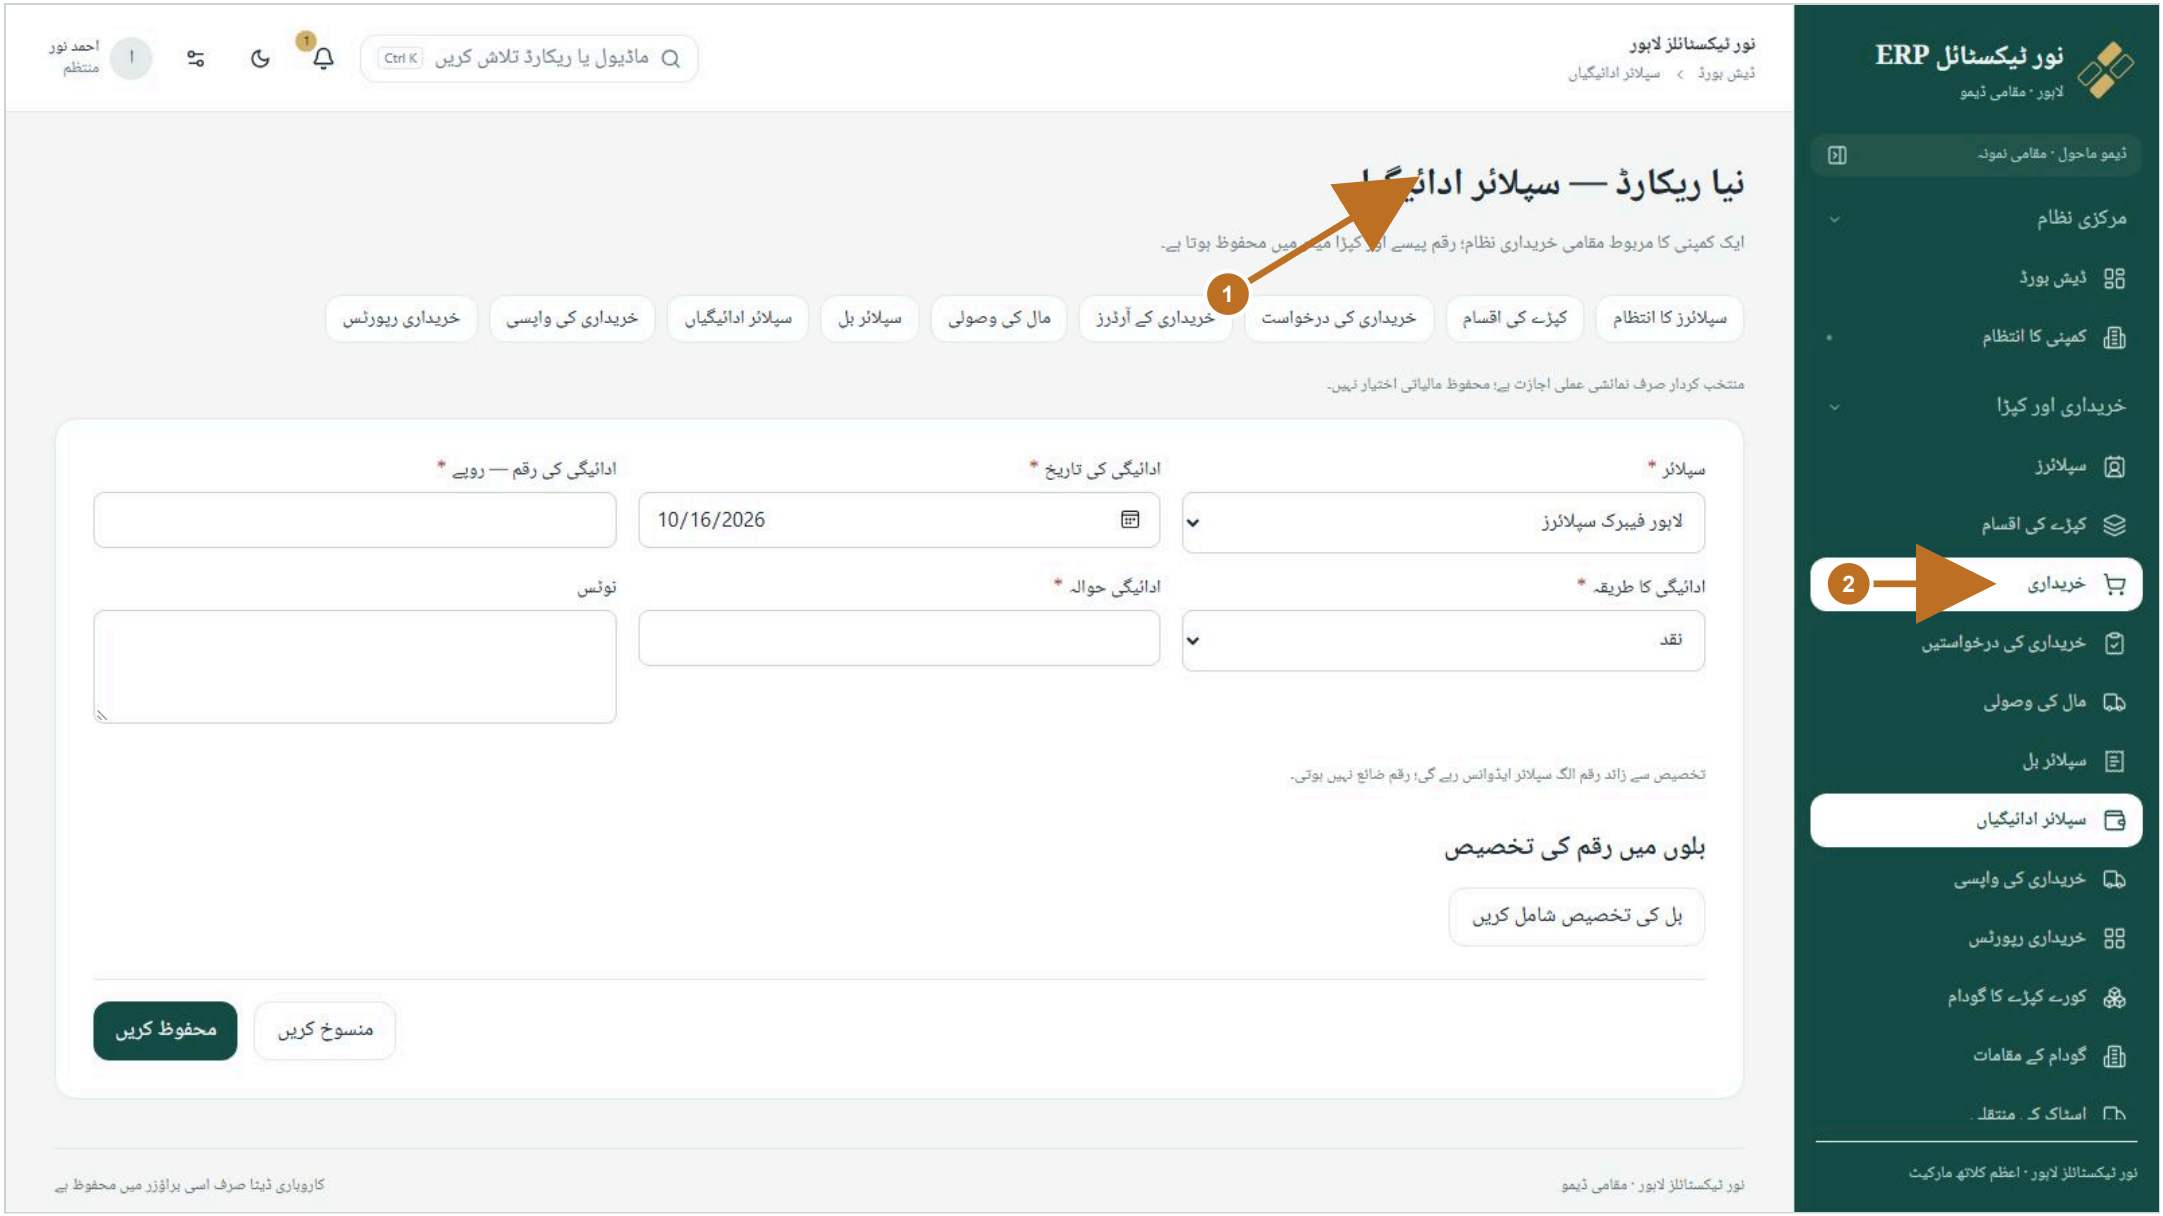

1 Screen purpose
Create a new source-linked record. Fill the visible required fields (*) and the additional fields listed below; review the source, quantities, units and dates before saving.

2 Navigation & use
Complete the visible fields below. Required labels carry an asterisk (*); select the correct linked source and unit, review quantities, then use the on-screen save and approval/posting actions.

Business connection
Source links join supplier, purchase request/order, measured GRN, lot/roll stock, bill, payment and return. Each posting has a distinct effect.

Form fields shown
واپسی کا موجودہ مقام · اصل وصولی لائن · مخصوص رول — اختیاری · واپسی کی مقدار — میٹر · واپسی کی تاریخ · واپسی کی وجہ · مال کی حالت · متعلقہ پوسٹ شدہ بل — اختیاری

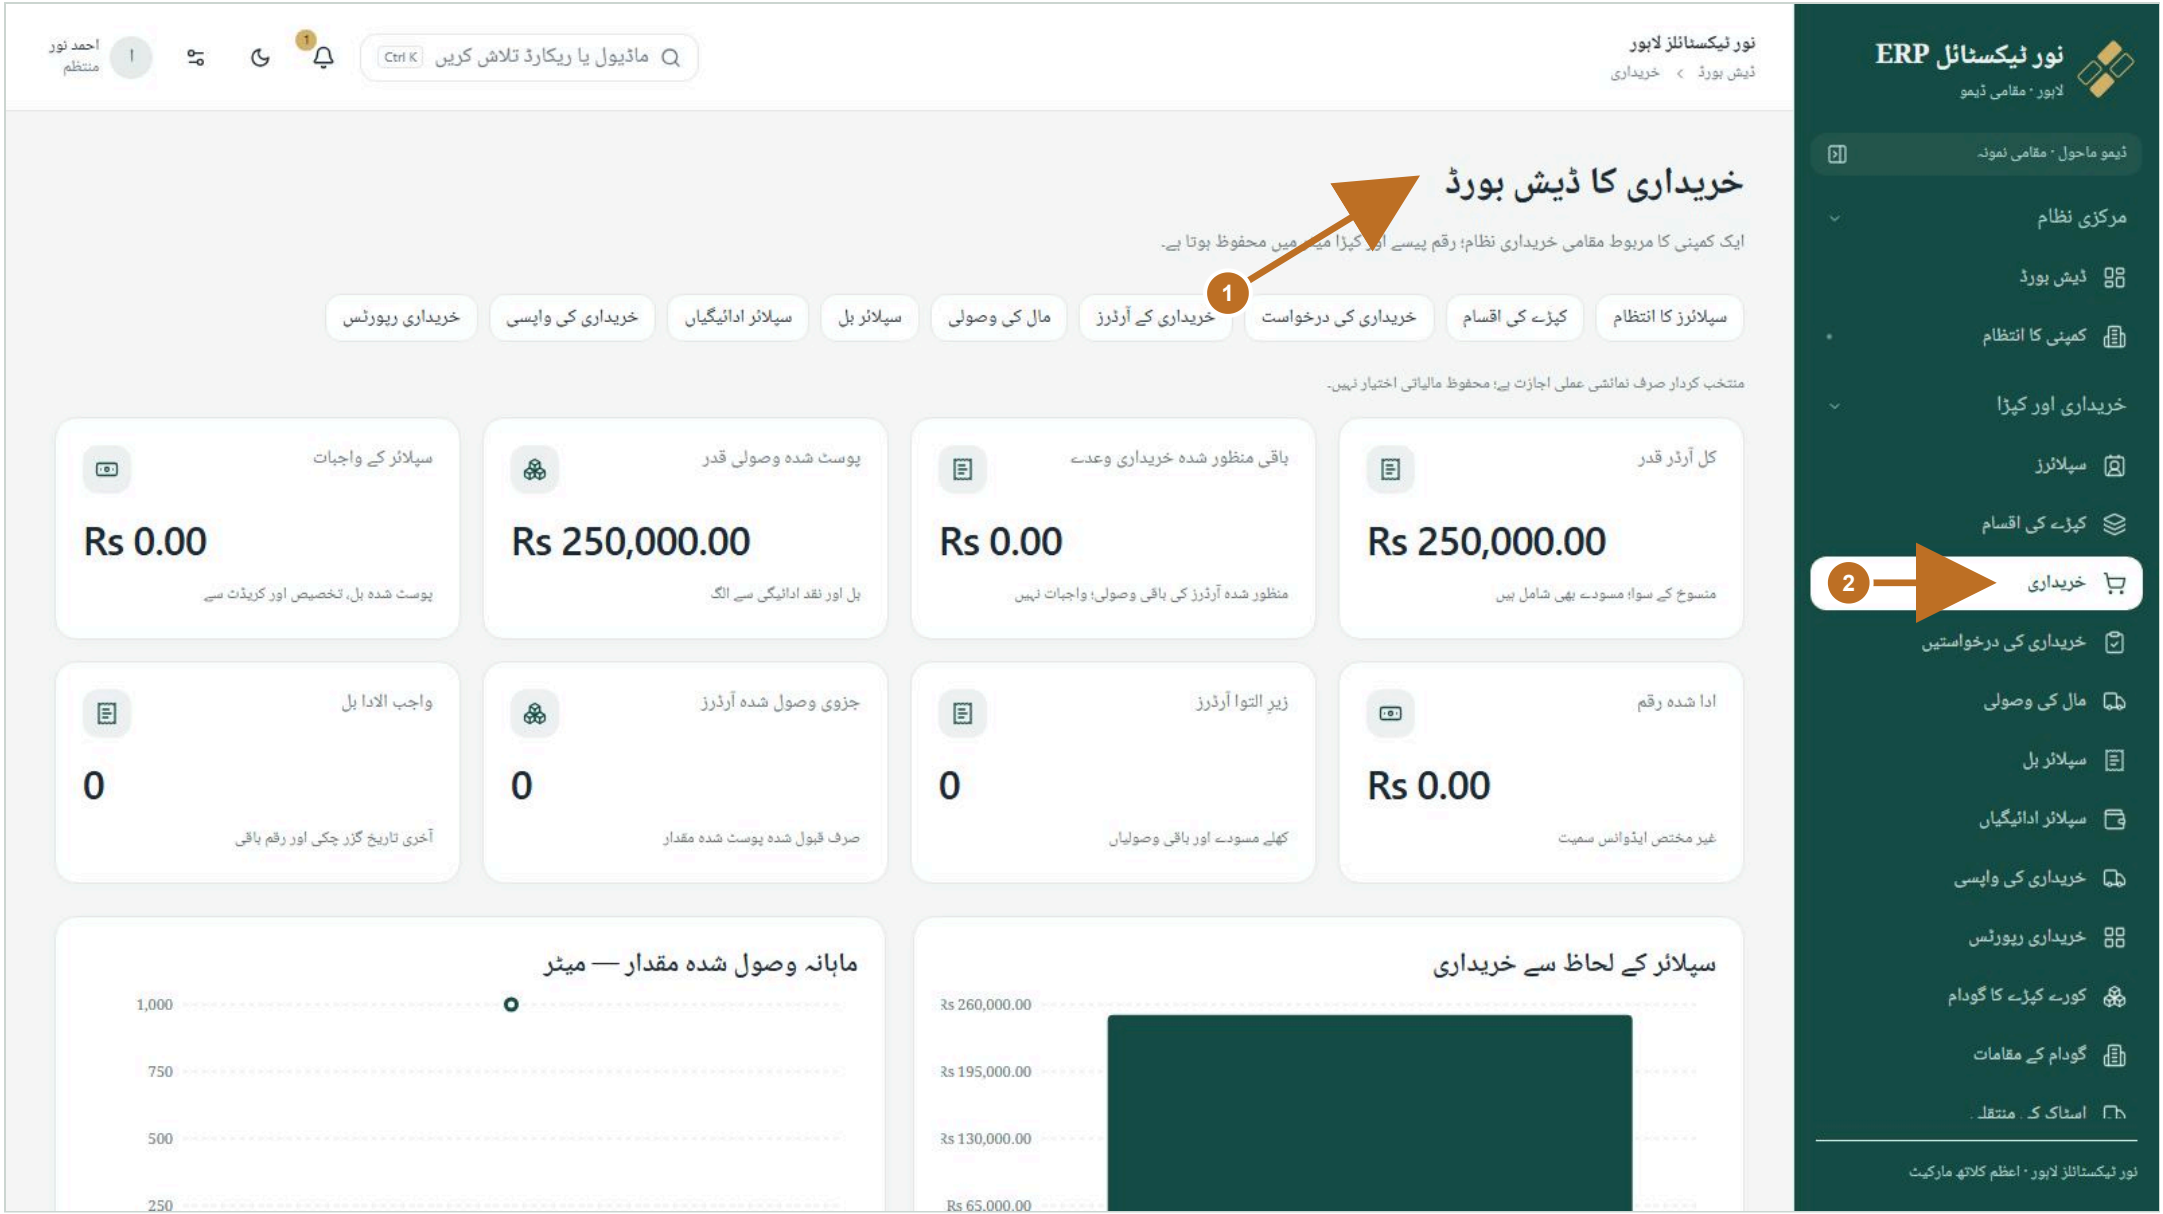

1 Screen purpose
Create a new source-linked record. Fill the visible required fields (*) and the additional fields listed below; review the source, quantities, units and dates before saving.

2 Navigation & use
Complete the visible fields below. Required labels carry an asterisk (*); select the correct linked source and unit, review quantities, then use the on-screen save and approval/posting actions.

Business connection
Source links join supplier, purchase request/order, measured GRN, lot/roll stock, bill, payment and return. Each posting has a distinct effect.

Form fields shown
سپلائر · ادائیگی کی تاریخ · ادائیگی کی رقم — روپے · ادائیگی کا طریقہ · ادائیگی حوالہ · نوٹس

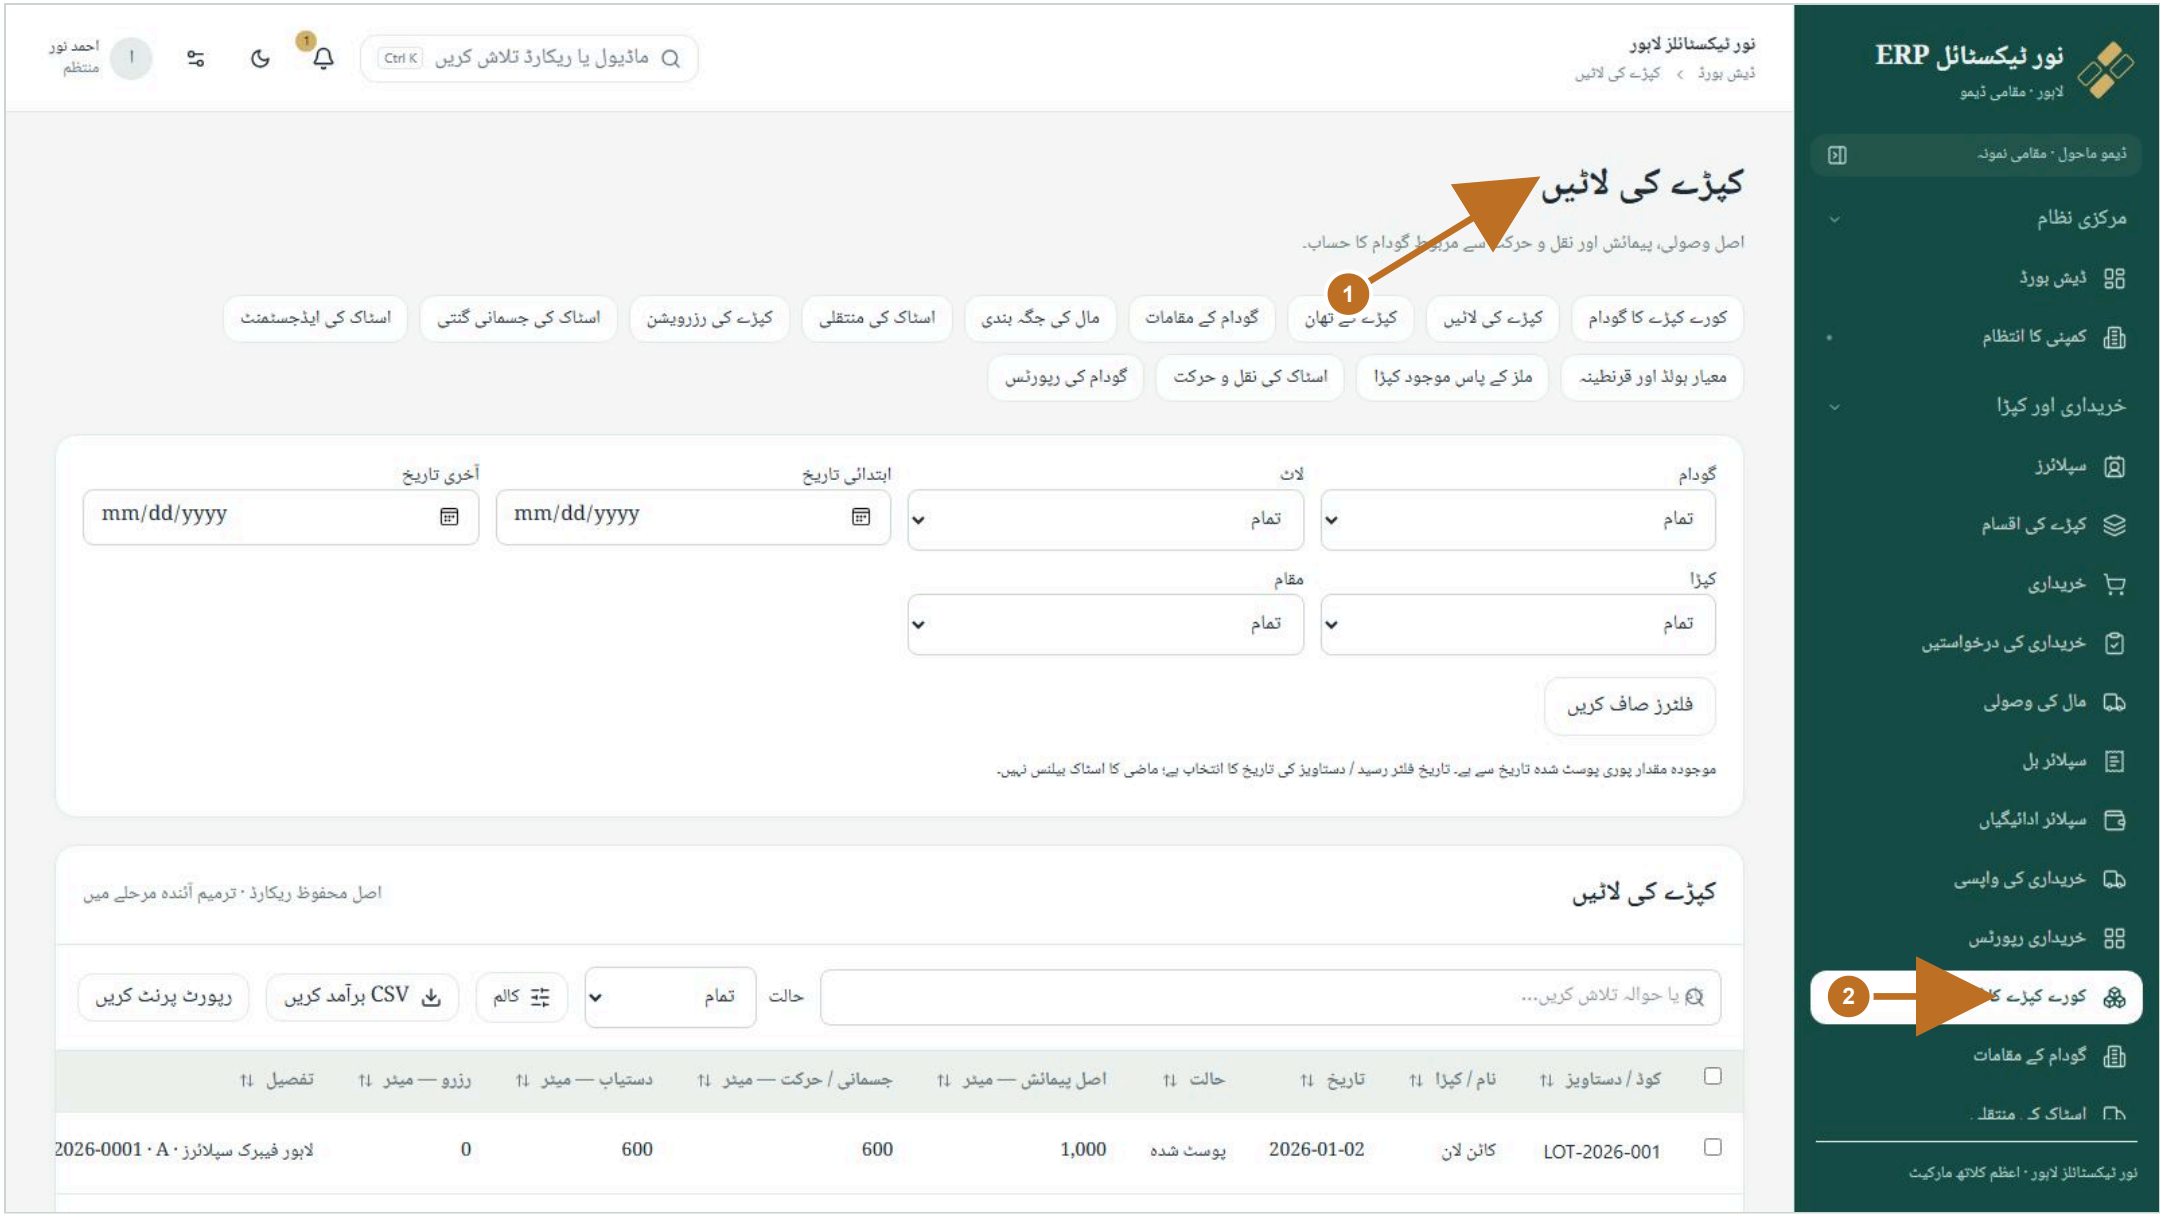

1 Screen purpose
Review the live indicators and follow their links to the source records that need attention.

2 Navigation & use
Use the register, filters, tabs and source links shown on the screen. Open the relevant record before using an edit, approval or posting action.

Business connection
Source links join supplier, purchase request/order, measured GRN, lot/roll stock, bill, payment and return. Each posting has a distinct effect.

Form / next step
No direct form on this screen. Use its linked child form or open a source record to continue.

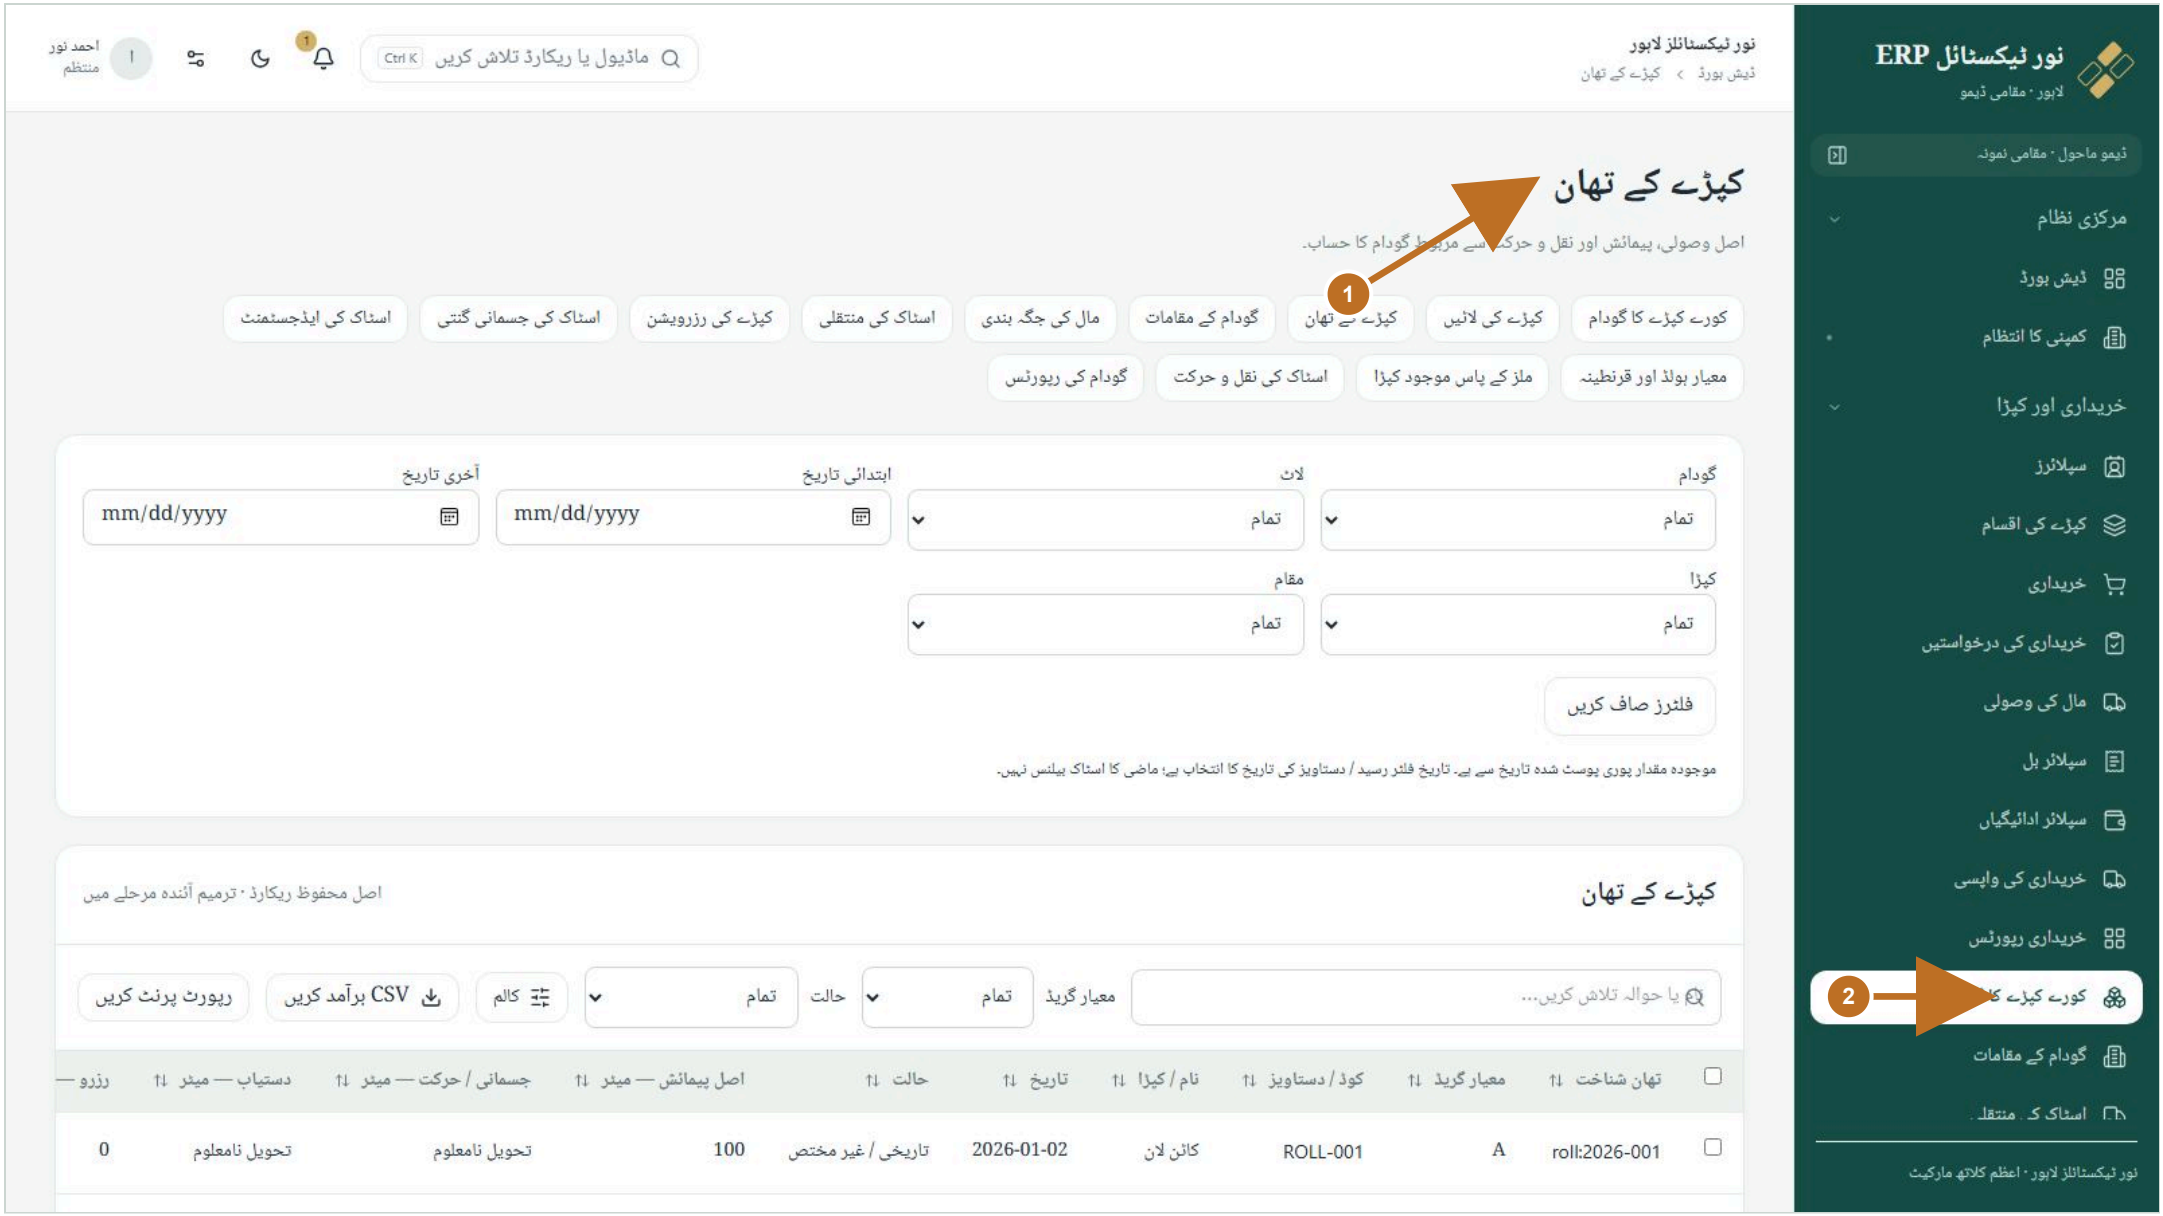

1 Screen purpose
Use this register to search and review the records for this business step, then open a source/detail record or start a supported action.

2 Navigation & use
Use the register, filters, tabs and source links shown on the screen. Open the relevant record before using an edit, approval or posting action.

Business connection
Warehouse records conserve stock identity across lots, rolls, locations, quality states and signed movements.

Form / next step
No direct form on this screen. Use its linked child form or open a source record to continue.

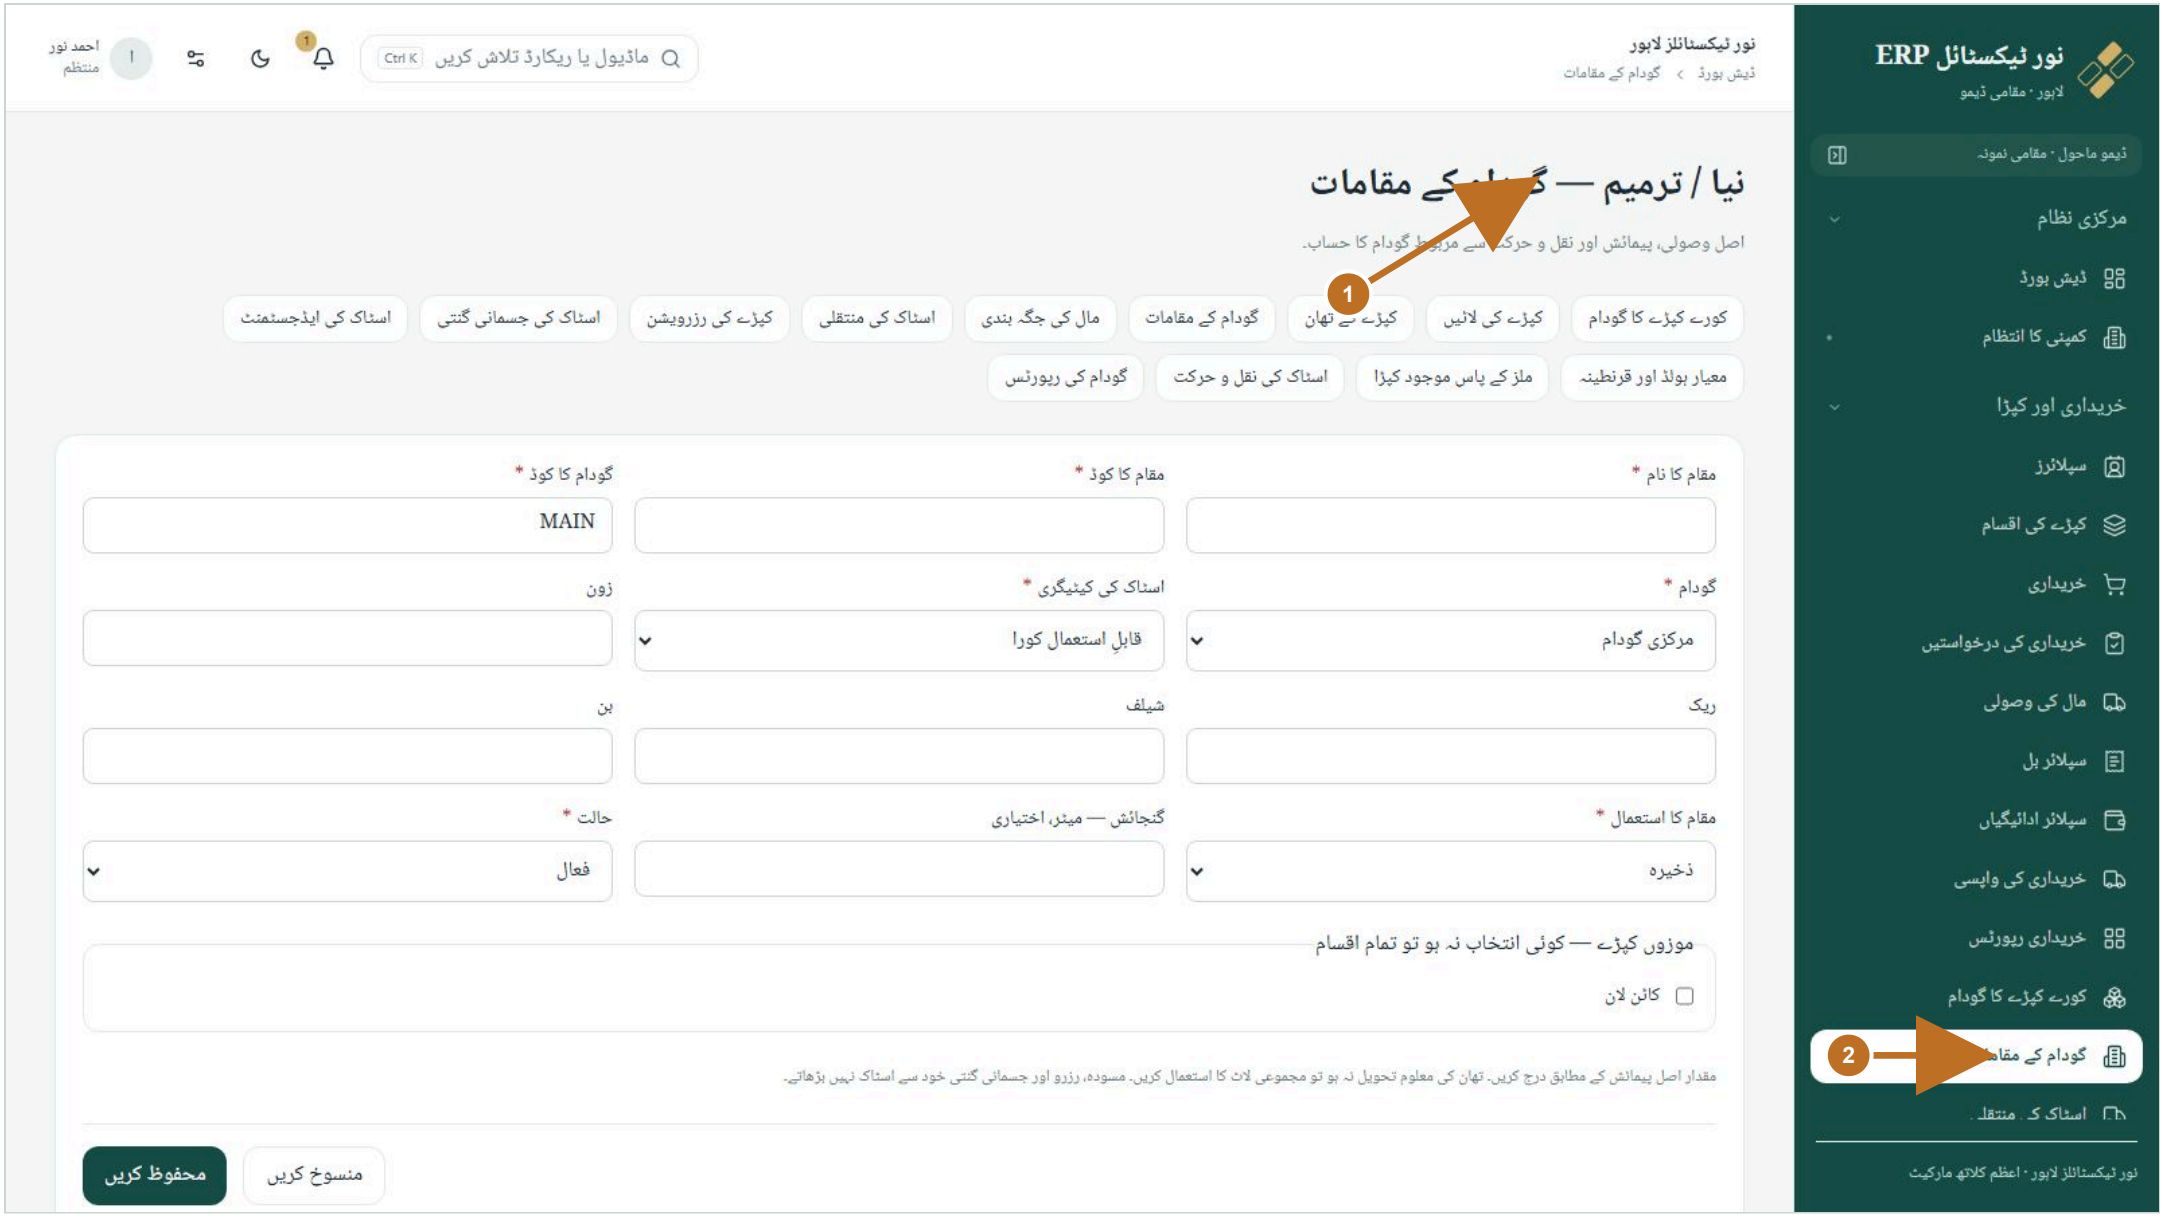

1 Screen purpose
Use this register to search and review the records for this business step, then open a source/detail record or start a supported action.

2 Navigation & use
Use the register, filters, tabs and source links shown on the screen. Open the relevant record before using an edit, approval or posting action.

1 Screen purpose
Review the work order and its source-linked material, cutting, component, inspection, cost and reporting records.

2 Navigation & use
Use the register, filters, tabs and source links shown on the screen. Open the relevant record before using an edit, approval or posting action.

Business connection
The approved work order links frozen design/BOM inputs to reservations, fabric issues, component lots, inspection and costing.

Form / next step
No direct form on this screen. Use its linked child form or open a source record to continue.

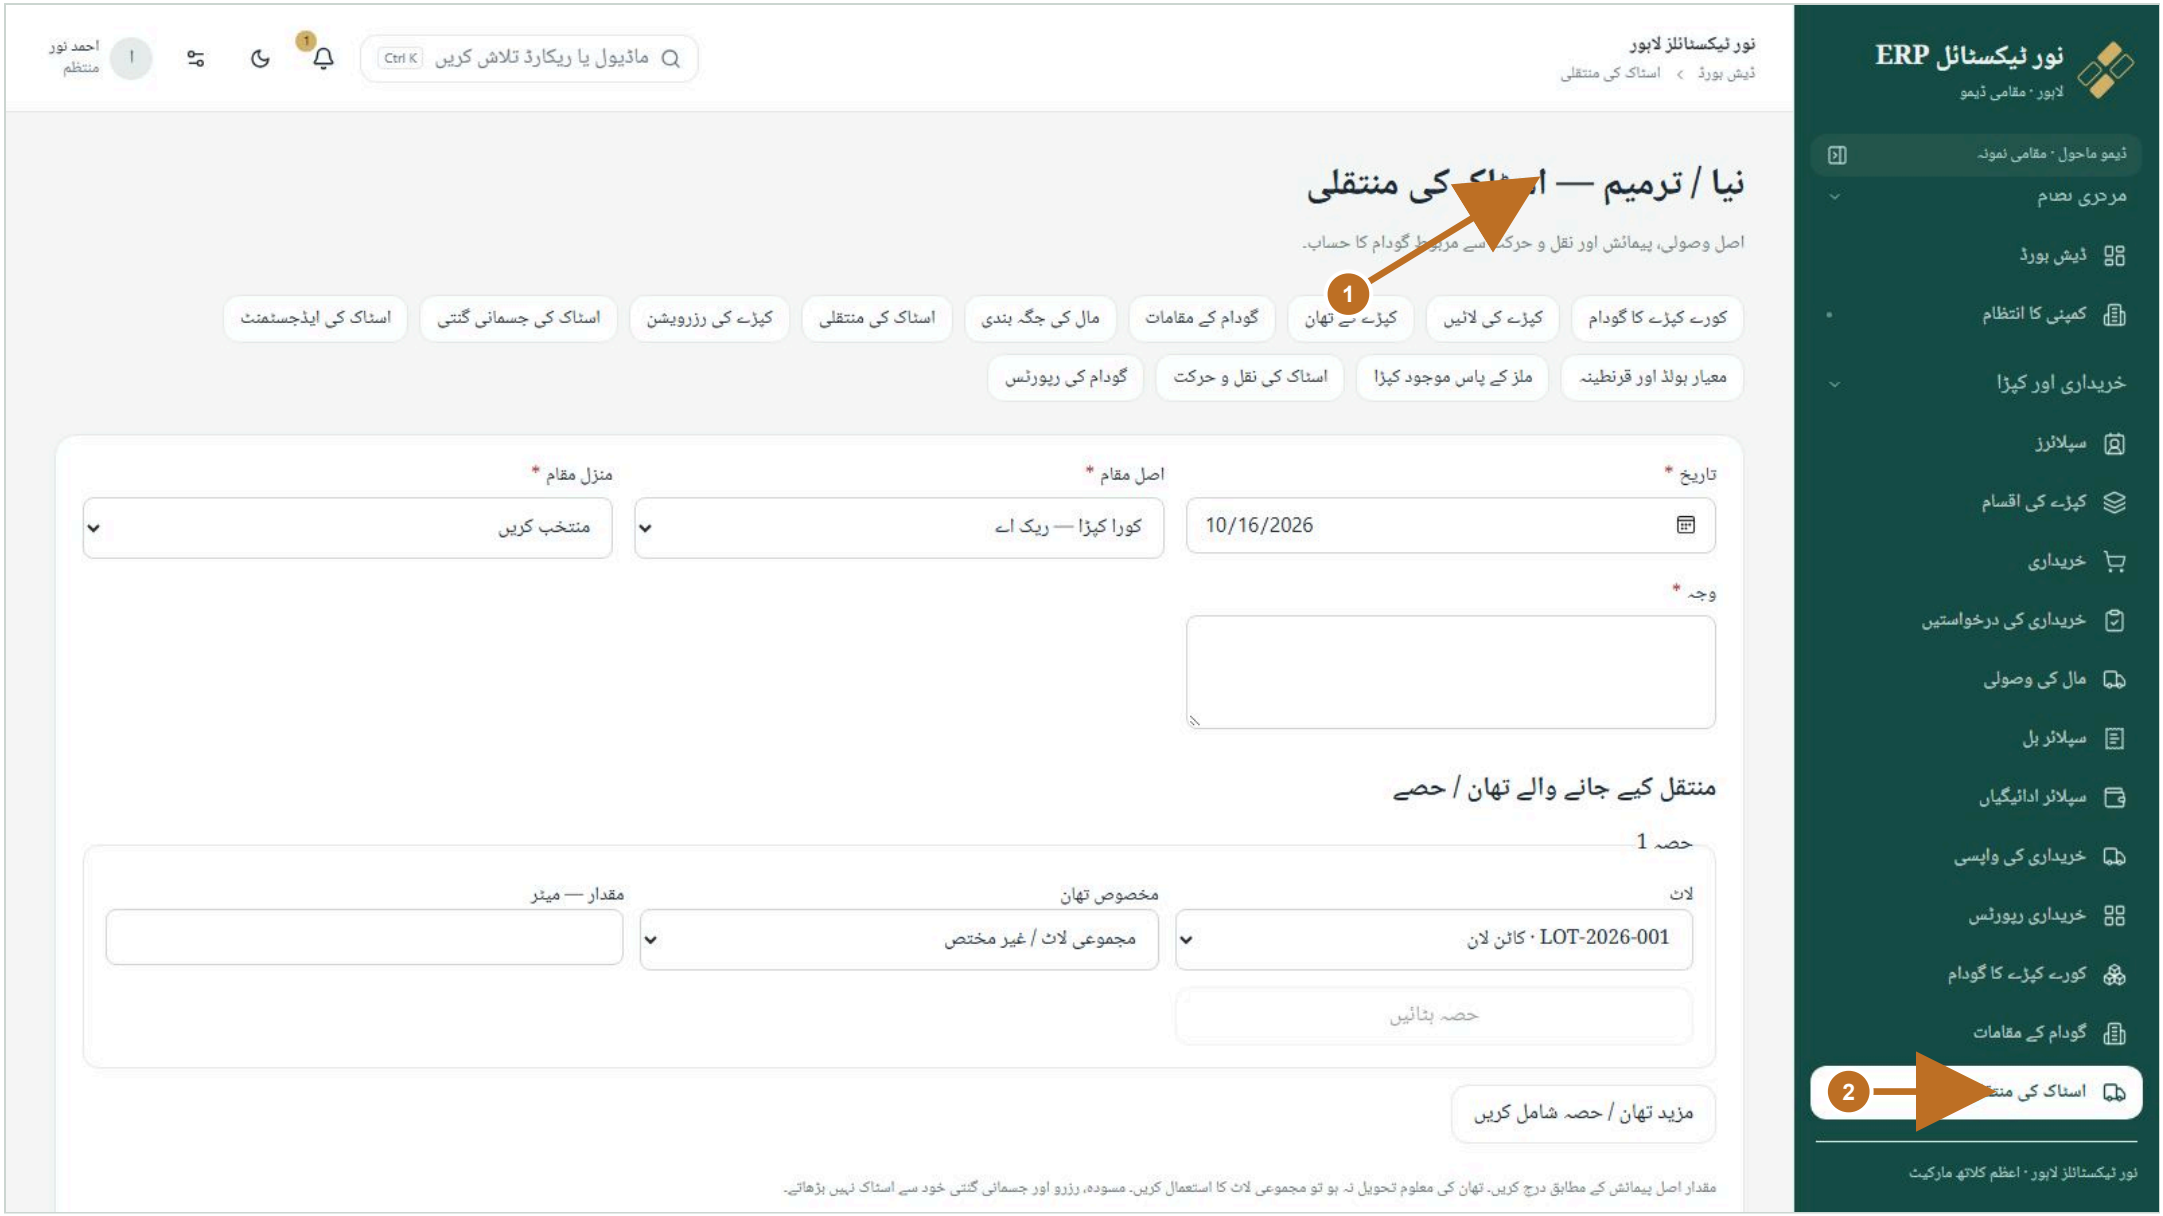

1 Screen purpose
Choose a report and available filters, then trace an exception back to the source transaction.

2 Navigation & use
Use the register, filters, tabs and source links shown on the screen. Open the relevant record before using an edit, approval or posting action.

Business connection
The approved work order links frozen design/BOM inputs to reservations, fabric issues, component lots, inspection and costing.

Form / next step
No direct form on this screen. Use its linked child form or open a source record to continue.

1 Screen purpose
Open the relevant record and use its visible status, filters and source links to review this submodule.

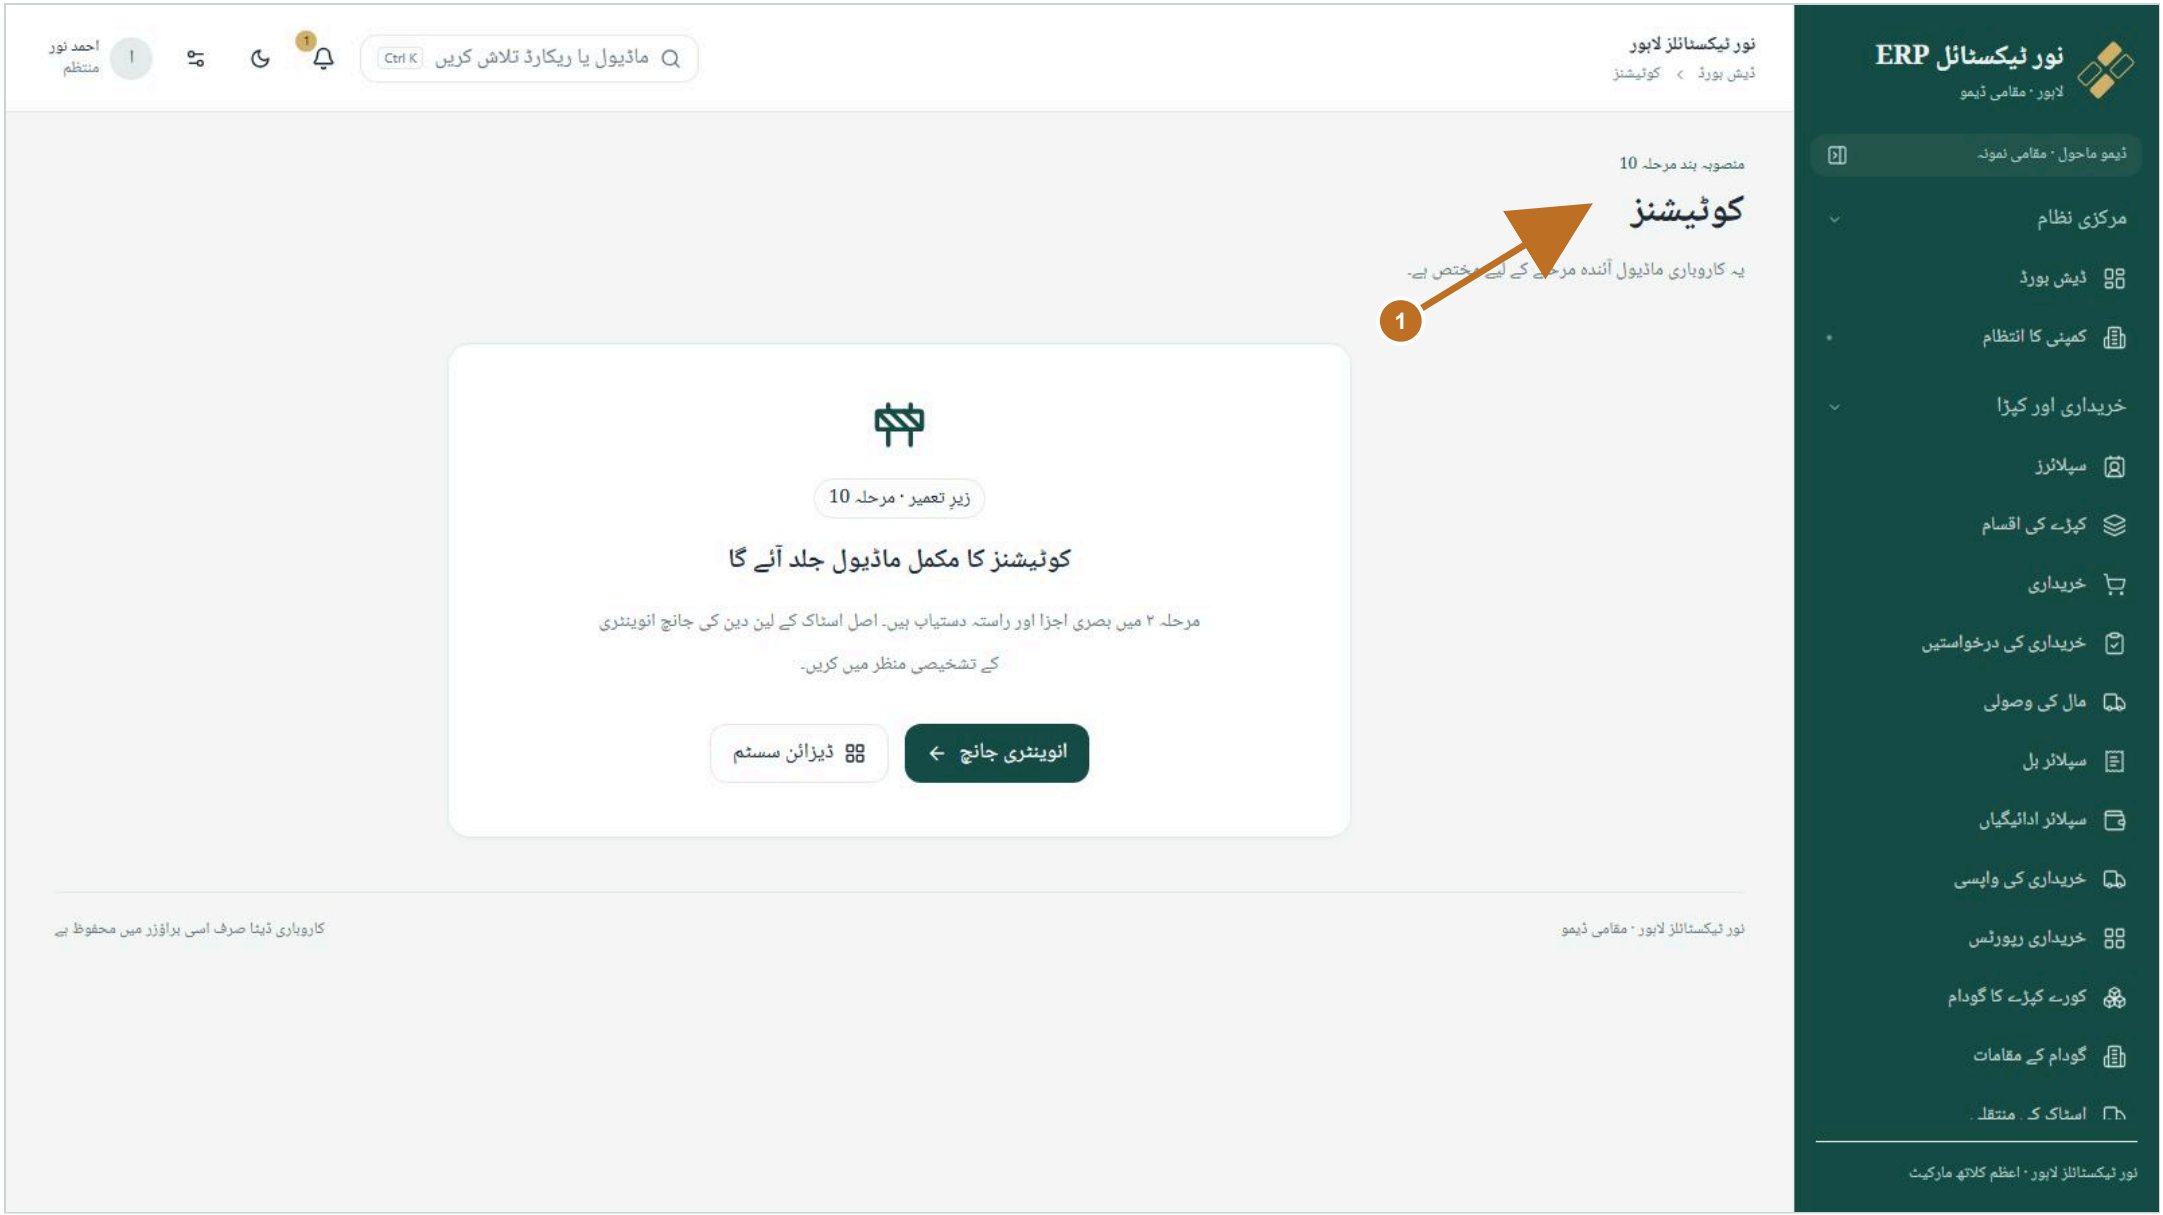

2 Navigation & use
Use the register, filters, tabs and source links shown on the screen. Open the relevant record before using an edit, approval or posting action.

Business connection
Follow the linked source document and its status; a draft, report or reservation is not the same as a posted physical movement.

Form / next step
No direct form on this screen. Use its linked child form or open a source record to continue.

1 Screen purpose
Review the live indicators and follow their links to the source records that need attention.

2 Navigation & use
Use the register, filters, tabs and source links shown on the screen. Open the relevant record before using an edit, approval or posting action.

Business connection
Matched sets consume compatible accepted component quantities from their source work order; incomplete sets remain visible WIP.

Form / next step
No direct form on this screen. Use its linked child form or open a source record to continue.

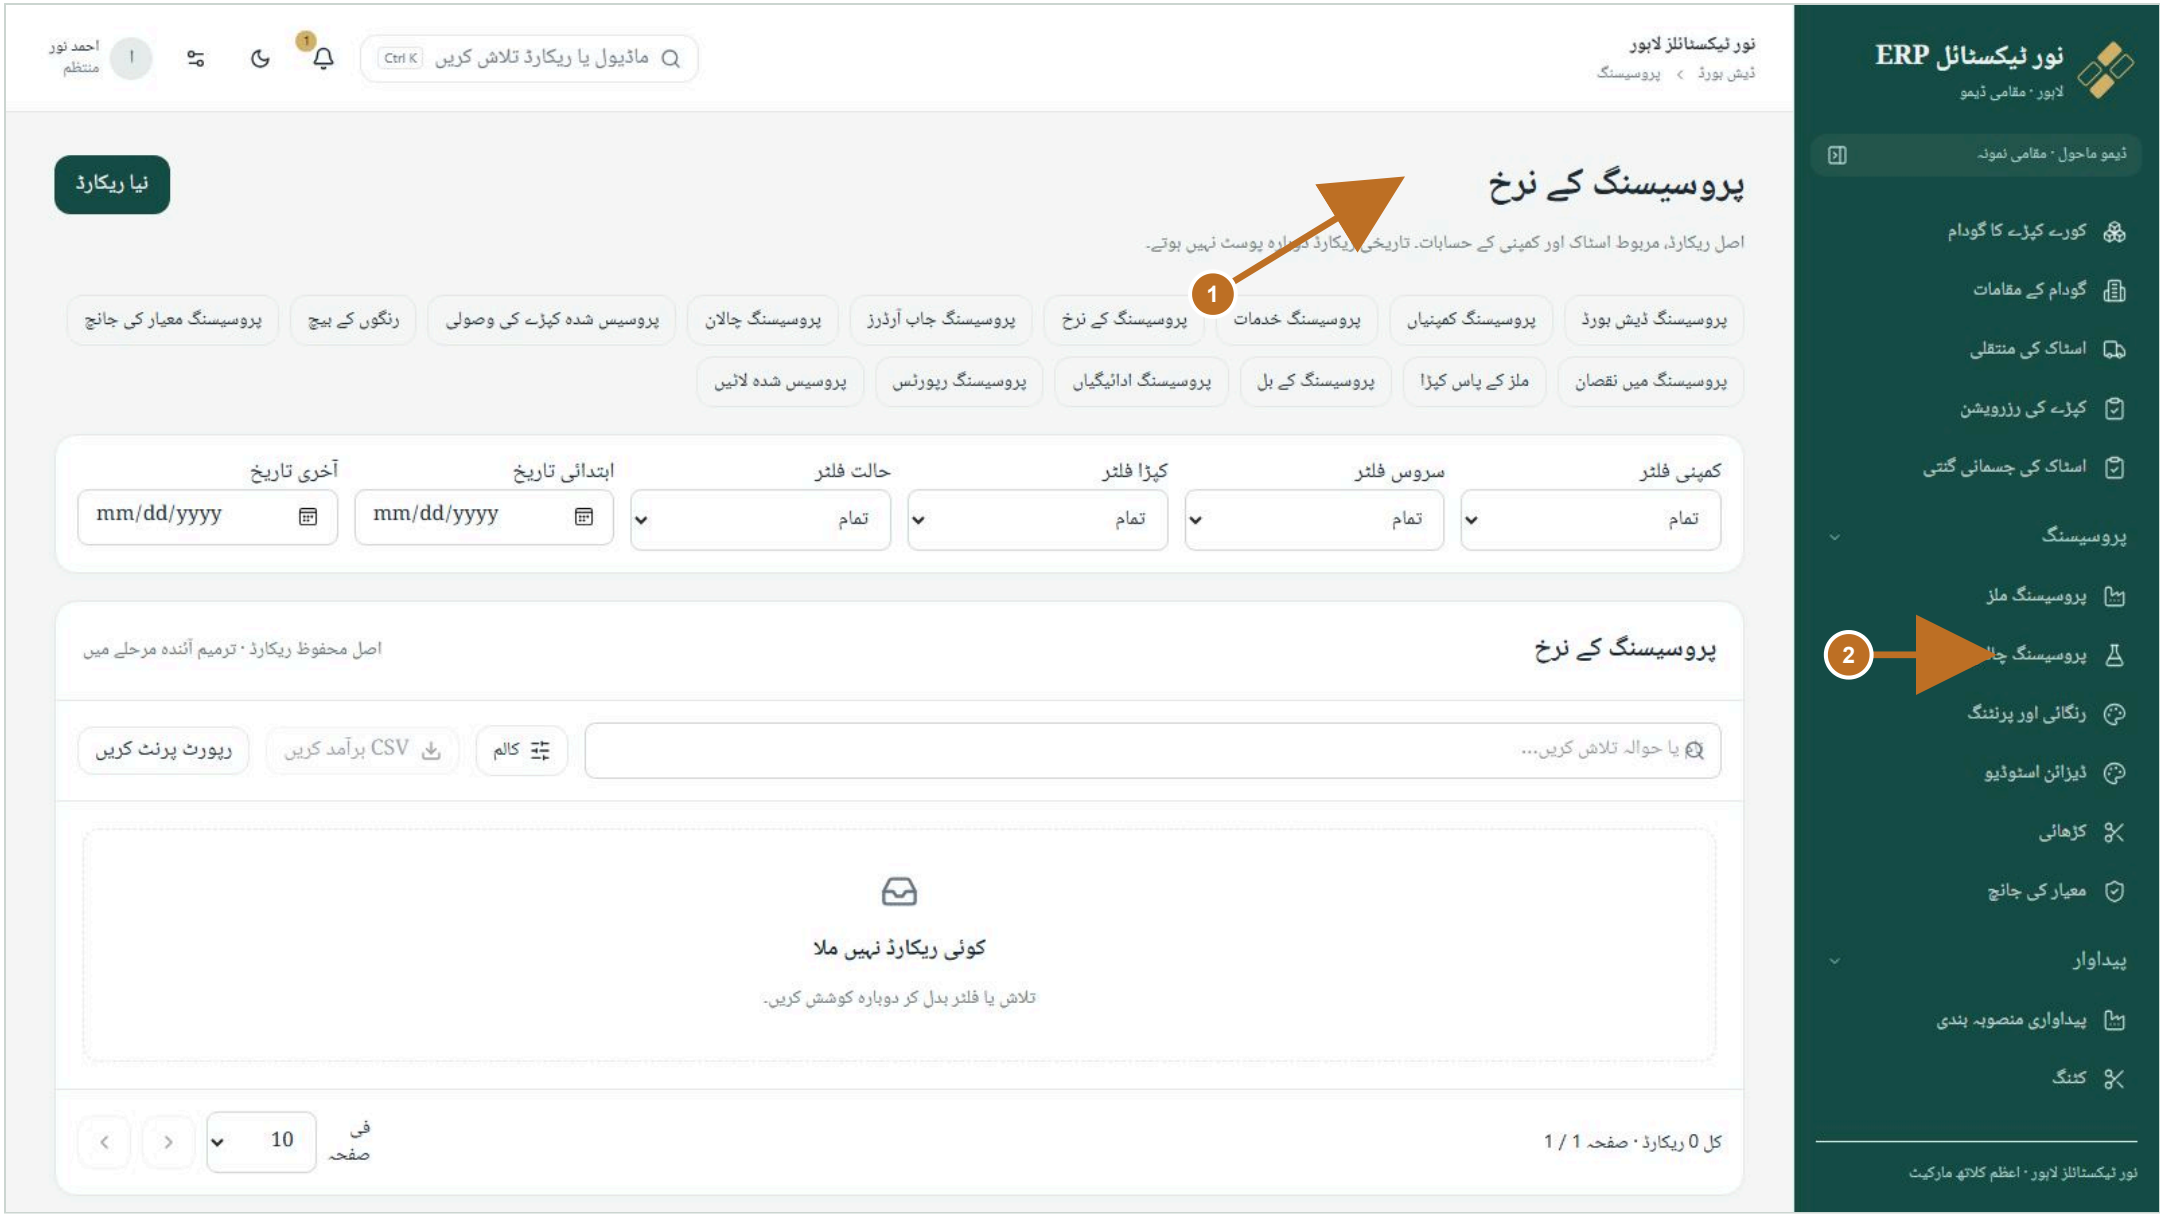

1 Screen purpose
Use this register to search and review the records for this business step, then open a source/detail record or start a supported action.

2 Navigation & use
Use the register, filters, tabs and source links shown on the screen. Open the relevant record before using an edit, approval or posting action.

Business connection
Matched sets consume compatible accepted component quantities from their source work order; incomplete sets remain visible WIP.

Form / next step
No direct form on this screen. Use its linked child form or open a source record to continue.

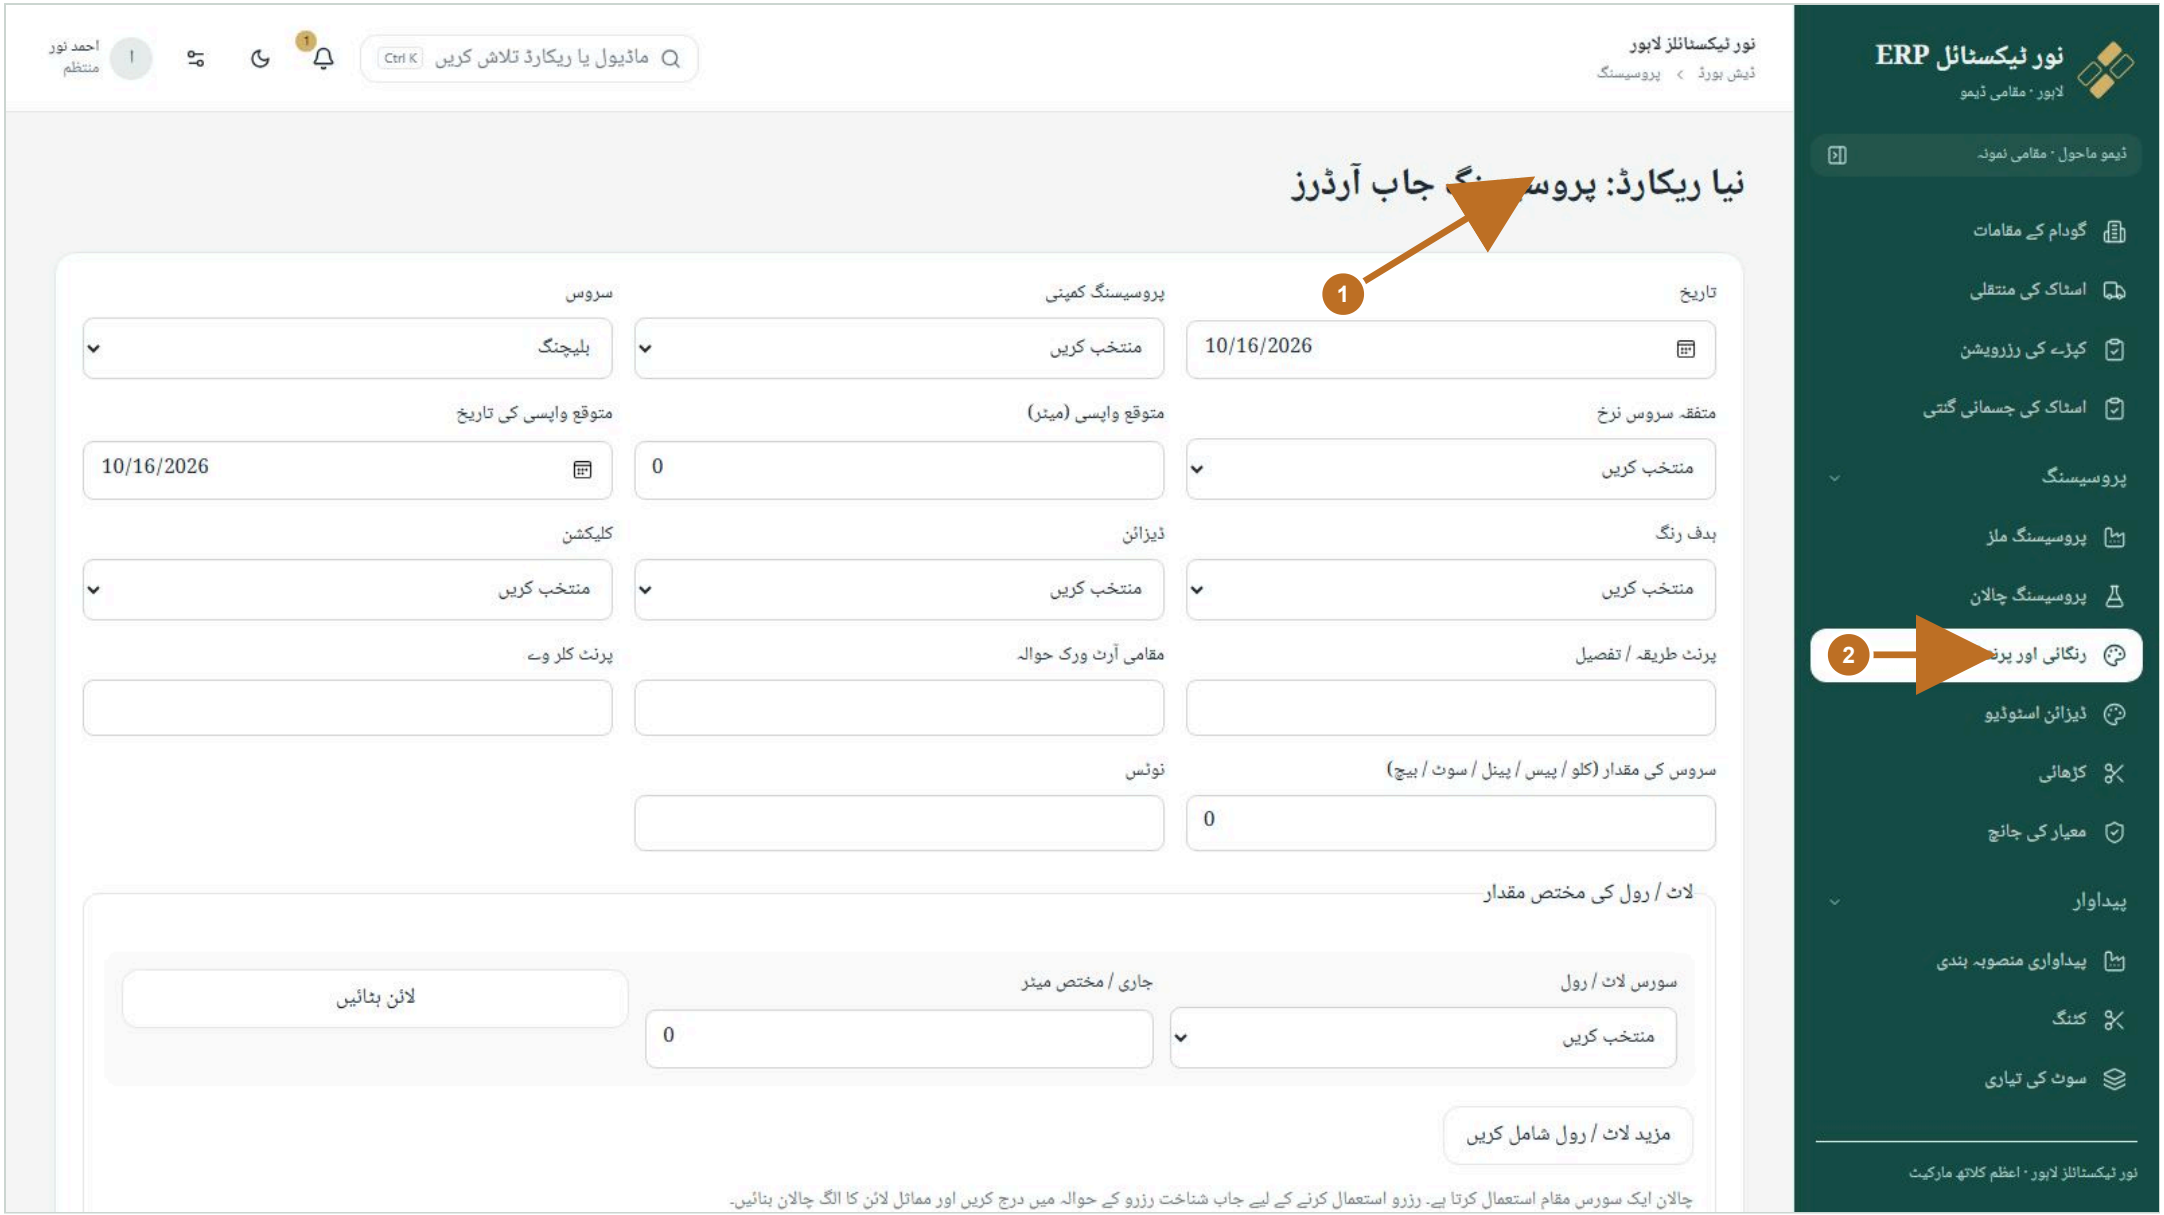

1 Screen purpose
Create a new source-linked record. Fill the visible required fields (*) and the additional fields listed below; review the source, quantities, units and dates before saving.

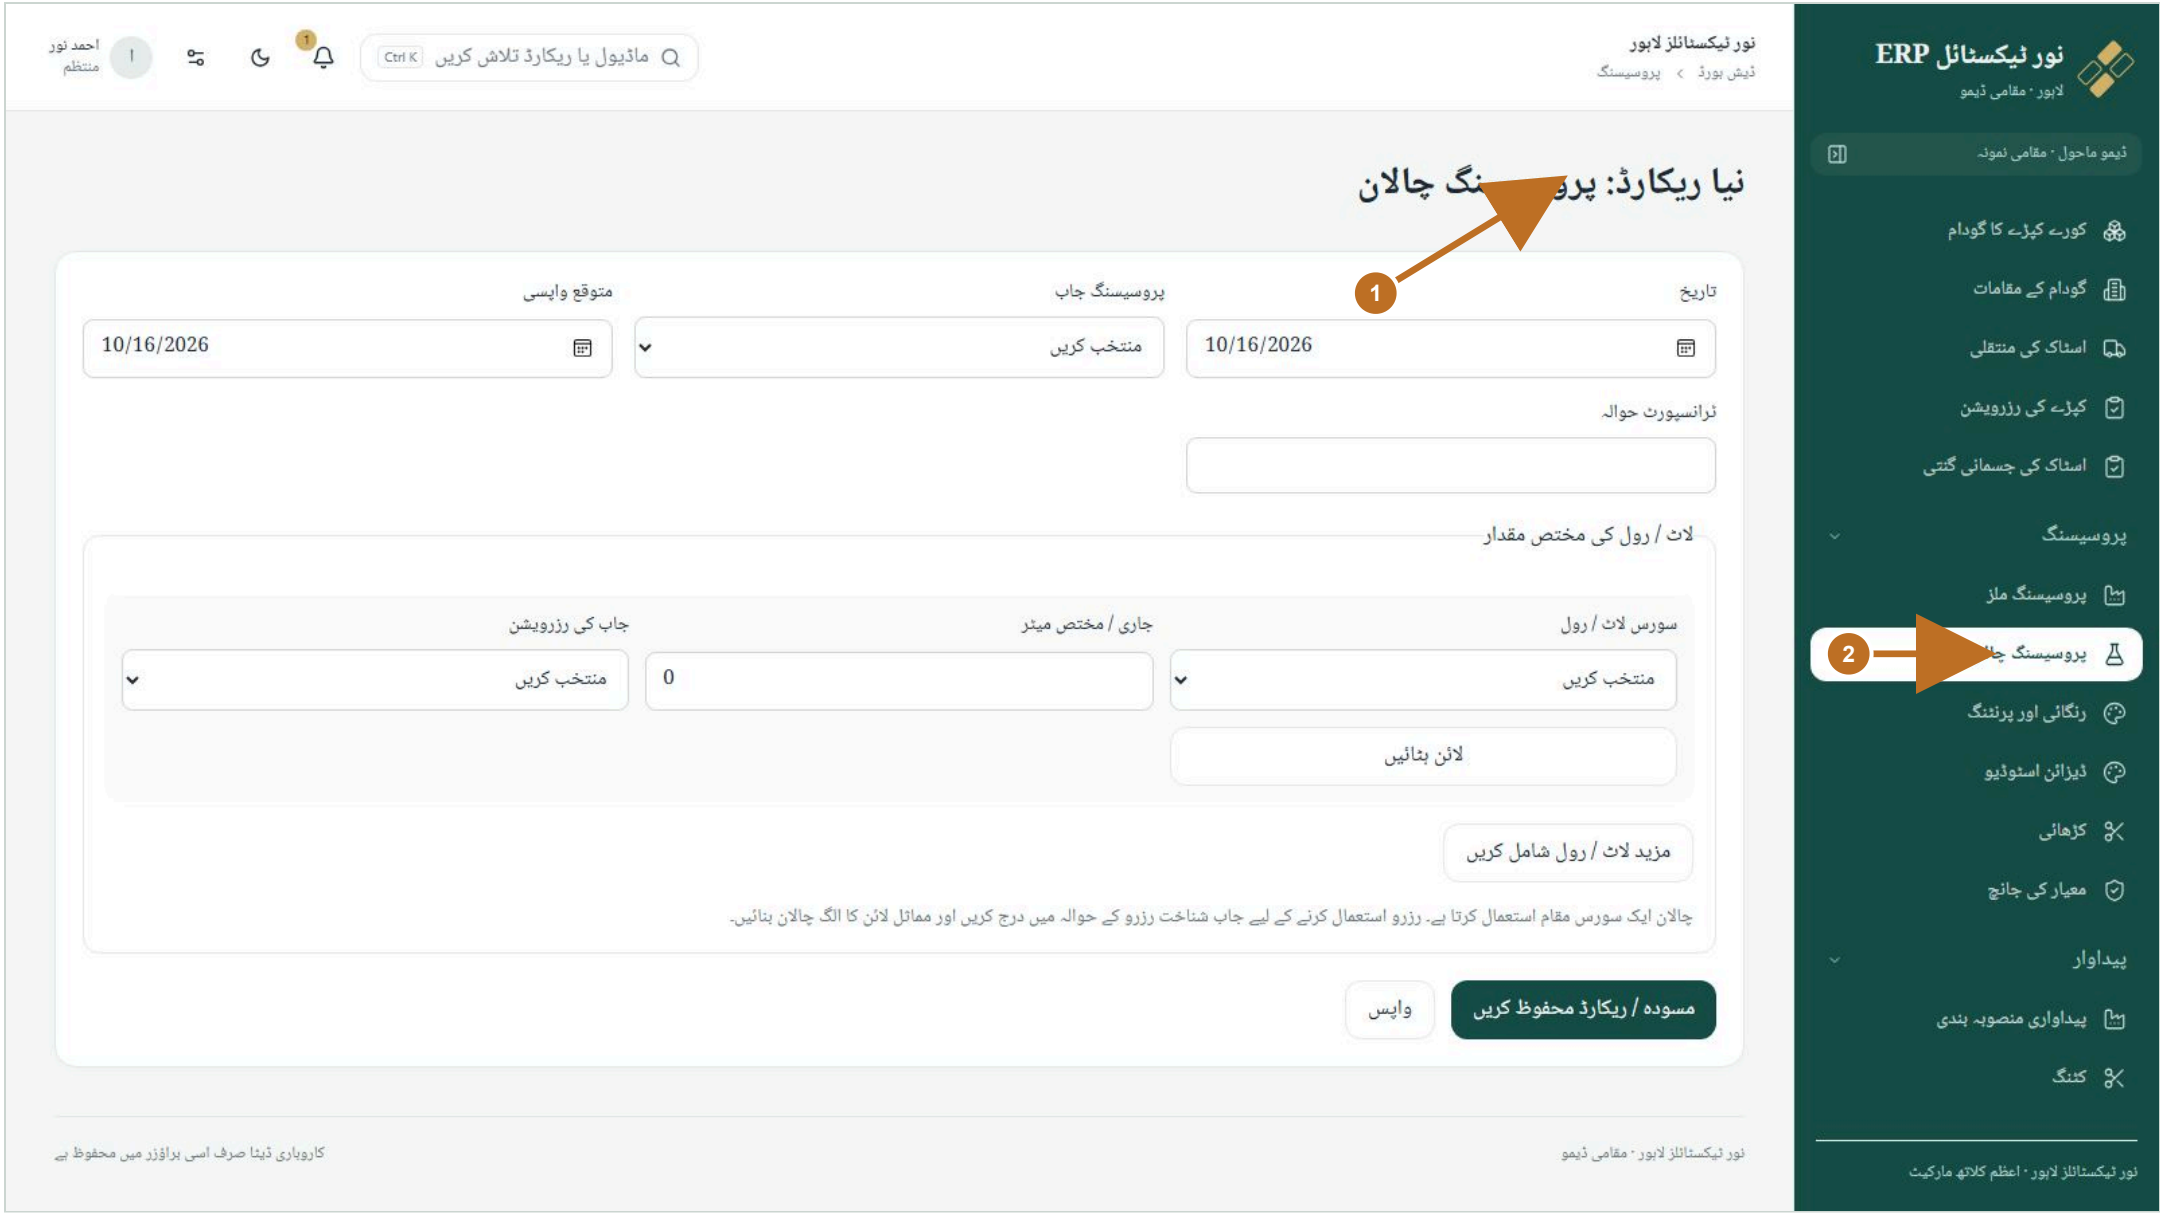

2 Navigation & use
Complete the visible fields below. Required labels carry an asterisk (*); select the correct linked source and unit, review quantities, then use the on-screen save and approval/posting actions.

Business connection
Matched sets consume compatible accepted component quantities from their source work order; incomplete sets remain visible WIP.

Form fields shown
تاریخ · اصل پیداواری ورک آرڈر · ہدف سیٹ · منصوبہ آغاز · منصوبہ تکمیل · ذمہ دار ٹیم · پلان نوٹس

1 Screen purpose
Review matched component custody, reservations, issues, partial sets, inspection and rework. Counts must remain tied to the originating work order and BOM.

2 Navigation & use
Use the register, filters, tabs and source links shown on the screen. Open the relevant record before using an edit, approval or posting action.

Business connection
Matched sets consume compatible accepted component quantities from their source work order; incomplete sets remain visible WIP.

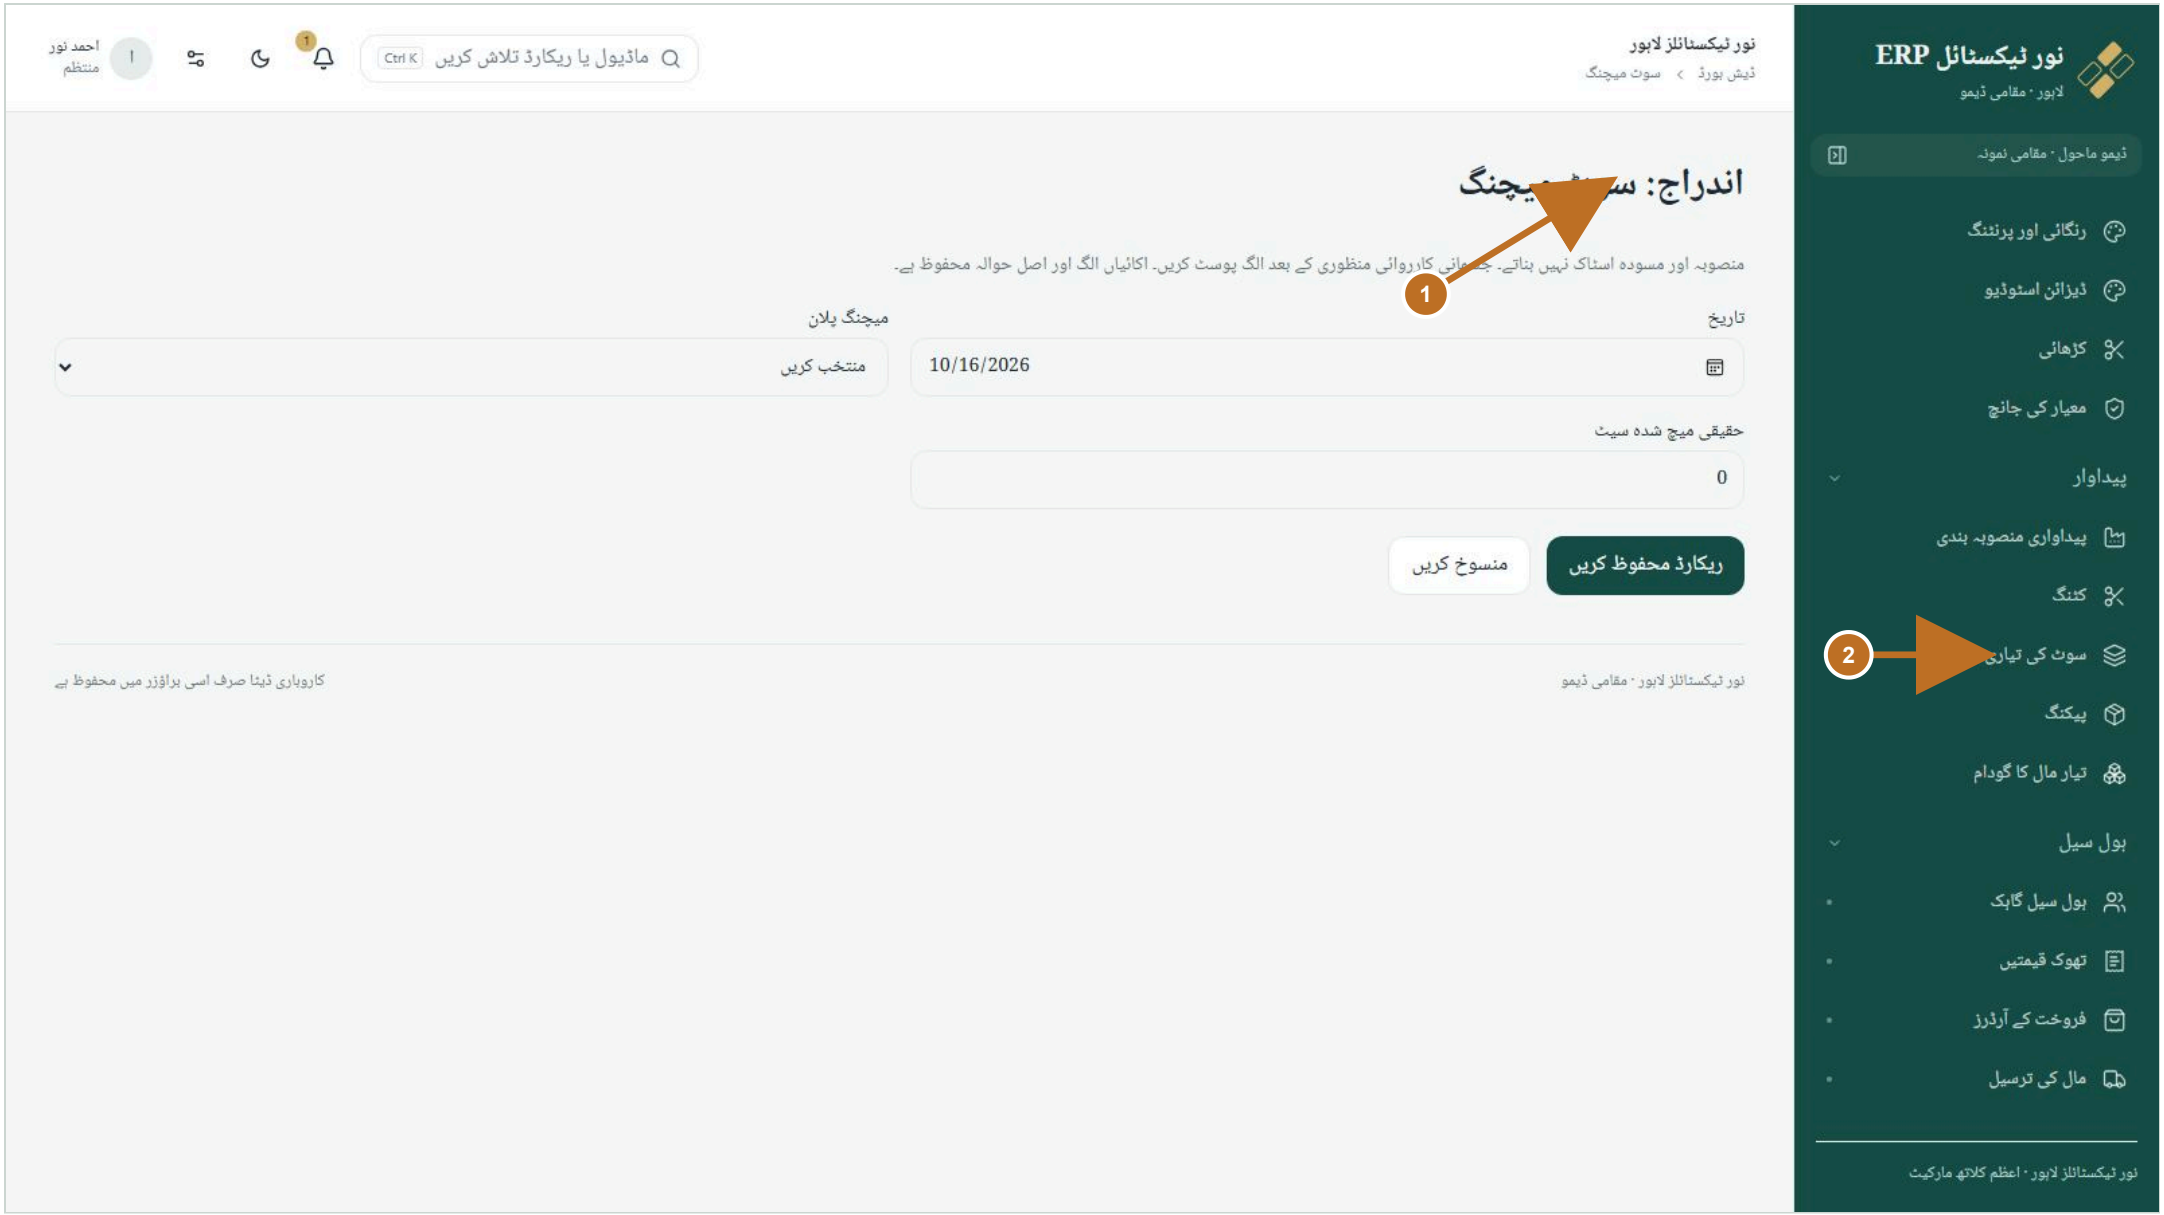

Form / next step
No direct form on this screen. Use its linked child form or open a source record to continue.
